## Mark I Richardson

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/2038182/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Morphology and Composition of the Surface of Mars: Mars Odyssey THEMIS Results. Science, 2003, 300, 2056-2061.	12.6	368
2	PlanetWRF: A general purpose, local to global numerical model for planetary atmospheric and climate dynamics. Journal of Geophysical Research, 2007, 112, .	3.3	220
3	Mars Climate Sounder limb profile retrieval of atmospheric temperature, pressure, and dust and water ice opacity. Journal of Geophysical Research, 2009, 114, .	3.3	220
4	On the orbital forcing of Martian water and CO2cycles: A general circulation model study with simplified volatile schemes. Journal of Geophysical Research, 2003, 108, .	3.3	217
5	The origin, evolution, and trajectory of large dust storms on Mars during Mars years 24–30 (1999–2011). Icarus, 2015, 251, 112-127.	2.5	155
6	Investigation of the nature and stability of the Martian seasonal water cycle with a general circulation model. Journal of Geophysical Research, 2002, 107, 7-1.	3.3	153
7	Growth and form of the mound in Gale Crater, Mars: Slope wind enhanced erosion and transport. Geology, 2013, 41, 543-546.	4.4	147
8	Simulation of the Martian dust cycle with the GFDL Mars GCM. Journal of Geophysical Research, 2004, 109, .	3.3	137
9	A topographically forced asymmetry in the martian circulation and climate. Nature, 2002, 416, 298-301.	27.8	123
10	Winds measured by the Rover Environmental Monitoring Station (REMS) during the Mars Science Laboratory (MSL) rover's Bagnold Dunes Campaign and comparison with numerical modeling using MarsWRF. Icarus, 2017, 291, 203-231.	2.5	119
11	Numerical simulation of Martian dust devils. Journal of Geophysical Research, 2003, 108, .	3.3	108
12	Observations of the initiation and evolution of the 2001 Mars global dust storm. Journal of Geophysical Research, 2005, 110, .	3.3	108
13	A survey of Martian dust devil activity using Mars Global Surveyor Mars Orbiter Camera images. Journal of Geophysical Research, 2005, 110, n/a-n/a.	3.3	105
14	Cyclones, tides, and the origin of a cross-equatorial dust storm on Mars. Geophysical Research Letters, 2003, 30, .	4.0	104
15	The impact of resolution on the dynamics of the martian global atmosphere: Varying resolution studies with the MarsWRF GCM. Icarus, 2012, 221, 276-288.	2.5	97
16	An assessment of the global, seasonal, and interannual spacecraft record of Martian climate in the thermal infrared. Journal of Geophysical Research, 2003, 108, .	3.3	94
17	Threshold for sand mobility on Mars calibrated from seasonal variations of sand flux. Nature Communications, 2014, 5, 5096.	12.8	86
18	Water ice clouds in the Martian atmosphere: General circulation model experiments with a simple cloud scheme. Journal of Geophysical Research, 2002, 107, 2-1.	3.3	81

Mark I Richardson

#	Article	IF	CITATIONS
19	Stratospheric superrotation in the TitanWRF model. Icarus, 2011, 213, 636-654.	2.5	81
20	Long-term evolution of transient liquid water on Mars. Journal of Geophysical Research, 2005, 110, n/a-n/a.	3.3	75
21	New dust opacity mapping from Viking infrared thermal mapper data. Journal of Geophysical Research, 1993, 98, 10941-10949.	3.3	69
22	Aeolian processes in Proctor Crater on Mars: Mesoscale modeling of dune-forming winds. Journal of Geophysical Research, 2005, 110, .	3.3	68
23	Relationship between frontal dust storms and transient eddy activity in the northern hemisphere of Mars as observed by Mars Global Surveyor. Journal of Geophysical Research, 2005, 110, .	3.3	68
24	Martian surface winds: Insensitivity to orbital changes and implications for aeolian processes. Journal of Geophysical Research, 2001, 106, 32885-32902.	3.3	67
25	Surface dust redistribution on Mars as observed by the Mars Global Surveyor and Viking orbiters. Journal of Geophysical Research, 2006, 111, .	3.3	67
26	Observations and preliminary science results from the first 100 sols of MSL Rover Environmental Monitoring Station ground temperature sensor measurements at Gale Crater. Journal of Geophysical Research E: Planets, 2014, 119, 745-770.	3.6	67
27	The impact of surface dust source exhaustion on the martian dust cycle, dust storms and interannual variability, as simulated by the MarsWRF General Circulation Model. Icarus, 2015, 257, 47-87.	2.5	66
28	Thermal Emission Imaging System (THEMIS) infrared observations of atmospheric dust and water ice cloud optical depth. Journal of Geophysical Research, 2003, 108, .	3.3	55
29	A first look at dust lifting and dust storms near the south pole of Mars with a mesoscale model. Journal of Geophysical Research, 2002, 107, 4-1.	3.3	54
30	Atmospheric modeling of Mars methane surface releases. Planetary and Space Science, 2011, 59, 227-237.	1.7	54
31	A mesoscale model for the Martian atmosphere. Journal of Geophysical Research, 2002, 107, 3-1.	3.3	49
32	THEMIS-VIS observations of clouds in the martian mesosphere: Altitudes, wind speeds, and decameter-scale morphology. Icarus, 2010, 210, 545-565.	2.5	46
33	Meteorology of proposed Mars Exploration Rover landing sites. Journal of Geophysical Research, 2003, 108, .	3.3	44
34	Fitting the Viking lander surface pressure cycle with a Mars General Circulation Model. Journal of Geophysical Research, 2009, 114, .	3.3	42
35	The sensitivity of solsticial pauses to atmospheric ice and dust in the MarsWRF General Circulation Model. Icarus, 2018, 311, 23-34.	2.5	40
36	The impact of a realistic vertical dust distribution on the simulation of the Martian General Circulation. Journal of Geophysical Research E: Planets, 2013, 118, 980-993.	3.6	37

Mark I Richardson

#	Article	IF	CITATIONS
37	Simulating Titan's methane cycle with the TitanWRF General Circulation Model. Icarus, 2016, 267, 106-134.	2.5	37
38	A reanalysis of water abundances in the Martian atmosphere at high obliquity. Geophysical Research Letters, 2005, 32, .	4.0	34
39	The Ashima/MIT Mars GCM and argon in the martian atmosphere. Icarus, 2012, 218, 1043-1070.	2.5	30
40	On the relationship between surface pressure, terrain elevation, and air temperature. Part I: The large diurnal surface pressure range at Gale Crater, Mars and its origin due to lateral hydrostatic adjustment. Planetary and Space Science, 2018, 164, 132-157.	1.7	30
41	Seasonal variation of aerosols in the Martian atmosphere. Journal of Geophysical Research, 2000, 105, 4109-4121.	3.3	26
42	Convective instability in the martian middle atmosphere. Icarus, 2010, 208, 574-589.	2.5	25
43	Zonal wavenumber three traveling waves in the northern hemisphere of Mars simulated with a general circulation model. Icarus, 2013, 223, 654-676.	2.5	23
44	Warm early Mars surface enabled by high-altitude water ice clouds. Proceedings of the National Academy of Sciences of the United States of America, 2021, 118, .	7.1	23
45	High-resolution atmospheric observations by the Mars Odyssey Thermal Emission Imaging System. Icarus, 2007, 192, 378-395.	2.5	22
46	The cascade from local to global dust storms on Mars: Temporal and spatial thresholds on thermal and dynamical feedback. Icarus, 2018, 302, 514-536.	2.5	21
47	An initial assessment of the impact of postulated orbit-spin coupling on Mars dust storm variability in fully interactive dust simulations. Icarus, 2019, 317, 649-668.	2.5	20
48	Comparison of microwave and infrared measurements of Martian atmospheric temperatures: Implications for short-term climate variability. Journal of Geophysical Research, 1998, 103, 5911-5918.	3.3	19
49	General circulation models of the dynamics of Pluto's volatile transport on the eve of the New Horizons encounter. Icarus, 2015, 254, 306-323.	2.5	17
50	Large Eddy Simulations of the Dusty Martian Convective Boundary Layer With MarsWRF. Journal of Geophysical Research E: Planets, 2021, 126, e2020JE006752.	3.6	17
51	Constraints on Mars' recent equatorial wind regimes from layered deposits and comparison with general circulation model results. Icarus, 2014, 230, 81-95.	2.5	15
52	Replication of the historic record of martian global dust storm occurrence in an atmospheric general circulation model. Icarus, 2019, 317, 197-208.	2.5	12
53	Curvilinear features in the southern hemisphere observed by Mars Global Surveyor Mars Orbiter Camera. Icarus, 2011, 215, 242-252.	2.5	11
54	Gravity Wave Observations by the Mars Science Laboratory REMS Pressure Sensor and Comparison With Mesoscale Atmospheric Modeling With MarsWRF. Journal of Geophysical Research E: Planets, 2021, 126, e2021JE006907.	3.6	11

#	Article	IF	CITATIONS
55	Angular momentum conservation in a simplified Venus General Circulation Model. Icarus, 2012, 221, 1173-1176.	2.5	7
56	Sensitivity of simulated Martian atmospheric temperature to prescribed dust opacity distribution: Comparison of model results with reconstructed data from Mars Exploration Rover missions. Journal of Geophysical Research E: Planets, 2015, 120, 2002-2019.	3.6	7
57	Mars: The next steps. Eos, 2000, 81, 302.	0.1	1
