citing authors

#	ARTICLE	IF	CITATIONS
1	Redox control of magnetosome biomineralization. <i>Journal of Oceanology and Limnology</i> , 2021, 39, 2070-2081.	1.3	6
2	Microbial diversity in the sediments of the southern Mariana Trench. <i>Journal of Oceanology and Limnology</i> , 2019, 37, 1024-1029.	1.3	10
3	Structural and enzymatic analysis of the cytochrome b5 reductase domain of <i>Ulva prolifera</i> nitrate reductase. <i>International Journal of Biological Macromolecules</i> , 2018, 111, 1175-1182.	7.5	5
4	The putative siderophore-interacting protein from <i>Vibrio anguillarum</i> : protein production, analysis, crystallization and X-ray crystallographic studies. <i>Acta Crystallographica Section F, Structural Biology Communications</i> , 2018, 74, 283-287.	0.8	3
5	Structural basis for specific calcium binding by the polycystic-kidney-disease domain of <i>Vibrio anguillarum</i> protease Epp. <i>Biochemical and Biophysical Research Communications</i> , 2018, 505, 471-477.	2.1	0
6	Iron Acquisition Strategies of <i>Vibrio anguillarum</i> . <i>Frontiers in Cellular and Infection Microbiology</i> , 2017, 7, 342.	3.9	40
7	The Terminal Oxidase <i>cbb3</i> Functions in Redox Control of Magnetite Biomineralization in <i>Magnetospirillum gryphiswaldense</i> . <i>Journal of Bacteriology</i> , 2014, 196, 2552-2562.	2.2	35
8	The oxygen sensor MgFnr controls magnetite biomineralization by regulation of denitrification in <i>Magnetospirillum gryphiswaldense</i> . <i>BMC Microbiology</i> , 2014, 14, 153.	3.3	29
9	Cytochrome cd1 Nitrite Reductase NirS Is Involved in Anaerobic Magnetite Biomineralization in <i>Magnetospirillum gryphiswaldense</i> and Requires NirN for Proper d1 Heme Assembly. <i>Journal of Bacteriology</i> , 2013, 195, 4297-4309.	2.2	48
10	The Periplasmic Nitrate Reductase Nap Is Required for Anaerobic Growth and Involved in Redox Control of Magnetite Biomineralization in <i>Magnetospirillum gryphiswaldense</i> . <i>Journal of Bacteriology</i> , 2012, 194, 4847-4856.	2.2	95
