#	ARTICLE	IF	CITATIONS
1	The hidden history of hypersensitivity pneumonitis. <i>European Respiratory Journal</i> , 2022, 59, 2100252.	6.7	7
2	Dusty trades and associated rheumatoid arthritis in a population-based study in the coal mining counties of Appalachia. <i>Occupational and Environmental Medicine</i> , 2022, 79, 308-314.	2.8	3
3	Pneumococcal pneumonia on the job: Uncovering the past story of occupational exposure to metal fumes and dust. <i>American Journal of Industrial Medicine</i> , 2022, 65, 517-524.	2.1	5
4	Depressive symptoms in lung transplant recipients: trajectory and association with mortality and allograft dysfunction. <i>Thorax</i> , 2022, 77, 891-899.	5.6	2
5	Cumulative occupational exposure to inorganic dust and fumes and invasive pneumococcal disease with pneumonia. <i>International Archives of Occupational and Environmental Health</i> , 2022, 95, 1797-1804.	2.3	6
6	Military Service and COPD Risk. <i>Chest</i> , 2022, 162, 792-795.	0.8	8
7	Becoming disenthralled with our conventional understanding of occupational lung disease. <i>Respirology</i> , 2022, 27, 383-384.	2.3	0
8	Primary graft dysfunction attenuates improvements in health-related quality of life after lung transplantation, but not disability or depression. <i>American Journal of Transplantation</i> , 2021, 21, 815-824.	4.7	5
9	Gamma-Butyrolactone Overdose Potentially Complicated by Co-Ingestion of Industrial Solvent N-Methyl-2-Pyrrolidone. <i>Journal of Analytical Toxicology</i> , 2021, 45, 322-324.	2.8	1
10	Cumulative Occupational Exposures and Lung-Function Decline in Two Large General-Population Cohorts. <i>Annals of the American Thoracic Society</i> , 2021, 18, 238-246.	3.2	14
11	Smoking, occupational exposures, and idiopathic pulmonary fibrosis among Swedish construction workers. <i>American Journal of Industrial Medicine</i> , 2021, 64, 251-257.	2.1	14
12	Early radiographic pneumoconiosis is associated with impaired exercise gas exchange among coal miners with normal resting spirometry. <i>American Journal of Industrial Medicine</i> , 2021, 64, 453-461.	2.1	2
13	Inorganic Dust Exposure During Military Service as a Predictor of Rheumatoid Arthritis and Other Autoimmune Conditions. <i>ACR Open Rheumatology</i> , 2021, 3, 466-474.	2.1	16
14	History of work-related diseases as a tool to protect the health of workers. <i>Industrial Health</i> , 2021, 59, 201-203.	1.0	0
15	Association between household exposure and cycle threshold in COVID-19 infected health care workers. <i>Journal of Occupational Medicine and Toxicology</i> , 2021, 16, 29.	2.2	1
16	Inhaled Corticosteroids Use and Risk of Invasive Pneumococcal Disease in a Population-based Study. <i>Annals of the American Thoracic Society</i> , 2020, 17, 1570-1575.	3.2	8
17	Military Deployment and Respiratory Symptoms. <i>Chest</i> , 2020, 157, 1407-1408.	0.8	1
18	Occupational exposure to dust and to fumes, work as a welder and invasive pneumococcal disease risk. <i>Occupational and Environmental Medicine</i> , 2020, 77, 57-63.	2.8	23

#	ARTICLE	IF	CITATIONS
19	Cycle Threshold to Test Positivity in COVID-19 for Return to Work Clearance in Health Care Workers. <i>Journal of Occupational and Environmental Medicine</i> , 2020, 62, 889-891.	1.7	13
20	Occupation versus environmental factors in hypersensitivity pneumonitis: population attributable fraction. <i>ERJ Open Research</i> , 2020, 6, 00374-2020.	2.6	6
21	Reply to Lee and Strek: Occupational Burden in Chronic Respiratory Disease: Call for Recognition, Training, and Data Capture. <i>American Journal of Respiratory and Critical Care Medicine</i> , 2019, 200, 1559-1559.	5.6	0
22	Tacrolimus trough monitoring guided by mass spectrometry without accounting for assay differences is associated with acute kidney injury in lung transplant recipients. <i>American Journal of Health-System Pharmacy</i> , 2019, 76, 2019-2027.	1.0	3
23	What has been done will be done again. <i>Respirology</i> , 2019, 24, 1125-1126.	2.3	5
24	Respiratory Health after Military Service in Southwest Asia and Afghanistan. An Official American Thoracic Society Workshop Report. <i>Annals of the American Thoracic Society</i> , 2019, 16, e1-e16.	3.2	52
25	The Occupational Burden of Nonmalignant Respiratory Diseases. An Official American Thoracic Society and European Respiratory Society Statement. <i>American Journal of Respiratory and Critical Care Medicine</i> , 2019, 199, 1312-1334.	5.6	269
26	Prevalence of Arthritis and Rheumatoid Arthritis in Coal Mining Counties of the United States. <i>Arthritis Care and Research</i> , 2019, 71, 1209-1215.	3.4	27
27	Into ploughshares: forging effective surveillance for work-related lung disease. <i>Occupational and Environmental Medicine</i> , 2019, 76, 783-784.	2.8	3
28	Occupational exposures and incidence of chronic bronchitis and related symptoms over two decades: the European Community Respiratory Health Survey. <i>Occupational and Environmental Medicine</i> , 2019, 76, oemed-2018-105274.	2.8	17
29	Increasing the Resolution of Chronic Obstructive Pulmonary Disease Definition. Lessons from a Cohort with Remote but Extensive Exposure to Secondhand Tobacco Smoke. <i>Annals of the American Thoracic Society</i> , 2018, 15, S122-S123.	3.2	1
30	Occupational exposures and 20-year incidence of COPD: the European Community Respiratory Health Survey. <i>Thorax</i> , 2018, 73, 1008-1015.	5.6	56
31	Spirometry reference values for a Kyrgyz population. <i>Clinical Respiratory Journal</i> , 2018, 12, 826-828.	1.6	5
32	The early history of manganese and the recognition of its neurotoxicity, 1837-1936. <i>NeuroToxicology</i> , 2018, 64, 5-11.	3.0	45
33	Impact of Rhinitis on Work Productivity: A Systematic Review. <i>Journal of Allergy and Clinical Immunology: in Practice</i> , 2018, 6, 1274-1286.e9.	3.8	132
34	Airflow limitation classified with the fixed ratio or the lower limit of normal and cause-specific mortality - A prospective study. <i>Respiratory Medicine</i> , 2018, 144, 36-41.	2.9	8
35	Occupational Exposures and Computed Tomographic Imaging Characteristics in the SPIROMICS Cohort. <i>Annals of the American Thoracic Society</i> , 2018, 15, 1411-1419.	3.2	27
36	Lung volumes identify an at-risk group in persons with prolonged secondhand tobacco smoke exposure but without overt airflow obstruction. <i>BMJ Open Respiratory Research</i> , 2018, 5, e000284.	3.0	13

#	ARTICLE	IF	CITATIONS
37	EBUS-TBNA is Sufficient for Successful Diagnosis of Silicosis with Mediastinal Lymphadenopathy. Lung, 2018, 196, 441-445.	3.3	5
38	Survival following lung transplantation for artificial stone silicosis relative to idiopathic pulmonary fibrosis. American Journal of Industrial Medicine, 2017, 60, 248-254.	2.1	32
39	Fatigue and sleepiness determine respiratory quality of life among veterans evaluated for sleep apnea. Health and Quality of Life Outcomes, 2017, 15, 48.	2.4	17
40	COPD and occupation: resetting the agenda. Occupational and Environmental Medicine, 2016, 73, 357-358.	2.8	7
41	High-altitude alpine therapy and lung function in asthma: systematic review and meta-analysis. ERJ Open Research, 2016, 2, 00097-2015.	2.6	29
42	O40-4â€¦Lung function decline and copd prevalence in relation to occupational exposures in a prospective cohort study: the ecrhs III. , 2016, , .		0
43	Pneumoconiosis Redux. Coal Workersâ€™ Pneumoconiosis and Silicosis Are Still a Problem. American Journal of Respiratory and Critical Care Medicine, 2016, 193, 603-605.	5.6	18
44	Is Smoking a Predictor for Acute Mountain Sickness? Findings From a Meta-Analysis. Nicotine and Tobacco Research, 2016, 18, 1509-1516.	2.6	10
45	Obesity and Functioning Among Individuals with Chronic Obstructive Pulmonary Disease (COPD). COPD: Journal of Chronic Obstructive Pulmonary Disease, 2016, 13, 352-359.	1.6	11
46	From silicosis to silica hazards: An experiment in medicine, history, and the social sciences. American Journal of Industrial Medicine, 2015, 58, 3-5.	2.1	8
47	Hospital nurses working wounded: Motivations and obstacles to return to work as experienced by nurses with injuries. Work, 2015, 50, 295-304.	1.1	5
48	Prospective Risk of Rheumatologic Disease Associated with Occupational Exposure in a Cohort of Male Construction Workers. American Journal of Medicine, 2015, 128, 1094-1101.	1.5	62
49	â€œAcuteâ€•silicosis at the 1930 Johannesburg Conference on silicosis and in its aftermath: Controversies over a distinct entity later recognized as silicoproteinosis. American Journal of Industrial Medicine, 2015, 58, 39-47.	2.1	8
50	Fungal contamination of the respiratory tract and associated respiratory impairment among sawmill workers in India. ERJ Open Research, 2015, 1, 00023-2015.	2.6	5
51	Lung Transplantation for Hypersensitivity Pneumonitis. Chest, 2015, 147, 1558-1565.	0.8	67
52	Smoking Increases the Risk of Acute Mountain Sickness. Wilderness and Environmental Medicine, 2015, 26, 164-172.	0.9	5
53	Occupational Exposures Are Associated with Worse Morbidity in Patients with Chronic Obstructive Pulmonary Disease. American Journal of Respiratory and Critical Care Medicine, 2015, 191, 557-565.	5.6	93
54	Role of Delta-aminolevulinic Acid in the Symptoms of Acute Porphyria. American Journal of Medicine, 2015, 128, 313-317.	1.5	76

#	ARTICLE	IF	CITATIONS
55	Annual average ambient particulate matter exposure estimates, measured home particulate matter, and hair nicotine are associated with respiratory outcomes in adults with asthma. <i>Environmental Research</i> , 2014, 129, 1-10.	7.5	27
56	Occupational chronic obstructive pulmonary disease: a systematic literature review. <i>Scandinavian Journal of Work, Environment and Health</i> , 2014, 40, 19-35.	3.4	107
57	Lower Health Literacy is Associated with Poorer Health Status and Outcomes in Chronic Obstructive Pulmonary Disease. <i>Journal of General Internal Medicine</i> , 2013, 28, 74-81.	2.6	141
58	Higher environmental relative moldiness index values measured in homes of adults with asthma, rhinitis, or both conditions. <i>Environmental Research</i> , 2013, 122, 98-101.	7.5	18
59	How Much Hypoxia Is Significant in Pulmonary Hypertension During Air Travel?: Response. <i>Chest</i> , 2013, 143, 877.	0.8	3
60	Chronic obstructive pulmonary disease among residents of an historically industrialised area. <i>Thorax</i> , 2012, 67, 901-907.	5.6	25
61	Effects of Commercial Air Travel on Patients With Pulmonary Hypertension. <i>Chest</i> , 2012, 142, 885-892.	0.8	47
62	Preface. <i>Clinics in Chest Medicine</i> , 2012, 33, xi-xii.	2.1	2
63	Multifocal inflammatory leukoencephalopathy associated with cocaine abuse: Is levamisole responsible?. <i>Clinical Toxicology</i> , 2012, 50, 534-535.	1.9	26
64	Disturbed sleep among COPD patients is longitudinally associated with mortality and adverse COPD outcomes. <i>Sleep Medicine</i> , 2012, 13, 476-483.	1.6	145
65	Artificial Stone Silicosis. <i>Chest</i> , 2012, 142, 419-424.	0.8	134
66	Occupation and COPD: A Brief Review. <i>Journal of Asthma</i> , 2012, 49, 2-4.	1.7	84
67	A patient on RIPE therapy presenting with recurrent isoniazid-associated pleural effusions: a case report. <i>Journal of Medical Case Reports</i> , 2011, 5, 558.	0.8	5
68	Topical antacid therapy for capsaicin-induced dermal pain: a poison center telephone-directed study. <i>American Journal of Emergency Medicine</i> , 2010, 28, 596-602.	1.6	9
69	Asthma caused by occupational exposures is common – A systematic analysis of estimates of the population-attributable fraction. <i>BMC Pulmonary Medicine</i> , 2009, 9, 7.	2.0	214
70	Further Exploration of the Links Between Occupational Exposure and Chronic Obstructive Pulmonary Disease. <i>Journal of Occupational and Environmental Medicine</i> , 2009, 51, 804-810.	1.7	50
71	Socioeconomic gradients in tiotropium use among adults with COPD. <i>International Journal of COPD</i> , 2008, Volume 3, 483-490.	2.3	14
72	Exposure to substances in the workplace and new-onset asthma: an international prospective population-based study (ECRHS-II). <i>Lancet</i> , The, 2007, 370, 336-341.	13.7	359

#	ARTICLE	IF	CITATIONS
73	Impact of the Home Indoor Environment on Adult Asthma and Rhinitis. Journal of Occupational and Environmental Medicine, 2005, 47, 362-372.	1.7	57
74	Exposure to vapors, gas, dust, or fumes: Assessment by a single survey item compared to a detailed exposure battery and a job exposure matrix. American Journal of Industrial Medicine, 2005, 48, 110-117.	2.1	61
75	Effects of physician-related factors on adult asthma care, health status, and quality of life. American Journal of Medicine, 2003, 114, 581-587.	1.5	20
76	American Thoracic Society Statement. American Journal of Respiratory and Critical Care Medicine, 2003, 167, 787-797.	5.6	714
77	The prevalence and predictors of respiratory-related work limitation and occupational disability in an international study. Chest, 2003, 124, 1153-9.	0.8	13
78	Physician reports of work-related asthma in California, 1993-1996. American Journal of Industrial Medicine, 2001, 39, 72-83.	2.1	70
79	Title is missing!. Journal of Occupational Rehabilitation, 2000, 10, 55-69.	2.2	30
80	Work dynamics of adults with asthma. , 1999, 35, 472-480.		23
81	The history of pulp and paper bleaching: respiratory-health effects. Lancet, The, 1997, 349, 1316-1318.	13.7	51
82	Self-reported carpal tunnel syndrome: Predictors of work disability from the National Health Interview Survey Occupational Health Supplement. , 1996, 30, 362-368.		50
83	Welding Helmet Airborne Fume Concentrations Compared to Personal Breathing Zone Sampling. AIHA Journal, 1995, 56, 280-283.	0.4	19
84	Mortality risk among elderly workers. American Journal of Industrial Medicine, 1994, 26, 543-547.	2.1	14
85	Microgranulomatous aspergillosis after shoveling wood chips: Report of a fatal outcome in a patient with chronic granulomatous disease. American Journal of Industrial Medicine, 1992, 22, 411-418.	2.1	19
