|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Impacts of Hurricane Dorian on the Bahamas: field observations of hazard intensity and performance of the built environment. Coastal Engineering Journal, 2022, 64, 3-23.                                     | 1.9 | 3         |
| 2  | StEER: A Community-Centered Approach to Assessing the Performance of the Built Environment after Natural Hazard Events. Frontiers in Built Environment, 2021, 7, .                                            | 2.3 | 15        |
| 3  | Automation and New Capabilities in the University of Florida NHERI Boundary Layer Wind Tunnel. Frontiers in Built Environment, 2020, 6, .                                                                     | 2.3 | 15        |
| 4  | Wind Resistance and Fragility Functions for Wood-Framed Wall Sheathing Panels in Low-Rise Residential Construction. Journal of Structural Engineering, 2020, 146, 04020139.                                   | 3.4 | 2         |
| 5  | Engineering-Based Tornado Damage Assessment: Numerical Tool for Assessing Tornado Vulnerability of Residential Structures. Frontiers in Built Environment, 2020, 6, .                                         | 2.3 | 5         |
| 6  | Hurricane Michael in the Area of Mexico Beach, Florida. Journal of Waterway, Port, Coastal and Ocean Engineering, 2020, 146, .                                                                                | 1.2 | 21        |
| 7  | Tornado-Induced and Straight-Line Wind Loads on a Low-Rise Building With Consideration of Internal Pressure. Frontiers in Built Environment, 2020, 6, .                                                       | 2.3 | 15        |
| 8  | Hurricanes Irma and Maria post-event survey in US Virgin Islands. Coastal Engineering Journal, 2019, 61, 121-134.                                                                                             | 1.9 | 30        |
| 9  | Epistemic Uncertainties in Fragility Functions Derived from Post-Disaster Damage Assessments. ASCE-ASME Journal of Risk and Uncertainty in Engineering Systems, Part A: Civil Engineering, 2018, 4, 04018015. | 1.7 | 10        |
| 10 | Overview of Damage Observed in Regional Construction during the Passage of Hurricane Irma over the State of Florida. , 2018, , .                                                                              |     | 12        |
| 11 | Overview and Field Data. , 2018, , 3-17.                                                                                                                                                                      |     | 0         |
| 12 | Field reconnaissance and overview of the impact of Hurricane Matthew on Haiti's Tiburon Peninsula. Natural Hazards, 2018, 94, 627-653.                                                                        | 3.4 | 11        |
| 13 | Linking Building Attributes and Tornado Vulnerability Using a Logistic Regression Model. Natural Hazards Review, 2018, 19, 04018017.                                                                          | 1.5 | 10        |
| 14 | Empirical Approach to Evaluating the Tornado Fragility of Residential Structures. Journal of Structural Engineering, 2017, 143, .                                                                             | 3.4 | 32        |
| 15 | Development of Empirically-Based Fragilities of Residential Damage in the 2011 Joplin, Missouri, Tornado. , 2016, , .                                                                                         |     | 4         |
| 16 | An Engineering-Based Approach to Predict Tornado-Induced Damage. , 2016, , 311-335.                                                                                                                           |     | 13        |
| 17 | A FIELD STUDY SETUP OF FOUR HOMES HAVING NON-VENTILATED AND SEMI-CONDITIONED SEALED ATTICS. Journal of Green Building, 2016, 11, 1-20.                                                                        | 0.8 | 2         |
| 18 | An estimate of tornado loads on a wood-frame building using database-assisted design methodology. Journal of Wind Engineering and Industrial Aerodynamics, 2015, 138, 27-35.                                  | 3.9 | 14        |

| #  | ARTICLE                                                                                                                                                                                  | IF  | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Comparison of two methods of near-surface wind speed estimation in the 22 May, 2011 Joplin, Missouri Tornado. Journal of Wind Engineering and Industrial Aerodynamics, 2015, 138, 87-97. | 3.9 | 39        |
| 20 | A vulnerability assessment tool for residential structures and extreme wind events. , 2015, , .                                                                                          |     | 1         |
| 21 | Tornado Damage and Impacts on Nuclear Facilities in the United States. Journal of Wind Engineering, 2015, 40, 91-100.                                                                    | 0.2 | 4         |
| 22 | Development of empirically-based fragilities of residential damage in the 2011 Joplin, Missouri tornado. , 2015, , .                                                                     |     | 0         |
| 23 | Failure Progression Analysis of Observed Residential Structural Damage within a Tornado Wind Field. , 2014, , .                                                                          |     | 5         |
| 24 | Wind Uplift Resistance of Artificially and Naturally Aged Asphalt Shingles. Journal of Architectural Engineering, 2014, 20, .                                                            | 1.6 | 6         |
| 25 | In Situ Nail Withdrawal Strengths in Wood Roof Structures. Journal of Structural Engineering, 2014, 140, .                                                                               | 3.4 | 5         |
| 26 | Wind Uplift Capacity of Foam-Retrofitted Roof Sheathing Panels Subjected to Rainwater Intrusion. Journal of Architectural Engineering, 2014, 20, .                                       | 1.6 | 5         |
| 27 | The influence of unsealing on the wind resistance of asphalt shingles. Journal of Wind Engineering and Industrial Aerodynamics, 2014, 130, 30-40.                                        | 3.9 | 11        |
| 28 | A comparison of methods to estimate peak wind loads on buildings. Journal of Wind Engineering and Industrial Aerodynamics, 2014, 126, 11-23.                                             | 3.9 | 99        |
| 29 | Using Tornado Damage Surveys to Improve Laboratory Tornado Simulations. , 2014, , .                                                                                                      |     | 2         |
| 30 | Anchor Bolt Steel Strength in Annular Stand-Off Base Plate Connections. Transportation Research Record, 2014, 2406, 23-31.                                                               | 1.9 | 3         |
| 31 | Probabilistic modeling of wind pressure on low-rise buildings. Journal of Wind Engineering and Industrial Aerodynamics, 2013, 114, 18-26.                                                | 3.9 | 90        |
| 32 | Using instrumented small-scale models to study structural load paths in wood-framed buildings. Engineering Structures, 2013, 54, 47-56.                                                  | 5.3 | 10        |
| 33 | Dual-Objective-Based Tornado Design Philosophy. Journal of Structural Engineering, 2013, 139, 251-263.                                                                                   | 3.4 | 59        |
| 34 | Residential Damage Patterns Following the 2011 Tuscaloosa, AL and Joplin, MO Tornadoes. Journal of Disaster Research, 2013, 8, 1061-1067.                                                | 0.7 | 35        |
| 35 | Making the Case for Improved Structural Design: Tornado Outbreaks of 2011. Leadership and Management in Engineering, 2012, 12, 254-270.                                                  | 0.3 | 59        |
| 36 | Building Damage Observations and EF Classifications from the Tuscaloosa, AL, and Joplin, MO, Tornadoes. , 2012, , .                                                                      |     | 17        |

| #  | ARTICLE                                                                                                                                                                                  | IF  | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 37 | GIS for the Geo-Referenced Analysis and Rapid Dissemination of Forensic Evidence Collected in the Aftermath of the Tuscaloosa Tornado. , 2012, , .                                       |     | 10        |
| 38 | In Situ Nail Withdrawal Strengths in Wood Residential Roofs. , 2012, , .                                                                                                                 |     | 0         |
| 39 | Probabilistic procedure for wood-frame roof sheathing panel debris impact to windows in hurricanes. Engineering Structures, 2012, 35, 178-187.                                           | 5.3 | 14        |
| 40 | Investigation of the Wind Resistance of Asphalt Shingles. , 2012, , .                                                                                                                    |     | 5         |
| 41 | Dual Objective Design Philosophy for Tornado Engineering. , 2012, , .                                                                                                                    |     | 1         |
| 42 | Wind Uplift Capacity of Foam-Retrofitted Roof Sheathing Subjected to Water Leaks. , 2012, , .                                                                                            |     | 0         |
| 43 | Estimation of Peak Wind Pressure on a Low-Rise Building. , 2012, , .                                                                                                                     |     | 2         |
| 44 | The Florida Coastal Monitoring Program (FCMP): A review. Journal of Wind Engineering and Industrial Aerodynamics, 2011, 99, 979-995.                                                     | 3.9 | 52        |
| 45 | Database-assisted design methodology to predict wind-induced structural behavior of a light-framed wood building. Engineering Structures, 2011, 33, 674-684.                             | 5.3 | 25        |
| 46 | Modeling System Effects and Structural Load Paths in a Wood-Framed Structure. Journal of Architectural Engineering, 2011, 17, 134-143.                                                   | 1.6 | 29        |
| 47 | Wind-Uplift Capacity of Residential Wood Roof-Sheathing Panels Retrofitted with Insulating Foam Adhesive. Journal of Architectural Engineering, 2011, 17, 144-154.                       | 1.6 | 36        |
| 48 | Influence of Edge Restraint on Clip Fastener Loads of Standing Seam Metal Roof Panels. Journal of ASTM International, 2011, 8, 1-16.                                                     | 0.2 | 1         |
| 49 | Using a Portable Nail Extractor to Determine Roof Nail Withdrawal Capacity of Existing Residential Structures. , 2010, , .                                                               |     | 0         |
| 50 | Advancing Performance Based Design through Full-Scale Simulation of Wind, Water, and Structural Interaction. , 2010, , .                                                                 |     | 0         |
| 51 | Experimentally Determined Structural Load Paths in a 1/3-Scale Model of Light-Framed Wood, Rectangular Building. , 2010, , .                                                             |     | 2         |
| 52 | On the Job versus Graduate School Training of Forensic Engineersâ€™ An Instructor and Professional Engineerâ€™s View. Journal of Performance of Constructed Facilities, 2010, 24, 78-86. | 2.0 | 11        |
| 53 | Wind Tunnel Studies on Sawtooth and Monosloped Roofs. Journal of Structural Engineering, 2010, 136, 1161-1171.                                                                           | 3.4 | 8         |
| 54 | Engineering Perspectives on Reducing Hurricane Damage to Housing in CARICOM Caribbean Islands. Natural Hazards Review, 2010, 11, 140-150.                                                | 1.5 | 27        |

| #  | ARTICLE                                                                                                                                                                                               | IF  | CITATIONS |
