#	ARTICLE	IF	CITATIONS
1	Minimal sample size in balanced ANOVA models of crossed, nested, and mixed classifications. Communications in Statistics - Theory and Methods, 2023, 52, 1728-1743.	1.0	2
2	An Empirical Approach That a Two-Stage Procedure is Better Than Bechhofer's Approach. Journal of Statistical Theory and Practice, 2020, 14, 1.	0.5	0
3	Determination of Minimum and Maximum Experimental Size in One-, Two- and Three-way ANOVA with Fixed and Mixed Models by R. Journal of Statistical Theory and Practice, 2020, 14, 1.	0.5	2
4	An Optimal Two-Stage Procedure to Select the Best out of a Normal Population. Journal of Statistical Theory and Practice, 2019, 13, 1.	0.5	4
5	Determination of the Optimal Size of Subsamples for Testing a Correlation Coefficient by a Sequential Triangular Test. Springer Proceedings in Mathematics and Statistics, 2018, , 315-328.	0.2	1
6	Robustness of the test of a product moment correlation coefficient under nonnormality. Journal of Statistical Theory and Practice, 2017, 11, 493-502.	0.5	0
7	How robust is the modified sequential triangular test of a correlation coefficient against nonnormality of the basic variables?. Journal of Statistical Theory and Practice, 2017, 11, 393-401.	0.5	0
8	A sequential triangular test of a correlation coefficient's null-hypothesis: $H_0: \rho \leq \rho_0$ vs $H_1: \rho > \rho_0$. Statistical Papers, 2015, 56, 689-699.	1.2	7
9	Determination of the size of a balanced experiment in mixed ANOVA models using the modified approximate F -test. Journal of Statistical Planning and Inference, 2005, 132, 183-201.	0.6	6
