citing authors

#	ARTICLE	IF	CITATIONS
1	Remote Ischemic Preconditioning Induces Cardioprotective Autophagy and Signals through the IL-6-Dependent JAK-STAT Pathway. <i>International Journal of Molecular Sciences</i> , 2020, 21, 1692.	4.1	27
2	Circulating mediators of remote ischemic preconditioning: search for the missing link between non-lethal ischemia and cardioprotection. <i>Oncotarget</i> , 2019, 10, 216-244.	1.8	37
3	The Role of Chemokines in Wound Healing. <i>International Journal of Molecular Sciences</i> , 2018, 19, 3217.	4.1	268
4	The regulation of miRNAs by reconstituted high-density lipoproteins in diabetes-impaired angiogenesis. <i>Scientific Reports</i> , 2018, 8, 13596.	3.3	22
5	Strikingly Different Atheroprotective Effects of Apolipoprotein A-I in Early- Versus Late-Stage Atherosclerosis. <i>JACC Basic To Translational Science</i> , 2018, 3, 187-199.	4.1	12
6	VEGFR2 is activated by high-density lipoproteins and plays a key role in the proangiogenic action of HDL in ischemia. <i>FASEB Journal</i> , 2018, 32, 2911-2922.	0.5	10
7	CC-chemokine class inhibition attenuates pathological angiogenesis while preserving physiological angiogenesis. <i>FASEB Journal</i> , 2017, 31, 1179-1192.	0.5	15
8	Broad-Spectrum Inhibition of the CC-Chemokine Class Improves Wound Healing and Wound Angiogenesis. <i>International Journal of Molecular Sciences</i> , 2017, 18, 155.	4.1	31
9	Chemokine binding protein $\alpha$ M3 <sup>TM</sup> limits atherosclerosis in apolipoprotein E <sup>-/-</sup> mice. <i>PLoS ONE</i> , 2017, 12, e0173224.	2.5	16
10	The Role of CC-Chemokines in the Regulation of Angiogenesis. <i>International Journal of Molecular Sciences</i> , 2016, 17, 1856.	4.1	89
11	Reconstituted high-density lipoproteins promote wound repair and blood flow recovery in response to ischemia in aged mice. <i>Lipids in Health and Disease</i> , 2016, 15, 150.	3.0	17
12	High-Density Lipoproteins Rescue Diabetes-Impaired Angiogenesis via Scavenger Receptor Class B Type I. <i>Diabetes</i> , 2016, 65, 3091-3103.	0.6	38
