#	Article	IF	Citations
1	The dynamics of oxidase activity during cultivation of basidiomycetes from the genus Trametes Fr Applied Biochemistry and Microbiology, 2006, 42, 558-563.	0.9	33
2	A two-stage technology for bacterial and chemical leaching of copper-zinc raw materials by Fe3+ ions with their subsequent regeneration by chemolithotrophic bacteria. Applied Biochemistry and Microbiology, 2009, 45, 56-60.	0.9	15
3	Title is missing!. Applied Biochemistry and Microbiology, 2003, 39, 82-86.	0.9	3
4	Respiration rate as a parameter for the process control of penicillin biosynthesis. Pharmaceutical Chemistry Journal, 1976, 10, 119-123.	0.8	1
5	Approximate economic criterion for evaluation of efficiency of nutrient medium composition in technical microbiology. Pharmaceutical Chemistry Journal, 1967, 1, 360-361.	0.8	O
6	Fermentation process as subject for temperature regulation. Pharmaceutical Chemistry Journal, 1968, 2, 151-153.	0.8	0
7	Programming of experiments for the optimization of complex processes by means of orthogonal Latin squares. Pharmaceutical Chemistry Journal, 1968, 2, 51-55.	0.8	0
8	Possibilities of controlling foaming of culture fluids by varying the composition of the nutrient media. Pharmaceutical Chemistry Journal, 1969, 3, 652-654.	0.8	0
9	Conference on Directed Biosynthesis. Pharmaceutical Chemistry Journal, 1969, 3, 615-617.	0.8	0
10	Experimental apparatus for the study of processes of antibiotic biosynthesis. Pharmaceutical Chemistry Journal, 1970, 4, 453-459.	0.8	0
11	Prospects of the automation of the main technological processes in the chemical and pharmaceutical industry. Pharmaceutical Chemistry Journal, 1970, 4, 285-290.	0.8	0
12	Methods of planning experiments. Pharmaceutical Chemistry Journal, 1971, 5, 559-561.	0.8	0
13	Selection of aeration and stirring conditions in fermentation processes. Pharmaceutical Chemistry Journal, 1972, 6, 242-246.	0.8	0
14	Automation of the process of the initial purification of culture liquids in the production of antibiotics. Pharmaceutical Chemistry Journal, 1972, 6, 478-480.	0.8	0
15	Automatic pH regulation during streptomycin biosynthesis. Pharmaceutical Chemistry Journal, 1973, 7, 122-125.	0.8	0
16	Dissolved carbon dioxide as a control parameter in fermentation processes. Pharmaceutical Chemistry Journal, 1976, 10, 532-535.	0.8	0
17	Automatic monitoring of the partial pressure of dissolved carbon dioxide in fermentation processes. Pharmaceutical Chemistry Journal, 1976, 10, 263-266.	0.8	O
18	Relationship between the intensity of respiration and the rate of growth in the biosynthesis of penicillin. Pharmaceutical Chemistry Journal, 1976, 10, 1365-1370.	0.8	0

#	Article	IF	CITATIONS
19	Algorithm of the measurement and control of microconcentrations of carbohydrates in fermentation processes. Pharmaceutical Chemistry Journal, 1977, 11, 261-268.	0.8	O
20	Diffusion-impulse method for automatically measuring the partial pressure of dissolved gases. Pharmaceutical Chemistry Journal, 1979, 13, 87-92.	0.8	0
21	Automatic control of the partial pressure of dissolved carbon dioxide in the process of biosynthesis of tetracycline. Pharmaceutical Chemistry Journal, 1980, 14, 561-564.	0.8	O
22	Use of ion-selective electrodes for automatic control of concentration of ammonium nitorgen in culture liquors during antibiotic production. Pharmaceutical Chemistry Journal, 1981, 15, 199-203.	0.8	0
23	Use of gas-sensitive electrodes for the automatic measurement of the concentration of ammonium nitrogen in processes for the biosynthesis of antibiotics. Pharmaceutical Chemistry Journal, 1982, 16, 309-316.	0.8	0
