#	ARTICLE	IF	CITATIONS
1	Plasma metabolites associated with colorectal cancer: A discovery–replication strategy. International Journal of Cancer, 2019, 145, 1221-1231.	5.1	42
2	Plasma metabolites associated with colorectal cancer stage: Findings from an international consortium. International Journal of Cancer, 2020, 146, 3256-3266.	5.1	26
3	Circulating tryptophan metabolites and risk of colon cancer: Results from case–control and prospective cohort studies. International Journal of Cancer, 2021, 149, 1659-1669.	5.1	22
4	Functional Polymorphisms in DNA Repair Genes Are Associated with Sporadic Colorectal Cancer Susceptibility and Clinical Outcome. International Journal of Molecular Sciences, 2019, 20, 97.	4.1	20
5	Untargeted Metabolomics Reveals Major Differences in the Plasma Metabolome between Colorectal Cancer and Colorectal Adenomas. Metabolites, 2021, 11, 119.	2.9	20
6	One-carbon metabolites, B vitamins and associations with systemic inflammation and angiogenesis biomarkers among colorectal cancer patients: results from the ColoCare Study. British Journal of Nutrition, 2020, 123, 1187-1200.	2.3	11
7	Circulating B-vitamin biomarkers and B-vitamin supplement use in relation to quality of life in patients with colorectal cancer: results from the FOCUS consortium. American Journal of Clinical Nutrition, 2021, 113, 1468-1481.	4.7	11
8	Circulating Folate and Folic Acid Concentrations: Associations With Colorectal Cancer Recurrence and Survival. JNCI Cancer Spectrum, 2020, 4, pkaa051.	2.9	9
9	Targeted Plasma Metabolic Profiles and Risk of Recurrence in Stage II and III Colorectal Cancer Patients: Results from an International Cohort Consortium. Metabolites, 2021, 11, 129.	2.9	6
10	Genome-wide association study of germline copy number variations reveals an association with prostate cancer aggressiveness. Mutagenesis, 2020, 35, 283-290.	2.6	3
11	Higher vitamin B6 status is associated with improved survival among patients with stage I–III colorectal cancer. American Journal of Clinical Nutrition, 2022, 116, 303-313.	4.7	2
