#	ARTICLE	IF	CITATIONS
1	Transition of young adult kidney transplant recipients. <i>Pediatric Nephrology</i> , 2023, 38, 383-390.	1.7	14
2	Successful ABO and HLA incompatible kidney transplantation in children in the UK. <i>Pediatric Nephrology</i> , 2023, 38, 529-535.	1.7	2
3	Time to Improve the Utilization of Kidneys From Donation After Circulatory Death Donors in Pediatric Transplantation. <i>Transplantation</i> , 2022, 106, 453-454.	1.0	2
4	The impact of donor and recipient sex on kidney allograft survival in pediatric transplant recipients. <i>Pediatric Nephrology</i> , 2022, 37, 209-216.	1.7	8
5	Long-term kidney function in children with Wilms tumour and constitutional WT1 pathogenic variant. <i>Pediatric Nephrology</i> , 2022, 37, 821-832.	1.7	5
6	Kidney transplantation outcomes for children and young people with lupus nephritis. <i>Pediatric Transplantation</i> , 2022, 26, e14193.	1.0	0
7	Increasing trends in hemodialysis and living donor kidney transplantation for children and young people in the United Kingdom. <i>Pediatric Transplantation</i> , 2022, , e14232.	1.0	0
8	Is Preemptive Kidney Transplantation Associated With Improved Outcomes when Compared to Non-preemptive Kidney Transplantation in Children? A Systematic Review and Meta-Analysis. <i>Transplant International</i> , 2022, 35, 10315.	1.6	10
9	Early data on <sc>SARSâ€CoV</sc>â€2 infection in paediatric kidney transplantation. <i>Pediatric Transplantation</i> , 2022, 26, .	1.0	1
10	Experience of ethical dilemmas among professionals working in pediatric transplantation: An international survey. <i>Pediatric Transplantation</i> , 2022, 26, .	1.0	3
11	Association of Histologic Parameters with Outcome in C3 Glomerulopathy and Idiopathic Immunoglobulin-Associated Membranoproliferative Glomerulonephritis. <i>Clinical Journal of the American Society of Nephrology: CJASN</i> , 2022, 17, 994-1007.	4.5	13
12	A biallelic lossâ€ofâ€function <i>PDIA6</i> variant in a second patient with polycystic kidney disease, infancyâ€onset diabetes, and microcephaly. <i>Clinical Genetics</i> , 2022, 102, 457-458.	2.0	0
13	UK national study of barriers to renal transplantation in children. <i>Archives of Disease in Childhood</i> , 2021, 106, 384-386.	1.9	3
14	Three-year outcomes from the CRADLE study in de novo pediatric kidney transplant recipients receiving everolimus with reduced tacrolimus and early steroid withdrawal. <i>American Journal of Transplantation</i> , 2021, 21, 123-137.	4.7	12
15	COVID-19 in children with chronic kidney disease: findings from the UK renal registry. <i>Archives of Disease in Childhood</i> , 2021, 106, e16-e16.	1.9	14
16	Kidney outcomes for children with lupus nephritis. <i>Pediatric Nephrology</i> , 2021, 36, 1377-1385.	1.7	53
17	Does HLA matching matter in the modern era of renal transplantation?. <i>Pediatric Nephrology</i> , 2021, 36, 31-40.	1.7	18
18	Associations between Deprivation, Geographic Location, and Access to Pediatric Kidney Care in the United Kingdom. <i>Clinical Journal of the American Society of Nephrology: CJASN</i> , 2021, 16, 194-203.	4.5	17

#	ARTICLE	IF	CITATIONS
19	Early detection of SARS-CoV-2 and other infections in solid organ transplant recipients and household members using wearable devices. <i>Transplant International</i> , 2021, 34, 1019-1031.	1.6	6
20	Improved renal allograft survival for pre-emptive paediatric renal transplant recipients in the UK. <i>Archives of Disease in Childhood</i> , 2021, 106, archdischild-2020-321277.	1.9	5
21	Outcomes of paediatric kidney transplant recipients using the updated 2013/2017 Banff histopathological classification for antibody-mediated rejection. <i>Pediatric Nephrology</i> , 2021, 36, 2575-2585.	1.7	3
22	Use of rituximab in paediatric nephrology. <i>Archives of Disease in Childhood</i> , 2021, 106, 1058-1065.	1.9	21
23	Early relapse of atypical hemolytic uremic syndrome following ABO-incompatible living-related pediatric kidney re-transplant successfully treated with eculizumab. <i>Pediatric Nephrology</i> , 2021, 36, 3271-3275.	1.7	3
24	Epstein-Barr virus (EBV) deletions as biomarkers of response to treatment of chronic active EBV. <i>British Journal of Haematology</i> , 2021, 195, 249-255.	2.5	8
25	728...A case series of paediatric kidney transplants during the ongoing COVID-19 pandemic. , 2021, , .		0
26	C3 Glomerulopathy and Related Disorders in Children. <i>Clinical Journal of the American Society of Nephrology: CJASN</i> , 2021, 16, 1639-1651.	4.5	12
27	Consent for covid-19 vaccination in children. <i>BMJ, The</i> , 2021, 374, n2356.	6.0	1
28	Clinical practice recommendations for recurrence of focal and segmental glomerulosclerosis/steroid-resistant nephrotic syndrome. <i>Pediatric Transplantation</i> , 2021, 25, e13955.	1.0	18
29	Utilisation of kidneys from deceased donors at increased risk of infectious disease transmission: a step in the right direction. <i>Pediatric Nephrology</i> , 2020, 35, 177-179.	1.7	0
30	Development and validation of the first consensus gene-expression signature of operational tolerance in kidney transplantation, incorporating adjustment for immunosuppressive drug therapy. <i>EBioMedicine</i> , 2020, 58, 102899.	6.1	16
31	Cell-Free DNA in Pediatric Solid Organ Transplantation Using a New Detection Method of Separating Donor-Derived from Recipient Cell-Free DNA. <i>Clinical Chemistry</i> , 2020, 66, 1300-1309.	3.2	7
32	No evidence for the need of a routine renal transplant ultrasound after elective transplant ureteric stent removal—A retrospective cohort study. <i>Pediatric Transplantation</i> , 2020, 24, e13704.	1.0	2
33	Preventing tuberculosis in paediatric kidney transplant recipients: is there a role for BCG immunisation pre-transplantation in low tuberculosis incidence countries?. <i>Pediatric Nephrology</i> , 2020, 36, 3023-3031.	1.7	3
34	Long-term outcomes and response to treatment in diacylglycerol kinase epsilon nephropathy. <i>Kidney International</i> , 2020, 97, 1260-1274.	5.2	31
35	Large-Scale Whole-Genome Sequencing Reveals the Genetic Architecture of Primary Membranoproliferative GN and C3 Glomerulopathy. <i>Journal of the American Society of Nephrology: JASN</i> , 2020, 31, 365-373.	6.1	36
36	Management of chronic renal allograft dysfunction and when to re-transplant. <i>Pediatric Nephrology</i> , 2019, 34, 599-603.	1.7	8

#	ARTICLE	IF	CITATIONS
37	Efficacy and safety of tacrolimus in de novo pediatric transplant recipients randomized to receive immediateâ€•or prolongedâ€•release tacrolimus. Clinical Transplantation, 2019, 33, e13698.	1.6	10
38	Efficacy and safety of prolongedâ€•release tacrolimus in stable pediatric allograft recipients converted from immediateâ€•release tacrolimus â€• a Phase 2, openâ€•label, singleâ€•arm, oneâ€•way crossover study. Transplant International, 2019, 32, 1182-1193.	1.6	11
39	BK viremia and nephropathy in pediatric renal transplant recipients. Pediatric Transplantation, 2019, 23, e13460.	1.0	11
40	Is deceased organ donation using extracorporeal membrane oxygenation transport ethical and feasible?. Pediatric Transplantation, 2019, 23, e13570.	1.0	1
41	Patient-specific 3D Printing. Annals of Surgery, 2019, 269, e18-e23.	4.2	24
42	Pharmacodynamics of rituximab on B lymphocytes in paediatric patients with autoimmune diseases. British Journal of Clinical Pharmacology, 2019, 85, 1790-1797.	2.4	9
43	The impact of changing practice on improved outcomes of paediatric renal transplantation in the United Kingdom: a 25 years review. Transplant International, 2019, 32, 751-761.	1.6	28
44	Plasma electrolyte imbalance in pediatric kidney transplant recipients. Pediatric Transplantation, 2019, 23, e13411.	1.0	7
45	Comparative pharmacokinetics of tacrolimus in stable pediatric allograft recipients converted from immediateâ€•release tacrolimus to prolongedâ€•release tacrolimus formulation. Pediatric Transplantation, 2019, 23, e13391.	1.0	9
46	8â€•...Multi-disciplinary leadership and the impact on education for children with medical needs. , 2019, , .		0
47	SAT0200â€•...UNUSUAL SYSTEMIC LUPUS ERYTHEMATOSUS/SJOEGREN'S SYNDROME PHENOTYPE IN A PATIENT WITH A TNFAIP3 GENE MUTATION. , 2019, , .		0
48	Screen of traditional soup broths with reported antipyretic activity towards the discovery of potential antimalarials. Archives of Disease in Childhood, 2019, 104, 1138-1142.	1.9	1
49	A Markov Multi-State model of lupus nephritis urine biomarker panel dynamics in children: Predicting changes in disease activity. Clinical Immunology, 2019, 198, 71-78.	3.2	12
50	European consensus-based recommendations for the diagnosis and treatment of rare paediatric vasculitides â€• the SHARE initiative. Rheumatology, 2019, 58, 656-671.	1.9	77
51	Steroid regulation: An overlooked aspect of tolerance and chronic rejection in kidney transplantation. Molecular and Cellular Endocrinology, 2018, 473, 205-216.	3.2	8
52	Vaccination titres pre- and post-transplant in paediatric renal transplant recipients and the impact of immunosuppressive therapy. Pediatric Nephrology, 2018, 33, 897-910.	1.7	20
53	Paediatric anti-neutrophil cytoplasmic antibody (ANCA)-associated vasculitis: an update on renal management. Pediatric Nephrology, 2018, 33, 25-39.	1.7	42
54	Incomplete vaccination coverage in European children with end-stage kidney disease prior to renal transplantation. Pediatric Nephrology, 2018, 33, 341-350.	1.7	12

#	ARTICLE	IF	CITATIONS
55	Clinical risk stratification of paediatric renal transplant recipients using C1q and C3d fixing of de novo donor-specific antibodies. <i>Pediatric Nephrology</i> , 2018, 33, 167-174.	1.7	17
56	Comparative pharmacokinetics of tacrolimus in de novo pediatric transplant recipients randomized to receive immediate- or prolonged-release tacrolimus. <i>Pediatric Transplantation</i> , 2018, 22, e13289.	1.0	5
57	A case series of perioperative variables in relation to short-term outcomes in pediatric renal transplant recipients. <i>Pediatric Transplantation</i> , 2018, 22, e13198.	1.0	1
58	Converting immunosuppression from an oral suspension to a granule formulation of tacrolimus in pediatric renal transplant recipients. <i>Pediatric Transplantation</i> , 2018, 22, e13214.	1.0	3
59	Improved outcomes for paediatric renal transplant recipients. <i>Paediatrics and Child Health (United Kingdom)</i> , 2018, 54, 107-114.	0.4	2
60	Chapter 4 Demography of the UK Paediatric Renal Replacement Therapy Population in 2016. <i>Nephron</i> , 2018, 139, 105-116.	1.8	13
61	Renal allograft survival rates in kidneys initially declined for paediatric transplantation. <i>Pediatric Nephrology</i> , 2018, 33, 1609-1616.	1.7	4
62	Genomic and clinical profiling of a national nephrotic syndrome cohort advocates a precision medicine approach to disease management. <i>Kidney International</i> , 2017, 91, 937-947.	5.2	201
63	Imaging in pediatric renal transplantation. <i>Pediatric Transplantation</i> , 2017, 21, e12885.	1.0	6
64	UK National Registry Study of Kidney Donation After Circulatory Death for Pediatric Recipients. <i>Transplantation</i> , 2017, 101, 1177-1181.	1.0	24
65	European evidence-based recommendations for diagnosis and treatment of childhood-onset systemic lupus erythematosus: the SHARE initiative. <i>Annals of the Rheumatic Diseases</i> , 2017, 76, 1788-1796.	0.9	139
66	Immune Desensitization Allows Pediatric Blood Group Incompatible Kidney Transplantation. <i>Transplantation</i> , 2017, 101, 1242-1246.	1.0	22
67	Hypomagnesemia and increased risk of new-onset diabetes mellitus after transplantation in pediatric renal transplant recipients. <i>Pediatric Nephrology</i> , 2017, 32, 879-884.	1.7	15
68	Post-infectious glomerulonephritis. <i>Paediatrics and International Child Health</i> , 2017, 37, 240-247.	1.0	49
69	European evidence-based recommendations for the diagnosis and treatment of childhood-onset lupus nephritis: the SHARE initiative. <i>Annals of the Rheumatic Diseases</i> , 2017, 76, 1965-1973.	0.9	105
70	Factor H autoantibody is associated with atypical hemolytic uremic syndrome in children in the United Kingdom and Ireland. <i>Kidney International</i> , 2017, 92, 1261-1271.	5.2	49
71	Paediatric renal transplantation: moving forward in the field. <i>Pediatric Nephrology</i> , 2017, 32, 2003-2004.	1.7	1
72	Plasma-cell-rich infiltrates in paediatric renal transplant biopsies are associated with increased risk of renal allograft failure. <i>Pediatric Nephrology</i> , 2017, 32, 679-684.	1.7	11

#	ARTICLE	IF	CITATIONS
73	Non-invasive imaging cannot replace formal angiography in the diagnosis of renovascular hypertension. <i>Pediatric Nephrology</i> , 2017, 32, 495-502.	1.7	46
74	When is biopsy-proven TIN not simply TIN? Answers. <i>Pediatric Nephrology</i> , 2017, 32, 977-979.	1.7	0
75	International validation of a urinary biomarker panel for identification of active lupus nephritis in children. <i>Pediatric Nephrology</i> , 2017, 32, 283-295.	1.7	46
76	When is biopsy-proven TIN not simply TIN? Questions. <i>Pediatric Nephrology</i> , 2017, 32, 975-976.	1.7	0
77	Detection of Low Frequency Multi-Drug Resistance and Novel Putative Maribavir Resistance in Immunocompromised Pediatric Patients with Cytomegalovirus. <i>Frontiers in Microbiology</i> , 2016, 7, 1317.	3.5	71
78	Living Donation Has a Greater Impact on Renal Allograft Survival Than HLA Matching in Pediatric Renal Transplant Recipients. <i>Transplantation</i> , 2016, 100, 2717-2722.	1.0	20
79	Biopsy-proven paediatric tubulointerstitial nephritis. <i>Pediatric Nephrology</i> , 2016, 31, 1625-1630.	1.7	18
80	The lack of Lazarus effect with proteasome inhibition. <i>Pediatric Nephrology</i> , 2016, 31, 1217-1219.	1.7	1
81	Positive trends in paediatric renal biopsy service provision in the UK: a national survey and re-audit of paediatric renal biopsy practice. <i>Pediatric Nephrology</i> , 2016, 31, 613-621.	1.7	8
82	Kidney donation after circulatory death: current evidence and opportunities for pediatric recipients. <i>Pediatric Nephrology</i> , 2016, 31, 1039-1045.	1.7	15
83	Why are kids with lupus at an increased risk of cardiovascular disease?. <i>Pediatric Nephrology</i> , 2016, 31, 861-883.	1.7	13
84	Immunosuppressive therapy for kidney transplantation in children and adolescents: systematic review and economic evaluation. <i>Health Technology Assessment</i> , 2016, 20, 1-324.	2.8	10
85	Lupus Nephritis. , 2016, , 759-780.		0
86	Obstructive Uropathy. , 2016, , 1121-1133.		0
87	Corticosteroid-free Kidney Transplantation Improves Growth. <i>Transplantation</i> , 2015, 99, 1178-1185.	1.0	47
88	Can pre-implantation biopsies predict renal allograft function in pediatric renal transplant recipients?. <i>Journal of King Abdulaziz University, Islamic Economics</i> , 2015, 36, 1299-1304.	1.1	1
89	SaO042AN EXCELLENT BIOMARKER PANEL FOR IDENTIFICATION OF ACTIVE LUPUS NEPHRITIS IN CHILDREN. <i>Nephrology Dialysis Transplantation</i> , 2015, 30, iii41-iii41.	0.7	0
90	Angioplasty for renovascular hypertension in 78 children. <i>Archives of Disease in Childhood</i> , 2015, 100, 474-478.	1.9	49

#	ARTICLE	IF	CITATIONS
91	Long-term outcomes of children after solid organ transplantation. Clinics, 2014, 69, 28-38.	1.5	72
92	Clinical significance of isolated v lesions in paediatric renal transplant biopsies: muscular arteries required to refute the diagnosis of acute rejection. Transplant International, 2014, 27, 170-175.	1.6	8
93	Treatment strategies to treat antibody-mediated rejection and to reduce donor-specific antibodies. Pediatric Transplantation, 2014, 18, 417-419.	1.0	6
94	Differences between paediatric and adult presentation of ESKD in attainment of adult social goals. Pediatric Nephrology, 2014, 29, 2379-2385.	1.7	24
95	Urine biomarkers for monitoring juvenile lupus nephritis: a prospective longitudinal study. Pediatric Nephrology, 2014, 29, 397-405.	1.7	42
96	Indications for use and safety of rituximab in childhood renal diseases. Pediatric Nephrology, 2013, 28, 1001-1009.	1.7	11
97	Maximising living donation with paediatric blood-group-incompatible renal transplantation. Pediatric Nephrology, 2013, 28, 1037-1040.	1.7	14
98	Tacrolimus toxicity secondary to diarrhoea in nephrotic syndrome. Acta Paediatrica, International Journal of Paediatrics, 2013, 102, e291-2.	1.5	4
99	Systemic Polyarteritis Nodosa in the Young: A Single-Center Experience Over Thirty-Two Years. Arthritis and Rheumatism, 2013, 65, 2476-2485.	6.7	107
100	New immunosuppressants in pediatric solid organ transplantation. Current Opinion in Organ Transplantation, 2012, 17, 503-508.	1.6	8
101	Distribution of ABO Blood Group Antibody Titers in Pediatric Patients Awaiting Renal Transplantation. Transplantation, 2012, 94, 362-368.	1.0	13
102	Autoantibodies in systemic lupus erythematosus. Pediatric Nephrology, 2012, 27, 1855-1868.	1.7	43
103	Non-viral infections in children after renal transplantation. Pediatric Nephrology, 2012, 27, 1465-1476.	1.7	19
104	Renal artery revascularisation can restore kidney function with absent radiotracer uptake. Pediatric Nephrology, 2012, 27, 2153-2157.	1.7	14
105	Update on Imaging for Suspected Renovascular Hypertension in Children and Adolescents. Current Hypertension Reports, 2012, 14, 591-595.	3.5	30
106	Joint European League Against Rheumatism and European Renal Association-European Dialysis and Transplant Association (EULAR/ERA-EDTA) recommendations for the management of adult and paediatric lupus nephritis. Annals of the Rheumatic Diseases, 2012, 71, 1771-1782.	0.9	868
107	Renal FMD may not confer a familial hypertensive risk nor is it caused by ACTA2 mutations. Pediatric Nephrology, 2011, 26, 1857-1861.	1.7	17
108	Comparison of parameters of chronic kidney disease following paediatric preemptive versus non-preemptive renal transplantation. Pediatric Transplantation, 2010, 14, 583-588.	1.0	15
