#	ARTICLE	IF	CITATIONS
1	Gram-Negative Outer and Inner Membrane Models: Insertion of Cyclic Cationic Lipopeptides. <i>Journal of Physical Chemistry B</i> , 2007, 111, 551-563.	2.6	123
2	Dexibuprofen Biodegradable Nanoparticles: One Step Closer towards a Better Ocular Interaction Study. <i>Nanomaterials</i> , 2020, 10, 720.	4.1	44
3	Psoriasis: From Pathogenesis to Pharmacological and Nano-Technological-Based Therapeutics. <i>International Journal of Molecular Sciences</i> , 2021, 22, 4983.	4.1	40
4	Polymyxin B-lipid interactions in Langmuir-Blodgett monolayers of <i>Escherichia coli</i> lipids: A thermodynamic and atomic force microscopy study. <i>Biopolymers</i> , 2004, 75, 480-490.	2.4	35
5	Tryptophan-containing lipopeptide antibiotics derived from polymyxin B with activity against Gram positive and Gram negative bacteria. <i>Biochimica Et Biophysica Acta - Biomembranes</i> , 2016, 1858, 333-343.	2.6	31
6	A Langmuir Monolayer Study of the Interaction of E1(145~162) Hepatitis G Virus Peptide with Phospholipid Membranes. <i>Journal of Physical Chemistry B</i> , 2010, 114, 448-456.	2.6	28
7	Synthesis, lipophilic derivatization and interaction with liposomes of HAV VP3 (102~121) sequence by using spectroscopic techniques. <i>Analyst, The</i> , 1996, 121, 1583-1588.	3.5	26
8	Analysis of HIV-1 fusion peptide inhibition by synthetic peptides from E1 protein of GB virus C. <i>Journal of Colloid and Interface Science</i> , 2011, 360, 124-131.	9.4	22
9	Influence of polymyxins on the structural dynamics of <i>Escherichia coli</i> lipid membranes. <i>Talanta</i> , 2003, 60, 225-234.	5.5	20
10	Effect of E1(64~81) hepatitis G peptide on the in vitro interaction of HIV-1 fusion peptide with membrane models. <i>Biochimica Et Biophysica Acta - Biomembranes</i> , 2011, 1808, 2178-2188.	2.6	17
11	Stability of carboplatin in 5% glucose solution in glass, polyethylene and polypropylene containers. <i>Journal of Pharmaceutical and Biomedical Analysis</i> , 1994, 12, 81-84.	2.8	16
12	Degradation pathway of carboplatin in aqueous solution. <i>International Journal of Pharmaceutics</i> , 1997, 146, 263-269.	5.2	16
13	Langmuir monolayers and Differential Scanning Calorimetry for the study of the interactions between camptothecin drugs and biomembrane models. <i>Biochimica Et Biophysica Acta - Biomembranes</i> , 2016, 1858, 422-433.	2.6	15
14	pH-induced destabilization of lipid bilayers by a peptide from the VP3 protein of the capsid of hepatitis A virus. <i>Analyst, The</i> , 1998, 123, 2251-2256.	3.5	12
15	Miscibility of the Hepatocyte Membrane Lipids at the Air/Water Interface and Interaction with the Sequence (110~121) of the Capsid Protein VP3 of Hepatitis A Virus. <i>Langmuir</i> , 1999, 15, 1101-1107.	3.5	12
16	Fluorescence study of the dynamic interaction between E1(145~162) sequence of hepatitis GB virus C and liposomes. <i>Analytical and Bioanalytical Chemistry</i> , 2009, 394, 1003-1010.	3.7	12
17	Biophysical Investigations of GBV E1 Peptides as Potential Inhibitors of HIV-1 Fusion Peptide. <i>ChemPhysChem</i> , 2011, 12, 2816-2822.	2.1	12
18	A cyclic GB virus C derived peptide with anti-HIV-1 activity targets the fusion peptide of HIV-1. <i>European Journal of Medicinal Chemistry</i> , 2014, 86, 589-604.	5.5	12

#	ARTICLE	IF	CITATIONS
19	Membrane interaction of a new synthetic antimicrobial lipopeptide sp-85 with broad spectrum activity. <i>Colloids and Surfaces A: Physicochemical and Engineering Aspects</i> , 2015, 480, 307-317.	4.7	12
20	Membrane fusion by an RGD-containing sequence from the core protein VP3 of hepatitis A virus and the RGA-analogue: Implications for viral infection. <i>Biopolymers</i> , 2001, 58, 63-77.	2.4	11
21	Interaction of the GBV-C E2-derived peptide, P6-2VIR576, with anionic phospholipid membranes. <i>Colloids and Surfaces A: Physicochemical and Engineering Aspects</i> , 2017, 532, 483-492.	4.7	11
22	Stability of aqueous carboplatin solutions under illumination. <i>Monatshefte für Chemie</i> , 1993, 124, 1077-1081.	1.8	9
23	Degradation kinetics of ifosfamide in aqueous solution. <i>International Journal of Pharmaceutics</i> , 1996, 139, 249-253.	5.2	8
24	Surface behavior of peptides from E1 GBV-C protein: Interaction with anionic model membranes and importance in HIV-1 FP inhibition. <i>Biochimica Et Biophysica Acta - Biomembranes</i> , 2015, 1848, 392-407.	2.6	8
25	Surface behaviour and peptide-lipid interactions of the E1(3-17)R and E1(3-17)G peptides from E1 capsid protein of GBV-C/HGV virus. <i>Colloids and Surfaces A: Physicochemical and Engineering Aspects</i> , 2008, 321, 175-180.	4.7	7
26	Physicochemical characterization of GBV-C E1 peptides as potential inhibitors of HIV-1 fusion peptide: Interaction with model membranes. <i>International Journal of Pharmaceutics</i> , 2012, 436, 593-601.	5.2	7
27	Ampicillin polymers: identification by gel-filtration chromatography. <i>International Journal of Pharmaceutics</i> , 1988, 41, 241-244.	5.2	6
28	Stability Study of Carboplatin in Aqueous Solution and Under Illumination by High Performance Liquid Chromatography. <i>Biomedical Chromatography</i> , 1997, 11, 119-120.	1.7	6
29	Membrane fusion induced by a lipopeptidic epitope from VP3 capsid protein of hepatitis A virus. <i>Luminescence</i> , 2001, 16, 135-143.	2.9	6
30	A study of HIV-1 FP inhibition by GBV-C peptides using lipid nano-assemblies. <i>Colloids and Surfaces A: Physicochemical and Engineering Aspects</i> , 2015, 480, 184-190.	4.7	5
31	Stability Study of Epirubicin in Nacl 0.9% Injection. <i>Annals of Pharmacotherapy</i> , 1997, 31, 992-995.	1.9	4
32	Physicochemical study of laminin-related peptides. <i>Supramolecular Science</i> , 1997, 4, 449-453.	0.7	3
33	Interaction with Phospholipid Mono- and Bi-layers of HAV-VP3 (102-121) Sequence by Using Spectroscopic Techniques. <i>Biomedical Chromatography</i> , 1997, 11, 121-123.	1.7	3
34	Modification of FP-HIV activity by peptide sequences of GB virus C: A biophysical approach. <i>Biochimica Et Biophysica Acta - Biomembranes</i> , 2014, 1838, 1274-1280.	2.6	3
35	Characterization and lipid phase effect on the interaction of GBV-C E2-derived peptide, P6-2VIR576, with lipid membranes relating it with the HIV-1 FP inhibition. <i>Colloids and Surfaces A: Physicochemical and Engineering Aspects</i> , 2018, 554, 187-196.	4.7	3
36	HPLC determination of azlocillin sodium for stability studies. <i>International Journal of Pharmaceutics</i> , 1990, 58, 103-106.	5.2	2

#	ARTICLE	IF	CITATIONS
37	Influence of alkyl length in the miscibility of several types of lecithins. Interaction of doxorubicin with these membrane models. <i>Thin Solid Films</i> , 1996, 284-285, 723-726.	1.8	1
38	Stability of ifosfamide in 0.9% sodium chloride solution or water for injection in a portable i.v. pump cassette. <i>American Journal of Health-System Pharmacy</i> , 1992, 49, 1137-1139.	1.0	0
39	Physicochemical studies of hepatitis A virus recombinant proteins: interaction with monolayers as membrane models. <i>Materials Science and Engineering C</i> , 1999, 8-9, 481-485.	7.3	0
40	Interaction of polymyxin B and A deacylated derivative with monolayers of bacterial lipids. <i>European Physical Journal Special Topics</i> , 2001, 11, Pr10-227-Pr10-232.	0.2	0
41	XV International Symposium on Luminescence Spectrometryâ€”ISLS 2012. <i>Analytical and Bioanalytical Chemistry</i> , 2013, 405, 3915-3916.	3.7	0
42	Lipid domains in LB films and giant vesicles to study GBV-C peptides interaction in the context of HIV-1 FP inhibition at membranes. <i>Colloids and Surfaces A: Physicochemical and Engineering Aspects</i> , 2019, 578, 123620.	4.7	0
43	Physicochemical studies of E1(53-66) synthetic peptide by phospholipid monolayers and differential scanning calorimetry. <i>European Physical Journal Special Topics</i> , 2004, 113, 39-42.	0.2	0
44	Interaction study of three overlapping synthetic peptides belonging to E2 protein of GBV-C/HGV with liposomes as biomembrane models. <i>European Physical Journal Special Topics</i> , 2004, 122, 211-215.	0.2	0
