#	ARTICLE	IF	CITATIONS
1	Improving the efficiency of surface-thermal hardening of machine parts in conditions of combination of processing technologies, integrated on a single machine tool base. Metal Working and Material Science, 2021, 23, 45-71.	0.3	0
2	Justification of the Flow Characteristics of the Recuperator for the Thermal Preparation of Machinery and Equipment Units. Metal Working and Material Science, 2020, 22, 82-93.	0.3	0
3	Synthesis of the Motion Law of Filling Threads Beat-up Mechanisms of the STB Loom with Cam Driven. Metal Working and Material Science, 2019, 21, 47-58.	0.3	0
4	Hybrid Processing: the Impact of Mechanical and Surface Thermal Treatment Integration onto the Machine Parts Quality. IOP Conference Series: Materials Science and Engineering, 2016, 126, 012016.	0.6	6
5	Integrated Processing: Quality Assurance Procedure of the Surface Layer of Machine Parts during the Manufacturing Step "Diamond Smoothing". IOP Conference Series: Materials Science and Engineering, 2016, 125, 012031.	0.6	10
6	Numerical Simulation of Temperature Field in Steel under Action of Electron Beam Heating Source. Key Engineering Materials, 2016, 712, 105-111.	0.4	19
7	The formation of the liquid phase in the surface layer of steel components in the high-energy heat hardening by high frequency currents. Metal Working and Material Science, 2016, , 41-51.	0.3	1
8	Depth Distribution of Temperature in Steel Parts during Surface Hardening by High Frequency Currents. Applied Mechanics and Materials, 2015, 788, 129-135.	0.2	4
9	Contact Processes in Grinding. Applied Mechanics and Materials, 2015, 788, 17-21.	0.2	10
10	Numerical Modeling of Steel Surface Hardening in the Process of High Energy Heating by High Frequency Currents. Applied Mechanics and Materials, 2014, 698, 288-293.	0.2	11
