#	ARTICLE	IF	CITATIONS
1	Chabazite from Campanian Ignimbrite Tuff as a Potential and Sustainable Remediation Agent for the Removal of Emerging Contaminants from Water. <i>Sustainability</i> , 2022, 14, 725.	3.2	2
2	Use of screen glass and polishing sludge in waste-based expanded aggregates for resource-saving lightweight concrete. <i>Journal of Cleaner Production</i> , 2022, 332, 130089.	9.3	10
3	Removal of non-steroidal anti-inflammatory drugs from water by zeolite-rich composites: The interference of inorganic anions on the ibuprofen and naproxen adsorption. <i>Journal of Environmental Management</i> , 2021, 286, 112168.	7.8	42
4	Thermogravimetric Study of the Decay of Zeolite-Bearing Building Materials. <i>Materials</i> , 2021, 14, 3551.	2.9	1
5	Application of Surfactant Modified Natural Zeolites for the Removal of Salicylic Acid—A Contaminant of Emerging Concern. <i>Materials</i> , 2021, 14, 7728.	2.9	7
6	Removal of emerging contaminants from water by zeolite-rich composites: A first approach aiming at diclofenac and ketoprofen. <i>Microporous and Mesoporous Materials</i> , 2020, 298, 110057.	4.4	52
7	Zeolite-Rich Composite Materials for Environmental Remediation: Arsenic Removal from Water. <i>Applied Sciences (Switzerland)</i> , 2020, 10, 6939.	2.5	22
8	Surface modified natural zeolites (SMNZs) as nanocomposite versatile materials for health and environment. <i>Colloids and Surfaces B: Biointerfaces</i> , 2019, 182, 110380.	5.0	16
9	Surface modification of zeolites for environmental applications. , 2019, , 57-85.		4
10	Surface-modified phillipsite-rich tuff from the Campania region (southern Italy) as a promising drug carrier: An ibuprofen sodium salt trial. <i>American Mineralogist</i> , 2018, 103, 700-710.	1.9	13
11	Use of surface modified natural zeolite (SMNZ) in pharmaceutical preparations Part 1. Mineralogical and technological characterization of some industrial zeolite-rich rocks. <i>Microporous and Mesoporous Materials</i> , 2017, 250, 232-244.	4.4	34
12	Surface modified zeolite-based granulates for the sustained release of diclofenac sodium. <i>European Journal of Pharmaceutical Sciences</i> , 2017, 99, 202-208.	4.0	23
13	Adsorption of the mycotoxin zearalenone by clinoptilolite and phillipsite zeolites treated with cetylpyridinium surfactant. <i>Colloids and Surfaces B: Biointerfaces</i> , 2017, 151, 324-332.	5.0	52
14	On the Use of Nonsteroidal Anti-Inflammatory Drugs as Rheology Modifiers for Surfactant Solutions. <i>Journal of Pharmaceutical Sciences</i> , 2017, 106, 3410-3412.	3.3	3
15	Chemical modification of activated carbon surface with iron functional groups for efficient separation of vanadium: batch and column study. <i>Research on Chemical Intermediates</i> , 2017, 43, 6553-6570.	2.7	9
16	Surface Modified Phillipsite as a Potential Carrier for NSAIDs Release. <i>Advanced Science Letters</i> , 2017, 23, 5941-5943.	0.2	8
17	Adsorption of Amoxicillin onto Organo-Modified Zeolitic Tuff. <i>Advanced Science Letters</i> , 2017, 23, 5944-5947.	0.2	4
18	The combined use of steam-treated bentonites and natural zeolites in the oenological refining process. <i>Mineralogical Magazine</i> , 2016, 80, 347-362.	1.4	12

#	ARTICLE	IF	CITATIONS
19	Use of surface modified natural zeolite (SMNZ) in pharmaceutical preparations. Part 2. A new approach for a fast functionalization of zeolite-rich carriers. Microporous and Mesoporous Materials, 2016, 235, 42-49.	4.4	21
20	Evaluation of the surfactant/phillipsite composites as carriers for diclofenac sodium. Journal of Molecular Liquids, 2016, 222, 711-716.	4.9	16
21	Rheology-sensitive response of zeolite-supported anti-inflammatory drug systems. Colloids and Surfaces B: Biointerfaces, 2016, 146, 938-944.	5.0	24
22	New insights on pressure, temperature, and chemical stability of CsAlSi ₅ O ₁₂ , a potential host for nuclear waste. Physics and Chemistry of Minerals, 2016, 43, 639-647.	0.8	15
23	Sr-, Zn- and Cd-exchanged zeolitic materials as water vapor adsorbents for thermal energy storage applications. Applied Thermal Engineering, 2016, 106, 1217-1224.	6.0	29
24	A comprehensive evaluation of sedimentary zeolites from Turkey as pozzolanic addition of cement- and lime-based binders. Construction and Building Materials, 2016, 105, 46-61.	7.2	40
25	Surfactant-modified phillipsite and chabazite as novel excipients for pharmaceutical applications?. Microporous and Mesoporous Materials, 2016, 224, 143-148.	4.4	32
26	The effect of digestive activity of pig gastro-intestinal tract on zeolite-rich rocks: An in vitro study. Microporous and Mesoporous Materials, 2016, 225, 133-136.	4.4	11
27	Surface interaction of humic acids with natural and synthetic phillipsite. Journal of Porous Materials, 2015, 22, 501-509.	2.6	13
28	Surface modified natural zeolite as a carrier for sustained diclofenac release: A preliminary feasibility study. Colloids and Surfaces B: Biointerfaces, 2015, 130, 101-109.	5.0	48
29	Zeolitized tuff in environmental friendly production of cementitious material: Chemical and mechanical characterization. Construction and Building Materials, 2015, 99, 272-278.	7.2	22
30	Embedment of Methylene Blue in natural and synthetic phillipsite. Clay Minerals, 2015, 50, 23-30.	0.6	1
31	New data on Cu-exchanged phillipsite: a multi-methodological study. Physics and Chemistry of Minerals, 2015, 42, 723-733.	0.8	8
32	Relationships between the water content of zeolites and their cation population. Microporous and Mesoporous Materials, 2015, 202, 36-43.	4.4	31
33	Ion exchange kinetics and thermodynamics of hydrosodalite, a narrow pore zeolite. Journal of Porous Materials, 2014, 21, 643-651.	2.6	11
34	Anion exchange selectivity of surfactant modified clinoptilolite-rich tuff for environmental remediation. Journal of Colloid and Interface Science, 2014, 430, 178-183.	9.4	36
35	Entrapping of Cs and Sr in heat-treated zeolite matrices. Journal of Nuclear Materials, 2013, 435, 196-201.	2.7	19
36	Natural zeolites for heavy metals removal from aqueous solutions: Modeling of the fixed bed Ba ²⁺ /Na ⁺ ion-exchange process using a mixed phillipsite/chabazite-rich tuff. Chemical Engineering Journal, 2013, 219, 37-42.	12.7	44

#	ARTICLE	IF	CITATIONS
37	Solidification of Cd-bearing zeolitic tuff by reaction with lime. Journal of Environmental Science and Health - Part A Toxic/Hazardous Substances and Environmental Engineering, 2012, 47, 228-236.	1.7	0
38	An unconventional method for the recovery of caustic soda from spent Al-rich pickling solutions. Journal of Environmental Management, 2011, 92, 1821-1827.	7.8	4
39	Immobilization of Cs and Sr in aluminosilicate matrices derived from natural zeolites. Journal of Nuclear Materials, 2011, 414, 451-457.	2.7	58
40	Comparative ion-exchange characterization of zeolitic and clayey materials for pedotechnical applications—Part 2: interaction with nutrient cations. Journal of Porous Materials, 2009, 16, 667-673.	2.6	5
41	Properties of zeolitized tuff/organic matter aggregates relevant for their use in pedotechnique. IIb: Structural characterization with emphasis on surface and porosity properties. Studies in Surface Science and Catalysis, 2008, , 517-520.	1.5	2
42	Properties of zeolitized tuff/organic matter aggregates relevant for their use in pedotechnique. III: organic matter stability and exchange properties. Studies in Surface Science and Catalysis, 2007, 170, 2141-2146.	1.5	7
43	Modeling pedogenization of zeolitized tuffs. II: medium-term weathering of phlegraean yellow tuff and red tuff with black scoriae by water and humic acids. Studies in Surface Science and Catalysis, 2007, 170, 2092-2097.	1.5	6
44	Cation selectivity of a Ca ²⁺ pre-exchanged clinoptilolite tuff. Studies in Surface Science and Catalysis, 2007, , 2128-2133.	1.5	5
45	Comparative ion-exchange characterization of zeolitic and clayey materials for pedotechnical applications—Part 1: interaction with noxious cations. Journal of Porous Materials, 2007, 14, 349-356.	2.6	13
46	Kinetics of the Ba ²⁺ /Na ⁺ exchange on a mixed phillipsite-chabazite-rich tuff. Studies in Surface Science and Catalysis, 2005, 155, 451-459.	1.5	0
47	Data processing of cation exchange equilibria in zeolites: a modified approach. Studies in Surface Science and Catalysis, 2005, 155, 129-140.	1.5	11
48	Ion exchange equilibria in a synthetic merlinoite. Studies in Surface Science and Catalysis, 2004, 154, 1920-1928.	1.5	6
49	Evaluation of an intermediate-silica sedimentary chabazite as exchanger for potentially radioactive cations. Microporous and Mesoporous Materials, 2003, 61, 159-165.	4.4	33
50	Ba and Co Removal from Water by Elution Through Fixed Beds of Phillipsite- and/or Chabazite-Rich Tuffs. Separation Science and Technology, 2003, 38, 2221-2236.	2.5	4
51	Ion exchange behaviour of two synthetic phillipsite-like phases. Studies in Surface Science and Catalysis, 2002, 142, 1841-1848.	1.5	1
52	Cu ²⁺ , Zn ²⁺ , Cd ²⁺ and Pb ²⁺ exchange for Na ⁺ in a sedimentary clinoptilolite, North Sardinia, Italy. Microporous and Mesoporous Materials, 2000, 37, 337-343.	4.4	140
53	A preliminary investigation on kinetics of zeolite A crystallisation using optical diagnostics. Materials Chemistry and Physics, 2000, 66, 120-125.	4.0	21
54	Ion exchange selectivity of phillipsite for Cs and Sr as a function of framework composition. Microporous and Mesoporous Materials, 1999, 28, 315-324.	4.4	61
