| #  | Article  | IF  | CITATIONS |
|----|--|-----|-----------|
| 1  | Local Energy Dissipation Rate Preserving Approximations to Driven Gradient Flows with Applications to Graphene Growth. Journal of Scientific Computing, 2022, 90, 1.   | 2.3 | 0         |
| 2  | Multisymplectic structure-preserving scheme for the coupled Gross–Pitaevskii equations.<br>International Journal of Computer Mathematics, 2021, 98, 783-806.   | 1.8 | 1         |
| 3  | On the L â^ž convergence of a conservative Fourier pseudoâ€spectral method for the space fractional<br>nonlinear Schrödinger equation. Numerical Methods for Partial Differential Equations, 2021, 37,<br>1591-1611. | 3.6 | 5         |
| 4  | Explicit high-order energy-preserving methods for general Hamiltonian partial differential equations.<br>Journal of Computational and Applied Mathematics, 2021, 388, 113298.  | 2.0 | 9         |
| 5  | Arbitrarily high-order structure-preserving schemes for the Gross–Pitaevskii equation with angular<br>momentum rotation. Computer Physics Communications, 2021, 261, 107767.   | 7.5 | 13        |
| 6  | Local structure-preserving algorithms for the molecular beam epitaxy model with slope selection.<br>Discrete and Continuous Dynamical Systems - Series B, 2021, 26, 4745.  | 0.9 | 0         |
| 7  | An efficient energy-preserving method for the two-dimensional fractional SchrĶdinger equation.<br>Applied Numerical Mathematics, 2021, 165, 232-247.   | 2.1 | 7         |
| 8  | The exponential invariant energy quadratization approach for general multi-symplectic Hamiltonian PDEs. Journal of Computational and Applied Mathematics, 2021, , 113955.  | 2.0 | 0         |
| 9  | Optimal error estimate of two linear and momentumâ€preserving Fourier pseudoâ€spectral schemes for<br>the RLW equation. Numerical Methods for Partial Differential Equations, 2020, 36, 394-417.                     | 3.6 | 4         |
| 10 | An SDG Galerkin structureâ€preserving scheme for the Kleinâ€Cordonâ€Schrödinger equation.<br>Mathematical Methods in the Applied Sciences, 2020, 43, 6011-6030.  | 2.3 | 0         |
| 11 | A linearly implicit structure-preserving Fourier pseudo-spectral scheme for the damped nonlinear<br>SchrĶdinger equation in three dimensions. Advances in Computational Mathematics, 2020, 46, 1.                    | 1.6 | 1         |
| 12 | A linearly implicit energy-preserving exponential integrator for the nonlinear Klein-Gordon equation.<br>Journal of Computational Physics, 2020, 419, 109690.  | 3.8 | 25        |
| 13 | A Linearly Implicit Structure-Preserving Scheme for the Camassa–Holm Equation Based on Multiple<br>Scalar Auxiliary Variables Approach. Journal of Scientific Computing, 2020, 83, 1.                                | 2.3 | 16        |
| 14 | A Linearly Implicit and Local Energy-Preserving Scheme for the Sine-Gordon Equation Based on the<br>Invariant Energy Quadratization Approach. Journal of Scientific Computing, 2019, 80, 1629-1655.                  | 2.3 | 47        |
| 15 | Local structure-preserving algorithms for general multi-symplectic Hamiltonian PDEs. Computer<br>Physics Communications, 2019, 235, 210-220.   | 7.5 | 9         |
| 16 | A novel energy-preserving scheme for the coupled nonlinear Schrödinger equations. International<br>Journal of Computer Mathematics, 2018, 95, 61-81.   | 1.8 | 5         |
| 17 | A new local energy-preserving algorithm for the BBM equation. Applied Mathematics and Computation, 2018, 324, 119-130.   | 2.2 | 9         |
| 18 | Optimal error estimate of a conformal Fourier pseudoâ€spectral method for the damped nonlinear<br>SchrĶdinger equation. Numerical Methods for Partial Differential Equations, 2018, 34, 1422-1454.                   | 3.6 | 9         |

| #  | Article  | IF  | CITATIONS |
|----|--|-----|-----------|
| 19 | Numerical analysis of a new conservative scheme for the coupled nonlinear SchrĶdinger equations.<br>International Journal of Computer Mathematics, 2018, 95, 1583-1608.                                  | 1.8 | 10        |
| 20 | Local discontinuous Galerkin methods based on the multisymplectic formulation for two kinds of<br>Hamiltonian PDEs. International Journal of Computer Mathematics, 2018, 95, 114-143.                    | 1.8 | 5         |
| 21 | Analysis of a Fourier pseudo-spectral conservative scheme for the Klein–Gordon–Schrödinger<br>equation. International Journal of Computer Mathematics, 2018, 95, 36-60.                                  | 1.8 | 3         |
| 22 | Optimal error estimate of a linear Fourier pseudo-spectral scheme for two dimensional<br>Klein–Gordon–Schrödinger equations. Journal of Mathematical Analysis and Applications, 2018, 468,<br>817-838.   | 1.0 | 21        |
| 23 | An energy-preserving Crank–Nicolson Galerkin spectral element method for the two dimensional<br>nonlinear Schrödinger equation. Journal of Computational and Applied Mathematics, 2018, 344,<br>245-258. | 2.0 | 13        |
| 24 | Efficient local energy dissipation preserving algorithms for the Cahn–Hilliard equation. Journal of<br>Computational Physics, 2018, 374, 654-667.  | 3.8 | 7         |
| 25 | An averaged vector field Legendre spectral element method for the nonlinear Schrödinger equation.<br>International Journal of Computer Mathematics, 2017, 94, 1196-1218.                                 | 1.8 | 6         |
| 26 | Local energy―and momentumâ€preserving schemes for Kleinâ€Gordonâ€Schrödinger equations and<br>convergence analysis. Numerical Methods for Partial Differential Equations, 2017, 33, 1329-1351.           | 3.6 | 3         |
| 27 | Dissipation-preserving spectral element method for damped seismic wave equations. Journal of Computational Physics, 2017, 350, 260-279.  | 3.8 | 5         |
| 28 | Two New Energy-Preserving Algorithms for Generalized Fifth-Order KdV Equation. Advances in Applied Mathematics and Mechanics, 2017, 9, 1206-1224.  | 1.2 | 3         |
| 29 | A conservative Fourier pseudo-spectral method for the nonlinear SchrĶdinger equation. Journal of Computational Physics, 2017, 328, 354-370.  | 3.8 | 106       |
| 30 | GPU-accelerated preconditioned GMRES method for two-dimensional Maxwell's equations.<br>International Journal of Computer Mathematics, 2017, 94, 2122-2144.  | 1.8 | 13        |
| 31 | Novel Symplectic Discrete Singular Convolution Method for Hamiltonian PDEs. Communications in Computational Physics, 2016, 19, 1375-1396.  | 1.7 | 2         |
| 32 | A discrete line integral method of order two for the Lorentz force system. Applied Mathematics and Computation, 2016, 291, 207-212.  | 2.2 | 6         |
| 33 | An Energy-Preserving Wavelet Collocation Method for General Multi-Symplectic Formulations of Hamiltonian PDEs. Communications in Computational Physics, 2016, 20, 1313-1339.                             | 1.7 | 11        |
| 34 | Derivation of the multisymplectic Crank–Nicolson scheme for the nonlinear Schrödinger equation.<br>Computer Physics Communications, 2014, 185, 2403-2411.  | 7.5 | 2         |
| 35 | Some new structure-preserving algorithms for general multi-symplectic formulations of Hamiltonian PDEs. Journal of Computational Physics, 2014, 279, 80-102.   | 3.8 | 67        |
| 36 | Multi-Symplectic Fourier Pseudospectral Method for the Kawahara Equation. Communications in Computational Physics, 2014, 16, 35-55.  | 1.7 | 43        |

|----|---|-----|-----------|
| 37 | Local energy-preserving and momentum-preserving algorithms for coupled nonlinear Schr¶dinger<br>system. Journal of Computational Physics, 2013, 239, 30-50.   | 3.8 | 44        |
| 38 | Local structure-preserving algorithms for the "good―Boussinesq equation. Journal of<br>Computational Physics, 2013, 239, 72-89.   | 3.8 | 30        |
| 39 | Numerical dispersion analysis of a multi-symplectic scheme for the three dimensional Maxwell's<br>equations. Journal of Computational Physics, 2013, 234, 330-352.                                      | 3.8 | 10        |
| 40 | Numerical analysis of a multi-symplectic scheme for the time-domain Maxwell's equations. Journal of<br>Mathematical Physics, 2011, 52, 123701.  | 1.1 | 4         |
| 41 | Legendre Polynomials Spectral Approximation for the Infinite-Dimensional Hamiltonian Systems.<br>Mathematical Problems in Engineering, 2011, 2011, 1-13.  | 1.1 | 0         |
| 42 | Multi-symplectic Birkhoffian structure for PDEs with dissipation terms. Physics Letters, Section A:<br>General, Atomic and Solid State Physics, 2010, 374, 2410-2416.                                   | 2.1 | 11        |
| 43 | New schemes for the coupled nonlinear SchrĶdinger equation. International Journal of Computer<br>Mathematics, 2010, 87, 775-787.  | 1.8 | 23        |
| 44 | Multisymplectic Preissman scheme for the time-domain Maxwell's equations. Journal of Mathematical<br>Physics, 2009, 50, 033510.   | 1.1 | 14        |
| 45 | Applications of the Multi-Symplectic Euler-box Scheme. , 2009, , .  |     | 0         |
| 46 | A new parallel genetic algorithm for solving multiobjective scheduling problems subjected to special process constraint. International Journal of Advanced Manufacturing Technology, 2009, 43, 151-160. | 3.0 | 33        |
| 47 | Local structure-preserving algorithms for partial differential equations. Science in China Series A:<br>Mathematics, 2008, 51, 2115-2136.   | 0.5 | 41        |
| 48 | Multi-objective scheduling problems subjected to special process constraint. , 2008, , .  |     | 4         |
| 49 | An Explicit Scheme for the KdV Equation. Chinese Physics Letters, 2008, 25, 2335-2338.  | 3.3 | 12        |
| 50 | Research on immune genetic algorithm for solving bi-objective scheduling problems subjected to special process constraint. , 2008, , .  |     | 0         |
| 51 | Multisymplectic Euler Box Scheme for the KdV Equation. Chinese Physics Letters, 2007, 24, 312-314.  | 3.3 | 21        |
| 52 | New multisymplectic self-adjoint scheme and its composition scheme for the time-domain Maxwell's<br>equations. Journal of Mathematical Physics, 2006, 47, 123508.                                       | 1.1 | 16        |
| 53 | On multi-symplectic partitioned Runge–Kutta methods for Hamiltonian wave equations. Applied Mathematics and Computation, 2006, 177, 36-43.  | 2.2 | 9         |
| 54 | On multisymplectic integrators based on Runge–Kutta–Nyström methods for Hamiltonian wave<br>equations. Applied Mathematics and Computation, 2006, 182, 1056-1063.                                       | 2.2 | 2         |

| #  | Article  | IF  | CITATIONS |
|----|--|-----|-----------|
| 55 | A new multisymplectic scheme for generalized Kadomtsev-Petviashvili equation. Journal of<br>Mathematical Physics, 2006, 47, 083503.                          | 1.1 | 3         |
| 56 | High-order multi-symplectic schemes for the nonlinear Klein–Gordon equation. Applied Mathematics<br>and Computation, 2005, 166, 608-632.                     | 2.2 | 26        |
| 57 | An Artificial Boundary Condition for the Multisymplectic Preissman Scheme. Journal of the Physical<br>Society of Japan, 2004, 73, 1457-1463.                 | 1.6 | 1         |
| 58 | Numerical implementation of the multisymplectic Preissman scheme and its equivalent schemes.<br>Applied Mathematics and Computation, 2004, 149, 299-326.     | 2.2 | 20        |
| 59 | Concatenating construction of the multisymplectic schemes for 2+1-dimensional sine-Gordon equation. Science in China Series A: Mathematics, 2004, 41, 18.    | 0.5 | 5         |
| 60 | Multisymplectic five-point scheme for the nonlinear wave equation. Science Bulletin, 2004, 48, 24.   | 1.7 | 2         |
| 61 | High Order Symplectic Schemes for the Sine-Gordon Equation*. Journal of the Physical Society of Japan, 2003, 72, 2731-2736.                                  | 1.6 | 8         |
| 62 | Multisymplectic Geometry and Multisymplectic Scheme for the Nonlinear Klein Gordon Equation.<br>Journal of the Physical Society of Japan, 2001, 70, 653-661. | 1.6 | 17        |
