#	ARTICLE	IF	CITATIONS
1	Two-fraction stereotactic ablative radiotherapy (SABR) versus two-fraction high dose rate (HDR) brachytherapy for localized prostate cancer: Does dose heterogeneity matter?. Radiotherapy and Oncology, 2022, 169, 51-56.	0.3	8
2	Single-fraction HDR brachytherapy as monotherapy in low and intermediate risk prostate cancer: Outcomes from two clinical trials with and without an MRI-guided boost. Radiotherapy and Oncology, 2021, 154, 29-35.	0.3	15
3	Changing me to we: Developing teambuilding in radiation therapy. Journal of Medical Imaging and Radiation Sciences, 2021, 52, 390-398.	0.2	0
4	Radiation therapists' knowledge and attitudes regarding specialized clinics for geriatric assessment of older women with early stage breast cancer: A cross sectional study. Journal of Geriatric Oncology, 2021, 12, 1107-1109.	0.5	3
5	Understanding team dynamics to promote team building in a radiotherapy department. Journal of Radiotherapy in Practice, 2020, , 1-6.	0.2	0
6	Learning in 360 Degrees: A Pilot Study on the Use of Virtual Reality for Radiation Therapy Patient Education. Journal of Medical Imaging and Radiation Sciences, 2020, 51, 221-226.	0.2	27
7	Prostate high dose-rate brachytherapy as monotherapy for low and intermediate risk prostate cancer: Efficacy results from a randomized phase II clinical trial of one fraction of 19ÅGy or two fractions of 13.5ÅGy. Radiotherapy and Oncology, 2020, 146, 90-96.	0.3	92
8	MRI assisted focal boost integrated with HDR monotherapy study in low and intermediate risk prostate cancer (MARS): Results from a phase II clinical trial. Radiotherapy and Oncology, 2019, 141, 144-148.	0.3	24
9	It Only Takes a Minute: The Development and Implementation of a Patient Experience Survey in Radiation Therapy. Journal of Medical Imaging and Radiation Sciences, 2019, 50, 5-11.	0.2	7
10	Efficacy Results of a Randomized Trial of Prostate HDR Monotherapy in Either One or Two Fractions for Low and Intermediate Risk Disease. Brachytherapy, 2019, 18, S52-S53.	0.2	3
11	Magnetic resonance-guided high intensity focused ultrasound (MR-HIFU) hyperthermia for primary rectal cancer: A virtual feasibility analysis.. Journal of Global Oncology, 2019, 5, 77-77.	0.5	0
12	Pattern of relapse and dose received by the recurrent intraprostatic nodule in low- to intermediate-risk prostate cancer treated with single fraction 19ÅGy high-dose-rate brachytherapy. Brachytherapy, 2018, 17, 291-297.	0.2	34
13	To prep or not to prep - that is the question: A randomized trial on the use of antiflatulent medication as part of bowel preparation for patients having image guided external beam radiation therapy to the prostate. Practical Radiation Oncology, 2018, 8, 116-122.	1.1	6
14	Breast Cancer Patientsâ€™ Preferences for Adjuvant Radiotherapy Post Lumpectomy: Whole Breast Irradiation vs. Partial Breast Irradiationâ€”Single Institutional Study. Journal of Cancer Education, 2018, 33, 37-43.	0.6	9
15	Assessing the Psychological Impact of Daily Bowel Preparation on Prostate Patients Who Receive Radiation Therapy. Journal of Medical Imaging and Radiation Sciences, 2018, 49, 70-75.	0.2	7
16	Evaluation of an Online Education Resource on Radiation Therapy Created for Patients with Postprostatectomy Prostate Cancer and Their Caregivers. Journal of Medical Imaging and Radiation Sciences, 2018, 49, 365-370.	0.2	0
17	Response to: â€”Reply to: Who Should Bear the Cost of Convenience? A Cost-effectiveness Analysis Comparing External Beam and Brachytherapy Radiotherapy Techniques for Early Stage Breast Cancerâ€™. Clinical Oncology, 2017, 29, 393-394.	0.6	1
18	Who Should Bear the Cost of Convenience? A Cost-effectiveness Analysis Comparing External Beam and Brachytherapy Radiotherapy Techniques for Early Stage Breast Cancer. Clinical Oncology, 2017, 29, e57-e63.	0.6	16

#	ARTICLE	IF	CITATIONS
19	Prostate high dose-rate brachytherapy as monotherapy for low and intermediate risk prostate cancer: Early toxicity and quality-of life results from a randomized phase II clinical trial of one fraction of 19Gy or two fractions of 13.5Gy. <i>Radiotherapy and Oncology</i> , 2017, 122, 87-92.	0.3	75
20	Permanent Breast Seed Implant for Early-stage Breast Cancer: Impact of Primary Tumour Location on the Overall Cosmetic Outcome. <i>Journal of Medical Imaging and Radiation Sciences</i> , 2015, 46, 85-89.	0.2	1
21	Providing Supportive Care for Young Breast Cancer Patients: Exploring the Comfort Level and Educational Needs of the Interprofessional Health Care Team at a Comprehensive Cancer Centre. <i>Journal of Medical Imaging and Radiation Sciences</i> , 2015, 46, S69-S74.	0.2	3
22	Empowering Patients through Education: Exploring Patients' Needs about Postoperative Radiation Therapy for Prostate Cancer at the Sunnybrook Odette Cancer Centre. <i>Journal of Medical Imaging and Radiation Sciences</i> , 2015, 46, 189-196.	0.2	6
23	Growing the Professional Body of Knowledge Through Undergraduate Student Research: Can We Get that in Writing?. <i>Journal of Medical Imaging and Radiation Sciences</i> , 2015, 46, S10-S12.	0.2	4
