| #  | Article                                                                                                                                                                                                    | IF  | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Global Prevalence of Depressive and Anxiety Symptoms in Children and Adolescents During COVID-19.<br>JAMA Pediatrics, 2021, 175, 1142.                                                                     | 3.3 | 1,149     |
| 2  | Child and adolescent mental illness during COVID-19: A rapid review. Psychiatry Research, 2020, 292, 113307.                                                                                               | 1.7 | 269       |
| 3  | Maternal depressive and anxiety symptoms before and during the COVID-19 pandemic in Canada: a longitudinal analysis. Lancet Psychiatry,the, 2021, 8, 405-415.                                              | 3.7 | 160       |
| 4  | Associations Between Screen Use and Child Language Skills. JAMA Pediatrics, 2020, 174, 665.                                                                                                                | 3.3 | 159       |
| 5  | Association of Screen Time With Internalizing and Externalizing Behavior Problems in Children 12<br>Years or Younger. JAMA Psychiatry, 2022, 79, 393.                                                      | 6.0 | 59        |
| 6  | Global Prevalence of Meeting Screen Time Guidelines Among Children 5 Years and Younger. JAMA<br>Pediatrics, 2022, 176, 373.                                                                                | 3.3 | 49        |
| 7  | Recreational screen time before and during COVIDâ€19 in schoolâ€aged children. Acta Paediatrica,<br>International Journal of Paediatrics, 2021, 110, 2805-2807.                                            | 0.7 | 47        |
| 8  | Brief Report: Young Children's Risk of Unintentional Injury: A Comparison of Mothers' and Fathers'<br>Supervision Beliefs and Reported Practices. Journal of Pediatric Psychology, 2009, 34, 1063-1068.    | 1.1 | 44        |
| 9  | Child and family factors associated with child mental health and well-being during COVID-19.<br>European Child and Adolescent Psychiatry, 2023, 32, 223-233.                                               | 2.8 | 42        |
| 10 | Latent classes of trait affect and cognitive affective regulation strategies are associated with depression, non-suicidal self-injury, and well-being. Journal of Affective Disorders, 2018, 225, 180-187. | 2.0 | 34        |
| 11 | Managing children's risk of injury in the home: Does parental teaching about home safety reduce young children's hazard interactions?. Accident Analysis and Prevention, 2014, 71, 194-200.                | 3.0 | 33        |
| 12 | Trajectories of screen use during early childhood: Predictors and associated behavior and learning outcomes. Computers in Human Behavior, 2020, 113, 106501.                                               | 5.1 | 31        |
| 13 | Bidirectional associations between screen time and children's externalizing and internalizing behaviors. Journal of Child Psychology and Psychiatry and Allied Disciplines, 2021, 62, 1475-1484.           | 3.1 | 31        |
| 14 | Effectiveness of psychosocial intervention for children and adolescents with comorbid problems: a systematic review. Child and Adolescent Mental Health, 2011, 16, 177-185.                                | 1.8 | 27        |
| 15 | Only Kids Who Are Fools Would Do That!: Peer Social Norms Influence Children's Risk-Taking<br>Decisions. Journal of Pediatric Psychology, 2013, 38, 744-755.                                               | 1.1 | 25        |
| 16 | Cognitive reappraisal attenuates the association between depressive symptoms and emotional response to stress during adolescence. Cognition and Emotion, 2019, 33, 524-535.                                | 1.2 | 25        |
| 17 | Screen time and developmental and behavioral outcomes for preschool children. Pediatric Research, 2022, 91, 1616-1621.                                                                                     | 1.1 | 24        |
| 18 | Treatment fidelity in psychosocial intervention for children and adolescents with comorbid problems. Child and Adolescent Mental Health, 2012, 17, 139-145.                                                | 1.8 | 23        |

| #  | Article                                                                                                                                                                                                                                               | IF  | CITATIONS |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Longitudinal changes of inflammatory biomarkers moderate the relationship between recent<br>stressful life events and prospective symptoms of depression in a diverse sample of urban adolescents.<br>Brain, Behavior, and Immunity, 2020, 86, 43-52. | 2.0 | 23        |
| 20 | Immunocognitive Model of Depression Secondary to Anxiety in Adolescents. Journal of Youth and Adolescence, 2018, 47, 2625-2636.                                                                                                                       | 1.9 | 18        |
| 21 | Cognitive Vulnerabilities to Depression for Adolescents in Single-Mother and Two-Parent Families.<br>Journal of Youth and Adolescence, 2017, 46, 213-227.                                                                                             | 1.9 | 17        |
| 22 | Understanding gender differences in childhood injuries: Examining longitudinal relations between<br>parental reactions and boys' versus girls' injury-risk behaviors Health Psychology, 2016, 35, 523-530.                                            | 1.3 | 17        |
| 23 | Protection From Depression Following Emotional Maltreatment: The Unique Role of Positive Schemas.<br>International Journal of Cognitive Therapy, 2016, 9, 327-343.                                                                                    | 1.3 | 15        |
| 24 | Longitudinal Associations Between Screen Use and Reading in Preschool-Aged Children. Pediatrics, 2021, 147, .                                                                                                                                         | 1.0 | 15        |
| 25 | Cumulative Social Risk and Child Screen Use: The Role of Child Temperament. Journal of Pediatric Psychology, 2022, 47, 171-179.                                                                                                                       | 1.1 | 12        |
| 26 | Reward Sensitivity, Cognitive Response Style, and Inflammatory Response to an Acute Stressor in Adolescents. Journal of Youth and Adolescence, 2020, 49, 2149-2159.                                                                                   | 1.9 | 11        |
| 27 | Emotional clarity development and psychosocial outcomes during adolescence Emotion, 2019, 19, 563-572.                                                                                                                                                | 1.5 | 11        |
| 28 | Don't Touch the Gadget Because It's Hot! Mothers' and Children's Behavior in the Presence of a<br>Contrived Hazard at Home: Implications for Supervising Children. Journal of Pediatric Psychology,<br>2015, 40, 85-95.                               | 1.1 | 9         |
| 29 | A Longitudinal Investigation of Cognitive Self-schemas across Adolescent Development. Journal of<br>Youth and Adolescence, 2019, 48, 635-647.                                                                                                         | 1.9 | 9         |
| 30 | Screen use relates to decreased offline enrichment activities. Acta Paediatrica, International Journal of Paediatrics, 2021, 110, 896-898.                                                                                                            | 0.7 | 8         |
| 31 | Screen Time as a Mechanism Through Which Cumulative Risk is Related to Child Socioemotional and Developmental Outcomes in Early Childhood. Research on Child and Adolescent Psychopathology, 2022, 50, 709-720.                                       | 1.4 | 8         |
| 32 | A Latent Structure Analysis of Cognitive Vulnerability to Depression in Adolescence. Behavior<br>Therapy, 2019, 50, 755-764.                                                                                                                          | 1.3 | 6         |
| 33 | Sex and race influence objective and self-report sleep and circadian measures in emerging adults independently of risk for bipolar spectrum disorder. Scientific Reports, 2020, 10, 13731.                                                            | 1.6 | 6         |
| 34 | Positive schemas, psychopathology, and quality of life in children with pediatric cancer: A pilot study.<br>Journal of Psychosocial Oncology, 2017, 35, 362-375.                                                                                      | 0.6 | 5         |
| 35 | A Multi-Informant Study of Strengths, Positive Self-Schemas and Subjective Well-Being from<br>Childhood to Adolescence. Journal of Happiness Studies, 2020, 21, 2169-2191.                                                                            | 1.9 | 5         |
| 36 | Exploring Factors Relating to Positive Outcomes for Youth with Bipolar Spectrum Disorder: A<br>Multi-Informant, Mixed Methods Study. International Journal of Applied Positive Psychology, 2018, 2,<br>1-21.                                          | 1.2 | 4         |

| #  | Article                                                                                                                                                                                                                   | IF  | CITATIONS |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 37 | Cross-Sectional Study Protocol for the COVID-19 Impact Survey of Mothers and Their 7–11 Year Old<br>Children in Alberta, Canada. Frontiers in Psychiatry, 2021, 12, 597759.                                               | 1.3 | 4         |
| 38 | Predictors of Preadolescent Children's Recreational Screen Time Duration During the COVID-19<br>Pandemic. Journal of Developmental and Behavioral Pediatrics, 2022, 43, 353-361.                                          | 0.6 | 4         |
| 39 | Linking Maternal Depression to Adolescent Internalizing Symptoms: Transmission of Cognitive Vulnerabilities. Journal of Youth and Adolescence, 2021, 50, 324-335.                                                         | 1.9 | 3         |
| 40 | Understanding the Constellation of Adolescent Emotional Clarity and Cognitive Response Styles<br>when Predicting Depression: A Latent Class Analysis. Cognitive Therapy and Research, 2018, 42, 803-812.                  | 1.2 | 2         |
| 41 | Tweens are not teens: the problem of amalgamating broad age groups when making pandemic recommendations. Canadian Journal of Public Health, 2021, 112, 984-987.                                                           | 1.1 | 1         |
| 42 | An Exploration of Positive Parenting in Relation to Psychopathology for Youth with a Diagnosis of<br>Bipolar Spectrum Disorder. Journal of the Canadian Academy of Child and Adolescent Psychiatry, 2017,<br>26, 224-232. | 0.7 | 1         |
| 43 | Understanding distal and proximal relational underpinnings of positive schemas in emerging adulthood. International Journal of Happiness and Development, 2018, 4, 327.                                                   | 0.1 | 0         |
| 44 | S51. The Effect of Childhood Adversity Exposure andÂRecent Stressful Life Events on Longitudinal<br>Inflammatory Response. Biological Psychiatry, 2019, 85, S316.                                                         | 0.7 | 0         |
| 45 | Reward Sensitivity and Cognitive Response Style Predict Interleukin-6 Response to the Trier Social<br>Stress Task. Biological Psychiatry, 2020, 87, S439-S440.                                                            | 0.7 | 0         |
| 46 | The Intergenerational Transmission of Risk and Psychopathology. , 2021, , .                                                                                                                                               |     | 0         |
| 47 | Understanding distal and proximal relational underpinnings of positive schemas in emerging adulthood. International Journal of Happiness and Development, 2018, 4, 327.                                                   | 0.1 | Ο         |
