#	ARTICLE	IF	CITATIONS
1	Association between Serum C-Peptide as a Risk Factor for Cardiovascular Disease and High-Density Lipoprotein Cholesterol Levels in Nondiabetic Individuals. PLoS ONE, 2015, 10, e112281.	2.5	18
2	Serum C-peptide as a key contributor to lipid-related residual cardiovascular risk in the elderly. Archives of Gerontology and Geriatrics, 2017, 73, 263-268.	3.0	13
3	Association between housing environment and depressive symptoms among older people: a multidimensional assessment. BMC Geriatrics, 2021, 21, 259.	2.7	12
4	The Association between the Serum C-Peptide Level and Bone Mineral Density. PLoS ONE, 2013, 8, e83107.	2.5	10
5	Depression-related differences in lean body mass distribution from National Health and Nutrition Examination Survey 2005–2006. Journal of Affective Disorders, 2014, 157, 1-7.	4.1	9
6	Associations of Serum C-Peptide Level with Body Fat Distribution and Ever Stroke in Nondiabetic Subjects. Journal of Stroke and Cerebrovascular Diseases, 2014, 23, e163-e169.	1.6	6
7	The role of social support in the association between dependency and important risk factors among the elderly. Psychogeriatrics, 2021, 21, 317-323.	1.2	4
8	Independent association between serum C-peptide levels and fat mass to lean mass ratio in the aging process. Geriatrics and Gerontology International, 2015, 15, 918-926.	1.5	3
9	Associations of serum C-peptide and insulin-like growth factor binding proteins-3 with breast cancer deaths. PLoS ONE, 2020, 15, e0242310.	2.5	3
10	Association between physical activity and serum C-peptide levels among the elderly. Geriatrics and Gerontology International, 2014, 14, 647-653.	1.5	2
