

Stuart Allan

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/2225212/stuart-allan-publications-by-year.pdf>

Version: 2024-04-23

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

155
papers

9,319
citations

#	Paper	IF	Citations
155	Does previous stroke modify the relationship between inflammatory biomarkers and clinical endpoints in CKD patients?. <i>BMC Nephrology</i> , 2022 , 23, 38	2.7	
154	Do Concentration or Activity of Selenoproteins Change in Acute Stroke Patients? A Systematic Review and Meta-Analyses.. <i>Cerebrovascular Diseases</i> , 2022 , 1-12	3.2	1
153	Itaconate and fumarate derivatives inhibit priming and activation of the canonical NLRP3 inflammasome in macrophages.. <i>Immunology</i> , 2022 ,	7.8	3
152	Beyond Antoni: A Surgeon's Guide to the Vestibular Schwannoma Microenvironment.. <i>Journal of Neurological Surgery, Part B: Skull Base</i> , 2022 , 83, 1-10	1.5	1
151	Systematic review: Association between circulating microRNA expression & stroke.. <i>Journal of Cerebral Blood Flow and Metabolism</i> , 2022 , 271678X221085090	7.3	0
150	Robust Thrombolytic and Anti-Inflammatory Action of a Constitutively Active ADAMTS13 Variant in Murine Stroke Models. <i>Blood</i> , 2021 ,	2.2	2
149	Characterisation of microvessel blood velocity and segment length in the brain using multi-diffusion-time diffusion-weighted MRI. <i>Journal of Cerebral Blood Flow and Metabolism</i> , 2021 , 41, 1939-1953	7.3	1
148	Systemic infection exacerbates cerebrovascular dysfunction in Alzheimer's disease. <i>Brain</i> , 2021 , 144, 1869-1883	11.2	5
147	Glyceryl trinitrate for the treatment of ischaemic stroke: Determining efficacy in rodent and ovine species for enhanced clinical translation. <i>Journal of Cerebral Blood Flow and Metabolism</i> , 2021 , 41, 3248-3259	7.3	1
146	Regenerative Potential of Hydrogels for Intracerebral Hemorrhage: Lessons from Ischemic Stroke and Traumatic Brain Injury Research. <i>Advanced Healthcare Materials</i> , 2021 , 10, e2100455	10.1	0
145	Revisiting promising preclinical intracerebral hemorrhage studies to highlight repurposable drugs for translation. <i>International Journal of Stroke</i> , 2021 , 16, 123-136	6.3	1
144	Influence of metabolic syndrome on post-stroke outcome, angiogenesis and vascular function in old rats determined by dynamic contrast enhanced MRI. <i>Journal of Cerebral Blood Flow and Metabolism</i> , 2021 , 41, 1692-1706	7.3	0
143	A hyperacute immune map of ischaemic stroke patients reveals alterations to circulating innate and adaptive cells. <i>Clinical and Experimental Immunology</i> , 2021 , 203, 458-471	6.2	2
142	Global proteomic analysis of extracellular matrix in mouse and human brain highlights relevance to cerebrovascular disease. <i>Journal of Cerebral Blood Flow and Metabolism</i> , 2021 , 41, 2423-2438	7.3	4
141	Cardiovascular comorbidities, inflammation, and cerebral small vessel disease. <i>Cardiovascular Research</i> , 2021 , 117, 2575-2588	9.9	3
140	UK consensus on pre-clinical vascular cognitive impairment functional outcomes assessment: Questionnaire and workshop proceedings. <i>Journal of Cerebral Blood Flow and Metabolism</i> , 2020 , 40, 1402-1414	7.3	0
139	Anakinra in COVID-19: important considerations for clinical trials. <i>Lancet Rheumatology</i> , 2020 , 2, e379-e381	14.2	34

138	Preceding infection and risk of stroke: An old concept revived by the COVID-19 pandemic. <i>International Journal of Stroke</i> , 2020 , 15, 722-732	6.3	19
137	Therapeutic potential of extracellular vesicles in preclinical stroke models: a systematic review and meta-analysis.. <i>BMJ Open Science</i> , 2020 , 4, e100047	4.6	4
136	Systemic conditioned medium treatment from interleukin-1 primed mesenchymal stem cells promotes recovery after stroke. <i>Stem Cell Research and Therapy</i> , 2020 , 11, 32	8.3	13
135	Hallmarks of NLRP3 inflammasome activation are observed in organotypic hippocampal slice culture. <i>Immunology</i> , 2020 , 161, 39-52	7.8	5
134	Improved reperfusion following alternative surgical approach for experimental stroke in mice. <i>F1000Research</i> , 2020 , 9, 188	3.6	3
133	Improved reperfusion following alternative surgical approach for experimental stroke in mice. <i>F1000Research</i> , 2020 , 9, 188	3.6	3
132	Stroke Induces Prolonged Changes in Lipid Metabolism, the Liver and Body Composition in Mice. <i>Translational Stroke Research</i> , 2020 , 11, 837-850	7.8	10
131	A Multi-Model Pipeline for Translational Intracerebral Haemorrhage Research. <i>Translational Stroke Research</i> , 2020 , 11, 1229-1242	7.8	7
130	Value of dynamic clinical and biomarker data for mortality risk prediction in COVID-19: a multicentre retrospective cohort study. <i>BMJ Open</i> , 2020 , 10, e041983	3	5
129	Ligature-induced periodontitis induces systemic inflammation but does not alter acute outcome after stroke in mice. <i>International Journal of Stroke</i> , 2020 , 15, 175-187	6.3	9
128	Using Zebrafish Larvae to Study the Pathological Consequences of Hemorrhagic Stroke. <i>Journal of Visualized Experiments</i> , 2019 ,	1.6	8
127	Extent of Ischemic Brain Injury After Thrombotic Stroke Is Independent of the NLRP3 (NACHT, LRR and PYD Domains-Containing Protein 3) Inflammasome. <i>Stroke</i> , 2019 , 50, 1232-1239	6.7	27
126	Selective Liposomal Transport through Blood Brain Barrier Disruption in Ischemic Stroke Reveals Two Distinct Therapeutic Opportunities. <i>ACS Nano</i> , 2019 , 13, 12470-12486	16.7	32
125	Pentraxin 3 regulates neutrophil infiltration to the brain during neuroinflammation. <i>AMRC Open Research</i> , 2019 , 1, 10	1.3	5
124	Interleukin-1 receptor antagonist treatment in acute ischaemic stroke does not alter systemic markers of anti-microbial defence. <i>F1000Research</i> , 2019 , 8, 1039	3.6	4
123	Interleukin-1 receptor antagonist treatment in acute ischaemic stroke does not alter systemic markers of anti-microbial defence. <i>F1000Research</i> , 2019 , 8, 1039	3.6	3
122	Interleukin-1 mediates ischaemic brain injury via distinct actions on endothelial cells and cholinergic neurons. <i>Brain, Behavior, and Immunity</i> , 2019 , 76, 126-138	16.6	26
121	Vascular dysfunction-The disregarded partner of Alzheimer's disease. <i>Alzheimer's and Dementia</i> , 2019 , 15, 158-167	1.2	265

120	Acute high-fat feeding leads to disruptions in glucose homeostasis and worsens stroke outcome. <i>Journal of Cerebral Blood Flow and Metabolism</i> , 2019 , 39, 1026-1037	7.3	20
119	Microglial Priming as Trained Immunity in the Brain. <i>Neuroscience</i> , 2019 , 405, 47-54	3.9	43
118	Development of a characterised tool kit for the interrogation of NLRP3 inflammasome-dependent responses. <i>Scientific Reports</i> , 2018 , 8, 5667	4.9	16
117	Neutrophil infiltration to the brain is platelet-dependent, and is reversed by blockade of platelet GPIIb/IIIa. <i>Immunology</i> , 2018 , 154, 322-328	7.8	25
116	SCIL-STROKE (Subcutaneous Interleukin-1 Receptor Antagonist in Ischemic Stroke): A Randomized Controlled Phase 2 Trial. <i>Stroke</i> , 2018 , 49, 1210-1216	6.7	93
115	Assessing Inflammation in Acute Intracerebral Hemorrhage with PK11195 PET and Dynamic Contrast-Enhanced MRI. <i>Journal of Neuroimaging</i> , 2018 , 28, 158-161	2.8	12
114	Changes in the secretome of tri-dimensional spheroid-cultured human mesenchymal stem cells in vitro by interleukin-1 priming. <i>Stem Cell Research and Therapy</i> , 2018 , 9, 11	8.3	56
113	Using zebrafish larval models to study brain injury, locomotor and neuroinflammatory outcomes following intracerebral haemorrhage. <i>F1000Research</i> , 2018 , 7, 1617	3.6	9
112	Using zebrafish larval models to study brain injury, locomotor and neuroinflammatory outcomes following intracerebral haemorrhage. <i>F1000Research</i> , 2018 , 7, 1617	3.6	12
111	Generation of Human Mesenchymal Stem Cell 3D Spheroids Using Low-binding Plates. <i>Bio-protocol</i> , 2018 , 8,	0.9	12
110	Small, Thin Graphene Oxide Is Anti-inflammatory Activating Nuclear Factor Erythroid 2-Related Factor 2 via Metabolic Reprogramming. <i>ACS Nano</i> , 2018 , 12, 11949-11962	16.7	23
109	Stroke: The past, present and future. <i>Brain and Neuroscience Advances</i> , 2018 , 2, 2398212818810689	4	13
108	Pentraxin 3 promotes long-term cerebral blood flow recovery, angiogenesis, and neuronal survival after stroke. <i>Journal of Molecular Medicine</i> , 2018 , 96, 1319-1332	5.5	19
107	The therapeutic potential of the mesenchymal stem cell secretome in ischaemic stroke. <i>Journal of Cerebral Blood Flow and Metabolism</i> , 2018 , 38, 1276-1292	7.3	119
106	Targeting the IL33-NLRP3 axis improves therapy for experimental cerebral malaria. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2018 , 115, 7404-7409	11.5	27
105	Translational models for vascular cognitive impairment: a review including larger species. <i>BMC Medicine</i> , 2017 , 15, 16	11.4	52
104	A brain in flame; do inflammasomes and pyroptosis influence stroke pathology?. <i>Brain Pathology</i> , 2017 , 27, 205-212	6	79
103	Boron-Based Inhibitors of the NLRP3 Inflammasome. <i>Cell Chemical Biology</i> , 2017 , 24, 1321-1335.e5	8.2	61

102	A quantitative brain map of experimental cerebral malaria pathology. <i>PLoS Pathogens</i> , 2017 , 13, e1006267	48
101	Mitochondrial Abnormalities and Synaptic Loss Underlie Memory Deficits Seen in Mouse Models of Obesity and Alzheimer's Disease. <i>Journal of Alzheimer's Disease</i> , 2017 , 55, 915-932	4.3 41
100	The IMPROVE Guidelines (Ischaemia Models: Procedural Refinements Of in Vivo Experiments). <i>Journal of Cerebral Blood Flow and Metabolism</i> , 2017 , 37, 3488-3517	7.3 74
99	Interleukin-1 primes human mesenchymal stem cells towards an anti-inflammatory and pro-trophic phenotype in vitro. <i>Stem Cell Research and Therapy</i> , 2017 , 8, 79	8.3 107
98	Reparative effects of interleukin-1 receptor antagonist in young and aged/co-morbid rodents after cerebral ischemia. <i>Brain, Behavior, and Immunity</i> , 2017 , 61, 117-126	16.6 46
97	Isolation and Cultivation of Primary Brain Endothelial Cells from Adult Mice. <i>Bio-protocol</i> , 2017 , 7,	0.9 21
96	Fenamate NSAIDs inhibit the NLRP3 inflammasome and protect against Alzheimer's disease in rodent models. <i>Nature Communications</i> , 2016 , 7, 12504	17.4 228
95	Interleukin-1 in Stroke: From Bench to Bedside. <i>Stroke</i> , 2016 , 47, 2160-7	6.7 68
94	Systemic inflammation affects reperfusion following transient cerebral ischaemia. <i>Experimental Neurology</i> , 2016 , 277, 252-260	5.7 16
93	A cross-laboratory preclinical study on the effectiveness of interleukin-1 receptor antagonist in stroke. <i>Journal of Cerebral Blood Flow and Metabolism</i> , 2016 , 36, 596-605	7.3 45
92	Emerging roles of the acute phase protein pentraxin-3 during central nervous system disorders. <i>Journal of Neuroimmunology</i> , 2016 , 292, 27-33	3.5 18
91	Decreased haemodynamic response and decoupling of cortical gamma-band activity and tissue oxygen perfusion after striatal interleukin-1 injection. <i>Journal of Neuroinflammation</i> , 2016 , 13, 195	10.1 6
90	Efficacy of Alteplase in a Mouse Model of Acute Ischemic Stroke: A Retrospective Pooled Analysis. <i>Stroke</i> , 2016 , 47, 1312-1318	6.7 25
89	Development & automation of a novel [(18)F]F prosthetic group, 2-[(18)F]-fluoro-3-pyridinecarboxaldehyde, and its application to an amino(oxy)-functionalised A β peptide. <i>Applied Radiation and Isotopes</i> , 2016 , 116, 120-7	1.7 8
88	Characterization of a conditional interleukin-1 receptor 1 mouse mutant using the Cre/LoxP system. <i>European Journal of Immunology</i> , 2016 , 46, 912-8	6.1 21
87	Delayed reperfusion deficits after experimental stroke account for increased pathophysiology. <i>Journal of Cerebral Blood Flow and Metabolism</i> , 2015 , 35, 277-84	7.3 30
86	AIM2 and NLRC4 inflammasomes contribute with ASC to acute brain injury independently of NLRP3. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2015 , 112, 4050-5	11.5 157
85	Interleukin-1 as a pharmacological target in acute brain injury. <i>Experimental Physiology</i> , 2015 , 100, 1488-94	21

84	Interleukin-1 and acute brain injury. <i>Frontiers in Cellular Neuroscience</i> , 2015 , 9, 18	6.1	93
83	Acid-dependent Interleukin-1 (IL-1) Cleavage Limits Available Pro-IL-1 for Caspase-1 Cleavage. <i>Journal of Biological Chemistry</i> , 2015 , 290, 25374-81	5.4	9
82	Requirement for interleukin-1 to drive brain inflammation reveals tissue-specific mechanisms of innate immunity. <i>European Journal of Immunology</i> , 2015 , 45, 525-30	6.1	25
81	The acute-phase protein PTX3 is an essential mediator of glial scar formation and resolution of brain edema after ischemic injury. <i>Journal of Cerebral Blood Flow and Metabolism</i> , 2014 , 34, 480-8	7.3	58
80	Chitinase-like proteins promote IL-17-mediated neutrophilia in a tradeoff between nematode killing and host damage. <i>Nature Immunology</i> , 2014 , 15, 1116-25	19.1	132
79	Late-onset epilepsy and occult cerebrovascular disease. <i>Journal of Cerebral Blood Flow and Metabolism</i> , 2014 , 34, 564-70	7.3	31
78	Variations in inflammation-related genes may be associated with childhood febrile seizure susceptibility. <i>Seizure: the Journal of the British Epilepsy Association</i> , 2014 , 23, 457-61	3.2	10
77	High-fat diet-induced memory impairment in triple-transgenic Alzheimer disease (3xTgAD) mice is independent of changes in amyloid and tau pathology. <i>Neurobiology of Aging</i> , 2014 , 35, 1821-32	5.6	152
76	Long-term functional recovery and compensation after cerebral ischemia in rats. <i>Behavioural Brain Research</i> , 2014 , 270, 18-28	3.4	25
75	Systemic inflammation impairs tissue reperfusion through endothelin-dependent mechanisms in cerebral ischemia. <i>Stroke</i> , 2014 , 45, 3412-9	6.7	31
74	Circulating cytokines and alarmins associated with placental inflammation in high-risk pregnancies. <i>American Journal of Reproductive Immunology</i> , 2014 , 72, 422-34	3.8	49
73	<i>Streptococcus pneumoniae</i> worsens cerebral ischemia via interleukin 1 and platelet glycoprotein Ib. <i>Annals of Neurology</i> , 2014 , 75, 670-83	9.4	39
72	Endogenous oils derived from human adipocytes are potent adjuvants that promote IL-1 dependent inflammation. <i>Diabetes</i> , 2014 , 63, 2037-50	0.9	32
71	Epilepsy and the inflammasome: Targeting inflammation as a novel therapeutic strategy for seizure disorders. <i>Inflammasome</i> , 2014 , 1,		4
70	Maternal high-fat diet worsens memory deficits in the triple-transgenic (3xTgAD) mouse model of Alzheimer disease. <i>PLoS ONE</i> , 2014 , 9, e99226	3.7	25
69	Systemic immune activation shapes stroke outcome. <i>Molecular and Cellular Neurosciences</i> , 2013 , 53, 14-25	5.8	51
68	Surgical manipulation compromises leukocyte mobilization responses and inflammation after experimental cerebral ischemia in mice. <i>Frontiers in Neuroscience</i> , 2013 , 7, 271	5.1	9
67	Central and haematopoietic interleukin-1 both contribute to ischaemic brain injury in mice. <i>DMM Disease Models and Mechanisms</i> , 2013 , 6, 1043-8	4.1	30

66	Microglia and macrophages differentially modulate cell death after brain injury caused by oxygen-glucose deprivation in organotypic brain slices. <i>Glia</i> , 2013 , 61, 813-24	9	116
65	Acidosis drives damage-associated molecular pattern (DAMP)-induced interleukin-1 secretion via a caspase-1-independent pathway. <i>Journal of Biological Chemistry</i> , 2013 , 288, 30485-30494	5.4	43
64	Age-related changes in core body temperature and activity in triple-transgenic Alzheimer's disease (3xTgAD) mice. <i>DMM Disease Models and Mechanisms</i> , 2013 , 6, 160-70	4.1	46
63	Systematic review and meta-analysis of the efficacy of statins in experimental stroke. <i>International Journal of Stroke</i> , 2012 , 7, 150-6	6.3	18
62	Hypermetabolism in a triple-transgenic mouse model of Alzheimer's disease. <i>Neurobiology of Aging</i> , 2012 , 33, 187-93	5.6	34
61	An Endovascular Perforation Model of Subarachnoid Haemorrhage in Rat Produces Heterogeneous Infarcts that Increase with Blood Load. <i>Translational Stroke Research</i> , 2012 , 3, 164-72	7.8	11
60	Interleukin-1 mediates neuroinflammatory changes associated with diet-induced atherosclerosis. <i>Journal of the American Heart Association</i> , 2012 , 1, e002006	6	26
59	Delayed administration of interleukin-1 receptor antagonist reduces ischemic brain damage and inflammation in comorbid rats. <i>Journal of Cerebral Blood Flow and Metabolism</i> , 2012 , 32, 1810-9	7.3	105
58	Neutrophil cerebrovascular transmigration triggers rapid neurotoxicity through release of proteases associated with decondensed DNA. <i>Journal of Immunology</i> , 2012 , 189, 381-92	5.3	133
57	Interleukin-1 receptor antagonist is beneficial after subarachnoid haemorrhage in rat by blocking haem-driven inflammatory pathology. <i>DMM Disease Models and Mechanisms</i> , 2012 , 5, 823-33	4.1	81
56	Assessing the contribution of inflammation in models of Alzheimer's disease. <i>Biochemical Society Transactions</i> , 2011 , 39, 886-90	5.1	88
55	Brain inflammation is induced by co-morbidities and risk factors for stroke. <i>Brain, Behavior, and Immunity</i> , 2011 , 25, 1113-22	16.6	150
54	Regulation of interleukin-1 in acute brain injury. <i>Trends in Pharmacological Sciences</i> , 2011 , 32, 617-22	13.2	65
53	Experimental stroke-induced changes in the bone marrow reveal complex regulation of leukocyte responses. <i>Journal of Cerebral Blood Flow and Metabolism</i> , 2011 , 31, 1036-50	7.3	52
52	Experimental intracerebral hemorrhage: avoiding pitfalls in translational research. <i>Journal of Cerebral Blood Flow and Metabolism</i> , 2011 , 31, 2135-51	7.3	53
51	Interleukin-1 and stroke: biomarker, harbinger of damage, and therapeutic target. <i>Cerebrovascular Diseases</i> , 2011 , 32, 517-27	3.2	83
50	Letter by McColl et al regarding article, "influenza virus infection aggravates stroke outcome". <i>Stroke</i> , 2011 , 42, e416; author reply e417	6.7	0
49	Occult cerebrovascular disease and late-onset epilepsy: could loss of neurovascular unit integrity be a viable model?. <i>Cardiovascular Psychiatry and Neurology</i> , 2011 , 2011, 130406		12

48	Interleukin-1 receptor antagonist in animal models of stroke: a fair summing up?. <i>Journal of Stroke and Cerebrovascular Diseases</i> , 2010 , 19, 512-3	2.8	4
47	Inflammation and brain injury: acute cerebral ischaemia, peripheral and central inflammation. <i>Brain, Behavior, and Immunity</i> , 2010 , 24, 708-23	16.6	230
46	Platelet interleukin-1alpha drives cerebrovascular inflammation. <i>Blood</i> , 2010 , 115, 3632-9	2.2	133
45	Tufts derivatives of FITC, Tb-DOTA or Gd-DOTA as potential macrophage-specific imaging biomarkers. <i>Contrast Media and Molecular Imaging</i> , 2010 , 5, 223-30	3.2	5
44	Interleukin-1 drives cerebrovascular inflammation via MAP kinase-independent pathways. <i>Current Neurovascular Research</i> , 2010 , 7, 330-40	1.8	32
43	A rapid and transient peripheral inflammatory response precedes brain inflammation after experimental stroke. <i>Journal of Cerebral Blood Flow and Metabolism</i> , 2009 , 29, 1764-8	7.3	97
42	Systemic infection, inflammation and acute ischemic stroke. <i>Neuroscience</i> , 2009 , 158, 1049-61	3.9	246
41	ADAMTS-9 expression is up-regulated following transient middle cerebral artery occlusion (tMCAo) in the rat. <i>Neuroscience Letters</i> , 2009 , 452, 252-7	3.3	13
40	Inflammatory responses in the rat brain in response to different methods of intra-cerebral administration. <i>Journal of Neuroimmunology</i> , 2008 , 194, 27-33	3.5	31
39	Matrix metalloproteinase-9 and urokinase plasminogen activator mediate interleukin-1-induced neurotoxicity. <i>Molecular and Cellular Neurosciences</i> , 2008 , 37, 135-42	4.8	46
38	Systemic inflammation alters the kinetics of cerebrovascular tight junction disruption after experimental stroke in mice. <i>Journal of Neuroscience</i> , 2008 , 28, 9451-62	6.6	243
37	Impaired adult neurogenesis in the dentate gyrus of a triple transgenic mouse model of Alzheimer's disease. <i>PLoS ONE</i> , 2008 , 3, e2935	3.7	260
36	Proliferating resident microglia after focal cerebral ischaemia in mice. <i>Journal of Cerebral Blood Flow and Metabolism</i> , 2007 , 27, 1941-53	7.3	253
35	Collapsin response mediator protein-2 hyperphosphorylation is an early event in Alzheimer's disease progression. <i>Journal of Neurochemistry</i> , 2007 , 103, 1132-44	6	136
34	Neuroinflammation in Parkinson's patients and MPTP-treated mice is not restricted to the nigrostriatal system: microgliosis and differential expression of interleukin-1 receptors in the olfactory bulb. <i>Experimental Gerontology</i> , 2007 , 42, 762-71	4.5	53
33	Systemic inflammatory stimulus potentiates the acute phase and CXC chemokine responses to experimental stroke and exacerbates brain damage via interleukin-1- and neutrophil-dependent mechanisms. <i>Journal of Neuroscience</i> , 2007 , 27, 4403-12	6.6	282
32	Systemic inflammation and stroke: aetiology, pathology and targets for therapy. <i>Biochemical Society Transactions</i> , 2007 , 35, 1163-5	5.1	50
31	ADAMTS-1 and -4 are up-regulated following transient middle cerebral artery occlusion in the rat and their expression is modulated by TNF in cultured astrocytes. <i>Brain Research</i> , 2006 , 1088, 19-30	3.7	55

30	Neurodegenerative actions of interleukin-1 in the rat brain are mediated through increases in seizure activity. <i>Journal of Neuroscience Research</i> , 2006 , 83, 385-91	4.4	24
29	The neurovascular unit and the key role of astrocytes in the regulation of cerebral blood flow. <i>Cerebrovascular Diseases</i> , 2006 , 21, 137-8	3.2	13
28	A luminescent probe containing a tuftsin targeting vector coupled to a terbium complex. <i>Chemical Communications</i> , 2006 , 909-11	5.8	54
27	Interleukin-1-induced neurotoxicity is mediated by glia and requires caspase activation and free radical release. <i>Journal of Neurochemistry</i> , 2006 , 98, 258-66	6	135
26	Inactivation of caspase-1 in rodent brain: a novel anticonvulsive strategy. <i>Epilepsia</i> , 2006 , 47, 1160-8	6.4	136
25	Interleukin-1 and neuronal injury. <i>Nature Reviews Immunology</i> , 2005 , 5, 629-40	36.5	763
24	Peripheral administration of interleukin-1 exacerbates ischaemic brain damage after transient focal ischaemia in mice. <i>Journal of Cerebral Blood Flow and Metabolism</i> , 2005 , 25, S103-S103	7.3	
23	Anti-inflammatory modulators in stroke. <i>Drug Discovery Today: Therapeutic Strategies</i> , 2004 , 1, 59-67		0
22	A dual role for interleukin-1 in LTP in mouse hippocampal slices. <i>Journal of Neuroimmunology</i> , 2003 , 144, 61-7	3.5	157
21	IL-1Rrp2 expression and IL-1F9 (IL-1H1) actions in brain cells. <i>Journal of Neuroimmunology</i> , 2003 , 139, 36-43	3.5	34
20	Interleukin-1 in the brain: mechanisms of action in acute neurodegeneration. <i>Annals of the New York Academy of Sciences</i> , 2003 , 992, 39-47	6.5	112
19	Inflammation in central nervous system injury. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2003 , 358, 1669-77	5.8	263
