

Matthew M Dahm

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/2284364/matthew-m-dahm-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

29
papers

977
citations

#	Paper	IF	Citations
29	Histopathology of the broad class of carbon nanotubes and nanofibers used or produced in U.S. facilities in a murine model.. <i>Particle and Fibre Toxicology</i> , 2021 , 18, 47	8.4	1
28	Serum peptidome: diagnostic window into pathogenic processes following occupational exposure to carbon nanomaterials. <i>Particle and Fibre Toxicology</i> , 2021 , 18, 39	8.4	1
27	Occupational Exposures to Engineered Nanomaterials: a Review of Workplace Exposure Assessment Methods. <i>Current Environmental Health Reports</i> , 2021 , 8, 223-234	6.5	3
26	Association of occupational exposures with functional immune response in workers handling carbon nanotubes and nanofibers. <i>Nanotoxicology</i> , 2020 , 14, 404-419	5.3	12
25	Mortality in a cohort of US firefighters from San Francisco, Chicago and Philadelphia: an update. <i>Occupational and Environmental Medicine</i> , 2020 , 77, 84-93	2.1	10
24	Planning for Epidemics and Pandemics: Assessing the Potential Impact of Extended Use and Reuse Strategies on Respirator Usage Rates to Support Supply-and-Demand Planning Efforts. <i>Journal of the International Society for Respiratory Protection</i> , 2020 , 37, 52-60	0.4	2
23	Physicochemical characterization and genotoxicity of the broad class of carbon nanotubes and nanofibers used or produced in U.S. facilities. <i>Particle and Fibre Toxicology</i> , 2020 , 17, 62	8.4	23
22	Work-related injuries within a large urban public school system in the Mid-Western United States. <i>Work</i> , 2019 , 62, 373-382	1.6	3
21	Predicting Occupational Exposures to Carbon Nanotubes and Nanofibers Based on Workplace Determinants Modeling. <i>Annals of Work Exposures and Health</i> , 2019 , 63, 158-172	2.4	4
20	Evaluation of total and inhalable samplers for the collection of carbon nanotube and carbon nanofiber aerosols.. <i>Aerosol Science and Technology</i> , 2019 , 53, 958-970	3.4	1
19	Exposure assessments for a cross-sectional epidemiologic study of US carbon nanotube and nanofiber workers. <i>International Journal of Hygiene and Environmental Health</i> , 2018 , 221, 429-440	6.9	27
18	Characterizing workforces exposed to current and emerging non-carbonaceous nanomaterials in the U.S. <i>Journal of Occupational and Environmental Hygiene</i> , 2018 , 15, 44-56	2.9	4
17	Carbon nanotube and nanofiber exposure and sputum and blood biomarkers of early effect among U.S. workers. <i>Environment International</i> , 2018 , 116, 214-228	12.9	44
16	Association of pulmonary, cardiovascular, and hematologic metrics with carbon nanotube and nanofiber exposure among U.S. workers: a cross-sectional study. <i>Particle and Fibre Toxicology</i> , 2018 , 15, 22	8.4	32
15	Generation and characterization of aerosols released from sanding composite nanomaterials containing carbon nanotubes. <i>NanoImpact</i> , 2017 , 5, 41-50	5.6	7
14	In Vivo Toxicity Assessment of Occupational Components of the Carbon Nanotube Life Cycle To Provide Context to Potential Health Effects. <i>ACS Nano</i> , 2017 , 11, 8849-8863	16.7	30
13	Refinement of the Nanoparticle Emission Assessment Technique into the Nanomaterial Exposure Assessment Technique (NEAT 2.0). <i>Journal of Occupational and Environmental Hygiene</i> , 2016 , 13, 708-17	2.9	44

12	Bridging the gap between exposure assessment and inhalation toxicology: Some insights from the carbon nanotube experience. <i>Journal of Aerosol Science</i> , 2016 , 99, 157-162	4.3	8
11	Characterizing adoption of precautionary risk management guidance for nanomaterials, an emerging occupational hazard. <i>Journal of Occupational and Environmental Hygiene</i> , 2015 , 12, 69-75	2.9	9
10	Exposure-response relationships for select cancer and non-cancer health outcomes in a cohort of U.S. firefighters from San Francisco, Chicago and Philadelphia (1950-2009). <i>Occupational and Environmental Medicine</i> , 2015 , 72, 699-706	2.1	62
9	Carbon Nanotube and Nanofiber Exposure Assessments: An Analysis of 14 Site Visits. <i>Annals of Occupational Hygiene</i> , 2015 , 59, 705-23		70
8	Creation of a retrospective job-exposure matrix using surrogate measures of exposure for a cohort of US career firefighters from San Francisco, Chicago and Philadelphia. <i>Occupational and Environmental Medicine</i> , 2015 , 72, 670-7	2.1	12
7	Mortality and cancer incidence in a pooled cohort of US firefighters from San Francisco, Chicago and Philadelphia (1950-2009). <i>Occupational and Environmental Medicine</i> , 2014 , 71, 388-97	2.1	175
6	Carbon nanotube dosimetry: from workplace exposure assessment to inhalation toxicology. <i>Particle and Fibre Toxicology</i> , 2013 , 10, 53	8.4	121
5	Occupational exposure assessment in carbon nanotube and nanofiber primary and secondary manufacturers: mobile direct-reading sampling. <i>Annals of Occupational Hygiene</i> , 2013 , 57, 328-44		64
4	Focused actions to protect carbon nanotube workers. <i>American Journal of Industrial Medicine</i> , 2012 , 55, 395-411	2.7	74
3	Occupational exposure assessment in carbon nanotube and nanofiber primary and secondary manufacturers. <i>Annals of Occupational Hygiene</i> , 2012 , 56, 542-56		77
2	Engineered carbonaceous nanomaterials manufacturers in the United States: workforce size, characteristics, and feasibility of epidemiologic studies. <i>Journal of Occupational and Environmental Medicine</i> , 2011 , 53, S62-7	2	32
1	Exposure control strategies in the carbonaceous nanomaterial industry. <i>Journal of Occupational and Environmental Medicine</i> , 2011 , 53, S68-73	2	25
