#	Article	IF	Citations
1	Naturalization and invasion of alien plants: concepts and definitions. Diversity and Distributions, 2000, 6, 93-107.	1.9	2,724
2	A proposed unified framework for biological invasions. Trends in Ecology and Evolution, 2011, 26, 333-339.	4.2	1,762
3	Novel ecosystems: theoretical and management aspects of the new ecological world order. Global Ecology and Biogeography, 2006, 15, 1-7.	2.7	1,528
4	What Attributes Make Some Plant Species More Invasive?. Ecology, 1996, 77, 1655-1661.	1.5	1,414
5	Effects of Invasive Alien Plants on Fire Regimes. BioScience, 2004, 54, 677.	2.2	1,193
6	Plant invasions â€“ the role of mutualisms. Biological Reviews, 2000, 75, 65-93.	4.7	1,092
7	Alien plants in checklists and floras: towards better communication between taxonomists and ecologists. Taxon, 2004, 53, 131-143.	0.4	978
8	Invasive Species, Environmental Change and Management, and Health. Annual Review of Environment and Resources, 2010, 35, 25-55.	5.6	936
9	Scientists' warning on invasive alien species. Biological Reviews, 2020, 95, 1511-1534.	4.7	928
10	Plant invasions: merging the concepts of species invasiveness and community invasibility. Progress in Physical Geography, 2006, 30, 409-431.	1.4	883
11	Trees and shrubs as invasive alien species â€“ a global review. Diversity and Distributions, 2011, 17, 788-809.	1.9	844
12	Niche-based modelling as a tool for predicting the risk of alien plant invasions at a global scale. Global Change Biology, 2005, 11, 2234-2250.	4.2	742
13	Adaptive evolution in invasive species. Trends in Plant Science, 2008, 13, 288-294.	4.3	724
14	The more the better? The role of polyploidy in facilitating plant invasions. Annals of Botany, 2012, 109, 19-45.	1.4	707
15	Riparian vegetation: degradation, alien plant invasions, and restoration prospects. Diversity and Distributions, 2007, 13, 126-139.	1.9	685
16	Something in the way you move: dispersal pathways affect invasion success. Trends in Ecology and Evolution, 2009, 24, 136-144.	4.2	680
17	A Unified Classification of Alien Species Based on the Magnitude of their Environmental Impacts. PLoS Biology, 2014, 12, e1001850.	2.6	648
18	Biological invasions as disruptors of plant reproductive mutualisms. Trends in Ecology and Evolution, 2006, 21, 208-216.	4.2	622

#	Article	IF	Citations
19	Traits Associated with Invasiveness in Alien Plants: Where Do we Stand?. , 2008, , 97-125.		615
20	Geographical and taxonomic biases in invasion ecology. Trends in Ecology and Evolution, 2008, 23, 237-244.	4.2	610
21	Determinants of Plant Distribution: Evidence from Pine Invasions. American Naturalist, 1991, 137, 639-668.	1.0	496
22	Predicting Plant Migration Rates in a Changing World: The Role of Longâ€Distance Dispersal. American Naturalist, 1999, 153, 464-475.	1.0	493
23	Mapping ecosystem services for planning and management. Agriculture, Ecosystems and Environment, 2008, 127, 135-140.	2.5	461
24	The importance of long-distance dispersal in biodiversity conservation. Diversity and Distributions, 2005, 11, 173-181.	1.9	428
25	Managing the whole landscape: historical, hybrid, and novel ecosystems. Frontiers in Ecology and the Environment, 2014, 12, 557-564.	1.9	378
26	Forestry Trees as Invasive Aliens. Conservation Biology, 1998, 12, 18-26.	2.4	371
27	Impacts of alien plant invasions on species richness in Mediterranean-type ecosystems: a meta-analysis. Progress in Physical Geography, 2009, 33, 319-338.	1.4	370
28	Multidimensional evaluation of managed relocation. Proceedings of the National Academy of Sciences of the United States of America, 2009, 106, 9721-9724.	3.3	339
29	Pine Invasions in the Southern Hemisphere: Determinants of Spread and Invadability. Journal of Biogeography, 1994, 21, 511.	1.4	328
30	Mutualistic Interactions and Biological Invasions. Annual Review of Ecology, Evolution, and Systematics, 2014, 45, 89-113.	3.8	324
31	Naturalization of introduced plants: ecological drivers of biogeographical patterns. New Phytologist, 2012, 196, 383-396.	3.5	318
32	Impacts of invasive Australian acacias: implications for management and restoration. Diversity and Distributions, 2011, 17, 1015-1029.	1.9	316
33	Invasion Science: A Horizon Scan of Emerging Challenges and Opportunities. Trends in Ecology and Evolution, 2017, 32, 464-474.	4.2	312
34	Conifers as invasive aliens: a global survey and predictive framework. Diversity and Distributions, 2004, 10, 321-331.	1.9	308
35	Defining the Impact of Nonâ€Native Species. Conservation Biology, 2014, 28, 1188-1194.	2.4	308
36	Ecological Impacts of Alien Species: Quantification, Scope, Caveats, and Recommendations. BioScience, 2015, 65, 55-63.	2.2	301

#	Article	IF	Citations
37	Residence time and potential range: crucial considerations in modelling plant invasions. Diversity and Distributions, 2007, 13, 11-22.	1.9	295
38	The invasive potential of Australian banksias in South African fynbos: A comparison of the reproductive potential of Banksia ericifolia and Leucadendron laureolum. Austral Ecology, 1992, 17, 305-314.	0.7	290
39	Trees and shrubs as invasive alien species â€“ 2013 update of the global database. Diversity and Distributions, 2013, 19, 1093-1094.	1.9	281
40	Inferring Process from Pattern in Plant Invasions: A Semimechanistic Model Incorporating Propagule Pressure and Environmental Factors. American Naturalist, 2003, 162, 713-724.	1.0	275
41	INTERACTIONS BETWEEN ENVIRONMENT, SPECIES TRAITS, AND HUMAN USES DESCRIBE PATTERNS OF PLANT INVASIONS. Ecology, 2006, 87, 1755-1769.	1.5	272
42	Ecosystem Level Impacts of Invasive Acacia saligna in the South African Fynbos. Restoration Ecology, 2004, 12, 44-51.	1.4	262
43	Fifty years of invasion ecology â€“ the legacy of Charles Elton. Diversity and Distributions, 2008, 14, 161-168.	1.9	254
44	Humanâ€mediated introductions of Australian acacias â€“ a global experiment in biogeography. Diversity and Distributions, 2011, 17, 771-787.	1.9	245
45	Socioâ€economic impact classification of alien taxa (<scp>SEICAT</scp>). Methods in Ecology and Evolution, 2018, 9, 159-168.	2.2	244
46	TEASIng apart alien species risk assessments: a framework for best practices. Ecology Letters, 2012, 15, 1475-1493.	3.0	241
47	Spatial congruence between biodiversity and ecosystem services in South Africa. Biological Conservation, 2009, 142, 553-562.	1.9	240
48	Current patterns of habitat transformation and future threats to biodiversity in terrestrial ecosystems of the Cape Floristic Region, South Africa. Biological Conservation, 2003, 112, 63-85.	1.9	232
49	Conflicting values: ecosystem services and invasive tree management. Biological Invasions, 2014, 16, 705-719.	1.2	230
50	Spread and impact of introduced conifers in South America: Lessons from other southern hemisphere regions. Austral Ecology, 2010, 35, 489-504.	0.7	224
51	Deliberate Introductions of Species: Research Needs. BioScience, 1999, 49, 619-630.	2.2	223
52	Predicting the Landscape-Scale Distribution of Alien Plants and Their Threat to Plant Diversity. Conservation Biology, 1999, 13, 303-313.	2.4	220
53	Integrative invasion science: model systems, multiâ€site studies, focused metaâ€analysis and invasion syndromes. New Phytologist, 2013, 200, 615-633.	3.5	219
54	Invasive plants as drivers of regime shifts: identifying highâ€priority invaders that alter feedback relationships. Diversity and Distributions, 2014, 20, 733-744.	1.9	214

#	Article	IF	Citations
55	Advancing impact prediction and hypothesis testing in invasion ecology using a comparative functional response approach. Biological Invasions, 2014, 16, 735-753.	1.2	214
56	Managed Relocation: Integrating the Scientific, Regulatory, and Ethical Challenges. BioScience, 2012, 62, 732-743.	2.2	212
57	Quantifying levels of biological invasion: towards the objective classification of invaded and invasible ecosystems. Global Change Biology, 2012, 18, 44-62.	4.2	212
58	Crossing Frontiers in Tackling Pathways of Biological Invasions. BioScience, 2015, 65, 769-782.	2.2	202
59	The roles of habitat features, disturbance, and distance from putative source populations in structuring alien plant invasions at the urban/wildland interface on the Cape Peninsula, South Africa. Biological Conservation, 2006, 132, 183-198.	1.9	198
60	A biome-scale assessment of the impact of invasive alien plants on ecosystem services in South Africa. Journal of Environmental Management, 2008, 89, 336-349.	3.8	197
61	Non-natives: 141 scientists object. Nature, 2011, 475, 36-36.	13.7	197
62	The biogeography of naturalization in alien plants. Journal of Biogeography, 2006, 33, 2040-2050.	1.4	196
63	Fungal Planet description sheets: 400â€“468. Persoonia: Molecular Phylogeny and Evolution of Fungi, 2016, 36, 316-458.	1.6	193
64	Modeling Invasive Plant Spread: The Role of Plant-Environment Interactions and Model Structure. Ecology, 1996, 77, 2043-2054.	1.5	191
65	Non-native species in urban environments: patterns, processes, impacts and challenges. Biological Invasions, 2017, 19, 3461-3469.	1.2	190
66	Seed banks of invasive Australian Acacia species in South Africa: Role in invasiveness and options for management. Perspectives in Plant Ecology, Evolution and Systematics, 2008, 10, 161-177.	1.1	184
67	Framework and guidelines for implementing the proposed <scp>IUCN</scp> Environmental Impact Classification for Alien Taxa (<scp>EICAT</scp>). Diversity and Distributions, 2015, 21, 1360-1363.	1.9	184
68	Explaining people's perceptions of invasive alien species: A conceptual framework. Journal of Environmental Management, 2019, 229, 10-26.	3.8	184
69	Integrating ecosystem services and disservices: insights from plant invasions. Ecosystem Services, 2017, 23, 94-107.	2.3	179
70	Global grass (<scp>P</scp>oaceae) success underpinned by traits facilitating colonization, persistence and habitat transformation. Biological Reviews, 2018, 93, 1125-1144.	4.7	178
71	Adoption, use and perception of Australian acacias around the world. Diversity and Distributions, 2011, 17, 822-836.	1.9	176
72	Conservation biogeography â€“ foundations, concepts and challenges. Diversity and Distributions, 2010, 16, 313-320.	1.9	175

#	Article	IF	Citations
73	Challenges and trade-offs in the management of invasive alien trees. Biological Invasions, 2014, 16, 721-734.	1.2	171
74	Prosopis: a global assessment of the biogeography, benefits, impacts and management of one of the world's worst woody invasive plant taxa. AoB PLANTS, 2014, 6, .	1.2	169
75	A review of models of alien plant spread. Ecological Modelling, 1996, 87, 249-265.	1.2	166
76	Plant invasions â€" the role of mutualisms. Biological Reviews, 2000, 75, 65-93.	4.7	165
77	Risk assessment, eradication, and biological control: global efforts to limit Australian acacia invasions. Diversity and Distributions, 2011, 17, 1030-1046.	1.9	165
78	Mapping the potential ranges of major plant invaders in South Africa, Lesotho and Swaziland using climatic suitability. Diversity and Distributions, 2004, 10, 475-484.	1.9	163
79	Invasion debt â€" quantifying future biological invasions. Diversity and Distributions, 2016, 22, 445-456.	1.9	160
80	Global effects of nonâ€native tree species on multiple ecosystem services. Biological Reviews, 2019, 94, 1477-1501.	4.7	158
81	Nationalâ€scale strategic approaches for managing introduced plants: insights from Australian acacias in South Africa. Diversity and Distributions, 2011, 17, 1060-1075.	1.9	157
82	The Effects of Alien Shrub Invasions on Vegetation Structure and Fire Behaviour in South African Fynbos Shrublands: A Simulation Study. Journal of Applied Ecology, 1985, 22, 955.	1.9	155
83	Title is missing!. , 1998, 135, 79-93.		154
84	USING A DYNAMIC LANDSCAPE MODEL FOR PLANNING THE MANAGEMENT OF ALIEN PLANT INVASIONS. , 2000, 10, 1833-1848.		154
85	Ornamental Plants as Invasive Aliens: Problems and Solutions in Kruger National Park, South Africa. Environmental Management, 2008, 41, 32-51.	1.2	153
86	Which Taxa Are Alien? Criteria, Applications, and Uncertainties. BioScience, 2018, 68, 496-509.	2.2	153
87	Management of plant invasions mediated by frugivore interactions. Journal of Applied Ecology, 2006, 43, 848-857.	1.9	151
88	Predicting and explaining plant invasions through analysis of source area floras: some critical considerations. Diversity and Distributions, 2004, 10, 179-187.	1.9	149
89	Reproductive biology of Australian acacias: important mediator of invasiveness?. Diversity and Distributions, 2011, 17, 911-933.	1.9	148
90	Drivers of future alien species impacts: An expertâ€based assessment. Global Change Biology, 2020, 26, 4880-4893.	4.2	145

#	Article	IF	Citations
91	Title is missing!. Environment, Development and Sustainability, 2001, 3, 145-168.	2.7	143
92	Identifying priority areas for ecosystem service management in South African grasslands. Journal of Environmental Management, 2011, 92, 1642-1650.	3.8	142
93	Misleading criticisms of invasion science: a field guide. Diversity and Distributions, 2013, 19, 1461-1467.	1.9	141
94	A framework for engaging stakeholders on the management of alien species. Journal of Environmental Management, 2018, 205, 286-297.	3.8	141
95	Similarity of introduced plant species to native ones facilitates naturalization, but differences enhance invasion success. Nature Communications, 2018, 9, 4631.	5.8	139
96	Increasing numbers and intercontinental spread of invasive insects on eucalypts. Biological Invasions, 2016, 18, 921-933.	1.2	134
97	Stakeholder engagement in the study and management of invasive alien species. Journal of Environmental Management, 2019, 229, 88-101.	3.8	134
98	Fungal Planet description sheets: 371â€“399. Persoonia: Molecular Phylogeny and Evolution of Fungi, 2015, 35, 264-327.	1.6	133
99	Tree invasions: patterns, processes, challenges and opportunities. Biological Invasions, 2014, 16, 473-481.	1.2	132
100	Identifying spatial components of ecological and evolutionary processes for regional conservation planning in the Cape Floristic Region, South Africa. Diversity and Distributions, 2003, 9, 191-210.	1.9	130
101	Tree invasions into treeless areas: mechanisms and ecosystem processes. Biological Invasions, 2014, 16, 663-675.	1.2	130
102	Existing and emerging high impact invasive species are characterized by higher functional responses than natives. Biology Letters, 2014, 10, 20130946.	1.0	130
103	An Assessment of Habitat Diversity and Transformation on La RÃ©union Island (Mascarene Islands,) Tj ETQq1 1 0.784314 rgBT /Over Conservation, 2005, 14, 3015-3032.	1.2	129
104	Introduced and invasive cactus species: a global review. AoB PLANTS, 2015, 7, .	1.2	129
105	Plant invasion science in protected areas: progress and priorities. Biological Invasions, 2017, 19, 1353-1378.	1.2	129
106	Riparian scrub recovery after clearing of invasive alien trees in headwater streams of the Western Cape, South Africa. Biological Conservation, 2005, 122, 509-521.	1.9	128
107	Relative roles of climatic suitability and anthropogenic influence in determining the pattern of spread in a global invader. Proceedings of the National Academy of Sciences of the United States of America, 2011, 108, 220-225.	3.3	128
108	Speciesâ€based risk assessments for biological invasions: advances and challenges. Diversity and Distributions, 2013, 19, 1095-1105.	1.9	128

#	Article	IF	Citations
109	Assessing the risk of invasive success inPinusandBanksiain South African mountain fynbos. Journal of Vegetation Science, 1990, 1, 629-642.	1.1	127
110	Defining invasiveness and invasibility in ecological networks. Biological Invasions, 2016, 18, 971-983.	1.2	121
111	Planted forests and invasive alien trees in Europe: A Code for managing existing and future plantings to mitigate the risk of negative impacts from invasions. NeoBiota, 0, 30, 5-47.	1.0	121
112	The progress of interdisciplinarity in invasion science. Ambio, 2017, 46, 428-442.	2.8	120
113	The current configuration of protected areas in the Cape Floristic Region, South Africaâ€"reservation bias and representation of biodiversity patterns and processes. Biological Conservation, 2003, 112, 129-145.	1.9	119
114	Protocols for Restoration Based on Recruitment Dynamics, Community Structure, and Ecosystem Function: Perspectives from South African Fynbos. Restoration Ecology, 1999, 7, 215-230.	1.4	118
115	Home away from home â€" objective mapping of highâ€risk source areas for plant introductions. Diversity and Distributions, 2007, 13, 299-312.	1.9	115
116	Temporal and interspecific variation in rates of spread for insect species invading Europe during the last 200Âyears. Biological Invasions, 2016, 18, 907-920.	1.2	114
117	Confronting the wicked problem of managing biological invasions. NeoBiota, 0, 31, 63-86.	1.0	114
118	Potential impacts of future land use and climate change on the Red List status of the Proteaceae in the Cape Floristic Region, South Africa. Global Change Biology, 2005, 11, 1452-1468.	4.2	113
119	A Conceptual Framework for Range-Expanding Species that Track Human-Induced Environmental Change. BioScience, 2019, 69, 908-919.	2.2	113
120	Managing conflict-generating invasive species in South Africa: Challenges and trade-offs. Bothalia, 2017, 47, .	0.2	113
121	Will Climate Change Promote Alien Plant Invasions?. , 2008, , 197-211.		112
122	Invasion trajectory of alien trees: the role of introduction pathway and planting history. Global Change Biology, 2014, 20, 1527-1537.	4.2	112
123	Historical legacies accumulate to shape future biodiversity in an era of rapid global change. Diversity and Distributions, 2015, 21, 534-547.	1.9	112
124	Recovery of South African fynbos vegetation following alien woody plant clearing and fire: implications for restoration. Austral Ecology, 2000, 25, 631-639.	0.7	108
125	Three centuries of managing introduced conifers in South Africa: Benefits, impacts, changing perceptions and conflict resolution. Journal of Environmental Management, 2012, 106, 56-68.	3.8	108
126	Ecology and management of invasive Pinaceae around the world: progress and challenges. Biological Invasions, 2017, 19, 3099-3120.	1.2	107

#	Article	IF	Citations
127	Fragmentation of South African renosterveld shrublands: effects on plant community structure and conservation implications. Biological Conservation, 1999, 90, 103-111.	1.9	104
128	Forestry Trees as Invasive Aliens. Conservation Biology, 1998, 12, 18-26.	2.4	103
129	Ecology and management of alien plant invasions in South African fynbos: Accommodating key complexities in objective decision making. Biological Conservation, 2009, 142, 1595-1604.	1.9	103
130	Invasive plants have broader physiological niches. Proceedings of the National Academy of Sciences of the United States of America, 2014, 111, 10610-10614.	3.3	99
131	Four priority areas to advance invasion science in the face of rapid environmental change. Environmental Reviews, 2021, 29, 119-141.	2.1	98
132	Managing invasive species in cities: A framework from Cape Town, South Africa. Landscape and Urban Planning, 2016, 151, 1-9.	3.4	97
133	Current and future threats to plant biodiversity on the Cape Peninsula, South Africa. Biodiversity and Conservation, 1996, 5, 607-647.	1.2	96
134	Reconstructing 50Âyears of Opuntia stricta invasion in the Kruger National Park, South Africa: environmental determinants and propagule pressure. Diversity and Distributions, 2004, 10, 427-437.	1.9	96
135	Predicting invasiveness of Australian acacias on the basis of their native climatic affinities, life history traits and human use. Diversity and Distributions, 2011, 17, 934-945.	1.9	96
136	Alien plant invasions and native plant extinctions: a six-threshold framework. AoB PLANTS, 2016, 8, .	1.2	95
137	The evolution and phylogenetic placement of invasive Australian Acacia species. Diversity and Distributions, 2011, 17, 848-860.	1.9	94
138	Perceptions of impact: Invasive alien plants in the urban environment. Journal of Environmental Management, 2019, 229, 76-87.	3.8	94
139	Reductions in Plant Species Richness under Stands of Alien Trees and Shrubs in the Fynbos Biome. South African Forestry Journal, 1989, 149, 1-8.	0.2	93
140	Searching for phylogenetic pattern in biological invasions. Global Ecology and Biogeography, 2007, 17, 070909153804002-???.	2.7	93
141	Alien plant invasions in tropical and sub-tropical savannas: patterns, processes and prospects. Biological Invasions, 2010, 12, 3913-3933.	1.2	93
142	Delayed biodiversity change: no time to waste. Trends in Ecology and Evolution, 2015, 30, 375-378.	4.2	92
143	Title is missing!. Plant Ecology, 2001, 152, 79-92.	0.7	91
144	Invasion of mesic mountain fynbos by Pinus radiata. South African Journal of Botany, 1986, 52, 529-536.	1.2	90

#	Article	IF	Citations
145	Validation of a spatial simulation model of a spreading alien plant population. Journal of Applied Ecology, 2001, 38, 571-584.	1.9	90
146	Protected-Area Boundaries as Filters of Plant Invasions. Conservation Biology, 2010, 25, no-no.	2.4	88
147	Flowering phenology of invasive alien plant species compared with native species in three Mediterranean-type ecosystems. Annals of Botany, 2009, 103, 485-494.	1.4	87
148	Hitting the right target: taxonomic challenges for, and of, plant invasions. AoB PLANTS, 2013, 5, plt042-plt042.	1.2	87
