#	Article	IF	CITATIONS
1	Prognostic value of peripheral blood CD14+HLA-DR+ monocytes in patients with acute pancreatitis. Journal of Immunoassay and Immunochemistry, 2021, 42, 478-492.	1.1	7
2	A pandemic recap: lessons we have learned. World Journal of Emergency Surgery, 2021, 16, 46.	5.0	16
3	A combination of C-reactive protein and quick sequential organ failure assessment (qSOFA) score has better prognostic accuracy than qSOFA alone in patients with complicated intra-abdominal infections. Acta Chirurgica Belgica, 2020, 120, 396-400.	0.4	6
4	Poor Outcome Could Be Predicted by Lower Monocyte Human Leukocyte Antigen-DR Expression in Patients with Complicated Intra-Abdominal Infections: A Review. Surgical Infections, 2020, 21, 77-80.	1.4	6
5	Could Soluble Cluster of Differentiation 163 Be Useful as Prognostic Biomarker in Patients With Complicated Intra-abdominal Infections?. Infectious Diseases in Clinical Practice, 2020, 28, 64-66.	0.3	o
6	The Role of the Molecular Subtypes in the Prognosis of Breast Cancer Patients. Open Access Macedonian Journal of Medical Sciences, 2020, 8, 133-138.	0.2	2
7	The Quick Sequential Organ Failure Assessment (qSOFA) Score is a Poor Mortality Predictor in Patients with Complicated Intra-abdominal Infections. Open Access Macedonian Journal of Medical Sciences, 2020, 8, 221-225.	0.2	2
8	The Potential Prognostic Performance of Neutrophil CD64 and Monocyte HLA-DR in Patients with Complicated Intra-abdominal Infections. Current Immunology Reviews, 2020, 16, 12-17.	1.2	1
9	Neutrophil CD64 – A potential biomarker in patients with complicated intra-abdominal infections? – A literature review. Acta Microbiologica Et Immunologica Hungarica, 2018, 65, 245-254.	0.8	4
