#	ARTICLE	IF	CITATIONS
1	Shock Index in the early assessment of febrile children at the emergency department: a prospective multicentre study. <i>Archives of Disease in Childhood</i> , 2022, 107, 116-122.	1.0	3
2	Rapid Viral Testing and Antibiotic Prescription in Febrile Children With Respiratory Symptoms Visiting Emergency Departments in Europe. <i>Pediatric Infectious Disease Journal</i> , 2022, 41, 39-44.	1.1	8
3	Retrospective analysis of North West London healthcare utilisation by children during the COVID-19 pandemic. <i>BMJ Paediatrics Open</i> , 2022, 6, e001363.	0.6	3
4	Characteristics and management of adolescents attending the ED with fever: a prospective multicentre study. <i>BMJ Open</i> , 2022, 12, e053451.	0.8	4
5	Update on the Coordinated Efforts of Looking After the Health Care Needs of Children and Young People Fleeing the Conflict Zone of Ukraine Presenting to European Emergency Departmentsâ€”A Joint Statement of the European Society for Emergency Paediatrics and the European Academy of Paediatrics. <i>Frontiers in Pediatrics</i> , 2022, 10, 897803.	0.9	7
6	Mind the gap: Mapping variation between national and local clinical practice guidelines for acute paediatric asthma from the United Kingdom and the Netherlands. <i>PLoS ONE</i> , 2022, 17, e0267445.	1.1	0
7	Febrile children with comorbidities at the emergency department â€” a multicentre observational study. <i>European Journal of Pediatrics</i> , 2022, 181, 3491-3500.	1.3	3
8	Development and validation of a prediction model for invasive bacterial infections in febrile children at European Emergency Departments: MOFICHE, a prospective observational study. <i>Archives of Disease in Childhood</i> , 2021, 106, 641-647.	1.0	13
9	Emergency care provided to refugee children in Europe: RefuNET: a cross-sectional survey study. <i>Emergency Medicine Journal</i> , 2021, 38, 5-13.	0.4	14
10	Impact of a clinical decision rule on antibiotic prescription for children with suspected lower respiratory tract infections presenting to European emergency departments: a simulation study based on routine data. <i>Journal of Antimicrobial Chemotherapy</i> , 2021, 76, 1349-1357.	1.3	1
11	Improving the prioritization of children at the emergency department: Updating the Manchester Triage System using vital signs. <i>PLoS ONE</i> , 2021, 16, e0246324.	1.1	7
12	Role of point-of-care tests in the management of febrile children: a qualitative study of hospital-based doctors and nurses in England. <i>BMJ Open</i> , 2021, 11, e044510.	0.8	4
13	Performance of seven different paediatric early warning scores to predict critical care admission in febrile children presenting to the emergency department: a retrospective cohort study. <i>BMJ Open</i> , 2021, 11, e044091.	0.8	10
14	Changes in Emergency Department Activity and the First COVID-19 Lockdown: A Cross-sectional Study. <i>Western Journal of Emergency Medicine</i> , 2021, 22, 603-607.	0.6	17
15	Treatment of Multisystem Inflammatory Syndrome in Children. <i>New England Journal of Medicine</i> , 2021, 385, 11-22.	13.9	254
16	Reduction in paediatric emergency visits during the COVID-19 pandemic in a region with open preschools and schools. <i>Acta Paediatrica, International Journal of Paediatrics</i> , 2021, 110, 2802-2804.	0.7	7
17	A clinical prediction model to identify children at risk for revisits with serious illness to the emergency department: A prospective multicentre observational study. <i>PLoS ONE</i> , 2021, 16, e0254366.	1.1	7
18	A Novel Framework for Phenotyping Children With Suspected or Confirmed Infection for Future Biomarker Studies. <i>Frontiers in Pediatrics</i> , 2021, 9, 688272.	0.9	34

#	ARTICLE	IF	CITATIONS
19	918â€¦Understanding responses of paediatric emergency departments to the first wave of the Covid-19 pandemic â€“ a pan-European perspective. , 2021, , .		0
20	A NICE combination for predicting hospitalisation at the Emergency Department: a European multicentre observational study of febrile children. Lancet Regional Health - Europe, The, 2021, 8, 100173.	3.0	4
21	1731â€¦Epidemiology, severity and outcomes of children presenting to emergency departments across Europe during the SARS-COV-2 pandemic: an observational cohort study. , 2021, , .		1
22	Variation in hospital admission in febrile children evaluated at the Emergency Department (ED) in Europe: PERFORM, a multicentre prospective observational study. PLoS ONE, 2021, 16, e0244810.	1.1	9
23	The impact of the COVID-19 pandemic on child health. Journal of Laboratory Medicine, 2021, 45, 249-258.	1.1	1
24	Responses of paediatric emergency departments to the first wave of the COVID-19 pandemic in Europe: a cross-sectional survey study. BMJ Paediatrics Open, 2021, 5, e001269.	0.6	3
25	Title is missing!. , 2021, 16, e0244810.		0
26	Title is missing!. , 2021, 16, e0244810.		0
27	Title is missing!. , 2021, 16, e0244810.		0
28	Title is missing!. , 2021, 16, e0244810.		0
29	Pediatric Inflammatory Multisystem Syndrome: Statement by the Pediatric Section of the European Society for Emergency Medicine and European Academy of Pediatrics. Frontiers in Pediatrics, 2020, 8, 490.	0.9	23
30	Management of Children With Fever at Risk for Pediatric Sepsis: A Prospective Study in Pediatric Emergency Care. Frontiers in Pediatrics, 2020, 8, 548154.	0.9	13
31	Variation in antibiotic prescription rates in febrile children presenting to emergency departments across Europe (MOFICHE): A multicentre observational study. PLoS Medicine, 2020, 17, e1003208.	3.9	59
32	Preparedness and Response to Pediatric COVID-19 in European Emergency Departments: A Survey of the REPEM and PERUKI Networks. Annals of Emergency Medicine, 2020, 76, 788-800.	0.3	61
33	Clinical practice guidelines for acute otitis media in children: a systematic review and appraisal of European national guidelines. BMJ Open, 2020, 10, e035343.	0.8	61
34	Title is missing!. , 2020, 17, e1003208.		0
35	Title is missing!. , 2020, 17, e1003208.		0
36	Title is missing!. , 2020, 17, e1003208.		0

#	ARTICLE	IF	CITATIONS
37	Title is missing!. , 2020, 17, e1003208.		0
38	Title is missing!. , 2020, 17, e1003208.		0
39	Fluids in the management of sepsis in children: a review of guidelines in the aftermath of the FEAST trial. Archives of Disease in Childhood, 2019, 104, 1236-1236.	1.0	3
40	Effects of saline or albumin fluid bolus in resuscitation: evidence from re-analysis of the FEAST trial. Lancet Respiratory Medicine,the, 2019, 7, 581-593.	5.2	68
41	Diversity in the emergency care for febrile children in Europe: a questionnaire study. BMJ Paediatrics Open, 2019, 3, e000456.	0.6	21
42	Plasma lipid profiles discriminate bacterial from viral infection in febrile children. Scientific Reports, 2019, 9, 17714.	1.6	15
43	Biomarkers for Infection in Children: Current Clinical Practice and Future Perspectives. Pediatric Infectious Disease Journal, 2019, 38, S7-S13.	1.1	24
44	Validation of the Feverkidstool and procalcitonin for detecting serious bacterial infections in febrile children. Pediatric Research, 2018, 83, 466-476.	1.1	24
45	Identification and treatment of paediatric sepsis: getting the balance right. Archives of Disease in Childhood, 2018, 103, 1185-1186.	1.0	8
46	Clinical prediction models for young febrile infants at the emergency department: an international validation study. Archives of Disease in Childhood, 2018, 103, archdischild-2017-314011.	1.0	18
47	Comparison of peripheral and central capillary refill time in febrile children presenting to a paediatric emergency department and its utility in identifying children with serious bacterial infection. Archives of Disease in Childhood, 2017, 102, 17-21.	1.0	11
48	Neutrophil CD64 expression is not a useful biomarker for detecting serious bacterial infections in febrile children at the emergency department. Infectious Diseases, 2016, 48, 331-337.	1.4	5
49	C-Reactive Protein Bedside Testing in Febrile Children Lowers Length of Stay at the Emergency Department. Pediatric Emergency Care, 2015, 31, 633-639.	0.5	20
50	Impact of a Clinical Decision Model for Febrile Children at Risk for Serious Bacterial Infections at the Emergency Department: A Randomized Controlled Trial. PLoS ONE, 2015, 10, e0127620.	1.1	26
51	C-reactive Protein, Procalcitonin and the Lab-Score for Detecting Serious Bacterial Infections in Febrile Children at the Emergency Department. Pediatric Infectious Disease Journal, 2014, 33, e273-e279.	1.1	63
52	Use of alarm features in referral of febrile children to the emergency department: an observational study. British Journal of General Practice, 2014, 64, e1-e9.	0.7	11
53	Vital signs should be maintained as continuous variables when predicting bacterial infections in febrile children. Journal of Clinical Epidemiology, 2013, 66, 453-457.	2.4	24
54	Clinical prediction model to aid emergency doctors managing febrile children at risk of serious bacterial infections: diagnostic study. BMJ, The, 2013, 346, f1706-f1706.	3.0	133

#	ARTICLE	IF	CITATIONS
55	Derivation and validation of age and temperature specific reference values and centile charts to predict lower respiratory tract infection in children with fever: prospective observational study. <i>BMJ, The</i> , 2012, 345, e4224-e4224.	3.0	47
56	Can urgency classification of the Manchester triage system predict serious bacterial infections in febrile children?. <i>Archives of Disease in Childhood</i> , 2011, 96, 715-722.	1.0	22
57	Parental Fever Attitude and Management. <i>Pediatric Emergency Care</i> , 2010, 26, 339-342.	0.5	24
58	C-reactive protein and procalcitonin in assessment of children with fever in the emergency department. , 0, , 51-51.		0
