

Liancun Zheng

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/1870364/liancun-zheng-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
88	Enlarged Lumen Volume of Proximal Aortic Segment and Acute Type B Aortic Dissection: A Computer Fluid Dynamics Study of Ideal Aortic Models.. <i>International Journal of General Medicine</i> , 2022 , 15, 535-543	2.3	
87	Turbulent boundary layer heat transfer of CuO/water nanofluids on a continuously moving plate subject to convective boundary. <i>Zeitschrift Fur Naturforschung - Section A Journal of Physical Sciences</i> , 2022 , 77, 369-377	1.4	
86	Anomalous diffusion and heat transfer on comb structure with anisotropic relaxation in fractal porous media. <i>Thermal Science</i> , 2021 , 25, 733-742	1.2	
85	Quantitative analysis of renal blood flow during thoracic endovascular aortic repair in type B aortic dissection using iFlow. <i>Quantitative Imaging in Medicine and Surgery</i> , 2021 , 11, 3726-3734	3.6	2
84	Analysis of the formation mechanism and occurrence possibility of Post-Stenotic Dilatation of the aorta by CFD approach. <i>Computer Methods and Programs in Biomedicine</i> , 2020 , 194, 105522	6.9	8
83	Numerical simulation of magnetic nano drug targeting to atherosclerosis: Effect of plaque morphology (stenosis degree and shoulder length). <i>Computer Methods and Programs in Biomedicine</i> , 2020 , 195, 105556	6.9	9
82	Numerical investigations of temperature and hemodynamics in carotid arteries with and without atherosclerotic plaque during open surgery. <i>Journal of Thermal Biology</i> , 2020 , 91, 102622	2.9	0
81	Evaluation of particle shape, size and magnetic field intensity for targeted delivery efficiency and plaque injury in treating atherosclerosis. <i>Powder Technology</i> , 2020 , 366, 63-72	5.2	8
80	Magnetic nanoparticle drug targeting to patient-specific atherosclerosis: effects of magnetic field intensity and configuration. <i>Applied Mathematics and Mechanics (English Edition)</i> , 2020 , 41, 349-360	3.2	3
79	Non-Newtonian biomagnetic fluid flow through a stenosed bifurcated artery with a slip boundary condition. <i>Applied Mathematics and Mechanics (English Edition)</i> , 2020 , 41, 1611-1630	3.2	1
78	Machine learning of synaptic structure with neurons to promote tumor growth. <i>Applied Mathematics and Mechanics (English Edition)</i> , 2020 , 41, 1697-1706	3.2	
77	Subdiffusions on circular branching structures. <i>Communications in Nonlinear Science and Numerical Simulation</i> , 2019 , 77, 225-238	3.7	4
76	Coupling Effects of Viscous Sheet and Ambient Fluid on Boundary Layer Flow and Heat Transfer in Power-Law Fluids. <i>Journal of Heat Transfer</i> , 2019 , 141,	1.8	4
75	Heat Transfer of Power-Law Liquid Food in a Tank with Varying Stirrer Settings. <i>International Journal of Food Engineering</i> , 2019 , 15,	1.9	1
74	Boundary Layer Mechanism of a Two-Phase Nanofluid Subject to Coupled Interface Dynamics of Fluid/Film. <i>Zeitschrift Fur Naturforschung - Section A Journal of Physical Sciences</i> , 2019 , 75, 43-53	1.4	
73	Numerical Investigation of a Two-Phase Nanofluid Model for Boundary Layer Flow Past a Variable Thickness Sheet. <i>Zeitschrift Fur Naturforschung - Section A Journal of Physical Sciences</i> , 2018 , 73, 229-237 ^{1.4}		
72	A spatial-fractional thermal transport model for nanofluid in porous media. <i>Applied Mathematical Modelling</i> , 2018 , 53, 622-634	4.5	27

71	An Investigation of the Forced Convection and Heat Transfer with a Cylindrical Agitator Subjected to Non-Newtonian Nanofluids. <i>Zeitschrift Fur Naturforschung - Section A Journal of Physical Sciences</i> , 2018 , 73, 869-882	1.4	
70	Fractional Boundary Layer Flow and Heat Transfer Over a Stretching Sheet With Variable Thickness. <i>Journal of Heat Transfer</i> , 2018 , 140,	1.8	6
69	Anomalous subdiffusion in angular and radial direction on a circular comb-like structure with nonisotropic relaxation. <i>Applied Mathematical Modelling</i> , 2018 , 64, 615-623	4.5	1
68	On the drag effect of one fluid driven by another in a vertical channel. <i>AIP Advances</i> , 2018 , 8, 115313	1.5	
67	Marangoni Convection Heat and Mass Transport of Power-Law Fluid in Porous Medium with Heat Generation and Chemical Reaction. <i>Heat Transfer Engineering</i> , 2017 , 38, 641-652	1.7	8
66	On mixed convection of two immiscible layers with a layer of non-Newtonian nanofluid in a vertical channel. <i>Powder Technology</i> , 2017 , 310, 351-358	5.2	16
65	Effects of nonlinear velocity slip and temperature jump on pseudo-plastic power-law fluid over moving permeable surface in presence of magnetic field. <i>Applied Mathematics and Mechanics (English Edition)</i> , 2017 , 38, 333-342	3.2	10
64	Exact solution and invariant for fractional Cattaneo anomalous diffusion of cells in two-dimensional comb framework. <i>Nonlinear Dynamics</i> , 2017 , 89, 213-224	5	9
63	Unsteady Marangoni convection heat transfer of fractional Maxwell fluid with Cattaneo heat flux. <i>Applied Mathematical Modelling</i> , 2017 , 44, 497-507	4.5	25
62	A novel investigation of a micropolar fluid characterized by nonlinear constitutive diffusion model in boundary layer flow and heat transfer. <i>Physics of Fluids</i> , 2017 , 29, 023105	4.4	24
61	Symmetry analysis and conservation laws to the space-fractional Prandtl equation. <i>Nonlinear Dynamics</i> , 2017 , 90, 1343-1351	5	4
60	On heat transfer of weakly compressible power-law flows. <i>Thermal Science</i> , 2017 , 21, 2709-2718	1.2	
59	Unsteady MHD flow and radiation heat transfer of nanofluid in a finite thin film with heat generation and thermophoresis. <i>Journal of the Taiwan Institute of Chemical Engineers</i> , 2016 , 67, 226-234	5.3	29
58	Heat transfer characteristics of thin power-law liquid films over horizontal stretching sheet with internal heating and variable thermal coefficient. <i>Applied Mathematics and Mechanics (English Edition)</i> , 2016 , 37, 1587-1596	3.2	14
57	Flow and Heat Transfer of Bingham Plastic Fluid over a Rotating Disk with Variable Thickness. <i>Zeitschrift Fur Naturforschung - Section A Journal of Physical Sciences</i> , 2016 , 71, 1003-1015	1.4	5
56	A Mixed Analytical/Numerical Method for Velocity and Heat Transfer of Laminar Power-Law Fluids. <i>Numerical Mathematics</i> , 2016 , 9, 315-336	1.5	5
55	Perturbation solutions for a micropolar fluid flow in a semi-infinite expanding or contracting pipe with large injection or suction through porous wall. <i>Open Physics</i> , 2016 , 14, 231-238	1.3	3
54	Existence and uniqueness of global solutions of caputo-type fractional differential equations. <i>Fractional Calculus and Applied Analysis</i> , 2016 , 19, 765-774	2.7	16

53	Modeling heat transport in nanofluids with stagnation point flow using fractional calculus. <i>Applied Mathematical Modelling</i> , 2016 , 40, 8974-8984	4.5	28
52	Lie group analysis and similarity solution for fractional Blasius flow. <i>Communications in Nonlinear Science and Numerical Simulation</i> , 2016 , 37, 90-101	3.7	11
51	Fractional anomalous diffusion with Cattaneo-Christov flux effects in a comb-like structure. <i>Applied Mathematical Modelling</i> , 2016 , 40, 6663-6675	4.5	28
50	Impact of Velocity Slip and Temperature Jump of Nanofluid in the Flow over a Stretching Sheet with Variable Thickness. <i>Zeitschrift Fur Naturforschung - Section A Journal of Physical Sciences</i> , 2016 , 71, 413-425	1.4	2
49	Convection of Maxwell fluid over stretching porous surface with heat source/sink in presence of nanoparticles: Lie group analysis. <i>Applied Mathematics and Mechanics (English Edition)</i> , 2016 , 37, 433-442 ^{3,2}	3.2	21
48	Unsteady natural convection heat transfer of nanofluid in an annulus with a sinusoidally heated source. <i>Numerical Heat Transfer; Part A: Applications</i> , 2016 , 69, 97-108	2.3	12
47	Magnetohydrodynamic thin film and heat transfer of power law fluids over an unsteady stretching sheet with variable thermal conductivity. <i>Thermal Science</i> , 2016 , 20, 1791-1800	1.2	8
46	A Novel Equivalent Agglomeration Model for Heat Conduction Enhancement in Nanofluids. <i>Scientific Reports</i> , 2016 , 6, 19560	4.9	9
45	Fractal aggregation kinetics contributions to thermal conductivity of nano-suspensions in unsteady thermal convection. <i>Scientific Reports</i> , 2016 , 6, 39446	4.9	9
44	Anomalous convection diffusion and wave coupling transport of cells on comb frame with fractional Cattaneo-Christov flux. <i>Communications in Nonlinear Science and Numerical Simulation</i> , 2016 , 38, 45-58	3.7	49
43	Lie group method for the modified model of MHD flow and heat transfer of a non-Newtonian fluid with prescribed heat flux over a moving porous plate. <i>Journal of Molecular Liquids</i> , 2016 , 220, 768-777	6	14
42	Unsteady Convective Heat Transfer of Power-Law Fluid with Variable Fluid Properties in a Concentric Annulus Originating from a Polymer Flooding Process. <i>Numerical Heat Transfer; Part A: Applications</i> , 2015 , 68, 761-776	2.3	2
41	The analysis of the suction/injection on the MHD Maxwell fluid past a stretching plate in the presence of nanoparticles by Lie group method. <i>Open Physics</i> , 2015 , 13,	1.3	4
40	Mixed convection heat transfer in power law fluids over a moving conveyor along an inclined plate. <i>International Journal of Heat and Mass Transfer</i> , 2015 , 85, 1023-1033	4.9	154
39	MHD Marangoni boundary layer flow and heat transfer of pseudo-plastic nanofluids over a porous medium with a modified model. <i>Mechanics of Time-Dependent Materials</i> , 2015 , 19, 519-536	1.2	22
38	A new diffusion for laminar boundary layer flow of power law fluids past a flat surface with magnetic effect and suction or injection. <i>International Journal of Heat and Mass Transfer</i> , 2015 , 90, 1090-1097	4.9	29
37	MHD flow and radiation heat transfer of nanofluids in porous media with variable surface heat flux and chemical reaction. <i>Applied Mathematical Modelling</i> , 2015 , 39, 165-181	4.5	267
36	Marangoni boundary layer flow and heat transfer of copper-water nanofluid over a porous medium disk. <i>AIP Advances</i> , 2015 , 5, 107225	1.5	39

35	MHD thermosolutal marangoni convection heat and mass transport of power law fluid driven by temperature and concentration gradient. <i>AIP Advances</i> , 2015 , 5, 087160	1.5	7
34	Fractional boundary layer flow and radiation heat transfer of MHD viscoelastic fluid over an unsteady stretching surface. <i>AIP Advances</i> , 2015 , 5, 107133	1.5	12
33	Flow and Heat Transfer of Nanofluids Over a Rotating Porous Disk with Velocity Slip and Temperature Jump. <i>Zeitschrift Fur Naturforschung - Section A Journal of Physical Sciences</i> , 2015 , 70, 351-358	1.4	2
32	Improved drag force model and its application in simulating nanofluid flow. <i>Microfluidics and Nanofluidics</i> , 2014 , 17, 253-261	2.8	16
31	Radiation effects on Marangoni convection flow and heat transfer in pseudo-plastic non-Newtonian nanofluids with variable thermal conductivity. <i>International Journal of Heat and Mass Transfer</i> , 2014 , 77, 708-716	4.9	143
30	Coupled flow and heat transfer in viscoelastic fluid with Cattaneo-Christov heat flux model. <i>Applied Mathematics Letters</i> , 2014 , 38, 87-93	3.5	288
29	Unsteady MHD convection heat transfer along an accelerating/decelerating cylinder with variable fluid properties. <i>European Physical Journal Plus</i> , 2014 , 129, 1	3.1	2
28	A new model for Brownian force and the application to simulating nanofluid flow. <i>Microfluidics and Nanofluidics</i> , 2014 , 16, 131-139	2.8	11
27	A finite element method for heat transfer of power-law flow in channels with a transverse magnetic field. <i>Mathematical Methods in the Applied Sciences</i> , 2014 , 37, 1121-1129	2.3	7
26	Similarity Solutions of Marangoni Convection Boundary Layer Flow with Gravity and External Pressure. <i>Chinese Journal of Chemical Engineering</i> , 2014 , 22, 365-369	3.2	20
25	Precipitation phenomenon of nanoparticles in power-law fluids over a rotating disk. <i>Microfluidics and Nanofluidics</i> , 2014 , 17, 107-114	2.8	9
24	Sedimentation and precipitation of nanoparticles in power-law fluids. <i>Microfluidics and Nanofluidics</i> , 2013 , 15, 11-18	2.8	15
23	Hall effect on MHD flow and heat transfer of nanofluids over a stretching wedge in the presence of velocity slip and Joule heating. <i>Open Physics</i> , 2013 , 11,	1.3	5
22	Magnetohydrodynamics Thermocapillary Marangoni Convection Heat Transfer of Power-Law Fluids Driven by Temperature Gradient. <i>Journal of Heat Transfer</i> , 2013 , 135,	1.8	36
21	A New Model for Plastic-Viscoelastic Magnetohydrodynamic (MHD) Flow with Radiation Thermal Transfer. <i>International Journal of Nonlinear Sciences and Numerical Simulation</i> , 2013 , 14, 435-441	1.8	2
20	Marangoni convection of power law fluids driven by power-law temperature gradient. <i>Journal of the Franklin Institute</i> , 2012 , 349, 2585-2597	4	38
19	Analysis of MHD thermosolutal Marangoni convection with the heat generation and a first-order chemical reaction. <i>Chemical Engineering Science</i> , 2012 , 69, 449-455	4.4	56
18	FLOW AND HEAT TRANSFER OF MHD VISCOUS FLUID OVER AN UNSTEADY STRETCHING SURFACE WITH RADIATION HEAT FLUX. <i>Chemical Engineering Communications</i> , 2012 , 199, 1-16	2.2	15

17	Comparison Between Thermal Conductivity Models on Heat Transfer in Power-Law Non-Newtonian Fluids. <i>Journal of Heat Transfer</i> , 2012 , 134,	1.8	12
16	Effects of Viscous Dissipation on the Thermal Boundary Layer of Pseudoplastic Power-Law Non-Newtonian Fluids Using Discretization Method and the Boubaker Polynomials Expansion Scheme. <i>ISRN Thermodynamics</i> , 2012 , 2012, 1-6		2
15	Hydrodynamic plane and axisymmetric slip stagnation-point flow with thermal radiation and temperature jump. <i>Journal of Mechanical Science and Technology</i> , 2011 , 25, 1837-1844	1.6	13
14	Experimental investigation of dimensionless velocity and shearing stress in boundary layer flow on continuous moving surface in power law fluids. <i>Journal of Thermal Science</i> , 2011 , 20, 115-118	1.9	2
13	Solving fractional partial differential equations in fluid mechanics by generalized differential transform method 2011 ,		5
12	Exact solutions for the unsteady rotating flows of a generalized Maxwell fluid with oscillating pressure gradient between coaxial cylinders. <i>Computers and Mathematics With Applications</i> , 2011 , 62, 1105-1115	2.7	27
11	Heat transfer in pseudo-plastic non-Newtonian fluids with variable thermal conductivity. <i>Energy Conversion and Management</i> , 2011 , 52, 355-358	10.6	30
10	A new model for flow and heat of a power law fluid in a pipe. <i>Thermal Science</i> , 2011 , 15, 127-130	1.2	8
9	Numerical Methods for Solving Energy Equations of Dilatant Fluid Flow 2010 ,		1
8	An analysis of the characteristics of the thermal boundary layer in power law fluid. <i>Journal of Thermal Science</i> , 2008 , 17, 233-237	1.9	4
7	Numerical study of thermal boundary layer on a continuous moving surface in power law fluids. <i>Journal of Thermal Science</i> , 2007 , 16, 243-247	1.9	8
6	Suitable heat transfer model for self-similar laminar boundary layer in power law fluids. <i>Journal of Thermal Science</i> , 2004 , 13, 150-154	1.9	15
5	Similarity solutions of momentum and energy equations for an axi-symmetric laminar jet. <i>Journal of Thermal Science</i> , 2004 , 13, 334-337	1.9	3
4	The initial, boundary value problems for a class of generalized diffusion equations. <i>Journal of Thermal Science</i> , 2002 , 11, 31-34	1.9	1
3	Momentum and heat transfer in laminar boundary layer behind shock wave. <i>Journal of Thermal Science</i> , 2002 , 11, 255-258	1.9	4
2	BIFURCATION SOLUTIONS TO A BOUNDARY LAYER PROBLEM ARISING IN THE THEORY OF POWER LAW FLUIDS. <i>Acta Mathematica Scientia</i> , 2000 , 20, 19-26	0.7	21
1	Memory dependent anomalous diffusion in comb structure under distributed order time fractional dual-phase-lag model. <i>International Journal of Biomathematics</i> , 2150048	1.8	1
