

Tao Zhu

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/2213660/tao-zhu-publications-by-year.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

18
papers

460

#	Paper	IF	Citations
18	Risk Factors for Length of Hospital Stay in Acute Exacerbation Chronic Obstructive Pulmonary Disease: A Multicenter Cross-Sectional Study.. <i>International Journal of General Medicine</i> , 2022 , 15, 3447-3458	2.3	0
17	Single-Cell RNA-Seq Analysis Reveals Lung Epithelial Cell Type-Specific Responses to HDM and Regulation by Tet1. <i>Genes</i> , 2022 , 13, 880	4.2	0
16	Nasal DNA methylation differentiates severe from non-severe asthma in African-American children. <i>Allergy: European Journal of Allergy and Clinical Immunology</i> , 2021 , 76, 1836-1845	9.3	8
15	PI3K inhibitor treatment ameliorates the glucocorticoid insensitivity of PBMCs in severe asthma. <i>Clinical and Translational Medicine</i> , 2020 , 9, 22	5.7	13
14	The Emerging Role of Ten-Eleven Translocation 1 in Epigenetic Responses to Environmental Exposures. <i>Epigenetics Insights</i> , 2020 , 13, 2516865720910155	3	8
13	Monocyte chemotactic protein-inducing protein 1 negatively regulating asthmatic airway inflammation and mucus hypersecretion involving β -aminobutyric acid type A receptor signaling pathway in vivo and in vitro. <i>Chinese Medical Journal</i> , 2020 , 134, 88-97	2.9	1
12	Induced sputum metabolomic profiles and oxidative stress are associated with chronic obstructive pulmonary disease (COPD) severity: potential use for predictive, preventive, and personalized medicine. <i>EPMA Journal</i> , 2020 , 11, 645-659	8.8	12
11	Clinical Differences between Eosinophilic and Noneosinophilic Acute Exacerbation of Chronic Obstructive Pulmonary Disease: A Multicenter Cross-Sectional Study. <i>Mediators of Inflammation</i> , 2020 , 2020, 1059079	4.3	2
10	Study on the Mechanism of Curcumin Regulating Lung Injury Induced by Outdoor Fine Particulate Matter (PM _{2.5}). <i>Mediators of Inflammation</i> , 2019 , 2019, 8613523	4.3	21
9	Curcumin Attenuates Asthmatic Airway Inflammation and Mucus Hypersecretion Involving a PPAR-Dependent NF- κ B Signaling Pathway In Vivo and In Vitro. <i>Mediators of Inflammation</i> , 2019 , 2019, 4927430	4.3	23
8	GLP-1 Analogue Liraglutide Enhances SP-A Expression in LPS-Induced Acute Lung Injury through the TTF-1 Signaling Pathway. <i>Mediators of Inflammation</i> , 2018 , 2018, 3601454	4.3	17
7	Transforaminal Percutaneous Endoscopic Lumbar Decompression by Using Rigid Bendable Burr for Lumbar Lateral Recess Stenosis: Technique and Clinical Outcome. <i>BioMed Research International</i> , 2018 , 2018, 2601232	3	6
6	Emodin suppresses LPS-induced inflammation in RAW264.7 cells through a PPAR-Dependent pathway. <i>International Immunopharmacology</i> , 2016 , 34, 16-24	5.8	69
5	Glucagon Like Peptide-1 (GLP-1) Modulates OVA-Induced Airway Inflammation and Mucus Secretion Involving a Protein Kinase A (PKA)-Dependent Nuclear Factor- κ B (NF- κ B) Signaling Pathway in Mice. <i>International Journal of Molecular Sciences</i> , 2015 , 16, 20195-211	6.3	45
4	Glucagon like peptide-1 attenuates bleomycin-induced pulmonary fibrosis, involving the inactivation of NF- κ B in mice. <i>International Immunopharmacology</i> , 2014 , 22, 498-504	5.8	38
3	Andrographolide protects against LPS-induced acute lung injury by inactivation of NF- κ B. <i>PLoS ONE</i> , 2013 , 8, e56407	3.7	146
2	Insulin up-regulates epithelial sodium channel in LPS-induced acute lung injury model in rats by SGK1 activation. <i>Injury</i> , 2012 , 43, 1277-83	2.5	31

- 1 Rosuvastatin attenuates mucus secretion in a murine model of chronic asthma by inhibiting the gamma-aminobutyric acid type A receptor. *Chinese Medical Journal*, **2012**, 125, 1457-64 2.9 18
