#	ARTICLE	IF	CITATIONS
1	Innovative working schedule: introducing one short nap during the night shift. <i>Ergonomics</i> , 2001, 44, 937-945.	2.1	83
2	EEG spectral power and cognitive performance during sleep inertia: The effect of normal sleep duration and partial sleep deprivation. <i>Physiology and Behavior</i> , 2006, 87, 177-184.	2.1	77
3	Impaired visual expertise for print in French adults with dyslexia as shown by N170 tuning. <i>Neuropsychologia</i> , 2012, 50, 3200-3206.	1.6	66
4	Sustained attention in the elderly: What do we know and what does it tell us about cognitive aging?. <i>Ageing Research Reviews</i> , 2013, 12, 459-468.	10.9	65
5	Vigilance and intrinsic maintenance of alert state: An ERP study. <i>Behavioural Brain Research</i> , 2010, 211, 185-190.	2.2	48
6	A Critical Review of Techniques Aiming at Enhancing and Sustaining Worker's Alertness during the Night Shift. <i>Industrial Health</i> , 2004, 42, 1-14.	1.0	44
7	Effects of nocturnal railway noise on sleep fragmentation in young and middle-aged subjects as a function of type of train and sound level. <i>International Journal of Psychophysiology</i> , 2008, 70, 184-191.	1.0	40
8	Investigating sustained attention ability in the elderly by using two different approaches: Inhibiting ongoing behavior versus responding on rare occasions. <i>Acta Psychologica</i> , 2014, 146, 51-57.	1.5	40
9	Impact of motivation on cognitive control in the context of vigilance lowering: An ERP study. <i>Brain and Cognition</i> , 2011, 77, 464-471.	1.8	35
10	The effects of aging on sustained attention ability: An ERP study.. <i>Psychology and Aging</i> , 2014, 29, 684-695.	1.6	35
11	Interaction of Age with Time of Day and Mental Load in Different Cognitive Tasks. <i>Perceptual and Motor Skills</i> , 2003, 96, 1223-1236.	1.3	25
12	Is the impaired N170 print tuning specific to developmental dyslexia? A matched reading-level study with poor readers and dyslexics. <i>Brain and Language</i> , 2013, 127, 539-544.	1.6	25
13	Age-related differences in the use of automatic and controlled processes in a situation of sustained attention. <i>Neuropsychologia</i> , 2015, 75, 607-616.	1.6	24
14	Age-related differences in the recruitment of proactive and reactive control in a situation of sustained attention. <i>Biological Psychology</i> , 2014, 103, 38-47.	2.2	23
15	Conflict control processing in adults with developmental dyslexia: An event related potentials study. <i>Clinical Neurophysiology</i> , 2014, 125, 69-76.	1.5	23
16	Sustaining attention to simple visual tasks: a central deficit in schizophrenia? A systematic review. <i>Annals of the New York Academy of Sciences</i> , 2017, 1408, 32-45.	3.8	21
17	Living alongside railway tracks: Long-term effects of nocturnal noise on sleep and cardiovascular reactivity as a function of age. <i>Environment International</i> , 2010, 36, 683-689.	10.0	20
18	Differentiating Motivational from Affective Influence of Performance-contingent Reward on Cognitive Control: The Wanting Component Enhances Both Proactive and Reactive Control. <i>Biological Psychology</i> , 2017, 125, 146-153.	2.2	18

#	ARTICLE	IF	CITATIONS
19	Performance monitoring mechanisms activated before and after a response: A comparison of aware and unaware errors. <i>Biological Psychology</i> , 2016, 120, 53-60.	2.2	16
20	Effects of acute and chronic sleep deprivation on daytime alertness and cognitive performance of healthy snorers and non-snorers. <i>Sleep Medicine</i> , 2012, 13, 29-35.	1.6	12
21	Long term exposure to nocturnal railway noise produces chronic signs of cognitive deficits and diurnal sleepiness. <i>Journal of Environmental Psychology</i> , 2013, 33, 45-52.	5.1	11
22	Sustained attention ability in schizophrenia: Investigation of conflict monitoring mechanisms. <i>Clinical Neurophysiology</i> , 2017, 128, 1599-1607.	1.5	10
23	Evidence of impaired proactive control under positive affect. <i>Neuropsychologia</i> , 2018, 114, 110-117.	1.6	10
24	The time course of the syllable frequency effect in visual word recognition: evidence for both facilitatory and inhibitory effects in French. <i>Reading and Writing</i> , 2014, 27, 171-187.	1.7	9
25	Influence of positive subliminal and supraliminal affective cues on goal pursuit in schizophrenia. <i>Schizophrenia Research</i> , 2015, 161, 291-298.	2.0	8
26	Effect of a short nap on the alertness of young drivers: Repercussion on the perception of motorcycles according to extent of the useful visual field of the driver. <i>Transportation Research Part F: Traffic Psychology and Behaviour</i> , 2009, 12, 143-154.	3.7	7
27	Early perception of written syllables in French: An event-related potential study. <i>Brain and Language</i> , 2009, 111, 55-60.	1.6	6
28	The effects of age on visual expertise for print. <i>Brain and Language</i> , 2017, 169, 48-56.	1.6	5
29	Effects of Age and Task Complexity on EEG and Performance in Relation to Psychological States. <i>Journal of Psychophysiology</i> , 2008, 22, 100-109.	0.7	4
30	Visual expertise for print in schizophrenia: Analysis of the N170 component. <i>International Journal of Psychophysiology</i> , 2018, 133, 111-119.	1.0	3
31	Impaired Frontal Midline Theta During Periods of High Reaction Time Variability in Schizophrenia. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2021, 6, 429-438.	1.5	1
