

Felix Alberto Morales Palomo

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/1859976/felix-alberto-morales-palomo-publications-by-year.pdf>

Version: 2024-04-20

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

32

#	Paper	IF	Citations
32	One Bout of Resistance Training Does Not Enhance Metformin Actions in Pre- and Diabetic Individuals.. <i>Medicine and Science in Sports and Exercise</i> , 2022 ,	1.2	1
31	Effects of chronic metformin treatment on training adaptations in men and women with hyperglycemia: A prospective study.. <i>Obesity</i> , 2022 ,	8	1
30	Concurrent endurance and resistance training enhances muscular adaptations in individuals with metabolic syndrome. <i>Scandinavian Journal of Medicine and Science in Sports</i> , 2021 , 31, 1440-1449	4.6	0
29	Effects of antihypertensive medication and high-intensity interval training in hypertensive metabolic syndrome individuals. <i>Scandinavian Journal of Medicine and Science in Sports</i> , 2021 , 31, 1411-1419	4.6	1
28	Effects of statins and exercise on postprandial lipoproteins in metabolic syndrome vs metabolically healthy individuals. <i>British Journal of Clinical Pharmacology</i> , 2021 , 87, 955-964	3.8	2
27	Substitution of parts of aerobic training by resistance training lowers fasting hyperglycemia in individuals with metabolic syndrome. <i>Applied Physiology, Nutrition and Metabolism</i> , 2021 , 46, 69-76	3	5
26	Exercise Reduces Medication for Metabolic Syndrome Management: A 5-Year Follow-up Study. <i>Medicine and Science in Sports and Exercise</i> , 2021 , 53, 1319-1325	1.2	1
25	Endurance Exercise Training reduces Blood Pressure according to the Wilderæ Principle. <i>International Journal of Sports Medicine</i> , 2021 ,	3.6	1
24	Effects of Exercise Training during Christmas on Body Weight and Cardiometabolic Health in Overweight Individuals. <i>International Journal of Environmental Research and Public Health</i> , 2020 , 17,	4.6	2
23	Response to Letter to the Editor Allard et al: "Exercise Training Adaptations in Metabolic Syndrome Individuals on Chronic Statin Treatment". <i>Journal of Clinical Endocrinology and Metabolism</i> , 2020 , 105,	5.6	0
22	Effects of statin therapy and exercise on postprandial triglycerides in overweight individuals with hypercholesterolaemia. <i>British Journal of Clinical Pharmacology</i> , 2020 , 86, 1089-1099	3.8	4
21	Exercise improves metformin 72-h glucose control by reducing the frequency of hyperglycemic peaks. <i>Acta Diabetologica</i> , 2020 , 57, 715-723	3.9	8
20	Importance of a verification test to accurately assess V O max in unfit individuals with obesity. <i>Scandinavian Journal of Medicine and Science in Sports</i> , 2020 , 30, 583-590	4.6	9
19	Exercise Training Adaptations in Metabolic Syndrome Individuals on Chronic Statin Treatment. <i>Journal of Clinical Endocrinology and Metabolism</i> , 2020 , 105,	5.6	5
18	The use of a graded exercise test may be insufficient to quantify true changes in V o following exercise training in unfit individuals with metabolic syndrome. <i>Journal of Applied Physiology</i> , 2020 , 129, 760-767	3.7	3
17	Insulin sensitivity improvement with exercise training is mediated by body weight loss in subjects with metabolic syndrome. <i>Diabetes and Metabolism</i> , 2020 , 46, 210-218	5.4	12
16	Post-exercise Hypotension Produced by Supramaximal Interval Exercise is Potentiated by Angiotensin Receptor Blockers. <i>International Journal of Sports Medicine</i> , 2019 , 40, 756-761	3.6	3

15	Effectiveness of Aerobic Exercise Programs for Health Promotion in Metabolic Syndrome. <i>Medicine and Science in Sports and Exercise</i> , 2019 , 51, 1876-1883	1.2	21
14	Women with metabolic syndrome show similar health benefits from high-intensity interval training than men. <i>PLoS ONE</i> , 2019 , 14, e0225893	3.7	1
13	Training intensity relative to ventilatory thresholds determines cardiorespiratory fitness improvements in sedentary adults with obesity. <i>European Journal of Sport Science</i> , 2019 , 19, 549-556	3.9	4
12	Effects of aerobic interval training on arterial stiffness and microvascular function in patients with metabolic syndrome. <i>Journal of Clinical Hypertension</i> , 2018 , 20, 11-18	2.3	25
11	Weight loss but not gains in cardiorespiratory fitness after exercise-training predicts improved health risk factors in metabolic syndrome. <i>Nutrition, Metabolism and Cardiovascular Diseases</i> , 2018 , 28, 1267-1274	4.5	14
10	Effects of intense aerobic exercise and/or antihypertensive medication in individuals with metabolic syndrome. <i>Scandinavian Journal of Medicine and Science in Sports</i> , 2018 , 28, 2042-2051	4.6	6
9	Exercise Periodization over the Year Improves Metabolic Syndrome and Medication Use. <i>Medicine and Science in Sports and Exercise</i> , 2018 , 50, 1983-1991	1.2	4
8	Intense aerobic exercise lowers blood pressure in individuals with metabolic syndrome taking antihypertensive medicine. <i>Blood Pressure Monitoring</i> , 2018 , 23, 230-236	1.3	3
7	Acute Hypotension after High-Intensity Interval Exercise in Metabolic Syndrome Patients. <i>International Journal of Sports Medicine</i> , 2017 , 38, 560-567	3.6	11
6	Ambulatory blood pressure response to a bout of HIIT in metabolic syndrome patients. <i>European Journal of Applied Physiology</i> , 2017 , 117, 1403-1411	3.4	17
5	Cardiovascular Drift during Training for Fitness in Patients with Metabolic Syndrome. <i>Medicine and Science in Sports and Exercise</i> , 2017 , 49, 518-526	1.2	7
4	Effects of repeated yearly exposure to exercise-training on blood pressure and metabolic syndrome evolution. <i>Journal of Hypertension</i> , 2017 , 35, 1992-1999	1.9	17
3	Aerobic interval training reduces vascular resistances during submaximal exercise in obese metabolic syndrome individuals. <i>European Journal of Applied Physiology</i> , 2017 , 117, 2065-2073	3.4	13
2	Dietary supplementation with omega-3 fatty acids and oleate enhances exercise training effects in patients with metabolic syndrome. <i>Obesity</i> , 2016 , 24, 1704-11	8	18
1	Effects of Simultaneous or Sequential Weight Loss Diet and Aerobic Interval Training on Metabolic Syndrome. <i>International Journal of Sports Medicine</i> , 2016 , 37, 274-81	3.6	25
