#	Article	IF	CITATIONS
1	An improvement of derivative-free point-to-point iterative processes with central divided differences. International Journal of Nonlinear Sciences and Numerical Simulation, 2022, .	1.0	Ο
2	Location of Solutions of Fredholm–Nemytskii Integral Equations from a Whittaker-Type Operator. Mediterranean Journal of Mathematics, 2022, 19, 1.	0.8	0
3	Toward a unified theory of inverse-free two-step point-to-point iterative processes. AlP Conference Proceedings, 2022, , .	0.4	0
4	An Algorithm Derivative-Free to Improve the Steffensen-Type Methods. Symmetry, 2022, 14, 4.	2.2	0
5	Location, Separation and Approximation of Solutions for Quadratic Matrix Equations. Foundations, 2022, 2, 457-474.	1.3	0
6	A Picard-Type Iterative Scheme for Fredholm Integral Equations of the Second Kind. Mathematics, 2021, 9, 83.	2.2	3
7	On High-Order Iterative Schemes for the Matrix pth Root Avoiding the Use of Inverses. Mathematics, 2021, 9, 144.	2.2	1
8	On the Chandrasekhar integral equation. Computational and Mathematical Methods, 2021, 3, e1150.	0.8	0
9	An Ulm-Type Inverse-Free Iterative Scheme for Fredholm Integral Equations of Second Kind. Symmetry, 2021, 13, 1957.	2.2	0
10	A multistep Steffensenâ€ŧype method for solving nonlinear systems of equations. Mathematical Methods in the Applied Sciences, 2020, 43, 7518-7536.	2.3	3
11	On nonlinear Fredholm integral equations with nonâ€differentiable Nemystkii operator. Mathematical Methods in the Applied Sciences, 2020, 43, 7961-7976.	2.3	4
12	Extending the choice of starting points for Newton's method. Mathematical Methods in the Applied Sciences, 2020, 43, 8042-8050.	2.3	2
13	The Newtonian Operator and Global Convergence Balls for Newton's Method. Mathematics, 2020, 8, 1074.	2.2	1
14	Improved Iterative Solution of Linear Fredholm Integral Equations of Second Kind via Inverse-Free Iterative Schemes. Mathematics, 2020, 8, 1747.	2.2	5
15	A Unified Convergence Analysis for Some Two-Point Type Methods for Nonsmooth Operators. Mathematics, 2019, 7, 701.	2.2	1
16	How to Obtain Global Convergence Domains via Newton's Method for Nonlinear Integral Equations. Mathematics, 2019, 7, 553.	2.2	8
17	Nonlinear Fredholm integral equations and majorant functions. Numerical Algorithms, 2019, 82, 1303-1323.	1.9	9
18	Numerical analysis for the quadratic matrix equations from a modification of fixedâ€point type. Mathematical Methods in the Applied Sciences, 2019, 42, 5856-5866.	2.3	3

Miguel A HernÄindez-VerÄ³n

#	Article	IF	CITATIONS
19	On an Inverse Free Steffensen-Type Method for the Approximation of Stiff Differential Equations. Numerical Functional Analysis and Optimization, 2019, 40, 119-133.	1.4	0
20	Solving Symmetric Algebraic Riccati Equations with High Order Iterative Schemes. Mediterranean Journal of Mathematics, 2018, 15, 1.	0.8	3
21	On the local convergence study for an efficient k-step iterative method. Journal of Computational and Applied Mathematics, 2018, 343, 753-761.	2.0	22
22	Extending the domain of starting points for Newton's method under conditions on the second derivative. Journal of Computational and Applied Mathematics, 2018, 340, 1-10.	2.0	0
23	Starting points for Newton's method under a center Lipschitz condition for the second derivative. Journal of Computational and Applied Mathematics, 2018, 330, 721-731.	2.0	6
24	The majorant principle applied to Hammerstein integral equations. Applied Mathematics Letters, 2018, 75, 50-58.	2.7	5
25	On two highâ€order families of frozen Newtonâ€ŧype methods. Numerical Linear Algebra With Applications, 2018, 25, e2126.	1.6	10
26	Improving the accessibility of Steffensen's method by decomposition of operators. Journal of Computational and Applied Mathematics, 2018, 330, 536-552.	2.0	2
27	Majorizing Sequences for Nonlinear Fredholm–Hammerstein Integral Equations. Studies in Applied Mathematics, 2018, 140, 270-297.	2.4	3
28	Toward a general theory of point to point iterative processes free of derivatives with quadratic convergence. AIP Conference Proceedings, 2018, , .	0.4	0
29	Existence, localization and approximation of solution of symmetric algebraic Riccati equations. Computers and Mathematics With Applications, 2018, 76, 187-203.	2.7	6
30	Domains of global convergence for Newton's method from auxiliary points. Applied Mathematics Letters, 2018, 85, 48-56.	2.7	12
31	On the local convergence of a Newton–Kurchatov-type method for non-differentiable operators. Applied Mathematics and Computation, 2017, 304, 1-9.	2.2	8
32	Convergence of Newton's method under Vertgeim conditions: new extensions using restricted convergence domains. Journal of Mathematical Chemistry, 2017, 55, 1392-1406.	1.5	4
33	A study of the influence of center conditions on the domain of parameters of Newton's method by using recurrence relations. Advances in Computational Mathematics, 2017, 43, 1103-1129.	1.6	2
34	On the Efficiency of a Family of Steffensen-Like Methods with Frozen Divided Differences. Computational Methods in Applied Mathematics, 2017, 17, 187-199.	0.8	2
35	Semilocal convergence of a k-step iterative process and its application for solving a special kind of conservative problems. Numerical Algorithms, 2017, 76, 309-331.	1.9	15
36	Convergence of Steffensen's method for non-differentiable operators. Numerical Algorithms, 2017, 75, 229-244.	1.9	3

Miguel A HernÃindez-VerÃ³n

#	Article	IF	CITATIONS
37	Expanding the Applicability of Some High Order Househölder-Like Methods. Algorithms, 2017, 10, 64.	2.1	Ο
38	On the Existence of Solutions of Nonlinear Fredholm Integral Equations from Kantorovich's Technique. Algorithms, 2017, 10, 89.	2.1	3
39	Convergence conditions on the k-th derivative of the operator. Frontiers in Mathematics, 2017, , 83-125.	0.3	Ο
40	Convergence conditions on the first derivative of the operator. Frontiers in Mathematics, 2017, , 127-159.	0.3	0
41	Convergence conditions on the second derivative of the operator. Frontiers in Mathematics, 2017, , 39-81.	0.3	0
42	On a Moser–Steffensen Type Method for Nonlinear Systems of Equations. Mediterranean Journal of Mathematics, 2016, 13, 4109-4128.	0.8	1
43	A Qualitative Analysis of a Family of Newton-Like Iterative Process with R-Order of Convergence At Least Three. SEMA SIMAI Springer Series, 2016, , 173-210.	0.7	0
44	The Theory of Kantorovich for Newton's Method: Conditions on the Second Derivative. SEMA SIMAI Springer Series, 2016, , 113-145.	0.7	0
45	A Steffensen type method of two steps in Banach spaces with applications. Journal of Computational and Applied Mathematics, 2016, 291, 317-331.	2.0	7
46	On the ball of convergence of secant-like methods for non-differentiable operators. Applied Mathematics and Computation, 2016, 273, 506-512.	2.2	8
47	Enlarging the domain of starting points for Newton's method under center conditions on the first Fréchet-derivative. Journal of Complexity, 2016, 33, 89-106.	1.3	10
48	On the Domain of Starting Points of Newton's Method Under Center Lipschitz Conditions. Mediterranean Journal of Mathematics, 2016, 13, 2287-2300.	0.8	7
49	On a Newton-Kurchatov-type Iterative Process. Numerical Functional Analysis and Optimization, 2016, 37, 65-79.	1.4	7
50	On an efficient <mml:math <br="" altimg="si5.gif" xmlns:mml="http://www.w3.org/1998/Math/MathML">display="inline" overflow="scroll"><mml:mi>k</mml:mi></mml:math> -step iterative method for nonlinear equations. Journal of Computational and Applied Mathematics, 2016, 302, 258-271.	2.0	18
51	On a Steffensen-like method for solving nonlinear equations. Calcolo, 2016, 53, 171-188.	1.1	12
52	A Modification of the Lipschitz Condition in the Newton–Kantorovich Theorem. Zeitschrift Fur Analysis Und Ihre Anwendung, 2016, 35, 309-331.	0.6	0
53	A study of optimization for Steffensen-type methods with frozen divided differences. SeMA Journal, 2015, 70, 23-46.	2.0	5
54	On the Accessibility of Newton's Method under a Hölder Condition on the First Derivative. Algorithms, 2015, 8, 514-528.	2.1	3

Miguel A HernÄindez-VerÄ³n

#	Article	IF	CITATIONS
55	On the Local Convergence of a Third Order Family of Iterative Processes. Algorithms, 2015, 8, 1121-1128.	2.1	11
56	A family of iterative methods that uses divided differences of first and second orders. Numerical Algorithms, 2015, 70, 571-589.	1.9	8
57	On the semilocal convergence of a three steps Newton-type iterative process under mild convergence conditions. Numerical Algorithms, 2015, 70, 377-392.	1.9	20
58	On a new family of highâ€order iterative methods for the matrix <i>p</i> th root. Numerical Linear Algebra With Applications, 2015, 22, 585-595.	1.6	9
59	Iterative methods for computing the matrix square root. SeMA Journal, 2015, 70, 11-21.	2.0	2
60	ENLARGING THE CONVERGENCE DOMAIN OF SECANT-LIKE METHODS FOR EQUATIONS. Taiwanese Journal of Mathematics, 2015, 19, .	0.4	1
61	A Traub type result for one-point iterative methods with memory. Analysis and Applications, 2014, 12, 323-340.	2.2	5
62	Approximation of inverse operators by a new family of high-order iterative methods. Numerical Linear Algebra With Applications, 2014, 21, 629-644.	1.6	15
63	A semilocal convergence result for Newton's method under generalized conditions of Kantorovich. Journal of Complexity, 2014, 30, 309-324.	1.3	11
64	An hybrid method that improves the accessibility of Steffensen's method. Numerical Algorithms, 2014, 66, 241-267.	1.9	0
65	On a family of high-order iterative methods under gamma conditions with applications in denoising. Numerische Mathematik, 2014, 127, 201-221.	1.9	3
66	How to Improve the Domain of Starting Points for Steffensen's Method. Studies in Applied Mathematics, 2014, 132, 354-380.	2.4	5
67	Increasing the applicability of Steffensen's method. Journal of Mathematical Analysis and Applications, 2014, 418, 1062-1073.	1.0	7
68	On the efficiency of two variants of Kurchatov's method for solving nonlinear systems. Numerical Algorithms, 2013, 64, 685-698.	1.9	16
69	Chebyshev-Secant-type Methods for Non-differentiable Operators. Milan Journal of Mathematics, 2013, 81, 25-35.	1.1	5
70	On Steffensen's method on Banach spaces. Journal of Computational and Applied Mathematics, 2013, 249, 9-23.	2.0	26
71	On the local convergence of Newton's method under generalized conditions of Kantorovich. Applied Mathematics Letters, 2013, 26, 566-570.	2.7	11
72	Semilocal convergence of secant-like methods for differentiable and nondifferentiable operator equations. Journal of Mathematical Analysis and Applications, 2013, 398, 100-112.	1.0	15

#	Article	IF	CITATIONS
73	A modification of the classic conditions of Newton–Kantorovich for Newton's method. Mathematical and Computer Modelling, 2013, 57, 584-594.	2.0	15
74	CONSTRUCTION OF DERIVATIVE-FREE ITERATIVE METHODS FROM CHEBYSHEV'S METHOD. Analysis and Applications, 2013, 11, 1350009.	2.2	8
75	A general semilocal convergence result for Newton's method under centered conditions for the second derivative. ESAIM: Mathematical Modelling and Numerical Analysis, 2013, 47, 149-167.	1.9	8
76	Analysing the efficiency of some modifications of the secant method. Computers and Mathematics With Applications, 2012, 64, 2066-2073.	2.7	17
77	Improving the domain of starting points for secant-like methods. Applied Mathematics and Computation, 2012, 219, 3677-3692.	2.2	3
78	Majorizing sequences for Newton's method from initial value problems. Journal of Computational and Applied Mathematics, 2012, 236, 2246-2258.	2.0	28
79	A variant of the Newton–Kantorovich theorem for nonlinear integral equations of mixed Hammerstein type. Applied Mathematics and Computation, 2012, 218, 9536-9546.	2.2	18
80	Semilocal convergence of a sixth order iterative method for quadratic equations. Applied Numerical Mathematics, 2012, 62, 833-841.	2.1	28
81	An Ulm-type method with -order of convergence three. Nonlinear Analysis: Real World Applications, 2012, 13, 14-26.	1.7	4
82	Solving non-differentiable equations by a new one-point iterative method with memory. Journal of Complexity, 2012, 28, 48-58.	1.3	15
83	How to Apply Newton $\hat{a} \in \mathbb{M}$ s Method to Operators with Unbounded Second Derivative. , 2011, , .		0
84	Solving nonlinear integral equations of Fredholm type with high order iterative methods. Journal of Computational and Applied Mathematics, 2011, 236, 1449-1463.	2.0	12
85	On Iterative Methods with Accelerated Convergence for Solving Systems of Nonlinear Equations. Journal of Optimization Theory and Applications, 2011, 151, 163-174.	1.5	27
86	On the semilocal convergence of efficient Chebyshev–Secant-type methods. Journal of Computational and Applied Mathematics, 2011, 235, 3195-3206.	2.0	42
87	Dynamics of a new family of iterative processes for quadratic polynomials. Journal of Computational and Applied Mathematics, 2010, 233, 2688-2695.	2.0	50
88	On some one-point hybrid iterative methods. Nonlinear Analysis: Theory, Methods & Applications, 2010, 72, 587-601.	1.1	6
89	An extension of Gander's result for quadratic equations. Journal of Computational and Applied Mathematics, 2010, 234, 960-971.	2.0	9
90	Variants of a classic Traub's result. Computers and Mathematics With Applications, 2010, 60, 2899-2908.	2.7	6

Miguel A HernÄindez-VerÄ³n

91	An optimization of Chebyshev's method. Journal of Complexity, 2009, 25, 343-361.	1.3	63
92	New iterations of R-order four with reduced computational cost. BIT Numerical Mathematics, 2009, 49, 325-342.	2.0	80
93	Newton-type methods of high order and domains of semilocal and global convergence. Applied Mathematics and Computation, 2009, 214, 142-154.	2.2	42
94	Toward a unified theory for third R-order iterative methods for operators with unbounded second derivative. Applied Mathematics and Computation, 2009, 215, 2248-2261.	2.2	4
95	Improving the efficiency index of one-point iterative processes. Journal of Computational and Applied Mathematics, 2009, 223, 879-892.	2.0	6
96	Fourth-order iterations for solving Hammerstein integral equations. Applied Numerical Mathematics, 2009, 59, 1149-1158.	2.1	11
97	An improvement of the region of accessibility of Chebyshev's method from Newton's method. Mathematics of Computation, 2009, 78, 1613-1627.	2.1	23
98	New identities in the Catalan triangle. Journal of Mathematical Analysis and Applications, 2008, 341, 52-61.	1.0	19
99	The Ulm method under mild differentiability conditions. Numerische Mathematik, 2008, 109, 193-207.	1.9	8
100	A note on a modification of Moser's method. Journal of Complexity, 2008, 24, 185-197.	1.3	7
101	A modification of Cauchy's method for quadratic equations. Journal of Mathematical Analysis and Applications, 2008, 339, 954-969.	1.0	7
102	A modified Chebyshev's iterative method with at least sixth order of convergence. Applied Mathematics and Computation, 2008, 206, 164-174.	2.2	92
103	On the global convergence of Chebyshev's iterative method. Journal of Computational and Applied Mathematics, 2008, 220, 17-21.	2.0	15
104	A generalization of the Kantorovich type assumptions for Halley's method. International Journal of Computer Mathematics, 2007, 84, 1771-1779.	1.8	3
105	Application of iterative processes of R-order at least three to operators with unbounded second derivative. Applied Mathematics and Computation, 2007, 185, 737-747.	2.2	6
106	Methods with prefixed order for approximating square roots with global and general convergence. Applied Mathematics and Computation, 2007, 194, 346-353.	2.2	0
107	Halley's method for operators with unbounded second derivative. Applied Numerical Mathematics, 2007, 57, 354-360.	2.1	27
108	On the efficiency index of one-point iterative processes. Numerical Algorithms, 2007, 46, 35-44.	1.9	4

#	Article	IF	CITATIONS
109	General Study of Iterative Processes of R-Order at Least Three under Weak Convergence Conditions. Journal of Optimization Theory and Applications, 2007, 133, 163-177.	1.5	12
110	On the R-order of convergence of Newton's method under mild differentiability conditions. Journal of Computational and Applied Mathematics, 2006, 197, 53-61.	2.0	24
111	On the R-order of the Halley method. Journal of Mathematical Analysis and Applications, 2005, 303, 591-601.	1.0	71
112	Accelerated convergence in Newton's method for approximating square roots. Journal of Computational and Applied Mathematics, 2005, 177, 225-229.	2.0	11
113	On a characterization of some Newton-like methods of R-order at least three. Journal of Computational and Applied Mathematics, 2005, 183, 53-66.	2.0	48
114	Solving a special case of conservative problems by Secant-like methods. Applied Mathematics and Computation, 2005, 169, 926-942.	2.2	34
115	New Kantorovich-Type Conditions for Halley's Method. Applied Numerical Analysis and Computational Mathematics, 2005, 2, 70-77.	0.6	26
116	On a new multiparametric family of Newton-like methods. Applied Numerical Analysis and Computational Mathematics, 2005, 2, 78-88.	0.6	9
117	A modification of the convergence conditions for Picard's iteration. Computational and Applied Mathematics, 2004, 23, .	1.3	5
118	A modification of Newton's method for nondifferentiable equations. Journal of Computational and Applied Mathematics, 2004, 164-165, 409-417.	2.0	11
119	On Halley-type iterations with free second derivative. Journal of Computational and Applied Mathematics, 2004, 170, 455-459.	2.0	43
120	High order algorithms for approximatingnth roots. International Journal of Computer Mathematics, 2004, 81, 1001-1014.	1.8	5
121	A NEWTON-LIKE METHOD FOR SOLVING SOME BOUNDARY VALUE PROBLEMS. Numerical Functional Analysis and Optimization, 2002, 23, 791-805.	1.4	12
122	Generalized differentiability conditions for Newton's method. IMA Journal of Numerical Analysis, 2002, 22, 187-205.	2.9	59
123	Solving a Boundary Value Problem by a Newton-Like Method. International Journal of Computer Mathematics, 2002, 79, 1113-1120.	1.8	4
124	Semilocal convergence of the secant method under mild convergence conditions of differentiability. Computers and Mathematics With Applications, 2002, 44, 277-285.	2.7	51
125	A uniparametric family of iterative processes for solving nondifferentiable equations. Journal of Mathematical Analysis and Applications, 2002, 275, 821-834.	1.0	62
126	A New Third-Order Iterative Processfor Solving Nonlinear Equations. Monatshefte Fur Mathematik, 2001, 133, 131-142.	0.9	1
