| #  | Article  | IF  | CITATIONS |
|----|--|-----|-----------|
| 1  | Increasing Daytime Stability Enhances Downslope Moisture Transport in the Subcanopy of an<br>Evenâ€Aged Conifer Forest in Western Oregon, USA. Journal of Geophysical Research D: Atmospheres,<br>2022, 127, . | 1.2 | 5         |
| 2  | Canopy wetting patterns and the determinants of dry season dewfall in an old growth Douglas-fir canopy. Agricultural and Forest Meteorology, 2022, 323, 109069.  | 1.9 | 1         |
| 3  | Forest restoration and hydrology. Forest Ecology and Management, 2022, 520, 120342.  | 1.4 | 18        |
| 4  | Synergies Among Environmental Science Research and Monitoring Networks: A Research Agenda.<br>Earth's Future, 2021, 9, e2020EF001631.  | 2.4 | 5         |
| 5  | Fifty years of runoff response to conversion of oldâ€growth forest to planted forest in the H. J.<br>Andrews Forest, Oregon, <scp>USA</scp> . Hydrological Processes, 2021, 35, e14168.                        | 1.1 | 11        |
| 6  | Longâ€ŧerm hydrology and aquatic biogeochemistry data from H. J. Andrews Experimental Forest,<br>Cascade Mountains, Oregon. Hydrological Processes, 2021, 35, e14187.  | 1.1 | 10        |
| 7  | Forest operations, tree species composition and decline in rainfall explain runoff changes in the<br>Nacimiento experimental catchments, south central Chile. Hydrological Processes, 2021, 35, e14257.        | 1.1 | 9         |
| 8  | Influence of anthropogenic greenhouse gases on the propensity for nocturnal cold-air drainage.<br>Theoretical and Applied Climatology, 2021, 146, 231-241.   | 1.3 | 1         |
| 9  | Streamflow response to native forest restoration in former <i>Eucalyptus</i> plantations in south central Chile. Hydrological Processes, 2021, 35, e14270.   | 1.1 | 9         |
| 10 | Long-Term Dynamics of the LTER Program: Evolving Definitions and Composition. Archimedes, 2021, , 55-79.   | 0.3 | 2         |
| 11 | Temperature Gradients and Inversions in a Forested Cascade Range Basin: Synoptic―to Localâ€5cale<br>Controls. Journal of Geophysical Research D: Atmospheres, 2020, 125, e2020JD032686.                        | 1.2 | 13        |
| 12 | River management response to multiâ€decade changes in timing of reservoir inflows, Columbia River<br>Basin, <scp>USA</scp> . Hydrological Processes, 2020, 34, 4814-4830.                                      | 1.1 | 11        |
| 13 | Long-term hydrological response to forest harvest during seasonal low flow: Potential implications for current forest practices. Science of the Total Environment, 2020, 730, 138926.                          | 3.9 | 32        |
| 14 | Long-term effects of forest harvesting on summer low flow deficits in the Coast Range of Oregon.<br>Journal of Hydrology, 2020, 585, 124749.   | 2.3 | 32        |
| 15 | Effects of an engineered log jam on spatial variability of the flow field across submergence depths.<br>River Research and Applications, 2020, 36, 383-397.  | 0.7 | 5         |
| 16 | Climate, Landforms, and Geology Affect Baseflow Sources in a Mountain Catchment. Water Resources<br>Research, 2019, 55, 5238-5254.   | 1.7 | 42        |
| 17 | Landscape patterns and diversity of meadow plants and flower-visitors in a mountain landscape.<br>Landscape Ecology, 2019, 34, 997-1014.   | 1.9 | 13        |
| 18 | Forest harvest legacies control dissolved organic carbon export in small watersheds, western<br>Oregon. Biogeochemistry, 2018, 140, 299-315.   | 1.7 | 24        |

JULIA ALLEN JONES

| #  | Article   | IF   | CITATIONS |
|----|---|------|-----------|
| 19 | Water sustainability and watershed storage. Nature Sustainability, 2018, 1, 378-379.  | 11.5 | 56        |
| 20 | Summer streamflow deficits from regenerating Douglasâ€fir forest in the Pacific Northwest, USA.<br>Ecohydrology, 2017, 10, e1790.   | 1.1  | 62        |
| 21 | Forests and water in South America. Hydrological Processes, 2017, 31, 972-980.  | 1.1  | 37        |
| 22 | Spatial models reveal the microclimatic buffering capacity of old-growth forests. Science Advances, 2016, 2, e1501392.  | 4.7  | 225       |
| 23 | Precipitation-snowmelt timing and snowmelt augmentation of large peak flow events, western<br>Cascades, Oregon. Water Resources Research, 2015, 51, 7649-7661.  | 1.7  | 31        |
| 24 | Changing forest water yields in response to climate warming: results from longâ€ŧerm experimental<br>watershed sites across North America. Global Change Biology, 2014, 20, 3191-3208.                          | 4.2  | 147       |
| 25 | Extinction debt in naturally contracting mountain meadows in the Pacific Northwest, USA: varying responses of plants and feeding guilds of nocturnal moths. Biodiversity and Conservation, 2014, 23, 2529-2544. | 1.2  | 13        |
| 26 | Trends in cation, nitrogen, sulfate and hydrogen ion concentrations in precipitation in the United<br>States and Europe from 1978 to 2010: a new look at an old problem. Biogeochemistry, 2013, 116, 303-334.   | 1.7  | 65        |
| 27 | Climate and Streamflow Trends in the Columbia River Basin: Evidence for Ecological and Engineering<br>Resilience to Climate Change. Atmosphere - Ocean, 2013, 51, 436-455.                                      | 0.6  | 24        |
| 28 | Ecosystem Processes and Human Influences Regulate Streamflow Response to Climate Change at<br>Long-Term Ecological Research Sites. BioScience, 2012, 62, 390-404.   | 2.2  | 149       |
| 29 | Spatio-temporal patterns of tree establishment are indicative of biotic interactions during early invasion of a montane meadow. Plant Ecology, 2012, 213, 555-568.  | 0.7  | 22        |
| 30 | A comparison of annual transpiration and productivity in monoculture and mixed-species Douglas-fir and red alder stands. Forest Ecology and Management, 2011, 262, 2263-2270.                                   | 1.4  | 38        |
| 31 | Hydrologic responses to climate change: considering geographic context and alternative hypotheses.<br>Hydrological Processes, 2011, 25, 1996-2000.  | 1.1  | 45        |
| 32 | Extreme flood sensitivity to snow and forest harvest, western Cascades, Oregon, United States.<br>Water Resources Research, 2010, 46, .   | 1.7  | 38        |
| 33 | Hydrologic effects of a changing forested landscape—challenges for the hydrological sciences.<br>Hydrological Processes, 2009, 23, 2699-2704.   | 1.1  | 33        |
| 34 | Climate variability, snow, and physiographic controls on storm hydrographs in small forested basins,<br>western Cascades, Oregon. Hydrological Processes, 2008, 22, 4949-4964.                                  | 1.1  | 19        |
| 35 | Structural and compositional controls on transpiration in 40- and 450-year-old riparian forests in western Oregon, USA. Tree Physiology, 2004, 24, 481-491.   | 1.4  | 113       |
| 36 | Seasonal and successional streamflow response to forest cutting and regrowth in the northwest and eastern United States. Water Resources Research, 2004, 40, .  | 1.7  | 148       |

JULIA ALLEN JONES

| #  | Article   | IF  | CITATIONS |
|----|---|-----|-----------|
| 37 | Runoff production on forest roads in a steep, mountain catchment. Water Resources Research, 2003, 39, .   | 1.7 | 112       |
| 38 | Forest roads and geomorphic process interactions, Cascade Range, Oregon. Earth Surface Processes and Landforms, 2001, 26, 191-204.  | 1.2 | 204       |
| 39 | Hydrologic processes and peak discharge response to forest removal, regrowth, and roads in 10 small experimental basins, Western Cascades, Oregon. Water Resources Research, 2000, 36, 2621-2642. | 1.7 | 148       |
| 40 | Role of Light Availability and Dispersal in Exotic Plant Invasion along Roads and Streams in the H. J.<br>Andrews Experimental Forest, Oregon. Conservation Biology, 2000, 14, 64-75.             | 2.4 | 409       |
| 41 | Peak Flow Responses to Clear-Cutting and Roads in Small and Large Basins, Western Cascades, Oregon.<br>Water Resources Research, 1996, 32, 959-974.   | 1.7 | 384       |
| 42 | CHANNEL NETWORK EXTENSION BY LOGGING ROADS IN TWO BASINS, WESTERN CASCADES, OREGON.<br>Journal of the American Water Resources Association, 1996, 32, 1195-1207.                                  | 1.0 | 222       |
