#	ARTICLE	IF	CITATIONS
1	Biology and pathogenesis of Acanthamoeba. Parasites and Vectors, 2012, 5, 6.	1.0	416
2	Pathogenesis of microbial keratitis. Microbial Pathogenesis, 2017, 104, 97-109.	1.3	155
3	Biology and pathogenesis of Naegleria fowleri. Acta Tropica, 2016, 164, 375-394.	0.9	127
4	Increasing Importance of <i>Balamuthia mandrillaris</i> . Clinical Microbiology Reviews, 2008, 21, 435-448.	5.7	121
5	Antimicrobial activities of green synthesized gums-stabilized nanoparticles loaded with flavonoids. Scientific Reports, 2019, 9, 3122.	1.6	96
6	Primary Amoebic Meningoencephalitis Caused by Naegleria fowleri: An Old Enemy Presenting New Challenges. PLoS Neglected Tropical Diseases, 2014, 8, e3017.	1.3	95
7	Brain-Eating Amoebae: Silver Nanoparticle Conjugation Enhanced Efficacy of Anti-Amoebic Drugs against <i>Naegleria fowleri</i> . ACS Chemical Neuroscience, 2017, 8, 2626-2630.	1.7	85
8	The Development of Drugs against Acanthamoeba Infections. Antimicrobial Agents and Chemotherapy, 2016, 60, 6441-6450.	1.4	79
9	Brain-Eating Amoebae: Predilection Sites in the Brain and Disease Outcome. Journal of Clinical Microbiology, 2017, 55, 1989-1997.	1.8	76
10	Acanthamoeba affects the integrity of human brain microvascular endothelial cells and degrades the tight junction proteins. International Journal for Parasitology, 2009, 39, 1611-1616.	1.3	73
11	Leptospirosis: Increasing importance in developing countries. Acta Tropica, 2020, 201, 105183.	0.9	68
12	Balamuthia amoebic encephalitis: An emerging disease with fatal consequences. Microbial Pathogenesis, 2008, 44, 89-97.	1.3	65
13	Cellulose degradation: a therapeutic strategy in the improved treatment of Acanthamoeba infections. Parasites and Vectors, 2015, 8, 23.	1.0	60
14	Identification and characterization of antibacterial compound(s) of cockroaches (Periplaneta) Tj ETQq0 0 0 rgBT /Oyerlock 10 Tf 50 222	1.7	60
15	Acanthamoeba is an evolutionary ancestor of macrophages: A myth or reality?. Experimental Parasitology, 2012, 130, 95-97.	0.5	57
16	Silver nanoparticle conjugation affects antiacanthamoebic activities of amphotericin B, nystatin, and fluconazole. Parasitology Research, 2018, 117, 265-271.	0.6	54
17	Combating Acanthamoeba spp. cysts: what are the options?. Parasites and Vectors, 2018, 11, 26.	1.0	51
18	Gut microbiome and human health under the space environment. Journal of Applied Microbiology, 2021, 130, 14-24.	1.4	49

#	ARTICLE	IF	CITATIONS
19	Silver Nanoparticle Conjugation-Enhanced Antibacterial Efficacy of Clinically Approved Drugs Cephadrine and Vildagliptin. <i>Antibiotics</i> , 2018, 7, 100.	1.5	47
20	Gold Nanoparticle-Conjugated Cinnamic Acid Exhibits Antiacanthamoebic and Antibacterial Properties. <i>Antimicrobial Agents and Chemotherapy</i> , 2018, 62, .	1.4	47
21	Zinc oxide nanoparticles conjugated with clinically-approved medicines as potential antibacterial molecules. <i>AMB Express</i> , 2021, 11, 104.	1.4	45
22	Gut bacteria of cockroaches are a potential source of antibacterial compound(s). <i>Letters in Applied Microbiology</i> , 2018, 66, 416-426.	1.0	44
23	Novel Coronavirus: Current Understanding of Clinical Features, Diagnosis, Pathogenesis, and Treatment Options. <i>Pathogens</i> , 2020, 9, 297.	1.2	44
24	Crocodiles and alligators: Antiamoebic and antitumor compounds of crocodiles. <i>Experimental Parasitology</i> , 2017, 183, 194-200.	0.5	43
25	Cobalt nanoparticles as novel nanotherapeutics against <i>Acanthamoeba castellanii</i> . <i>Parasites and Vectors</i> , 2019, 12, 280.	1.0	41
26	<i>Acanthamoeba castellanii</i> of the T4 genotype is a potential environmental host for <i>Enterobacter aerogenes</i> and <i>Aeromonas hydrophila</i> . <i>Parasites and Vectors</i> , 2013, 6, 169.	1.0	40
27	Gold Nanoparticle Conjugation Enhances the Antiacanthamoebic Effects of Chlorhexidine. <i>Antimicrobial Agents and Chemotherapy</i> , 2016, 60, 1283-1288.	1.4	40
28	The Use of Nanomedicine for Targeted Therapy against Bacterial Infections. <i>Antibiotics</i> , 2019, 8, 260.	1.5	38
29	Inefficacy of marketed contact lens disinfection solutions against keratitis-causing <i>Acanthamoeba castellanii</i> belonging to the T4 genotype. <i>Experimental Parasitology</i> , 2014, 141, 122-128.	0.5	36
30	Anti-Acanthamoebic properties of resveratrol and demethoxycurcumin. <i>Experimental Parasitology</i> , 2012, 132, 519-523.	0.5	35
31	Repositioning of Guanabenz in Conjugation with Gold and Silver Nanoparticles against Pathogenic Amoebae <i>Acanthamoeba castellanii</i> and <i>Naegleria fowleri</i> . <i>ACS Infectious Diseases</i> , 2019, 5, 2039-2046.	1.8	35
32	Drug Discovery against <i>Acanthamoeba</i> Infections: Present Knowledge and Unmet Needs. <i>Pathogens</i> , 2020, 9, 405.	1.2	35
33	War of the microbial worlds: Who is the beneficiary in <i>Acanthamoeba</i> "bacterial interactions?. <i>Experimental Parasitology</i> , 2012, 130, 311-313.	0.5	34
34	Antiamoebic activity of plant-based natural products and their conjugated silver nanoparticles against <i>Acanthamoeba castellanii</i> (ATCC 50492). <i>AMB Express</i> , 2020, 10, 24.	1.4	34
35	Clinically Approved Drugs against CNS Diseases as Potential Therapeutic Agents To Target Brain-Eating Amoebae. <i>ACS Chemical Neuroscience</i> , 2019, 10, 658-666.	1.7	32
36	Application and Importance of Theranostics in the Diagnosis and Treatment of Cancer. <i>Archives of Medical Research</i> , 2021, 52, 131-142.	1.5	32

#	ARTICLE	IF	CITATIONS
37	Animals living in polluted environments are potential source of antimicrobials against infectious agents. <i>Pathogens and Global Health</i> , 2012, 106, 218-223.	1.0	31
38	Targeting cyst wall is an effective strategy in improving the efficacy of marketed contact lens disinfecting solutions against <i>Acanthamoeba castellanii</i> cysts. <i>Contact Lens and Anterior Eye</i> , 2016, 39, 239-243.	0.8	30
39	Gut bacteria of <i>Cuora amboinensis</i> (turtle) produce broad-spectrum antibacterial molecules. <i>Scientific Reports</i> , 2019, 9, 17012.	1.6	30
40	Gold Nanoparticles Conjugation Enhances Antiacanthamoebic Properties of Nystatin, Fluconazole and Amphotericin B. <i>Journal of Microbiology and Biotechnology</i> , 2019, 29, 171-177.	0.9	30
41	Cytotoxic effects of Benzodioxane, Naphthalene diimide, Porphyrin and Acetamol derivatives on HeLa cells. <i>SAGE Open Medicine</i> , 2018, 6, 205031211878196.	0.7	29
42	Effect of Antimicrobial Compounds on <i>Balamuthia mandrillaris</i> Encystment and Human Brain Microvascular Endothelial Cell Cytopathogenicity. <i>Antimicrobial Agents and Chemotherapy</i> , 2007, 51, 4471-4473.	1.4	28
43	The effect of different environmental conditions on the encystation of <i>Acanthamoeba castellanii</i> belonging to the T4 genotype. <i>Experimental Parasitology</i> , 2013, 135, 30-35.	0.5	28
44	Combined drug therapy in the management of granulomatous amoebic encephalitis due to <i>Acanthamoeba</i> spp., and <i>Balamuthia mandrillaris</i> . <i>Experimental Parasitology</i> , 2014, 145, S115-S120.	0.5	28
45	<i>trans</i> -Cinnamic Acid Conjugated Gold Nanoparticles as Potent Therapeutics against Brain-Eating Amoeba <i>Naegleria fowleri</i> . <i>ACS Chemical Neuroscience</i> , 2019, 10, 2692-2696.	1.7	28
46	Antibacterial Activities of Selected Pure Compounds Isolated from Gut Bacteria of Animals Living in Polluted Environments. <i>Antibiotics</i> , 2020, 9, 190.	1.5	28
47	<i>Balamuthia mandrillaris</i> interactions with human brain microvascular endothelial cells in vitro. <i>Journal of Medical Microbiology</i> , 2007, 56, 1110-1115.	0.7	27
48	Status of free-living amoebae (<i>Acanthamoeba</i> spp., <i>Naegleria fowleri</i> , <i>Balamuthia mandrillaris</i>) in drinking water supplies in Karachi, Pakistan. <i>Journal of Water and Health</i> , 2013, 11, 371-375.	1.1	27
49	Status of the effectiveness of contact lens solutions against keratitis-causing pathogens. <i>Contact Lens and Anterior Eye</i> , 2015, 38, 34-38.	0.8	27
50	<i>Balamuthia mandrillaris</i> : Morphology, biology, and virulence. <i>Tropical Parasitology</i> , 2015, 5, 15.	0.2	27
51	A Simple Assay to Screen Antimicrobial Compounds Potentiating the Activity of Current Antibiotics. <i>BioMed Research International</i> , 2013, 2013, 1-4.	0.9	26
52	Silencing of xylose isomerase and cellulose synthase by siRNA inhibits encystation in <i>Acanthamoeba castellanii</i> . <i>Parasitology Research</i> , 2013, 112, 1221-1227.	0.6	25
53	Animals living in polluted environments are a potential source of anti-tumor molecule(s). <i>Cancer Chemotherapy and Pharmacology</i> , 2017, 80, 919-924.	1.1	25
54	<i>Balamuthia mandrillaris</i> resistance to hostile conditions. <i>Journal of Medical Microbiology</i> , 2008, 57, 428-431.	0.7	24

#	ARTICLE	IF	CITATIONS
55	Synthesis of 4-(dimethylamino)pyridine propylthioacetate coated gold nanoparticles and their antibacterial and photophysical activity. <i>Journal of Nanobiotechnology</i> , 2018, 16, 6.	4.2	24
56	Oleic acid-conjugated silver nanoparticles as efficient antiamebic agent against <i>Acanthamoeba castellanii</i> . <i>Parasitology Research</i> , 2019, 118, 2295-2304.	0.6	23
57	Area 51: How do <i>Acanthamoeba</i> invade the central nervous system?. <i>Trends in Parasitology</i> , 2011, 27, 185-189.	1.5	22
58	<i>Acanthamoeba</i> and bacteria produce antimicrobials to target their counterpart. <i>Parasites and Vectors</i> , 2014, 7, 56.	1.0	22
59	Gold-Conjugated Curcumin as a Novel Therapeutic Agent against Brain-Eating Amoebae. <i>ACS Omega</i> , 2020, 5, 12467-12475.	1.6	22
60	Photochemotherapeutic Strategy against <i>Acanthamoeba</i> Infections. <i>Antimicrobial Agents and Chemotherapy</i> , 2015, 59, 3031-3041.	1.4	21
61	Gut bacteria of animals/pests living in polluted environments are a potential source of antibacterials. <i>Applied Microbiology and Biotechnology</i> , 2019, 103, 3955-3964.	1.7	21
62	<i>Mycobacterium leprae</i> : Pathogenesis, diagnosis, and treatment options. <i>Microbial Pathogenesis</i> , 2020, 149, 104475.	1.3	21
63	Predator vs aliens: bacteria interactions with <i>Acanthamoeba</i> . <i>Parasitology</i> , 2014, 141, 869-874.	0.7	20
64	Development of nanoparticle-assisted PCR assay in the rapid detection of brain-eating amoebae. <i>Parasitology Research</i> , 2018, 117, 1801-1811.	0.6	20
65	Antimicrobial discovery from natural and unusual sources. <i>Journal of Pharmacy and Pharmacology</i> , 2018, 70, 1287-1300.	1.2	20
66	Novel Azoles as Antiparasitic Remedies against Brain-Eating Amoebae. <i>Antibiotics</i> , 2020, 9, 188.	1.5	20
67	The type III secretion system is involved in <i>Escherichia coli</i> K1 interactions with <i>Acanthamoeba</i> . <i>Experimental Parasitology</i> , 2011, 128, 409-413.	0.5	19
68	Novel antiacanthamoebic compounds belonging to quinazolinones. <i>European Journal of Medicinal Chemistry</i> , 2019, 182, 111575.	2.6	19
69	Gut Bacteria of Water Monitor Lizard (<i>Varanus salvator</i>) Are a Potential Source of Antibacterial Compound(s). <i>Antibiotics</i> , 2019, 8, 164.	1.5	19
70	The increasing importance of <i>Vermamoeba vermiformis</i> . <i>Journal of Eukaryotic Microbiology</i> , 2021, 68, e12857.	0.8	19
71	Metformin-coated silver nanoparticles exhibit anti-acanthamoebic activities against both trophozoite and cyst stages. <i>Experimental Parasitology</i> , 2020, 215, 107915.	0.5	19
72	Brain-eating Amoebae Infection: Challenges and Opportunities in Chemotherapy. <i>Mini-Reviews in Medicinal Chemistry</i> , 2019, 19, 980-987.	1.1	19

#	ARTICLE	IF	CITATIONS
73	War of the microbial world: Acanthamoeba spp. interactions with microorganisms. Folia Microbiologica, 2021, 66, 689-699.	1.1	18
74	The cyst wall carbohydrate composition of Balamuthia mandrillaris. Parasitology Research, 2009, 104, 1439-1443.	0.6	17
75	Effects of Shape and Size of Cobalt Phosphate Nanoparticles against Acanthamoeba castellanii. Pathogens, 2019, 8, 260.	1.2	17
76	Status of the effectiveness of contact lens disinfectants in Malaysia against keratitis-causing pathogens. Experimental Parasitology, 2017, 183, 187-193.	0.5	16
77	Occurrence and molecular characterisation of Acanthamoeba isolated from recreational hot springs in Malaysia: evidence of pathogenic potential. Journal of Water and Health, 2019, 17, 813-825.	1.1	16
78	<i>Naegleria fowleri</i> : diagnosis, treatment options and pathogenesis. Expert Opinion on Orphan Drugs, 2019, 7, 67-80.	0.5	16
79	Occurrence of free-living amoebae (Acanthamoeba, Balamuthia, Naegleria) in water samples in Peninsular Malaysia. Journal of Water and Health, 2019, 17, 160-171.	1.1	16
80	SARS-CoV-2 invasion of the central nervous: a brief review. Hospital Practice (1995), 2021, 49, 157-163.	0.5	16
81	Antidiabetic Drugs and Their Nanoconjugates Repurposed as Novel Antimicrobial Agents against Acanthamoeba castellanii. Journal of Microbiology and Biotechnology, 2019, 29, 713-720.	0.9	16
82	The role of gut microbiome in cancer genesis and cancer prevention. Health Sciences Review, 2022, 2, 100010.	0.6	16
83	Effect of free versus liposomal-complexed pentamidine isethionate on biological characteristics of Acanthamoeba castellanii in vitro. Journal of Medical Microbiology, 2009, 58, 327-330.	0.7	15
84	Balamuthia mandrillaris: Role of galactose in encystment and identification of potential inhibitory targets. Experimental Parasitology, 2010, 126, 22-27.	0.5	15
85	Biologically active metabolite(s) from haemolymph of red-headed centipede Scolopendra subspinipes possess broad spectrum antibacterial activity. AMB Express, 2019, 9, 95.	1.4	15
86	Aryl Quinazolinone Derivatives as Novel Therapeutic Agents against Brain-Eating Amoebae. ACS Chemical Neuroscience, 2020, 11, 2438-2449.	1.7	15
87	Effect of Microgravity Environment on Gut Microbiome and Angiogenesis. Life, 2021, 11, 1008.	1.1	15
88	Metronidazole conjugated magnetic nanoparticles loaded with amphotericin B exhibited potent effects against pathogenic Acanthamoeba castellanii belonging to the T4 genotype. AMB Express, 2020, 10, 127.	1.4	15
89	Black cobra (<i>Naja naja karachiensis</i>) lysates exhibit broad-spectrum antimicrobial activities. Pathogens and Global Health, 2014, 108, 129-136.	1.0	14
90	Gut Bacteria of <i>Rattus rattus</i> (Rat) Produce Broad-Spectrum Antibacterial Lipopeptides. ACS Omega, 2021, 6, 12261-12273.	1.6	14

#	ARTICLE	IF	CITATIONS
91	Acanthamoeba Keratitis: Current Status and Urgent Research Priorities. Current Medicinal Chemistry, 2019, 26, 5711-5726.	1.2	14
92	Opportunistic free-living amoebal pathogens. Pathogens and Global Health, 2022, 116, 70-84.	1.0	14
93	<i>Balamuthia mandrillaris</i> : Staining Properties of Cysts and Trophozoites and the Effect of 2,6-Dichlorobenzonitrile and Calcofluor White on Encystment. Journal of Eukaryotic Microbiology, 2009, 56, 136-141.	0.8	13
94	Is Acanthamoeba pathogenicity associated with intracellular bacteria?. Experimental Parasitology, 2011, 129, 207-210.	0.5	13
95	Is Ritual Cleansing a Missing Link Between Fatal Infection and Brain-Eating Amoebae?. Clinical Infectious Diseases, 2012, 54, 1817-1818.	2.9	13
96	<i>Acanthamoeba</i> differentiation: a two-faced drama of <i>Dr Jekyll and Mr Hyde</i> . Parasitology, 2012, 139, 826-834.	0.7	13
97	Killing the Dead: Chemotherapeutic Strategies Against Free-Living Cyst-Forming Protists (<i>Acanthamoeba</i> sp. and <i>Balamuthia mandrillaris</i>). Journal of Eukaryotic Microbiology, 2013, 60, 291-297.	0.8	13
98	The effect of peptidic and non-peptidic proteasome inhibitors on the biological properties of <i>Acanthamoeba castellanii</i> belonging to the T4 genotype. Experimental Parasitology, 2016, 168, 16-24.	0.5	13
99	Oleic Acid Coated Silver Nanoparticles Showed Better <i>in Vitro</i> Amoebicidal Effects against <i>Naegleria fowleri</i> than Amphotericin B. ACS Chemical Neuroscience, 2020, 11, 2431-2437.	1.7	13
100	Transcriptome analysis of <i>Escherichia coli</i> K1 after therapy with hesperidin conjugated with silver nanoparticles. BMC Microbiology, 2021, 21, 51.	1.3	13
101	Moxifloxacin and Sulfamethoxazole-Based Nanocarriers Exhibit Potent Antibacterial Activities. Antibiotics, 2021, 10, 964.	1.5	13
102	Presence of rotavirus and free-living amoebae in the water supplies of Karachi, Pakistan. Revista Do Instituto De Medicina Tropical De Sao Paulo, 2017, 59, e32.	0.5	12
103	Antibacterial Effects of Quinazolin-4(3H)-One Functionalized-Conjugated Silver Nanoparticles. Antibiotics, 2019, 8, 179.	1.5	12
104	Importance of Theranostics in Rare Brain-Eating Amoebae Infections. ACS Chemical Neuroscience, 2019, 10, 6-12.	1.7	12
105	Proposed Intranasal Route for Drug Administration in the Management of Central Nervous System Manifestations of COVID-19. ACS Chemical Neuroscience, 2020, 11, 1523-1524.	1.7	12
106	Photochemotherapeutic strategies against <i>Acanthamoeba keratitis</i> . AMB Express, 2012, 2, 47.	1.4	11
107	Culturable Aerobic and Facultative Anaerobic Intestinal Bacterial Flora of Black Cobra (<i>Naja naja</i>) Tj ETQq1 1 0.784314 rgBT /Overlock	1.1	11
108	The effect of environmental and physiological conditions on excystation of <i>Acanthamoeba castellanii</i> belonging to the T4 genotype. Parasitology Research, 2014, 113, 2809-2816.	0.6	11
