#	ARTICLE	IF	CITATIONS
1	Psyllium reduces inulin-induced colonic gas production in IBS: MRI and <i>in vitro</i> fermentation studies. <i>Gut</i> , 2022, 71, 919-927.	6.1	21
2	Long-term personalized low FODMAP diet improves symptoms and maintains luminal Bifidobacteria abundance in irritable bowel syndrome. <i>Neurogastroenterology and Motility</i> , 2022, 34, e14241.	1.6	31
3	Fat-soluble vitamin assessment, deficiency and supplementation in infants with cholestasis. <i>Journal of Human Nutrition and Dietetics</i> , 2022, 35, 273-279.	1.3	3
4	Commentary on: prebiotic effects: metabolic and health benefits. <i>British Journal of Nutrition</i> , 2022, 127, 554-555.	1.2	7
5	P415 Improving food-related quality of life in Inflammatory Bowel Disease with a novel web-based intervention: a randomised controlled feasibility trial. <i>Journal of Crohn's and Colitis</i> , 2022, 16, i406-i406.	0.6	0
6	Almonds and their impact on gastrointestinal physiology, luminal microbiology and gastrointestinal function: a randomised controlled trial. <i>Proceedings of the Nutrition Society</i> , 2022, 81, .	0.4	0
7	Food-Related Quality of Life in Children and Adolescents With Crohn's Disease. <i>Inflammatory Bowel Diseases</i> , 2022, 28, 1838-1843.	0.9	8
8	Optimal Design of Clinical Trials of Dietary Interventions in Disorders of Gut-Brain Interaction. <i>American Journal of Gastroenterology</i> , 2022, 117, 973-984.	0.2	11
9	Undertaking a research project improves confidence in research skills among student dietitians. <i>Journal of Human Nutrition and Dietetics</i> , 2022, , .	1.3	4
10	Protein status in phenylketonuria: A scoping review. <i>Clinical Nutrition</i> , 2022, 41, 894-922.	2.3	4
11	FODMAPs or gluten as inducers of symptoms in irritable bowel syndrome: separating the wheat from the chaff. <i>American Journal of Clinical Nutrition</i> , 2022, 115, 327-328.	2.2	2
12	Knowledge, perceptions and behaviours regarding dietary management of adults living with phenylketonuria. <i>Journal of Human Nutrition and Dietetics</i> , 2022, 35, 1016-1029.	1.3	5
13	Group education by dietitians in patients with gastrointestinal disorders: Potentially clinically effective and time for randomised trials. <i>Journal of Human Nutrition and Dietetics</i> , 2022, 35, 417-420.	1.3	3
14	Low FODMAP diet in irritable bowel syndrome: a review of recent clinical trials and meta-analyses. <i>Current Opinion in Clinical Nutrition and Metabolic Care</i> , 2022, 25, 341-347.	1.3	7
15	Food-related quality of life in inflammatory bowel disease: measuring the validity and reliability of the Turkish version of FR-QOL-29. <i>Health and Quality of Life Outcomes</i> , 2022, 20, .	1.0	2
16	The Effect of Fiber Supplementation on Chronic Constipation in Adults: An Updated Systematic Review and Meta-Analysis of Randomized Controlled Trials. <i>American Journal of Clinical Nutrition</i> , 2022, 116, 953-969.	2.2	16
17	Food Additive Emulsifiers and Their Impact on Gut Microbiome, Permeability, and Inflammation: Mechanistic Insights in Inflammatory Bowel Disease. <i>Journal of Crohn's and Colitis</i> , 2021, 15, 1068-1079.	0.6	63
18	Challenges of the low FODMAP diet for managing irritable bowel syndrome and approaches to their minimisation and mitigation. <i>Proceedings of the Nutrition Society</i> , 2021, 80, 19-28.	0.4	16

#	ARTICLE	IF	CITATIONS
19	Food additive emulsifiers: a review of their role in foods, legislation and classifications, presence in food supply, dietary exposure, and safety assessment. <i>Nutrition Reviews</i> , 2021, 79, 726-741.	2.6	71
20	Glycemic Response to a Renal-specific Oral Nutritional Supplement in Patients With Diabetes Undergoing Hemodialysis: A Randomized Crossover Trial. <i>Journal of Parenteral and Enteral Nutrition</i> , 2021, 45, 267-276.	1.3	2
21	Behavioral and Diet Therapies in Integrated Care for Patients With Irritable Bowel Syndrome. <i>Gastroenterology</i> , 2021, 160, 47-62.	0.6	81
22	Chronic constipation in adults: Contemporary perspectives and clinical challenges. 1: Epidemiology, diagnosis, clinical associations, pathophysiology and investigation. <i>Neurogastroenterology and Motility</i> , 2021, 33, e14050.	1.6	25
23	Dietary fibre in gastrointestinal health and disease. <i>Nature Reviews Gastroenterology and Hepatology</i> , 2021, 18, 101-116.	8.2	367
24	Gut microbiota associations with diet in irritable bowel syndrome and the effect of low FODMAP diet and probiotics. <i>Clinical Nutrition</i> , 2021, 40, 1861-1870.	2.3	44
25	Nopal fiber (<i>Opuntia ficus-indica</i>) improves symptoms in irritable bowel syndrome in the short term: a randomized controlled trial. <i>Neurogastroenterology and Motility</i> , 2021, 33, e13986.	1.6	14
26	Psyllium reduces colonic hydrogen production following ingestion of inulin in irritable bowel syndrome. , 2021, , .		0
27	Fruits and their impact on the gut microbiota, gut motility and constipation. <i>Food and Function</i> , 2021, 12, 8850-8866.	2.1	31
28	Synthesising nutrition science into dietary guidelines for populations amidst the challenge of fake news: Summary of an Academy of Nutrition Sciences position paper. <i>Nutrition Bulletin</i> , 2021, 46, 2-7.	0.8	4
29	Synthesising nutrition science into dietary guidelines for populations amidst the challenge of fake news: Summary of an Academy of Nutrition Sciences position paper. <i>Journal of Human Nutrition and Dietetics</i> , 2021, 34, 467-471.	1.3	7
30	Chronic constipation in adults: Contemporary perspectives and clinical challenges. 2: Conservative, behavioural, medical and surgical treatment. <i>Neurogastroenterology and Motility</i> , 2021, 33, e14070.	1.6	17
31	Food-related quality of life is impaired in inflammatory bowel disease and associated with reduced intake of key nutrients. <i>American Journal of Clinical Nutrition</i> , 2021, 113, 832-844.	2.2	26
32	Fermented foods: Availability, cost, ingredients, nutritional content and on-pack claims. <i>Journal of Human Nutrition and Dietetics</i> , 2021, , .	1.3	1
33	Communication skills in dietetic practice: a scoping review protocol. <i>JB Evidence Synthesis</i> , 2021, 19, 3363-3371.	0.6	4
34	The PROMOTE study: targeting the gut microbiome with prebiotics to overcome age-related anabolic resistance: protocol for a double-blinded, randomised, placebo-controlled trial. <i>BMC Geriatrics</i> , 2021, 21, 407.	1.1	14
35	Nutrient, Fibre, and FODMAP Intakes and Food-related Quality of Life in Patients with Inflammatory Bowel Disease, and Their Relationship with Gastrointestinal Symptoms of Differing Aetiologies. <i>Journal of Crohn's and Colitis</i> , 2021, 15, 2041-2053.	0.6	23
36	Prebiotic fructans have greater impact on luminal microbiology and CD3+ T cells in healthy siblings than patients with Crohn's disease: A pilot study investigating the potential for primary prevention of inflammatory bowel disease. <i>Clinical Nutrition</i> , 2021, 40, 5009-5019.	2.3	12

#	ARTICLE	IF	CITATIONS
37	Protein status of people with phenylketonuria: a scoping review protocol. <i>BMJ Open</i> , 2021, 11, e049883.	0.8	5
38	Predictors of adherence to a gluten-free diet in celiac disease: Do knowledge, attitudes, experiences, symptoms, and quality of life play a role?. <i>Nutrition</i> , 2021, 90, 111249.	1.1	6
39	Relationship Between Skeletal Muscle Area and Density and Clinical Outcome in Adults Receiving Venovenous Extracorporeal Membrane Oxygenation. <i>Critical Care Medicine</i> , 2021, 49, e350-e359.	0.4	10
40	Prebiotic Galactooligosaccharide Supplementation in Adults with Ulcerative Colitis: Exploring the Impact on Peripheral Blood Gene Expression, Gut Microbiota, and Clinical Symptoms. <i>Nutrients</i> , 2021, 13, 3598.	1.7	16
41	Perceptions and psychosocial impact of food, nutrition, eating and drinking in people with inflammatory bowel disease: a qualitative investigation of food-related quality of life. <i>Journal of Human Nutrition and Dietetics</i> , 2020, 33, 115-127.	1.3	58
42	Nutrient Intake, Diet Quality, and Diet Diversity in Irritable Bowel Syndrome and the Impact of the Low FODMAP Diet. <i>Journal of the Academy of Nutrition and Dietetics</i> , 2020, 120, 535-547.	0.4	73
43	Effects of Low FODMAP Diet on Symptoms, Fecal Microbiome, and Markers of Inflammation in Patients With Quiescent Inflammatory Bowel Disease in a Randomized Trial. <i>Gastroenterology</i> , 2020, 158, 176-188.e7.	0.6	209
44	Diet-Microbiome Interactions and the Risk of Pouchitis in Ileal Pouch-Anal Anastomosis. <i>Journal of Crohn's and Colitis</i> , 2020, 14, 153-154.	0.6	1
45	Probiotics and constipation: mechanisms of action, evidence for effectiveness and utilisation by patients and healthcare professionals. <i>Proceedings of the Nutrition Society</i> , 2020, 79, 147-157.	0.4	41
46	Low FODMAP diet in children and adolescents with functional bowel disorder: A clinical case note review. <i>JGH Open</i> , 2020, 4, 153-159.	0.7	15
47	Food supplements and diet as treatment options in irritable bowel syndrome. <i>Neurogastroenterology and Motility</i> , 2020, 32, e13951.	1.6	24
48	Nuts and their Effect on Gut Microbiota, Gut Function and Symptoms in Adults: A Systematic Review and Meta-Analysis of Randomised Controlled Trials. <i>Nutrients</i> , 2020, 12, 2347.	1.7	44
49	Emulsifiers Impact Colonic Length in Mice and Emulsifier Restriction is Feasible in People with Crohn's Disease. <i>Nutrients</i> , 2020, 12, 2827.	1.7	34
50	Communication skills teaching for student dietitians using experiential learning and simulated patients. <i>Journal of Human Nutrition and Dietetics</i> , 2020, 33, 601-613.	1.3	21
51	Î²-Galactooligosaccharide in Conjunction With Low FODMAP Diet Improves Irritable Bowel Syndrome Symptoms but Reduces Fecal Bifidobacteria. <i>American Journal of Gastroenterology</i> , 2020, 115, 906-915.	0.2	50
52	Investigating optimal education regarding the low FODMAP diet in functional bowel disorders: a feasibility randomised controlled trial of leaflet vs mobile application vs dietetic consultation. <i>Proceedings of the Nutrition Society</i> , 2020, 79, .	0.4	5
53	Contrasting effects of viscous and particulate fibers on colonic fermentation in vitro and in vivo, and their impact on intestinal water studied by MRI in a randomized trial. <i>American Journal of Clinical Nutrition</i> , 2020, 112, 595-602.	2.2	12
54	Fibre from nopal cactus (<i>Opuntia ficus-indica</i>) improves symptoms in irritable bowel syndrome in the short term: a pilot randomised-controlled trial. <i>Proceedings of the Nutrition Society</i> , 2020, 79, .	0.4	1

#	ARTICLE	IF	CITATIONS
55	Low FODMAP diet & prebiotic β -galactooligosaccharides improve irritable bowel syndrome and response to low FODMAP is predicted by urine and faecal metabolites: a randomised controlled trial. Proceedings of the Nutrition Society, 2020, 79, .	0.4	5
56	FODMAP-specific mobile application: impact on gut symptoms in 11,689 people, and dietary triggers in 2,053 people. Proceedings of the Nutrition Society, 2020, 79, .	0.4	5
57	Food additive emulsifier restriction is feasible in people with Crohn's disease. Proceedings of the Nutrition Society, 2020, 79, .	0.4	2
58	Prebiotic β -galacto-oligosaccharide impact on clinical, inflammatory and microbiota outcomes in active ulcerative colitis: an open-label study. Proceedings of the Nutrition Society, 2020, 79, .	0.4	0
59	Predictors of adherence to a gluten-free diet in coeliac disease: do knowledge, attitudes, beliefs, quality of life and symptoms play a role?. Proceedings of the Nutrition Society, 2020, 79, .	0.4	0
60	Nut consumption and the impact on gut microbiome and gut function in healthy people: a systematic review of randomised controlled trials. Proceedings of the Nutrition Society, 2020, 79, .	0.4	0
61	The effect of prunes on stool output, gut transit time and gastrointestinal microbiota: A randomised controlled trial. Clinical Nutrition, 2019, 38, 165-173.	2.3	27
62	Fermented Foods: Definitions and Characteristics, Impact on the Gut Microbiota and Effects on Gastrointestinal Health and Disease. Nutrients, 2019, 11, 1806.	1.7	350
63	Fermentable carbohydrates in functional bowel disorders: New insights. Neurogastroenterology and Motility, 2019, 31, e13662.	1.6	0
64	Fermentable carbohydrates in functional bowel disorders: new insights. Journal of Human Nutrition and Dietetics, 2019, 32, 411-412.	1.3	1
65	A high prevalence of chronic gastrointestinal symptoms in adults with cystic fibrosis is detected using tools already validated in other GI disorders. United European Gastroenterology Journal, 2019, 7, 881-888.	1.6	27
66	P192 Prevalence and factors associated with impaired food-related quality of life: a cross-sectional survey of 1223 people with inflammatory bowel disease. Journal of Crohn's and Colitis, 2019, 13, S186-S186.	0.6	0
67	Translating probiotic science into practice. Nutrition Bulletin, 2019, 44, 165-173.	0.8	6
68	Nutrient, fibre, sorbitol and chlorogenic acid content of prunes (Prunus domestica): an updated analysis and comparison of different countries of origin and database values. International Journal of Food Sciences and Nutrition, 2019, 70, 924-931.	1.3	7
69	Dried fruit and public health " what does the evidence tell us?. International Journal of Food Sciences and Nutrition, 2019, 70, 675-687.	1.3	39
70	β -Hydroxy- β -methylbutyrate and its impact on skeletal muscle mass and physical function in clinical practice: a systematic review and meta-analysis. American Journal of Clinical Nutrition, 2019, 109, 1119-1132.	2.2	96
71	Prebiotics in irritable bowel syndrome and other functional bowel disorders in adults: a systematic review and meta-analysis of randomized controlled trials. American Journal of Clinical Nutrition, 2019, 109, 1098-1111.	2.2	84
72	Perceptions of Constipation Among the General Public and People With Constipation Differ Strikingly From Those of General and Specialist Doctors and the Rome IV Criteria. American Journal of Gastroenterology, 2019, 114, 1116-1129.	0.2	23

#	ARTICLE	IF	CITATIONS
73	Randomised clinical trial: <i>Bifidobacterium lactis</i> NCC2818 probiotic vs placebo, and impact on gut transit time, symptoms, and gut microbiology in chronic constipation. <i>Alimentary Pharmacology and Therapeutics</i> , 2019, 49, 251-264.	1.9	45
74	Probiotic use is common in constipation, but only a minority of general and specialist doctors recommend them and consider there to be an evidence base. <i>Nutrition</i> , 2019, 61, 157-163.	1.1	15
75	Adequacy of nutrition support during extracorporeal membrane oxygenation. <i>Clinical Nutrition</i> , 2019, 38, 324-331.	2.3	32
76	Clinical Application of Dietary Therapies in Irritable Bowel Syndrome. <i>Journal of Gastrointestinal and Liver Diseases</i> , 2019, 27, 307-316.	0.5	23
77	The low FODMAP diet in the management of irritable bowel syndrome: an evidence-based review of FODMAP restriction, reintroduction and personalisation in clinical practice. <i>Journal of Human Nutrition and Dietetics</i> , 2018, 31, 239-255.	1.3	199
78	Nutritional implications of dietary interventions for managing gastrointestinal disorders. <i>Current Opinion in Gastroenterology</i> , 2018, 34, 105-111.	1.0	16
79	Habitual dietary fibre intake influences gut microbiota response to an inulin-type fructan prebiotic: a randomised, double-blind, placebo-controlled, cross-over, human intervention study. <i>British Journal of Nutrition</i> , 2018, 119, 176-189.	1.2	163
80	Reply. <i>Gastroenterology</i> , 2018, 154, 1548.	0.6	0
81	Long-term impact of the low FODMAP diet on gastrointestinal symptoms, dietary intake, patient acceptability, and healthcare utilization in irritable bowel syndrome. <i>Neurogastroenterology and Motility</i> , 2018, 30, e13154.	1.6	132
82	Volatile Organic Compounds in Feces Associate With Response to Dietary Intervention in Patients With Irritable Bowel Syndrome. <i>Clinical Gastroenterology and Hepatology</i> , 2018, 16, 385-391.e1.	2.4	90
83	Nutritional status, the development and persistence of malnutrition and dietary intake in oesophago-gastric cancer: a longitudinal cohort study. <i>Journal of Human Nutrition and Dietetics</i> , 2018, 31, 785-792.	1.3	30
84	Dietary fiber intervention on gut microbiota composition in healthy adults: a systematic review and meta-analysis. <i>American Journal of Clinical Nutrition</i> , 2018, 107, 965-983.	2.2	408
85	Short-Term Daily Intake of Polydextrose Fiber Does Not Shorten Intestinal Transit Time in Constipated Adults: A Randomized Controlled Trial. <i>Nutrients</i> , 2018, 10, 920.	1.7	8
86	Programmatic Assessment of Competence in Dietetics: A New Frontier. <i>Journal of the Academy of Nutrition and Dietetics</i> , 2017, 117, 175-179.	0.4	25
87	The gut microbiota of siblings offers insights into microbial pathogenesis of inflammatory bowel disease. <i>Gut Microbes</i> , 2017, 8, 359-365.	4.3	33
88	Prebiotic inulin-type fructans and galacto-oligosaccharides: definition, specificity, function, and application in gastrointestinal disorders. <i>Journal of Gastroenterology and Hepatology (Australia)</i> , 2017, 32, 64-68.	1.4	209
89	Mechanisms of Action of Probiotics and the Gastrointestinal Microbiota on Gut Motility and Constipation. <i>Advances in Nutrition</i> , 2017, 8, 484-494.	2.9	269
90	Dietary patterns, digestive symptoms, and health-related quality of life in women reporting minor digestive symptoms. <i>Nutrition</i> , 2017, 35, 132-138.	1.1	4

#	ARTICLE	IF	CITATIONS
91	A Diet Low in FODMAPs Reduces Symptoms in Patients With Irritable Bowel Syndrome and A Probiotic Restores Bifidobacterium Species: A Randomized Controlled Trial. <i>Gastroenterology</i> , 2017, 153, 936-947.	0.6	315
92	The challenges of control groups, placebos and blinding in clinical trials of dietary interventions. <i>Proceedings of the Nutrition Society</i> , 2017, 76, 203-212.	0.4	83
93	The low FODMAP diet: recent advances in understanding its mechanisms and efficacy in IBS. <i>Gut</i> , 2017, 66, 1517-1527.	6.1	259
94	Peer-assisted learning and small-group teaching to improve practice placement quality and capacity in dietetics. <i>Nutrition and Dietetics</i> , 2017, 74, 349-356.	0.9	15
95	Fermentable Carbohydrates [FODMAPs] Exacerbate Functional Gastrointestinal Symptoms in Patients With Inflammatory Bowel Disease: A Randomised, Double-blind, Placebo-controlled, Cross-over, Re-challenge Trial. <i>Journal of Crohn's and Colitis</i> , 2017, 11, 1420-1429.	0.6	100
96	Research Gaps in Diet and Nutrition in Inflammatory Bowel Disease. A Topical Review by D-ECCO Working Group [Dietitians of ECCO]. <i>Journal of Crohn's and Colitis</i> , 2017, 11, 1407-1419.	0.6	84
97	Irritable bowel syndrome and diet. <i>Current Opinion in Clinical Nutrition and Metabolic Care</i> , 2017, 20, 456-463.	1.3	18
98	Randomized controlled trial of dietary fiber for the prevention of radiation-induced gastrointestinal toxicity during pelvic radiotherapy. <i>American Journal of Clinical Nutrition</i> , 2017, 106, 849-857.	2.2	48
99	7-day weighed food diaries suggest patients with hereditary hemorrhagic telangiectasia may spontaneously modify their diet to avoid nosebleed precipitants. <i>Orphanet Journal of Rare Diseases</i> , 2017, 12, 60.	1.2	4
100	Prebiotic B-Galacto-oligosaccharide supplementation of the low FODMAP diet improves symptoms of irritable bowel syndrome but does not prevent diet induced decline in bifidobacteria: a randomised controlled trial. <i>Proceedings of the Nutrition Society</i> , 2017, 76, .	0.4	1
101	Volatile organic compounds predict response to both low FODMAP diet and probiotics in irritable bowel syndrome: a randomised controlled trial. <i>Proceedings of the Nutrition Society</i> , 2017, 76, .	0.4	0
102	Validated constipation symptom and quality-of-life measures neither reflect patient and clinician concerns nor use words familiar to patients. <i>Gastrointestinal Nursing</i> , 2016, 14, 29-38.	0.0	5
103	Influence of habitual dietary fibre intake on the responsiveness of the gut microbiota to a prebiotic: protocol for a randomised, double-blind, placebo-controlled, cross-over, single-centre study. <i>BMJ Open</i> , 2016, 6, e012504.	0.8	12
104	1133 The Low FODMAP Diet Reduces Symptoms in Irritable Bowel Syndrome Compared With Placebo Diet and the Microbiota Alterations May Be Prevented by Probiotic Co-Administration: A 2x2 Factorial Randomized Controlled Trial. <i>Gastroenterology</i> , 2016, 150, S230.	0.6	8
105	Fermentable oligosaccharide, disaccharide, monosaccharide and polyol content of foods commonly consumed by ethnic minority groups in the United Kingdom. <i>International Journal of Food Sciences and Nutrition</i> , 2016, 67, 383-390.	1.3	17
106	Altered gastrointestinal microbiota in irritable bowel syndrome and its modification by diet: probiotics, prebiotics and the low FODMAP diet. <i>Proceedings of the Nutrition Society</i> , 2016, 75, 306-318.	0.4	89
107	Dietary guidelines for irritable bowel syndrome are important for gastroenterologists, dietitians and people with irritable bowel syndrome. <i>Journal of Human Nutrition and Dietetics</i> , 2016, 29, 547-548.	1.3	5
108	Validity and reliability of the Bristol Stool Form Scale in healthy adults and patients with diarrhoea-predominant irritable bowel syndrome. <i>Alimentary Pharmacology and Therapeutics</i> , 2016, 44, 693-703.	1.9	271

#	ARTICLE	IF	CITATIONS
109	Systematic review with meta-analysis: effect of fibre supplementation on chronic idiopathic constipation in adults. <i>Alimentary Pharmacology and Therapeutics</i> , 2016, 44, 103-116.	1.9	102
110	The effect of communicating the genetic risk of cardiometabolic disorders on motivation and actual engagement in preventative lifestyle modification and clinical outcome: a systematic review and meta-analysis of randomised controlled trials. <i>British Journal of Nutrition</i> , 2016, 116, 924-934.	1.2	43
111	Fermentable Carbohydrate Restriction (Low FODMAP Diet) in Clinical Practice Improves Functional Gastrointestinal Symptoms in Patients with Inflammatory Bowel Disease. <i>Inflammatory Bowel Diseases</i> , 2016, 22, 1129-1136.	0.9	137
112	Food-related Quality of Life in Inflammatory Bowel Disease: Development and Validation of a Questionnaire. <i>Journal of Crohn's and Colitis</i> , 2016, 10, 194-201.	0.6	40
113	Siblings of patients with Crohn's disease exhibit a biologically relevant dysbiosis in mucosal microbial metacommunities. <i>Gut</i> , 2016, 65, 944-953.	6.1	56
114	Dietary supplement use and nosebleeds in hereditary haemorrhagic telangiectasia - an observational study. <i>Intractable and Rare Diseases Research</i> , 2016, 5, 109-113.	0.3	7
115	The effect of prunes on stool output, whole gut transit time and gastrointestinal symptoms: a randomised controlled trial. <i>Proceedings of the Nutrition Society</i> , 2015, 74, .	0.4	3
116	Variable access to quality nutrition information regarding inflammatory bowel disease: a survey of patients and health professionals and objective examination of written information. <i>Health Expectations</i> , 2015, 18, 2501-2512.	1.1	21
117	Assessment of the Turkish Version of the King's Stool Chart for Evaluating Stool Output and Diarrhea Among Patients Receiving Enteral Nutrition. <i>Gastroenterology Nursing</i> , 2015, 38, 218-225.	0.2	4
118	Clinical effectiveness and economic costs of group versus one-to-one education for short-chain fermentable carbohydrate restriction (low FODMAP diet) in the management of irritable bowel syndrome. <i>Journal of Human Nutrition and Dietetics</i> , 2015, 28, 687-696.	1.3	73
119	PTU-183 Advice from a dietitian regarding the low fodmap diet broadly maintains nutrient intake and does not alter fibre intake. <i>Gut</i> , 2015, 64, A143.2-A144.	6.1	11
120	Resting metabolic rate and anthropometry in older people: a comparison of measured and calculated values. <i>Journal of Human Nutrition and Dietetics</i> , 2015, 28, 72-84.	1.3	23
121	Dietary intake of inulin-type fructans in active and inactive Crohn's disease and healthy controls: a case-control study. <i>Journal of Crohn's and Colitis</i> , 2015, 9, 1024-1031.	0.6	33
122	Obesity and the gastrointestinal microbiota: a review of associations and mechanisms. <i>Nutrition Reviews</i> , 2015, 73, 376-385.	2.6	119
123	The Effect of Fibre on Chronic Constipation in Adults: A Systematic Review. <i>Proceedings of the Nutrition Society</i> , 2015, 74, .	0.4	0
