#	ARTICLE	IF	CITATIONS
1	Profiling Social Cognition in Premanifest Huntington's Disease. <i>Journal of the International Neuropsychological Society</i> , 2022, 28, 217-229.	1.8	5
2	Effectiveness of gait aid prescription for improving spatiotemporal gait parameters and associated outcomes in community-dwelling older people: a systematic review. <i>Disability and Rehabilitation</i> , 2022, 44, 6139-6154.	1.8	6
3	Cognitive dysfunction in systemic lupus erythematosus: how do we advance our understanding?. <i>Lancet Rheumatology</i> , The, 2022, , .	3.9	4
4	Listener Detection of Objectively Validated Acoustic Features of Speech in Huntington's Disease. <i>Journal of Huntington's Disease</i> , 2022, 11, 71-79.	1.9	3
5	Fibromyalgia, mood disorders, cognitive test results, cognitive symptoms and quality of life in systemic lupus erythematosus. <i>Rheumatology</i> , 2022, 62, 190-199.	1.9	7
6	A qualitative examination of apathy and physical activity in Huntington's and Parkinson's disease. <i>Neurodegenerative Disease Management</i> , 2022, 12, 129-139.	2.2	3
7	The Lived Experiences of Depression in Huntington's Disease: A Qualitative Study. <i>Journal of Huntington's Disease</i> , 2022, 11, 321-335.	1.9	4
8	Apathy predicts rate of cognitive decline over 24 months in premanifest Huntington's disease. <i>Psychological Medicine</i> , 2021, 51, 1338-1344.	4.5	21
9	Feasibility and initial validation of "HD-Mobile", a smartphone application for remote self-administration of performance-based cognitive measures in Huntington's disease. <i>Journal of Neurology</i> , 2021, 268, 590-601.	3.6	10
10	Multidimensional Apathy: The Utility of the Dimensional Apathy Scale in Huntington's Disease. <i>Movement Disorders Clinical Practice</i> , 2021, 8, 361-370.	1.5	11
11	The Hunger Games: Homeostatic State-Dependent Fluctuations in Disinhibition Measured with a Novel Gamified Test Battery. <i>Nutrients</i> , 2021, 13, 2001.	4.1	3
12	Utility of Huntington's Disease Assessments by Disease Stage: Floor/Ceiling Effects. <i>Frontiers in Neurology</i> , 2021, 12, 595679.	2.4	6
13	Hippocampal and striatal volumes correlate with spatial memory impairment in Huntington's disease. <i>Journal of Neuroscience Research</i> , 2021, 99, 2948-2963.	2.9	4
14	Visuomotor integration deficits are common to familial and sporadic preclinical Alzheimer's disease. <i>Brain Communications</i> , 2021, 3, fcab003.	3.3	8
15	Enhancing the Clinical Utility of DriveSafe DriveAware for People with Huntington's Disease. <i>Journal of Huntington's Disease</i> , 2020, 9, 353-357.	1.9	0
16	Gut dysbiosis in Huntington's disease: associations among gut microbiota, cognitive performance and clinical outcomes. <i>Brain Communications</i> , 2020, 2, fcaa110.	3.3	98
17	Responsiveness to change over time and test-retest reliability of the PROMIS and Neuro-QoL mental health measures in persons with Huntington disease (HD). <i>Quality of Life Research</i> , 2020, 29, 3419-3439.	3.1	9
18	Accuracy of automated amygdala MRI segmentation approaches in Huntington's disease in the IMAGE-HD cohort. <i>Human Brain Mapping</i> , 2020, 41, 1875-1888.	3.6	9

#	ARTICLE	IF	CITATIONS
19	Dissociable Motivational Deficits in Pre-manifest Huntington's Disease. Cell Reports Medicine, 2020, 1, 100152.	6.5	16
20	Longitudinal expression changes are weak correlates of disease progression in Huntington's disease. Brain Communications, 2020, 2, fcaa172.	3.3	6
21	Association of CAG Repeats With Long-term Progression in Huntington Disease. JAMA Neurology, 2019, 76, 1375.	9.0	44
22	Speech in prodromal and symptomatic Huntington's disease as a model of measuring onset and progression in dominantly inherited neurodegenerative diseases. Neuroscience and Biobehavioral Reviews, 2019, 107, 450-460.	6.1	32
23	Discrete changes in the frequency and functions of autobiographical reminiscence in Huntington's disease. Memory, 2019, 27, 1345-1351.	1.7	1
24	Striatal morphology and neurocognitive dysfunction in Huntington disease: The IMAGE-HD study. Psychiatry Research - Neuroimaging, 2019, 291, 1-8.	1.8	9
25	How different aspects of motor dysfunction influence day-to-day function in huntington's disease. Movement Disorders, 2019, 34, 1910-1914.	3.9	3
26	Validation of Neuro-QoL and PROMIS Mental Health Patient Reported Outcome Measures in Persons with Huntington Disease. Journal of Huntington's Disease, 2019, 8, 467-482.	1.9	17
27	MSH3 modifies somatic instability and disease severity in Huntington's and myotonic dystrophy type 1. Brain, 2019, 142, 1876-1886.	7.6	114
28	Movement Disorder Society Task Force Viewpoint: Huntington's Disease Diagnostic Categories. Movement Disorders Clinical Practice, 2019, 6, 541-546.	1.5	67
29	"Real-life" hippocampal-dependent spatial memory impairments in Huntington's disease. Cortex, 2019, 119, 46-60.	2.4	11
30	Pervasive autobiographical memory impairments in Huntington's disease. Neuropsychologia, 2019, 127, 123-130.	1.6	10
31	Apathy Associated With Impaired Recognition of Happy Facial Expressions in Huntington's Disease. Journal of the International Neuropsychological Society, 2019, 25, 453-461.	1.8	6
32	Cognitive Fitness to Drive in Huntington's Disease: Assessing the Clinical Utility of DriveSafe DriveAware. Journal of Huntington's Disease, 2019, 8, 87-95.	1.9	2
33	Spatial memory in Huntington's disease: A comparative review of human and animal data. Neuroscience and Biobehavioral Reviews, 2019, 98, 194-207.	6.1	17
34	A Game for Eliciting Trust Between People and Devices Under Diverse Performance Conditions. Communications in Computer and Information Science, 2018, , 172-190.	0.5	2
35	Agreement between clinician-rated versus patient-reported outcomes in Huntington disease. Journal of Neurology, 2018, 265, 1443-1453.	3.6	7
36	Reduced amygdala volumes are related to motor and cognitive signs in Huntington's disease: The IMAGE-HD study. Neurolmage: Clinical, 2018, 18, 881-887.	2.7	30

#	ARTICLE	IF	CITATIONS
37	Rating scales for cognition in Huntington's disease: Critique and recommendations. <i>Movement Disorders</i> , 2018, 33, 187-195.	3.9	38
38	Emotion Recognition Correlates With Social-Neuropsychiatric Dysfunction in Huntington's Disease. <i>Journal of the International Neuropsychological Society</i> , 2018, 24, 417-423.	1.8	21
39	Cross-sectional and longitudinal voxel-based grey matter asymmetries in Huntington's disease. <i>NeuroImage: Clinical</i> , 2018, 17, 312-324.	2.7	23
40	Relationships Among Apathy, Health-Related Quality of Life, and Function in Huntington's Disease. <i>Journal of Neuropsychiatry and Clinical Neurosciences</i> , 2018, 30, 194-201.	1.8	42
41	Stages of dysfunctional decision-making in addiction. <i>Pharmacology Biochemistry and Behavior</i> , 2018, 164, 99-105.	2.9	119
42	Relationship between measures of impulsivity in opioid-dependent individuals. <i>Personality and Individual Differences</i> , 2018, 120, 133-137.	2.9	1
43	Oxytocin selectively modulates brain processing of disgust in Huntington's disease gene carriers. <i>Progress in Neuro-Psychopharmacology and Biological Psychiatry</i> , 2018, 81, 11-16.	4.8	23
44	Evaluating cognition in individuals with Huntington disease: Neuro-QoL cognitive functioning measures. <i>Quality of Life Research</i> , 2018, 27, 811-822.	3.1	12
45	Understanding the need for assistance with survey completion in people with Huntington disease. <i>Quality of Life Research</i> , 2018, 27, 801-810.	3.1	1
46	Brain Regions Showing White Matter Loss in Huntington's Disease Are Enriched for Synaptic and Metabolic Genes. <i>Biological Psychiatry</i> , 2018, 83, 456-465.	1.3	79
47	El1â€¦Compensation in huntington's disease. , 2018, , .		0
48	Working Memory-Related Effective Connectivity in Huntington's Disease Patients. <i>Frontiers in Neurology</i> , 2018, 9, 370.	2.4	12
49	Deep Brain Stimulation for Parkinson's disease changes perception in the Rubber Hand Illusion. <i>Scientific Reports</i> , 2018, 8, 13842.	3.3	6
50	Juvenile Huntington's disease: left behind?. <i>Lancet Neurology</i> , The, 2018, 17, 932-933.	10.2	7
51	Testing a longitudinal compensation model in premanifest Huntington's disease. <i>Brain</i> , 2018, 141, 2156-2166.	7.6	33
52	Diminished facial EMG responses to disgusting scenes and happy and fearful faces in Huntington's disease. <i>Cortex</i> , 2018, 106, 185-199.	2.4	10
53	Understanding patient-reported outcome measures in Huntington disease: at what point is cognitive impairment related to poor measurement reliability?. <i>Quality of Life Research</i> , 2018, 27, 2541-2555.	3.1	10
54	Emotion recognition in Parkinson's disease: Static and dynamic factors.. <i>Neuropsychology</i> , 2018, 32, 230-234.	1.3	9

#	ARTICLE	IF	CITATIONS
55	Visual scanning of the eye region of human faces predicts emotion recognition performance in Huntington's disease.. Neuropsychology, 2018, 32, 356-365.	1.3	7
56	Executive impairment is associated with unawareness of neuropsychiatric symptoms in premanifest and early Huntington's disease.. Neuropsychology, 2018, 32, 958-965.	1.3	13
57	Patient-reported outcome measures in Huntington disease: Quality of life in neurological disorders (Neuro-QoL) social functioning measures.. Psychological Assessment, 2018, 30, 450-458.	1.5	9
58	Data Analytics from Enroll-HD, a Global Clinical Research Platform for Huntington's Disease. Movement Disorders Clinical Practice, 2017, 4, 212-224.	1.5	137
59	Parkinson's disease alters multisensory perception: Insights from the Rubber Hand Illusion. Neuropsychologia, 2017, 97, 38-45.	1.6	25
60	Longitudinal changes in the fronto-striatal network are associated with executive dysfunction and behavioral dysregulation in Huntington's disease: 30 months IMAGE-HD data. Cortex, 2017, 92, 139-149.	2.4	27
61	Beyond emotion recognition deficits: A theory guided analysis of emotion processing in Huntington's disease. Neuroscience and Biobehavioral Reviews, 2017, 73, 276-292.	6.1	32
62	Identification of genetic variants associated with Huntington's disease progression: a genome-wide association study. Lancet Neurology, The, 2017, 16, 701-711.	10.2	248
63	Feasibility and Efficacy of Brief Computerized Training to Improve Emotion Recognition in Premanifest and Early-Symptomatic Huntington's Disease. Journal of the International Neuropsychological Society, 2017, 23, 314-321.	1.8	16
64	Operationalizing compensation over time in neurodegenerative disease. Brain, 2017, 140, 1158-1165.	7.6	62
65	Survival End Points for Huntington Disease Trials Prior to a Motor Diagnosis. JAMA Neurology, 2017, 74, 1352.	9.0	12
66	Design optimization for clinical trials in early-stage manifest Huntington's disease. Movement Disorders, 2017, 32, 1610-1619.	3.9	11
67	Reduced Willingness to Expend Effort for Reward in Obesity: Link to Adherence to a 3-Month Weight Loss Intervention. Obesity, 2017, 25, 1676-1681.	3.0	17
68	Reliability and Validity of the HD-PRO-TriadTM, a Health-Related Quality of Life Measure Designed to Assess the Symptom Triad of Huntington's Disease. Journal of Huntington's Disease, 2017, 6, 201-215.	1.9	1
69	Abnormal Visual Scanning of Emotionally Evocative Natural Scenes in Huntington's Disease. Frontiers in Psychology, 2017, 8, 405.	2.1	1
70	Pilot Validation of Ambulatory Activity Monitors for Sleep Measurement in Huntington's Disease Gene Carriers. Journal of Huntington's Disease, 2017, 6, 249-253.	1.9	20
71	Optokinetic nystagmus reflects perceptual directions in the onset binocular rivalry in Parkinson's disease. PLoS ONE, 2017, 12, e0173707.	2.5	15
72	Cognitive assessment in Huntington disease clinical drug trials. Handbook of Clinical Neurology / Edited By P J Vinken and G W Bruyn, 2017, 144, 227-244.	1.8	13

#	ARTICLE	IF	CITATIONS
73	Families Affected by Huntington's Disease Report Difficulties in Communication, Emotional Involvement, and Problem Solving. <i>Journal of Huntington's Disease</i> , 2017, 6, 169-177.	1.9	13
74	Topological length of white matter connections predicts their rate of atrophy in premanifest Huntington's disease. <i>JCI Insight</i> , 2017, 2, .	5.0	37
75	D21...Longitudinal compensation in the cognitive network in huntington's disease. <i>Journal of Neurology, Neurosurgery and Psychiatry</i> , 2016, 87, A42.1-A42.	1.9	0
76	Introduction to the JINS Special Issue: Preclinical Prediction. <i>Journal of the International Neuropsychological Society</i> , 2016, 22, 951-955.	1.8	0
77	Subjective sleep problems in Huntington's disease: A pilot investigation of the relationship to brain structure, neurocognitive, and neuropsychiatric function. <i>Journal of the Neurological Sciences</i> , 2016, 364, 148-153.	0.6	29
78	HDQLIFE: development and assessment of health-related quality of life in Huntington disease (HD). <i>Quality of Life Research</i> , 2016, 25, 2441-2455.	3.1	39
79	Two different phenomena in basic motor speech performance in premanifest Huntington disease. <i>Neurology</i> , 2016, 87, 2283-2283.	1.1	1
80	D20...Operationalising compensation over time in neurodegenerative disease. <i>Journal of Neurology, Neurosurgery and Psychiatry</i> , 2016, 87, A41.2-A41.	1.9	0
81	D22...Compensation in preclinical huntington's disease: evidence from the track-on HD study. <i>Journal of Neurology, Neurosurgery and Psychiatry</i> , 2016, 87, A42.2-A42.	1.9	0
82	Multimodal imaging biomarkers in premanifest and early Huntington's disease: 30-month IMAGE-HD data. <i>British Journal of Psychiatry</i> , 2016, 208, 571-578.	2.8	43
83	Visuospatial Processing Deficits Linked to Posterior Brain Regions in Premanifest and Early Stage Huntington's Disease. <i>Journal of the International Neuropsychological Society</i> , 2016, 22, 595-608.	1.8	44
84	Computational modeling for addiction medicine. <i>Progress in Brain Research</i> , 2016, 224, 53-65.	1.4	24
85	Cognitive assessment strategies in Huntington's disease research. <i>Journal of Neuroscience Methods</i> , 2016, 265, 19-24.	2.5	18
86	Clinical-Genetic Associations in the Prospective Huntington at Risk Observational Study (PHAROS). <i>JAMA Neurology</i> , 2016, 73, 102.	9.0	38
87	Decision-making in Psychopathy. <i>Psychiatry, Psychology and Law</i> , 2016, 23, 521-537.	1.2	7
88	Iron accumulation in the basal ganglia in Huntington's disease: cross-sectional data from the IMAGE-HD study. <i>Journal of Neurology, Neurosurgery and Psychiatry</i> , 2016, 87, 545-549.	1.9	69
89	Medication Use in Early-HD Participants in Track-HD: an Investigation of its Effects on Clinical Performance. <i>PLOS Currents</i> , 2016, 8, .	1.4	6
90	Dual task performance in Huntington's disease: A comparison of choice reaction time tasks.. <i>Neuropsychology</i> , 2015, 29, 703-712.	1.3	7

#	ARTICLE	IF	CITATIONS
91	Compensation in Preclinical Huntington's Disease: Evidence From the Track-On HD Study. EBioMedicine, 2015, 2, 1420-1429.	6.1	122
92	Functional Brain Correlates of Neuropsychiatric Symptoms in Presymptomatic Huntington's Disease: The IMAGE-HD Study. Journal of Huntington's Disease, 2015, 4, 325-332.	1.9	10
93	Dual Task Performance May be a Better Measure of Cognitive Processing in Huntington's Disease than Traditional Attention Tests. Journal of Huntington's Disease, 2015, 4, 119-130.	1.9	6
94	Volumetric Analysis of the Hypothalamus in Huntington Disease Using 3T MRI: The IMAGE-HD Study. PLoS ONE, 2015, 10, e0117593.	2.5	30
95	Hippocampal 5-HT1A Receptor and Spatial Learning and Memory. Frontiers in Pharmacology, 2015, 6, 289.	3.5	67
96	Longitudinal change in white matter microstructure in Huntington's disease: The IMAGE-HD study. Neurobiology of Disease, 2015, 74, 406-412.	4.4	89
97	Effects of task difficulty during dual-task circle tracing in Huntington's disease. Journal of Neurology, 2015, 262, 268-276.	3.6	12
98	Feasibility of use of probabilistic reversal learning and serial reaction time tasks in clinical trials of Parkinson's disease. Parkinsonism and Related Disorders, 2015, 21, 894-898.	2.2	12
99	An improved cognitive model of the Iowa and Sookchow Gambling Tasks with regard to model fitting performance and tests of parameter consistency. Frontiers in Psychology, 2015, 6, 229.	2.1	26
100	Utility of self-report and performance-based measures of risk for predicting driving behavior in young people. Personality and Individual Differences, 2015, 86, 184-188.	2.9	12
101	Psychopathic Personality Traits and Iowa Gambling Task Performance in Incarcerated Offenders. Psychiatry, Psychology and Law, 2015, 22, 134-144.	1.2	13
102	Cognitive interventions to enhance neural compensation in Huntington's disease. Neurodegenerative Disease Management, 2015, 5, 155-164.	2.2	27
103	Functional changes during working memory in Huntington's disease: 30-month longitudinal data from the IMAGE-HD study. Brain Structure and Function, 2015, 220, 501-512.	2.3	61
104	Differential effects of social stress on laboratory-based decision-making are related to both impulsive personality traits and gender. Cognition and Emotion, 2015, 29, 1475-1485.	2.0	12
105	Selective vulnerability of Rich Club brain regions is an organizational principle of structural connectivity loss in Huntington's disease. Brain, 2015, 138, 3327-3344.	7.6	96
106	The impact of occipital lobe cortical thickness on cognitive task performance: An investigation in Huntington's Disease. Neuropsychologia, 2015, 79, 138-146.	1.6	56
107	Safety, tolerability, and efficacy of PBT2 in Huntington's disease: a phase 2, randomised, double-blind, placebo-controlled trial. Lancet Neurology, The, 2015, 14, 39-47.	10.2	112
108	Data from 617 Healthy Participants Performing the Iowa Gambling Task: A "Many Labs" Collaboration. , 2015, 3, .		15

#	ARTICLE	IF	CITATIONS
109	Functional magnetic resonance imaging of working memory in Huntington's disease: Cross-sectional data from the IMAGE-HD study. Human Brain Mapping, 2014, 35, 1847-1864.	3.6	60
110	HD-CAB: A cognitive assessment battery for clinical trials in Huntington's disease ^{1,2,3} . Movement Disorders, 2014, 29, 1281-1288.	3.9	73
111	Movement sequencing in Huntington disease. World Journal of Biological Psychiatry, 2014, 15, 459-471.	2.6	14
112	Abnormal synchrony of resting state networks in premanifest and symptomatic Huntington disease: the IMAGE-HD study. Journal of Psychiatry and Neuroscience, 2014, 39, 87-96.	2.4	63
113	Response to Turner. Addiction, 2014, 109, 1139-1140.	3.3	1
