

G Harvey Anderson

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/2209520/g-harvey-anderson-publications-by-year.pdf>

Version: 2024-04-25

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
221	Nutritional Composition and In Vitro Starch Digestibility of Crackers Supplemented with Faba Bean Whole Flour, Starch Concentrate, Protein Concentrate and Protein Isolate.. <i>Foods</i> , 2022 , 11,	4.9	4
220	High Choline Intake during Pregnancy Reduces Characteristics of the Metabolic Syndrome in Male Wistar Rat Offspring Fed a High Fat But Not a Normal Fat Post-Weaning Diet. <i>Nutrients</i> , 2021 , 13,	6.7	1
219	Age and Sex Interact to Determine the Effects of Commonly Consumed Dairy Products on Postmeal Glycemia, Satiety, and Later Meal Food Intake in Adults. <i>Journal of Nutrition</i> , 2021 , 151, 2161-2174	4.1	4
218	Faba bean meal, starch or protein fortification of durum wheat pasta differentially influence noodle composition, starch structure and in vitro digestibility. <i>Food Chemistry</i> , 2021 , 349, 129167	8.5	9
217	Choline and Folic Acid in Diets Consumed during Pregnancy Interact to Program Food Intake and Metabolic Regulation of Male Wistar Rat Offspring. <i>Journal of Nutrition</i> , 2021 , 151, 857-865	4.1	4
216	An examination of contributions of animal- and plant-based dietary patterns on the nutrient quality of diets of adult Canadians. <i>Applied Physiology, Nutrition and Metabolism</i> , 2021 , 46, 877-886	3	2
215	The effect of dairy products and non-dairy snacks on food intake, subjective appetite and cortisol levels in children: a randomized control study. <i>Applied Physiology, Nutrition and Metabolism</i> , 2021 , 46, 1097-1104	3	1
214	The Zebrafish (Danio Rerio) as a Novel Model to Study Folate-mthfr Interactions During Embryonic Development and Effect(s) on Long-Term Health. <i>Current Developments in Nutrition</i> , 2020 , 4, 1269-1269	0.4	78
213	Folic acid content of diet during pregnancy determines post-birth re-set of metabolism in Wistar rat dams. <i>Journal of Nutritional Biochemistry</i> , 2020 , 83, 108414	6.3	2
212	Maternal Choline Intake Programs Hypothalamic Energy Regulation and Later-Life Phenotype of Male Wistar Rat Offspring. <i>Molecular Nutrition and Food Research</i> , 2020 , 64, e1901178	5.9	6
211	Ethanolamides of essential linolenic and linoleic fatty acids suppress short-term food intake in rats. <i>Food and Function</i> , 2020 , 11, 3066-3072	6.1	5
210	Choline Supplementation Mitigates the Adverse Effects of a High Folic Acid Maternal Diet on Food Intake Regulation in the Offspring. <i>Current Developments in Nutrition</i> , 2020 , 4, 1806-1806	0.4	78
209	Effects of cultured dairy and nondairy products added to breakfast cereals on blood glucose control, satiation, satiety, and short-term food intake in young women. <i>Applied Physiology, Nutrition and Metabolism</i> , 2020 , 45, 1118-1126	3	2
208	Role of Amino Acids in Blood Glucose Changes in Young Adults Consuming Cereal with Milks Varying in Casein and Whey Concentrations and Their Ratio. <i>Journal of Nutrition</i> , 2020 , 150, 3103-3113	4.1	2
207	High 5MTHF, but Not Folic Acid During Pregnancy, Alters Hypothalamic Regulatory Pathways and Associates with Post-Partum Weight-Gain in Wistar Rat Mothers. <i>Current Developments in Nutrition</i> , 2020 , 4, 1230-1230	0.4	78
206	Gestational folic acid content alters the development and function of hypothalamic food intake regulating neurons in Wistar rat offspring post-weaning. <i>Nutritional Neuroscience</i> , 2020 , 23, 149-160	3.6	11
205	Dietary Intakes of Folic Acid During Pregnancy Determines Maternal Re-Set of Metabolism Post-Birth in Wistar Rat Dams (FS08-06-19). <i>Current Developments in Nutrition</i> , 2019 , 3,	0.4	78

204	Choline and Folic Acid Balance in Diets During Pregnancy Programs Food Intake Regulation in Wistar Rat Offspring (FS08-05-19). <i>Current Developments in Nutrition</i> , 2019 , 3,	0.4	78
203	5-Methyltetrahydrofolate in Maternal Diets Alters DNA Methylation Potential and Increases Later Life Weight Gain and Food Intake in Wistar Rat Dams and Female Offspring (P11-022-19). <i>Current Developments in Nutrition</i> , 2019 , 3,	0.4	78
202	Optimizing foods for special dietary use in Canada: key outcomes and recommendations from a tripartite workshop. <i>Applied Physiology, Nutrition and Metabolism</i> , 2019 , 44, 1258-1265	3	3
201	Acute decrease in plasma testosterone and appetite after either glucose or protein beverages in adolescent males. <i>Clinical Endocrinology</i> , 2019 , 91, 295-303	3.4	
200	Role of single serving form of dairy on satiety and postprandial glycaemia in young and older healthy adults. <i>Applied Physiology, Nutrition and Metabolism</i> , 2019 , 44, 1289-1296	3	5
199	Effect of dairy and nondairy snacks on postprandial blood glucose regulation in 9-14-year-old children. <i>Applied Physiology, Nutrition and Metabolism</i> , 2019 , 44, 1073-1080	3	6
198	Research and regulatory gaps for the substantiation of protein content claims on foods. <i>Applied Physiology, Nutrition and Metabolism</i> , 2019 , 44, 95-98	3	2
197	Maternal Choline Intake Programs Hypothalamic Energy Regulatory Pathways and Long-Term Phenotype in Male Wistar Rat Offspring (OR35-04-19). <i>Current Developments in Nutrition</i> , 2019 , 3,	0.4	78
196	Increased milk protein content and whey-to-casein ratio in milk served with breakfast cereal reduce postprandial glycemia in healthy adults: An examination of mechanisms of action. <i>Journal of Dairy Science</i> , 2019 , 102, 6766-6780	4	9
195	Correlating in vitro digestion viscosities and bioaccessible nutrients of milks containing enhanced protein concentration and normal or modified protein ratio to human trials. <i>Food and Function</i> , 2019 , 10, 7687-7696	6.1	2
194	Faba bean protein flours added to pasta reduce post-ingestion glycaemia, and increase satiety, protein content and quality. <i>Food and Function</i> , 2019 , 10, 7476-7488	6.1	11
193	The role of IL-6 in exercise-induced anorexia in normal-weight boys. <i>Applied Physiology, Nutrition and Metabolism</i> , 2018 , 43, 979-987	3	4
192	Acute effects of monosodium glutamate addition to whey protein on appetite, food intake, blood glucose, insulin and gut hormones in healthy young men. <i>Appetite</i> , 2018 , 120, 92-99	4.5	11
191	Effect of milk protein intake and casein-to-whey ratio in breakfast meals on postprandial glucose, satiety ratings, and subsequent meal intake. <i>Journal of Dairy Science</i> , 2018 , 101, 8688-8701	4	16
190	Decreased Appetite after High-Intensity Exercise Correlates with Increased Plasma Interleukin-6 in Normal-Weight and Overweight/Obese Boys. <i>Current Developments in Nutrition</i> , 2017 , 1, e000398	0.4	21
189	Pre- and within-meal effects of fluid dairy products on appetite, food intake, glycemia, and regulatory hormones in children. <i>Applied Physiology, Nutrition and Metabolism</i> , 2017 , 42, 302-310	3	14
188	The effect of dairy and nondairy beverages consumed with high glycemic cereal on subjective appetite, food intake, and postprandial glycemia in young adults. <i>Applied Physiology, Nutrition and Metabolism</i> , 2017 , 42, 1201-1209	3	14
187	The effect of dairy products consumed with high glycemic carbohydrate on subjective appetite, food intake, and postprandial glycemia in older adults. <i>Applied Physiology, Nutrition and Metabolism</i> , 2017 , 42, 1210-1216	3	13

186	High vitamin A intake during pregnancy modifies dopaminergic reward system and decreases preference for sucrose in Wistar rat offspring. <i>Journal of Nutritional Biochemistry</i> , 2016 , 27, 104-11	6.3	6
185	Pubertal status, pre-meal drink composition, and later meal timing interact in determining children's appetite and food intake. <i>Applied Physiology, Nutrition and Metabolism</i> , 2016 , 41, 924-30	3	1
184	Physiology of Food Intake Control in Children. <i>Advances in Nutrition</i> , 2016 , 7, 232S-240S	10	15
183	Role of maternal vitamins in programming health and chronic disease. <i>Nutrition Reviews</i> , 2016 , 74, 166-80.4	8.4	16
182	The effects of potatoes and other carbohydrate side dishes consumed with meat on food intake, glycemia and satiety response in children. <i>Nutrition and Diabetes</i> , 2016 , 6, e195	4.7	18
181	Maternal and postweaning folic acid supplementation interact to influence body weight, insulin resistance, and food intake regulatory gene expression in rat offspring in a sex-specific manner. <i>Applied Physiology, Nutrition and Metabolism</i> , 2016 , 41, 411-20	3	11
180	Maternal fat-soluble vitamins, brain development, and regulation of feeding behavior: an overview of research. <i>Nutrition Research</i> , 2016 , 36, 1045-1054	4	11
179	Interaction of mealtime ad libitum beverage and food intake with meal advancement in healthy young men and women. <i>Physiology and Behavior</i> , 2015 , 143, 39-44	3.5	3
178	Mealtime exposure to food advertisements while watching television increases food intake in overweight and obese girls but has a paradoxical effect in boys. <i>Applied Physiology, Nutrition and Metabolism</i> , 2015 , 40, 162-7	3	17
177	A gestational diet high in fat-soluble vitamins alters expression of genes in brain pathways and reduces sucrose preference, but not food intake, in Wistar male rat offspring. <i>Applied Physiology, Nutrition and Metabolism</i> , 2015 , 40, 424-31	3	7
176	Methyl vitamins contribute to obesogenic effects of a high multivitamin gestational diet and epigenetic alterations in hypothalamic feeding pathways in Wistar rat offspring. <i>Molecular Nutrition and Food Research</i> , 2015 , 59, 476-89	5.9	20
175	Acute changes in substrate oxidation do not affect short-term food intake in healthy boys and men. <i>Applied Physiology, Nutrition and Metabolism</i> , 2015 , 40, 168-77	3	6
174	A high multivitamin diet fed to Wistar rat dams during pregnancy increases maternal weight gain later in life and alters homeostatic, hedonic and peripheral regulatory systems of energy balance. <i>Behavioural Brain Research</i> , 2015 , 278, 1-11	3.4	9
173	Acute decrease in serum testosterone after a mixed glucose and protein beverage in obese peripubertal boys. <i>Clinical Endocrinology</i> , 2015 , 83, 332-8	3.4	4
172	Canned Navy Bean Consumption Reduces Metabolic Risk Factors Associated with Obesity. <i>Canadian Journal of Dietetic Practice and Research</i> , 2015 , 76, 33-7	1.3	8
171	A comparison of effects of lard and hydrogenated vegetable shortening on the development of high-fat diet-induced obesity in rats. <i>Nutrition and Diabetes</i> , 2015 , 5, e188	4.7	36
170	Mechanism of action of pre-meal consumption of whey protein on glycemic control in young adults. <i>Journal of Nutritional Biochemistry</i> , 2014 , 25, 36-43	6.3	93
169	Mechanism of action of whole milk and its components on glycemic control in healthy young men. <i>Journal of Nutritional Biochemistry</i> , 2014 , 25, 1124-1131	6.3	30

168	Increasing vitamin A in post-weaning diets reduces food intake and body weight and modifies gene expression in brains of male rats born to dams fed a high multivitamin diet. <i>Journal of Nutritional Biochemistry</i> , 2014 , 25, 991-6	6.3	10
167	Estimated intakes and sources of total and added sugars in the Canadian diet. <i>Nutrients</i> , 2014 , 6, 1899-912	6.7	72
166	The acute effect of commercially available pulse powders on postprandial glycaemic response in healthy young men. <i>British Journal of Nutrition</i> , 2014 , 112, 1966-73	3.6	34
165	The effects of whole grain high-amylose maize flour as a source of resistant starch on blood glucose, satiety, and food intake in young men. <i>Journal of Food Science</i> , 2014 , 79, H2550-6	3.4	46
164	Effect of sodium alginate addition to chocolate milk on glycemia, insulin, appetite and food intake in healthy adult men. <i>European Journal of Clinical Nutrition</i> , 2014 , 68, 613-8	5.2	26
163	Second-meal effects of pulses on blood glucose and subjective appetite following a standardized meal 2 h later. <i>Applied Physiology, Nutrition and Metabolism</i> , 2014 , 39, 849-51	3	17
162	Acute effects of pea protein and hull fibre alone and combined on blood glucose, appetite, and food intake in healthy young men--a randomized crossover trial. <i>Applied Physiology, Nutrition and Metabolism</i> , 2014 , 39, 1360-5	3	27
161	Obesity, sex and pubertal status affect appetite hormone responses to a mixed glucose and whey protein drink in adolescents. <i>Clinical Endocrinology</i> , 2014 , 81, 63-70	3.4	13
160	Increasing the protein to carbohydrate ratio in yogurts consumed as a snack reduces post-consumption glycemia independent of insulin. <i>Clinical Nutrition</i> , 2014 , 33, 29-38	5.9	37
159	High multivitamin intakes during pregnancy and postweaning obesogenic diets interact to affect the relationship between expression of PPAR genes and glucose regulation in the offspring. <i>Journal of Nutritional Biochemistry</i> , 2013 , 24, 877-81	6.3	8
158	Caloric beverages consumed freely at meal-time add calories to an ad libitum meal. <i>Appetite</i> , 2013 , 65, 75-82	4.5	41
157	White vegetables: glycemia and satiety. <i>Advances in Nutrition</i> , 2013 , 4, 356S-67S	10	29
156	Energy and macronutrient content of familiar beverages interact with pre-meal intervals to determine later food intake, appetite and glycemic response in young adults. <i>Appetite</i> , 2013 , 60, 154-161	4.5	40
155	Obesogenic phenotype of offspring of dams fed a high multivitamin diet is prevented by a post-weaning high multivitamin or high folate diet. <i>International Journal of Obesity</i> , 2013 , 37, 1177-82	5.5	21
154	A premeal snack of raisins decreases mealtime food intake more than grapes in young children. <i>Applied Physiology, Nutrition and Metabolism</i> , 2013 , 38, 382-9	3	15
153	An after-school snack of raisins lowers cumulative food intake in young children. <i>Journal of Food Science</i> , 2013 , 78 Suppl 1, A5-A10	3.4	12
152	Recent advances in dietary proteins and lipid metabolism. <i>Current Opinion in Lipidology</i> , 2013 , 24, 207-13	4.4	40
151	High folate gestational and post-weaning diets alter hypothalamic feeding pathways by DNA methylation in Wistar rat offspring. <i>Epigenetics</i> , 2013 , 8, 710-9	5.7	61

150	Acute sodium ingestion has no effect on short-term food and water intake, subjective appetite, thirst, or glycemic response in healthy young men. <i>Applied Physiology, Nutrition and Metabolism</i> , 2013 , 38, 746-52	3	2
149	High Folic Acid Intake during Pregnancy Lowers Body Weight and Reduces Femoral Area and Strength in Female Rat Offspring. <i>Journal of Osteoporosis</i> , 2013 , 2013, 154109	2.8	12
148	Overweight and obese boys reduce food intake in response to a glucose drink but fail to increase intake in response to exercise of short duration. <i>Applied Physiology, Nutrition and Metabolism</i> , 2012 , 37, 520-9	3	33
147	Sweetness, satiation, and satiety. <i>Journal of Nutrition</i> , 2012 , 142, 1149S-54S	4.1	90
146	Reply to the discussion of Overweight and obese boys reduce food intake in response to a glucose drink but fail to increase intake in response to exercise of short duration. <i>Applied Physiology, Nutrition and Metabolism</i> , 2012 , 37, 1016-1017	3	2
145	The use of low-calorie sweeteners by adults: impact on weight management. <i>Journal of Nutrition</i> , 2012 , 142, 1163S-9S	4.1	43
144	Soya protein- and casein-based nutritionally complete diets fed during gestation and lactation differ in effects on characteristics of the metabolic syndrome in male offspring of Wistar rats. <i>British Journal of Nutrition</i> , 2012 , 107, 284-94	3.6	16
143	The effect of yellow pea protein and fibre on short-term food intake, subjective appetite and glycaemic response in healthy young men. <i>British Journal of Nutrition</i> , 2012 , 108 Suppl 1, S74-80	3.6	37
142	Regular consumption of pulses for 8 weeks reduces metabolic syndrome risk factors in overweight and obese adults. <i>British Journal of Nutrition</i> , 2012 , 108 Suppl 1, S111-22	3.6	61
141	Beta glucan: health benefits in obesity and metabolic syndrome. <i>Journal of Nutrition and Metabolism</i> , 2012 , 2012, 851362	2.7	215
140	The acute effects of a pulse-containing meal on glycaemic responses and measures of satiety and satiation within and at a later meal. <i>British Journal of Nutrition</i> , 2012 , 108, 509-17	3.6	47
139	Fructose and non-fructose sugar intakes in the US population and their associations with indicators of metabolic syndrome. <i>Food and Chemical Toxicology</i> , 2011 , 49, 2875-82	4.7	66
138	Soy protein- and casein-based weaning diets differ in effects on food intake and blood glucose regulation in male Wistar rats. <i>Nutrition Research</i> , 2011 , 31, 237-45	4	1
137	Soy protein-based compared with casein-based diets fed during pregnancy and lactation increase food intake and characteristics of metabolic syndrome less in female than male rat offspring. <i>Nutrition Research</i> , 2011 , 31, 644-51	4	15
136	The effect of high multivitamin diet during pregnancy on food intake and glucose metabolism in Wistar rat offspring fed low-vitamin diets post weaning. <i>Journal of Developmental Origins of Health and Disease</i> , 2011 , 2, 302-10	2.4	2
135	Dietary proteins as determinants of metabolic and physiologic functions of the gastrointestinal tract. <i>Nutrients</i> , 2011 , 3, 574-603	6.7	126
134	Effect of drinking compared with eating sugars or whey protein on short-term appetite and food intake. <i>International Journal of Obesity</i> , 2011 , 35, 562-9	5.5	34
133	First and second meal effects of pulses on blood glucose, appetite, and food intake at a later meal. <i>Applied Physiology, Nutrition and Metabolism</i> , 2011 , 36, 634-42	3	35

132	Milk proteins in the regulation of body weight, satiety, food intake and glycemia. <i>Nestle Nutrition Workshop Series Paediatric Programme</i> , 2011 , 67, 147-59		33
131	Television viewing at mealtime reduces caloric compensation in peripubertal, but not postpubertal, girls. <i>Pediatric Research</i> , 2011 , 70, 513-7	3.2	33
130	Effect of protein source in diets fed during gestation and lactation on food intake regulation in male offspring of Wistar rats. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2011 , 300, R1175-84	3.2	16
129	Relation between estimates of cornstarch digestibility by the Englyst in vitro method and glycemic response, subjective appetite, and short-term food intake in young men. <i>American Journal of Clinical Nutrition</i> , 2010 , 91, 932-9	7	73
128	Effect of premeal consumption of whey protein and its hydrolysate on food intake and postmeal glycemia and insulin responses in young adults. <i>American Journal of Clinical Nutrition</i> , 2010 , 91, 966-75	7	210
127	Snacking definitions: impact on interpretation of the literature and dietary recommendations. <i>Critical Reviews in Food Science and Nutrition</i> , 2010 , 50, 848-71	11.5	98
126	Multivitamin supplementation during pregnancy alters body weight and macronutrient selection in Wistar rat offspring. <i>Journal of Developmental Origins of Health and Disease</i> , 2010 , 1, 386-95	2.4	5
125	Reduced energy intake at breakfast is not compensated for at lunch if a high-insoluble-fiber cereal replaces a low-fiber cereal. <i>American Journal of Clinical Nutrition</i> , 2009 , 89, 1343-9	7	48
124	Multivitamin supplementation of Wistar rats during pregnancy accelerates the development of obesity in offspring fed an obesogenic diet. <i>International Journal of Obesity</i> , 2009 , 33, 364-72	5.5	35
123	Acute effects of dietary fibre and glycaemic carbohydrate on appetite and food intake in healthy males. <i>Appetite</i> , 2009 , 52, 58-64	4.5	30
122	High vitamin intake by Wistar rats during pregnancy alters tissue fatty acid concentration in the offspring fed an obesogenic diet. <i>Metabolism: Clinical and Experimental</i> , 2009 , 58, 722-30	12.7	11
121	The effect of duration of exercise at the ventilation threshold on subjective appetite and short-term food intake in 9 to 14 year old boys and girls. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2009 , 6, 66	8.4	45
120	Food intake and satiety following a serving of pulses in young men: effect of processing, recipe, and pulse variety. <i>Journal of the American College of Nutrition</i> , 2009 , 28, 543-52	3.5	47
119	The effect of a high multivitamin diet during the first gestation on the dams and their offspring from the first and second pregnancy. <i>FASEB Journal</i> , 2009 , 23, 219.2	0.9	
118	High maternal folate intake by Sprague Dawley rats results in higher weight gain and lower plasma folate in male offspring. <i>FASEB Journal</i> , 2009 , 23, 219.1	0.9	
117	A comparison of short-term appetite and energy intakes in normal weight and obese boys following glucose and whey-protein drinks. <i>International Journal of Obesity</i> , 2008 , 32, 362-71	5.5	57
116	Recent developments in calcium-related obesity research. <i>Obesity Reviews</i> , 2008 , 9, 428-45	10.6	121
115	Reproducibility of short-term food intake and subjective appetite scores after a glucose preload, ventilation threshold, and body composition in boys. <i>Applied Physiology, Nutrition and Metabolism</i> , 2008 , 33, 326-37	3	34

114	High multivitamin intake by Wistar rats during pregnancy results in increased food intake and components of the metabolic syndrome in male offspring. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2008 , 295, R575-82	3.2	40
113	Effects of glucose-to-fructose ratios in solutions on subjective satiety, food intake, and satiety hormones in young men. <i>American Journal of Clinical Nutrition</i> , 2007 , 86, 1354-63	7	89
112	Much ado about high-fructose corn syrup in beverages: the meat of the matter. <i>American Journal of Clinical Nutrition</i> , 2007 , 86, 1577-8	7	22
111	Enhanced food intake regulatory responses after a glucose drink in hyperinsulinemic men. <i>International Journal of Obesity</i> , 2007 , 31, 1222-31	5.5	19
110	Effect of television viewing at mealtime on food intake after a glucose preload in boys. <i>Pediatric Research</i> , 2007 , 61, 745-9	3.2	112
109	Insoluble cereal fiber reduces appetite and short-term food intake and glycemic response to food consumed 75 min later by healthy men. <i>American Journal of Clinical Nutrition</i> , 2007 , 86, 972-9	7	116
108	Effect of short-duration physical activity and ventilation threshold on subjective appetite and short-term energy intake in boys. <i>Appetite</i> , 2007 , 49, 644-51	4.5	37
107	Whey proteins in the regulation of food intake and satiety. <i>Journal of the American College of Nutrition</i> , 2007 , 26, 704S-12S	3.5	227
106	Much ado about high-fructose corn syrup in beverages: the meat of the matter. <i>American Journal of Clinical Nutrition</i> , 2007 , 86, 1577-1578	7	20
105	Physiology of food intake regulation: interaction with dietary components. <i>Nestle Nutrition Workshop Series Paediatric Programme</i> , 2006 , 58, 133-43; discussion 143-5		21
104	Sugars-containing beverages and post-prandial satiety and food intake. <i>International Journal of Obesity</i> , 2006 , 30, S52-S59	5.5	34
103	Effects of l-Tryptophan on Food Intake and Selection in Lean Men and Women. <i>Annals of the New York Academy of Sciences</i> , 2006 , 499, 327-328	6.5	5
102	Multifunctional roles of dietary proteins in the regulation of metabolism and food intake: Application to feeding infants. <i>Journal of Pediatrics</i> , 2006 , 149, S74-S79	3.6	14
101	Hyperglycemia after protein ingestion concurrent with injection of a GLP-1 receptor agonist in rats: a possible role for dietary peptides. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2005 , 289, R688-94	3.2	10
100	Intense sweeteners and sugar replacers in the regulation of food intake and body weight 2005 , 292-310		
99	Milk Proteins in Food and Food/Drug Synergy on Feeding Behavior, Energy Balance, and Body Weight Regulation 2005 , 347-371		
98	High-fiber cereal reduces postprandial insulin responses in hyperinsulinemic but not normoinsulinemic subjects. <i>Diabetes Care</i> , 2004 , 27, 1281-5	14.6	36
97	Dietary proteins in the regulation of food intake and body weight in humans. <i>Journal of Nutrition</i> , 2004 , 134, 974S-9S	4.1	243

96	Protein source, quantity, and time of consumption determine the effect of proteins on short-term food intake in young men. <i>Journal of Nutrition</i> , 2004 , 134, 3011-5	4.1	183
95	Consumption of sugars and the regulation of short-term satiety and food intake. <i>American Journal of Clinical Nutrition</i> , 2003 , 78, 843S-849S	7	91
