#	ARTICLE	IF	CITATIONS
1	Mapping the focus of research conducted with adults with cerebral palsy: an overview of systematic reviews. <i>Disability and Rehabilitation</i> , 2023, 45, 185-208.	0.9	5
2	Participation of children and young people with cerebral palsy in activities of daily living in rural Uganda. <i>Developmental Medicine and Child Neurology</i> , 2023, 65, 274-284.	1.1	6
3	Perspectives of children and adolescents with cerebral palsy about involvement as research partners: a qualitative study. <i>Disability and Rehabilitation</i> , 2022, 44, 4293-4302.	0.9	4
4	Feasibility of scaling-up a community-based exercise program for young people with disability. <i>Disability and Rehabilitation</i> , 2022, 44, 1669-1681.	0.9	6
5	The experience of participation: eliciting the views of children on the autism spectrum. <i>Disability and Rehabilitation</i> , 2022, 44, 1700-1708.	0.9	13
6	Measure of Early Vision Use: initial validation with parents of children with cerebral palsy. <i>Disability and Rehabilitation</i> , 2022, 44, 4066-4074.	0.9	2
7	Measure of Early Vision Use: development of a new assessment tool for children with cerebral palsy. <i>Disability and Rehabilitation</i> , 2022, 44, 4055-4065.	0.9	5
8	Towards a paradigm shift in pediatric rehabilitation: accelerating the uptake of evidence on participation into routine clinical practice. <i>Disability and Rehabilitation</i> , 2022, 44, 1746-1757.	0.9	38
9	Do physical activity interventions influence subsequent attendance and involvement in physical activities for children with cerebral palsy: a systematic review. <i>Disability and Rehabilitation</i> , 2022, 44, 1682-1698.	0.9	14
10	Is the search for cerebral palsy "cures" a reasonable and appropriate goal in the 2020s?. <i>Developmental Medicine and Child Neurology</i> , 2022, 64, 49-55.	1.1	5
11	The Future of Disability Research in Australia: Protocol for a Multiphase Research Agenda "Setting Study. <i>JMIR Research Protocols</i> , 2022, 11, e31126.	0.5	7
12	Capture the magic: participation for all. <i>Disability and Rehabilitation</i> , 2022, 44, 1556-1557.	0.9	1
13	Do supports and barriers to routine clinical assessment for children with cerebral palsy change over time? A mixed methods study. <i>Disability and Rehabilitation</i> , 2022, , 1-11.	0.9	0
14	Co-development of the ENVISAGE Families programme for parents of children with disabilities: Reflections on a parent-researcher partnership. <i>Australian Occupational Therapy Journal</i> , 2022, 69, 653-661.	0.6	8
15	Efficacy of a knowledge translation approach in changing allied health practitioner use of evidence-based practices with children with cerebral palsy: a before and after longitudinal study. <i>Disability and Rehabilitation</i> , 2021, 43, 3592-3605.	0.9	6
16	Unpacking the application of Q methodology for use in occupational therapy research. <i>Scandinavian Journal of Occupational Therapy</i> , 2021, 28, 323-328.	1.1	4
17	Better Together: the Australasian Academy of Cerebral Palsy and Developmental Medicine champions equity. <i>Developmental Medicine and Child Neurology</i> , 2021, 63, 356-356.	1.1	0
18	Steering towards collaborative assessment: a qualitative study of parents' experiences of evidence-based assessment practices for their child with cerebral palsy. <i>Disability and Rehabilitation</i> , 2021, 43, 458-467.	0.9	9

#	ARTICLE	IF	CITATIONS
19	Definitions and Operationalization of Mental Health Problems, Wellbeing and Participation Constructs in Children with NDD: Distinctions and Clarifications. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 1656.	1.2	28
20	Application of Inertial Measurement Units and Machine Learning Classification in Cerebral Palsy: Randomized Controlled Trial. <i>JMIR Rehabilitation and Assistive Technologies</i> , 2021, 8, e29769.	1.1	8
21	Structural validity and internal consistency of Picture My Participation: A measure for children with disability. <i>African Journal of Disability</i> , 2021, 10, 763.	0.7	6
22	Successfully Negotiating Life Challenges: Learnings From Adults With Cerebral Palsy. <i>Qualitative Health Research</i> , 2021, 31, 2176-2193.	1.0	7
23	How Much Participation is Enough? A Commentary on the "Community Participation of School-Aged Children: Who is at Risk of Restricted Participation?" <i>Physical and Occupational Therapy in Pediatrics</i> , 2021, 41, 464-466.	0.8	0
24	Prescribing upper limb orthoses for children with cerebral palsy: a Q methodology study of occupational therapists' decision making. <i>Disability and Rehabilitation</i> , 2020, 42, 2600-2610.	0.9	6
25	Content validity and usefulness of Picture My Participation for measuring participation in children with and without intellectual disability in South Africa and Sweden. <i>Scandinavian Journal of Occupational Therapy</i> , 2020, 27, 336-348.	1.1	19
26	Participation in diverse life situations for people with disability: a vision for the future. <i>Developmental Medicine and Child Neurology</i> , 2020, 62, 5-5.	1.1	7
27	FitSkills: protocol for a stepped wedge cluster randomised trial of a community-based exercise programme to increase participation among young people with disability. <i>BMJ Open</i> , 2020, 10, e037153.	0.8	11
28	Health-related quality of life and upper limb impairment in children with cerebral palsy: developing a mapping algorithm. <i>Developmental Medicine and Child Neurology</i> , 2020, 62, 854-860.	1.1	9
29	Assessing participation of children with acquired brain injury and cerebral palsy: a systematic review of measurement properties. <i>Developmental Medicine and Child Neurology</i> , 2020, 62, 434-444.	1.1	21
30	Drooling in children with neurodisability: A survey of Australian speech-language pathologists' practice. <i>International Journal of Speech-Language Pathology</i> , 2020, 22, 601-609.	0.6	4
31	Sustained participation in community-based physical activity by adolescents with cerebral palsy: a qualitative study. <i>Disability and Rehabilitation</i> , 2019, 41, 3043-3051.	0.9	15
32	Validation of custom wearable sensors to measure angle kinematics: A technical report. <i>Health and Technology</i> , 2019, 9, 887-892.	2.1	3
33	Evaluation of a template for countering misinformation "Real-world Autism treatment myth debunking. <i>PLoS ONE</i> , 2019, 14, e0210746.	1.1	56
34	Economic evaluation of simulated and traditional clinical placements in occupational therapy education. <i>Australian Occupational Therapy Journal</i> , 2019, 66, 369-379.	0.6	4
35	Placement replacement: A conceptual framework for designing simulated clinical placement in occupational therapy. <i>Australian Journal of Cancer Nursing</i> , 2019, 21, 4-13.	0.8	13
36	Behavioural interventions to treat drooling in children with neurodisability: a systematic review. <i>Developmental Medicine and Child Neurology</i> , 2019, 61, 39-48.	1.1	13

#	ARTICLE	IF	CITATIONS
37	Understanding allied health practitioners' use of evidence-based assessments for children with cerebral palsy: a mixed methods study. <i>Disability and Rehabilitation</i> , 2019, 41, 53-65.	0.9	11
38	Psychometric Evaluation of the "Evidence Based Practice Competencies Questionnaire" Cerebral Palsy. <i>Physical and Occupational Therapy in Pediatrics</i> , 2018, 38, 305-315.	0.8	1
39	Economic evaluation and cost of interventions for cerebral palsy: a systematic review. <i>Developmental Medicine and Child Neurology</i> , 2018, 60, 543-558.	1.1	42
40	Supports and barriers to implementation of routine clinical assessment for children with cerebral palsy: A mixed-methods study. <i>Disability and Rehabilitation</i> , 2018, 40, 425-434.	0.9	9
41	A transactional framework for pediatric rehabilitation: shifting the focus to situated contexts, transactional processes, and adaptive developmental outcomes. <i>Disability and Rehabilitation</i> , 2018, 40, 1829-1841.	0.9	47
42	Rationale for prescription, and effectiveness of, upper limb orthotic intervention for children with cerebral palsy: a systematic review. <i>Disability and Rehabilitation</i> , 2018, 40, 1361-1371.	0.9	12
43	Measurement of Upper Limb Range of Motion Using Wearable Sensors: A Systematic Review. <i>Sports Medicine - Open</i> , 2018, 4, 53.	1.3	71
44	Simulated versus traditional occupational therapy placements: A randomised controlled trial. <i>Australian Occupational Therapy Journal</i> , 2018, 65, 556-564.	0.6	31
45	Measures used to quantify participation in childhood disability and their alignment with the family of participation-related constructs: a systematic review. <i>Developmental Medicine and Child Neurology</i> , 2018, 60, 1101-1116.	1.1	96
46	Mental health consumer participation in undergraduate occupational therapy student assessment: No negative impact. <i>Australian Occupational Therapy Journal</i> , 2018, 65, 494-502.	0.6	10
47	Characteristics Influencing Diversity of Participation of Children in Activities Outside School. <i>American Journal of Occupational Therapy</i> , 2018, 72, 7204205010p1-7204205010p9.	0.1	2
48	An Overview of Evidence-Based Occupational and Physiotherapy for Children with Cerebral Palsy. , 2018, , 165-192.		0
49	Methods for conceptualising "visual ability" as a measurable construct in children with cerebral palsy. <i>BMC Medical Research Methodology</i> , 2017, 17, 46.	1.4	8
50	Weak evidence supports intensive, task-oriented, early intervention with parent support for infants with, or at high risk of, cerebral palsy. <i>Australian Occupational Therapy Journal</i> , 2017, 64, 423-425.	0.6	1
51	Participation, both a means and an end: a conceptual analysis of processes and outcomes in childhood disability. <i>Developmental Medicine and Child Neurology</i> , 2017, 59, 16-25.	1.1	361
52	Leisure participation "preference congruence of children with cerebral palsy: a Children's Assessment of Participation and Enjoyment International Network descriptive study. <i>Developmental Medicine and Child Neurology</i> , 2017, 59, 380-387.	1.1	19
53	Measurement of activity limitations and participation restrictions: examination of ICF-linked content and scale properties of the FIM and PC-PART instruments. <i>Disability and Rehabilitation</i> , 2017, 39, 1025-1038.	0.9	9
54	Participation trajectories: impact of school transitions on children and adolescents with cerebral palsy. <i>Developmental Medicine and Child Neurology</i> , 2017, 59, 174-182.	1.1	47

#	ARTICLE	IF	CITATIONS
55	Effectiveness and cost-effectiveness of embedded simulation in occupational therapy clinical practice education: study protocol for a randomised controlled trial. <i>Trials</i> , 2017, 18, 345.	0.7	15
56	A descriptive study of the participation of children and adolescents in activities outside school. <i>BMC Pediatrics</i> , 2016, 16, 84.	0.7	18
57	While involving children and youth with disability as research partners was viewed positively, methodologically strong research is required to further inform effective participation and outcomes. <i>Australian Occupational Therapy Journal</i> , 2016, 63, 219-220.	0.6	0
58	Personal Care Participation Assessment and Resource Tool: Clinical utility for inpatient rehabilitation. <i>Canadian Journal of Occupational Therapy</i> , 2016, 83, 237-248.	0.8	2
59	Minimising impairment: Protocol for a multicentre randomised controlled trial of upper limb orthoses for children with cerebral palsy. <i>BMC Pediatrics</i> , 2016, 16, 70.	0.7	13
60	“Participation”: a systematic review of language, definitions, and constructs used in intervention research with children with disabilities. <i>Developmental Medicine and Child Neurology</i> , 2016, 58, 29-38.	1.1	258
61	A systematic review of evidence-based assessment practices by allied health practitioners for children with cerebral palsy. <i>Developmental Medicine and Child Neurology</i> , 2016, 58, 332-347.	1.1	21
62	Measurement of visual ability in children with cerebral palsy: a systematic review. <i>Developmental Medicine and Child Neurology</i> , 2016, 58, 1016-1029.	1.1	36
63	Comparing participation in physical recreation activities between children with disability and children with typical development: A secondary analysis of matched data. <i>Research in Developmental Disabilities</i> , 2016, 49-50, 268-276.	1.2	61
64	Optimising leisure participation: a pilot intervention study for adolescents with physical impairments. <i>Disability and Rehabilitation</i> , 2016, 38, 963-971.	0.9	34
65	The effect of interventions aimed at improving participation outcomes for children with disabilities: a systematic review. <i>Developmental Medicine and Child Neurology</i> , 2015, 57, 1093-1104.	1.1	135
66	Improving allied health professionals’ research implementation behaviours for children with cerebral palsy: protocol for a before-after study. <i>Implementation Science</i> , 2015, 10, 16.	2.5	13
67	“Our child’s significant disability shapes our lives” experiences of family social participation. <i>Disability and Rehabilitation</i> , 2015, 37, 2264-2271.	0.9	28
68	Improving the participation of youth with physical disabilities in community activities: An interrupted time series design. <i>Australian Occupational Therapy Journal</i> , 2015, 62, 105-115.	0.6	61
69	Robot assisted upper limb therapy combined with upper limb rehabilitation was at least as effective on a range of outcomes, and cost less to deliver, as an equal dose of upper limb rehabilitation alone for people with stroke. <i>Australian Occupational Therapy Journal</i> , 2015, 62, 74-76.	0.6	5
70	Responsiveness, construct and criterion validity of the Personal Care-Participation Assessment and Resource Tool (PC-PART). <i>Health and Quality of Life Outcomes</i> , 2015, 13, 125.	1.0	4
71	Evaluation of the internal construct validity of the Personal Care Participation Assessment and Resource Tool (PC-PART) using Rasch analysis. <i>BMC Health Services Research</i> , 2014, 14, 543.	0.9	7
72	Is participation among children with intellectual disabilities in outside school activities similar to their typically developing peers? A systematic review. <i>Developmental Neurorehabilitation</i> , 2014, 17, 64-71.	0.5	39

#	ARTICLE	IF	CITATIONS
73	Rasch analysis of The Melbourne Assessment of Unilateral Upper Limb Function. <i>Developmental Medicine and Child Neurology</i> , 2014, 56, 665-672.	1.1	62
74	Participation: Are we there yet? <i>Australian Occupational Therapy Journal</i> , 2014, 61, 291-292.	0.6	23
75	Preparatory teachers' perceptions of school readiness: a survey of Victorian teachers. <i>Australian Educational Researcher</i> , 2014, 41, 109-124.	1.6	15
76	Meta-analysis of qualitative studies concluded that the social environment was the most influential environmental factor to impact participation of youths with disabilities. <i>Australian Occupational Therapy Journal</i> , 2014, 61, 124-125.	0.6	1
77	Strategies that facilitate participation in family activities of children and adolescents with profound intellectual and multiple disabilities: parents' and personal assistants' experiences. <i>Disability and Rehabilitation</i> , 2014, 36, 2169-2177.	0.9	27
78	Participation of children with intellectual disability compared with typically developing children. <i>Research in Developmental Disabilities</i> , 2013, 34, 1854-1862.	1.2	95
79	Children with cerebral palsy and periventricular white matter injury: Does gestational age affect functional outcome?. <i>Research in Developmental Disabilities</i> , 2013, 34, 2500-2506.	1.2	10
80	Intensive therapy following upper limb botulinum toxin A injection in young children with unilateral cerebral palsy: a randomized trial. <i>Developmental Medicine and Child Neurology</i> , 2013, 55, 238-247.	1.1	72
81	Reliable Classification of Functional Profiles and Movement Disorders of Children with Cerebral Palsy. <i>Physical and Occupational Therapy in Pediatrics</i> , 2013, 33, 342-352.	0.8	29
82	Measurement properties of the Personal Care Participation Assessment and Resource Tool: a systematic review. <i>Disability and Rehabilitation</i> , 2013, 35, 265-281.	0.9	8
83	Development of the Mini-Assisting Hand Assessment: evidence for content and internal scale validity. <i>Developmental Medicine and Child Neurology</i> , 2013, 55, 1030-1037.	1.1	54
84	Geographical patterns in the recreation and leisure participation of children and youth with cerebral palsy: A CAPE international collaborative network study. <i>Developmental Neurorehabilitation</i> , 2013, 16, 196-206.	0.5	34
85	Looking to the future: adolescents with cerebral palsy talk about their aspirations – a narrative study. <i>Disability and Rehabilitation</i> , 2012, 34, 2103-2110.	0.9	40
86	Bimanual behaviours in children aged 8–18 months: A literature review to select toys that elicit the use of two hands. <i>Research in Developmental Disabilities</i> , 2012, 33, 240-250.	1.2	26
87	Further evidence of validity of the Modified Melbourne Assessment for neurologically impaired children aged 2 to 4 years. <i>Developmental Medicine and Child Neurology</i> , 2012, 54, 424-428.	1.1	14
88	Single subject experimental design study demonstrated cognitive orientation to daily occupational performance (CO-OP) improved performance of self-selected goals in adults with chronic stroke. <i>Australian Occupational Therapy Journal</i> , 2012, 59, 467-468.	0.6	1
89	Prospective study of the participation patterns of Grade 6 and Year 8 students in Victoria, Australia in activities outside of school. <i>Australian Occupational Therapy Journal</i> , 2012, 59, 197-208.	0.6	13
90	Linking cerebral palsy upper limb measures to the International Classification of Functioning, Disability and Health. <i>Journal of Rehabilitation Medicine</i> , 2011, 43, 987-996.	0.8	30

#	ARTICLE	IF	CITATIONS
91	Preliminary evidence supports the validity of the Strength-Dexterity Test as a unidimensional scale measuring fingertip force coordination in children and adolescents. <i>Australian Occupational Therapy Journal</i> , 2011, 58, 317-318.	0.6	0
92	Bracing and splinting interventions in the upper limbs of people with cerebral palsy. <i>Developmental Medicine and Child Neurology</i> , 2011, 53, 293-294.	1.1	6
93	Children and youth with myelomeningocele™s independence in managing clean intermittent catheterization in familiar settings. <i>Acta Paediatrica, International Journal of Paediatrics</i> , 2011, 100, 429-438.	0.7	15
94	Modified constraint-induced movement therapy or bimanual occupational therapy following injection of Botulinum toxin-A to improve bimanual performance in young children with hemiplegic cerebral palsy: a randomised controlled trial methods paper. <i>BMC Neurology</i> , 2010, 10, 58.	0.8	46
95	Stability of caregiver-reported manual ability and gross motor function classifications of cerebral palsy. <i>Developmental Medicine and Child Neurology</i> , 2010, 52, 153-159.	1.1	37
96	Repeat botulinum toxin-A injections in the upper limb of children with hemiplegia: a randomized controlled trial. <i>Developmental Medicine and Child Neurology</i> , 2010, 52, 79-86.	1.1	62
97	Assessing bimanual performance in young children with hemiplegic cerebral palsy: a systematic review. <i>Developmental Medicine and Child Neurology</i> , 2010, 52, 413-421.	1.1	59
98	Eight weeks of occupational therapy home programme, compared to no programme, resulted in improved achievement of child and family-selected goals by children with cerebral palsy. <i>Australian Occupational Therapy Journal</i> , 2010, 57, 444-445.	0.6	0
99	The relationship between physical performance and self-perception in children with and without cerebral palsy. <i>Australian Occupational Therapy Journal</i> , 2009, 56, 24-32.	0.6	18
100	Newborn Individualised Developmental Care and Assessment Programme for infants born less than 32 weeks™ gestation did not improve neurodevelopmental outcomes at one and two years more than standard developmental care. <i>Australian Occupational Therapy Journal</i> , 2009, 56, 439-441.	0.6	0
101	Editor's note "Reporting of trials of non-pharmacological interventions. <i>Australian Occupational Therapy Journal</i> , 2009, 56, 72-73.	0.6	0
102	There was insufficient evidence to conclude that upper extremity casting was effective for individuals with central nervous system disorders. <i>Australian Occupational Therapy Journal</i> , 2009, 56, 73-74.	0.6	0
103	Characteristics influencing participation of Australian children with cerebral palsy. <i>Disability and Rehabilitation</i> , 2009, 31, 2204-2215.	0.9	82
104	Sensory Processing Abilities of Children Who Have Sustained Traumatic Brain Injuries. <i>American Journal of Occupational Therapy</i> , 2009, 63, 701-709.	0.1	27
105	Diversity of participation in children with cerebral palsy. <i>Developmental Medicine and Child Neurology</i> , 2008, 50, 363-369.	1.1	153
106	Children with cerebral palsy participate: A review of the literature. <i>Disability and Rehabilitation</i> , 2008, 30, 1867-1884.	0.9	160
107	Review of the Children's Assessment of Participation and Enjoyment and the Preferences for Activity of Children. <i>Physical and Occupational Therapy in Pediatrics</i> , 2008, 28, 389-404.	0.8	86
108	Establishing Validity of a Modified Melbourne Assessment for Children Ages 2 to 4 Years. <i>American Journal of Occupational Therapy</i> , 2008, 62, 373-383.	0.1	29

#	ARTICLE	IF	CITATIONS
109	Goal-directed training: linking theories of treatment to clinical practice for improved functional activities in daily life. <i>Clinical Rehabilitation</i> , 2007, 21, 47-55.	1.0	98
110	Constraint-induced movement therapy in the treatment of the upper limb in children with hemiplegic cerebral palsy. <i>The Cochrane Library</i> , 2007, , CD004149.	1.5	86
111	Constraint-induced movement therapy in the treatment of the upper limb in children with hemiplegic cerebral palsy: a Cochrane systematic review. <i>Clinical Rehabilitation</i> , 2007, 21, 675-685.	1.0	172
112	Being in pain: a phenomenological study of young people with cerebral palsy. <i>Developmental Medicine and Child Neurology</i> , 2007, 49, 445-449.	1.1	48
113	Group-Based Task-Related Training for Children with Cerebral Palsy. <i>Physical and Occupational Therapy in Pediatrics</i> , 2007, 27, 43-65.	0.8	21
114	Daily activities of families with a child with severe autism revolved around the need to occupy and pacify the child: Families felt robbed of meaning and satisfaction in family life. <i>Australian Occupational Therapy Journal</i> , 2006, 53, 136-137.	0.6	4
115	The International Classification of Functioning, Disability and Health: They're talking our language. <i>Australian Occupational Therapy Journal</i> , 2006, 53, 65-66.	0.6	15
116	Critically Appraised Papers Related to Children with Autism; June 2006 Issue1. <i>Australian Occupational Therapy Journal</i> , 2006, 53, 237-238.	0.6	1
117	Occupational Performance Challenges for Children with Congenital Heart Disease: A Literature Review. <i>Canadian Journal of Occupational Therapy</i> , 2004, 71, 161-172.	0.8	14
118	Upper-Limb Injections of Botulinum Toxin-A in Children With Cerebral Palsy: A Critical Review of the Literature and Clinical Implications for Occupational Therapists. <i>American Journal of Occupational Therapy</i> , 2004, 58, 389-397.	0.1	42
119	Impact of Second Skin Lycra Splinting on the Quality of Upper Limb Movement in Children. <i>British Journal of Occupational Therapy</i> , 2003, 66, 464-472.	0.5	20
120	Feeding the Infant With Congenital Heart Disease: An Occupational Performance Challenge. <i>American Journal of Occupational Therapy</i> , 2001, 55, 277-284.	0.1	18
121	Implications of providing wrist-hand orthoses for children with cerebral palsy: evidence from a randomised controlled trial. <i>Disability and Rehabilitation</i> , 0, , 1-11.	0.9	0
