#	ARTICLE	IF	CITATIONS
1	Coral decline threatens fish biodiversity in marine reserves. Proceedings of the National Academy of Sciences of the United States of America, 2004, 101, 8251-8253.	3.3	751
2	Near-future carbon dioxide levels alter fish behaviour by interfering with neurotransmitter function. Nature Climate Change, 2012, 2, 201-204.	8.1	487
3	Replenishment of fish populations is threatened by ocean acidification. Proceedings of the National Academy of Sciences of the United States of America, 2010, 107, 12930-12934.	3.3	399
4	Rapid transgenerational acclimation of a tropical reef fish to climate change. Nature Climate Change, 2012, 2, 30-32.	8.1	368
5	Comparison of field methods for measuring surface topography and their associations with a tropical reef fish assemblage. Marine Ecology - Progress Series, 1994, 112, 87-96.	0.9	270
6	Anthropogenic noise increases fish mortality by predation. Nature Communications, 2016, 7, 10544.	5.8	253
7	Parental environment mediates impacts of increased carbon dioxide on a coral reef fish. Nature Climate Change, 2012, 2, 858-861.	8.1	245
8	The Biology, Behavior, and Ecology of the Pelagic, Larval Stage of Coral Reef Fishes. , 2002, , 171-199.		225
9	Effects of elevated water temperature and food availability on the reproductive performance of a coral reef fish. Marine Ecology - Progress Series, 2010, 401, 233-243.	0.9	190
10	BEHAVIORALLY INDUCED MATERNAL STRESS IN A FISH INFLUENCES PROGENY QUALITY BY A HORMONAL MECHANISM. Ecology, 1998, 79, 1873-1883.	1.5	186
11	Impaired learning of predators and lower prey survival under elevated $\text{CO}_2$ : a consequence of neurotransmitter interference. Global Change Biology, 2014, 20, 515-522.	4.2	180
12	Larval growth predicts the recruitment success of a coral reef fish. Oecologia, 2002, 131, 521-525.	0.9	173
13	Elevated carbon dioxide affects behavioural lateralization in a coral reef fish. Biology Letters, 2012, 8, 78-81.	1.0	171
14	Experimental test of the effect of maternal hormones on larval quality of a coral reef fish. Oecologia, 1999, 118, 412-422.	0.9	162
15	Intragenetic variation in antipredator responses of coral reef fishes affected by ocean acidification: implications for climate change projections on marine communities. Global Change Biology, 2011, 17, 2980-2986.	4.2	161
16	Selective predation for low body condition at the larval-juvenile transition of a coral reef fish. Oecologia, 2004, 139, 23-29.	0.9	160
17	Ocean Acidification Affects Prey Detection by a Predatory Reef Fish. PLoS ONE, 2011, 6, e22736.	1.1	157
18	Acclimation to predicted ocean warming through developmental plasticity in a tropical reef fish. Global Change Biology, 2011, 17, 1712-1719.	4.2	156

#	ARTICLE	IF	CITATIONS
19	Impact of global warming and rising CO2 levels on coral reef fishes: what hope for the future?. Journal of Experimental Biology, 2012, 215, 3865-3873.	0.8	152
20	Putting prey and predator into the CO2 equation - qualitative and quantitative effects of ocean acidification on predator-prey interactions. Ecology Letters, 2011, 14, 1143-1148.	3.0	150
21	?Sublethal effects of coral bleaching on an obligate coral feeding butterflyfish?. Coral Reefs, 2004, 23, 352-356.	0.9	148
22	Microstructure of settlement-marks in the otoliths of tropical reef fishes. Marine Biology, 1999, 134, 29-41.	0.7	146
23	Larval growth history determines juvenile growth and survival in a tropical marine fish. Oikos, 2004, 106, 225-242.	1.2	137
24	Effects of elevated CO2 on fish behaviour undiminished by transgenerational acclimation. Nature Climate Change, 2014, 4, 1086-1089.	8.1	131
25	Habitat choice, recruitment and the response of coral reef fishes to coral degradation. Oecologia, 2007, 153, 727-737.	0.9	128
26	Glimpse into guts: overview of the feeding of larvae of tropical shorefishes. Marine Ecology - Progress Series, 2007, 339, 243-257.	0.9	128
27	MOTHERS MATTER: CROWDING LEADS TO STRESSED MOTHERS AND SMALLER OFFSPRING IN MARINE FISH. Ecology, 2006, 87, 1104-1109.	1.5	127
28	Survival against the odds: ontogenetic changes in selective pressure mediate growth-mortality trade-offs in a marine fish. Proceedings of the Royal Society B: Biological Sciences, 2007, 274, 1575-1582.	1.2	122
29	Estimating total abundance of a large temperate-reef fish using visual strip-transects. Marine Biology, 1987, 96, 469-478.	0.7	119
30	Marine mollusc predator-escape behaviour altered by near-future carbon dioxide levels. Proceedings of the Royal Society B: Biological Sciences, 2014, 281, 20132377.	1.2	117
31	New genes that extend <i>Caenorhabditis elegans</i> lifespan in response to reproductive signals. Aging Cell, 2012, 11, 192-202.	3.0	115
32	Learn and live: predator experience and feeding history determines prey behaviour and survival. Proceedings of the Royal Society B: Biological Sciences, 2012, 279, 2091-2098.	1.2	113
33	Effects of Ocean Acidification on Learning in Coral Reef Fishes. PLoS ONE, 2012, 7, e31478.	1.1	111
34	Post-settlement transition in coral reef fishes: overlooked complexity in niche shifts. Marine Ecology - Progress Series, 1997, 153, 247-257.	0.9	110
35	Effects of ocean acidification on visual risk assessment in coral reef fishes. Functional Ecology, 2012, 26, 553-558.	1.7	107
36	Aerobic scope predicts dominance during early life in a tropical damselfish. Functional Ecology, 2014, 28, 1367-1376.	1.7	104

#	ARTICLE	IF	CITATIONS
37	Parental effects improve escape performance of juvenile reef fish in a high-CO <sub>2</sub> world. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2014, 281, 20132179.	1.2	103
38	Comparative study of metamorphosis in tropical reef fishes. <i>Marine Biology</i> , 2002, 141, 841-853.	0.7	100
39	Not worth the risk: apex predators suppress herbivory on coral reefs. <i>Oikos</i> , 2014, 123, 829-836.	1.2	98
40	Elevated CO <sub>2</sub> Affects Predator-Prey Interactions through Altered Performance. <i>PLoS ONE</i> , 2013, 8, e58520.	1.1	96
41	Spatial and temporal validation of settlement-marks in the otoliths of tropical reef fishes. <i>Marine Ecology - Progress Series</i> , 1997, 153, 259-271.	0.9	90
42	The Somatic Reproductive Tissues of <i>C. elegans</i> Promote Longevity through Steroid Hormone Signaling. <i>PLoS Biology</i> , 2010, 8, e1000468.	2.6	85
43	Crucial knowledge gaps in current understanding of climate change impacts on coral reef fishes. <i>Journal of Experimental Biology</i> , 2010, 213, 894-900.	0.8	82
44	Consumption of coral propagules after mass spawning enhances larval quality of damselfish through maternal effects. <i>Oecologia</i> , 2003, 136, 37-45.	0.9	80
45	Motorboat noise impacts parental behaviour and offspring survival in a reef fish. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2017, 284, 20170143.	1.2	79
46	Size-selectivity of predatory reef fish on juvenile prey. <i>Marine Ecology - Progress Series</i> , 2010, 399, 273-283.	0.9	79
47	Predation risk assessment by olfactory and visual cues in a coral reef fish. <i>Coral Reefs</i> , 2008, 27, 105-113.	0.9	78
48	To fear or to feed: the effects of turbidity on perception of risk by a marine fish. <i>Biology Letters</i> , 2011, 7, 811-813.	1.0	77
49	Habitat degradation negatively affects auditory settlement behavior of coral reef fishes. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2018, 115, 5193-5198.	3.3	77
50	Maternal condition influences phenotypic selection on offspring. <i>Journal of Animal Ecology</i> , 2007, 76, 174-182.	1.3	74
51	Feeling the heat: the effect of acute temperature changes on predator-prey interactions in coral reef fish. , 2015, 3, cov011.		74
52	Effects of feeding history on the growth characteristics of a reef fish at settlement. <i>Marine Biology</i> , 1992, 114, 165-173.	0.7	74
53	Ontogeny of diet shifts by a microcarnivorous fish, <i>Cheilodactylus spectabilis</i> : relationship between feeding mechanics, microhabitat selection and growth. <i>Marine Biology</i> , 1998, 132, 9-20.	0.7	71
54	Interactive effects of ocean acidification and rising sea temperatures alter predation rate and predator selectivity in reef fish communities. <i>Global Change Biology</i> , 2015, 21, 1848-1855.	4.2	71

#	ARTICLE	IF	CITATIONS
55	Reproductive Acclimation to Increased Water Temperature in a Tropical Reef Fish. PLoS ONE, 2014, 9, e97223.	1.1	70
56	Development and changes at settlement in the barbel structure of the reef fish, <i>Upeneus tragula</i> (Mullidae). Environmental Biology of Fishes, 1993, 37, 269-282.	0.4	69
57	Fish feeding on mobile benthic invertebrates: influence of spatial variability in habitat associations. Marine Biology, 1995, 121, 627-637.	0.7	69
58	Parental condition affects early life-history of a coral reef fish. Journal of Experimental Marine Biology and Ecology, 2008, 360, 109-116.	0.7	69
59	Background level of risk determines how prey categorize predators and non-predators. Proceedings of the Royal Society B: Biological Sciences, 2014, 281, 20140355.	1.2	69
60	Parental effects on offspring life histories: when are they important?. Biology Letters, 2009, 5, 262-265.	1.0	68
61	Influence of habitat degradation on fish replenishment. Coral Reefs, 2010, 29, 537-546.	0.9	68
62	Background level of risk and the survival of predator-naive prey: can neophobia compensate for predator naivety in juvenile coral reef fishes?. Proceedings of the Royal Society B: Biological Sciences, 2015, 282, 20142197.	1.2	68
63	Variability in age and size at settlement of the tropical goatfish <i>Upeneus trayula</i> (Mullidae) in the northern Great Barrier Reef lagoon. Marine Ecology - Progress Series, 1994, 103, 1-15.	0.9	68
64	High rate of prey consumption in a small predatory fish on coral reefs. Coral Reefs, 2012, 31, 909-918.	0.9	67
65	Habitat selection and aggression as determinants of spatial segregation among damselfish on a coral reef. Coral Reefs, 2001, 20, 289-298.	0.9	66
66	Numerical and Energetic Processes in the Ecology of Coral Reef Fishes. , 2002, , 221-238.		65
67	Coral Reef Fish Rapidly Learn to Identify Multiple Unknown Predators upon Recruitment to the Reef. PLoS ONE, 2011, 6, e15764.	1.1	64
68	O2 replenishment to fish nests: males adjust brood care to ambient conditions and brood development. Behavioral Ecology, 2005, 16, 389-397.	1.0	63
69	Hormonally mediated maternal effects shape offspring survival potential in stressful environments. Oecologia, 2009, 160, 657-665.	0.9	63
70	Climate change and the performance of larval coral reef fishes: the interaction between temperature and food availability. , 2013, 1, cot024-cot024.		63
71	The role of chemical alarm signals in facilitating learned recognition of novel chemical cues in a coral reef fish. Animal Behaviour, 2005, 69, 51-57.	0.8	62
72	Diel CO2 cycles reduce severity of behavioural abnormalities in coral reef fish under ocean acidification. Scientific Reports, 2017, 7, 10153.	1.6	62

#	ARTICLE	IF	CITATIONS
73	Behaviourally Mediated Phenotypic Selection in a Disturbed Coral Reef Environment. PLoS ONE, 2009, 4, e7096.	1.1	62
74	Ontogeny of diet changes in a tropical benthic carnivorous fish, <i>Parupeneus barberinus</i> (Mullidae): relationship between foraging behaviour, habitat use, jaw size, and prey selection. Marine Biology, 2001, 138, 1099-1113.	0.7	61
75	It Pays to Be Pushy: Intracohort Interference Competition between Two Reef Fishes. PLoS ONE, 2012, 7, e42590.	1.1	61
76	Screening for Suicidal Ideation and Attempts among Emergency Department Medical Patients: Instrument and Results from the <scp>P</scp>sychiatric <scp>E</scp>mergency <scp>R</scp>esearch <scp>C</scp>ollaboration. Suicide and Life-Threatening Behavior, 2013, 43, 313-323.	0.9	61
77	Shoaling reduces metabolic rate in a gregarious coral reef fish species. Journal of Experimental Biology, 2016, 219, 2802-2805.	0.8	61
78	Coral degradation and the structure of tropical reef fish communities. Marine Ecology - Progress Series, 2007, 333, 243-248.	0.9	61
79	The basics of acidification: baseline variability of pH on Australian coral reefs. Marine Biology, 2010, 157, 1849-1856.	0.7	60
80	Long-term cleaner fish presence affects growth of a coral reef fish. Biology Letters, 2011, 7, 863-865.	1.0	60
81	A Comparison of Measures of Boldness and Their Relationships to Survival in Young Fish. PLoS ONE, 2013, 8, e68900.	1.1	60
82	SOCIAL FACILITATION OF SELECTIVE MORTALITY. Ecology, 2007, 88, 1562-1570.	1.5	58
83	Shifting from Right to Left: The Combined Effect of Elevated CO <sub>2</sub> and Temperature on Behavioural Lateralization in a Coral Reef Fish. PLoS ONE, 2014, 9, e87969.	1.1	58
84	Compensating in the wild: is flexible growth the key to early juvenile survival?. Oikos, 2007, 116, 111-120.	1.2	57
85	Location influences size-selective predation on newly settled reef fish. Marine Ecology - Progress Series, 2006, 317, 203-209.	0.9	57
86	Environmental influences on larval duration, growth and magnitude of settlement of a coral reef fish. Marine Biology, 2005, 147, 291-300.	0.7	55
87	Smell, learn and live: The role of chemical alarm cues in predator learning during early life history in a marine fish. Behavioural Processes, 2010, 83, 299-305.	0.5	54
88	Increased <scp><scp>CO<sub>2</sub></scp></scp> stimulates reproduction in a coral reef fish. Global Change Biology, 2013, 19, 3037-3045.	4.2	53
89	Degradation of chemical alarm cues and assessment of risk throughout the day. Ecology and Evolution, 2013, 3, 3925-3934.	0.8	51
90	Friend or foe? The role of latent inhibition in predator and non-predator labelling by coral reef fishes. Animal Cognition, 2011, 14, 707-714.	0.9	50

#	ARTICLE	IF	CITATIONS
91	The effect of climate change on the escape kinematics and performance of fishes: implications for future predator-prey interactions. , 2019, 7, co2078.		50
92	Indirect effects of an ectoparasite reduce successful establishment of a damselfish at settlement. Functional Ecology, 2011, 25, 586-594.	1.7	49
93	Acoustic enrichment can enhance fish community development on degraded coral reef habitat. Nature Communications, 2019, 10, 5414.	5.8	49
94	Prey experience of predation influences mortality rates at settlement in a coral reef fish, Pomacentrus amboinensis. Journal of Fish Biology, 2006, 68, 969-974.	0.7	48
95	Resource use and impact of three herbivorous damselfishes on coral reef communities. Marine Ecology - Progress Series, 2006, 328, 215-224.	0.9	48
96	Temperature-induced shifts in selective pressure at a critical developmental transition. Oecologia, 2007, 152, 219-225.	0.9	46
97	Influence of prey body characteristics and performance on predator selection. Oecologia, 2009, 159, 401-413.	0.9	46
98	Ocean acidification reverses competition for space as habitats degrade. Scientific Reports, 2013, 3, 3280.	1.6	46
99	Influence of cortisol on developmental rhythms during embryogenesis in a tropical damselfish. The Journal of Experimental Zoology, 2002, 293, 456-466.	1.4	45
100	Chemical Alarm Cues Are Conserved within the Coral Reef Fish Family Pomacentridae. PLoS ONE, 2012, 7, e47428.	1.1	45
101	Active in the sac: damselfish embryos use innate recognition of odours to learn predation risk before hatching. Animal Behaviour, 2015, 103, 1-6.	0.8	45
102	Boat noise impacts risk assessment in a coral reef fish but effects depend on engine type. Scientific Reports, 2018, 8, 3847.	1.6	45
103	Warming has a greater effect than elevated CO <sub>2</sub> on predator-prey interactions in coral reef fish. Proceedings of the Royal Society B: Biological Sciences, 2017, 284, 20170784.	1.2	44
104	Generalization of learned predator recognition in coral reef ecosystems: how cautious are damselfish?. Functional Ecology, 2013, 27, 299-304.	1.7	43
105	Behavioural measures determine survivorship within the hierarchy of whole-organism phenotypic traits. Functional Ecology, 2018, 32, 958-969.	1.7	43
106	Lethal effects of habitat degradation on fishes through changing competitive advantage. Proceedings of the Royal Society B: Biological Sciences, 2012, 279, 3899-3904.	1.2	42
107	In hot water: sustained ocean warming reduces survival of a low-latitude coral reef fish. Marine Biology, 2018, 165, 1.	0.7	42
108	At odds with the group: changes in lateralization and escape performance reveal conformity and conflict in fish schools. Proceedings of the Royal Society B: Biological Sciences, 2016, 283, 20161127.	1.2	41
