#	ARTICLE	IF	CITATIONS
1	The analysis of influence of uncertainty factors on mathematical modeling of process of reverse expansion of ammonia in low-speed reciprocating compressor stage. Part 1. Omsk Scientific Bulletin Series Aviation-Rocket and Power Engineering, 2022, 6, 44-54.	0.0	0
2	Implementing the principles of operating processes schematization and of performance loss distribution when designing long-stroke reciprocating compressor stages. IOP Conference Series: Materials Science and Engineering, 2021, 1180, 012016.	0.6	0
3	Multipurpose conversion of marine diesel engines when creating piston motor-compressor units. Omsk Scientific Bulletin Series Aviation-Rocket and Power Engineering, 2021, 5, 14-22.	0.0	0
4	The analysis of uncertainty factors influence on mathematical modeling of ammonia compression in wet vapor area. Omsk Scientific Bulletin Series Aviation-Rocket and Power Engineering, 2021, 5, 30-38.	0.0	0
5	Implementation Features of Multistage Compression in Air Compressor Units Based on Low-Speed Long-Stroke Stages. Chemical and Petroleum Engineering (English Translation of Khimicheskoe I) Tj ETQq1 1 0.784314.rgBT /Overlock 1	0.4	0
6	The effect of deformation of flow part of elastomeric elements of self-acting valves on characteristics of low-speed long-stroke compressor stages. Omsk Scientific Bulletin Series Aviation-Rocket and Power Engineering, 2021, 5, 33-38.	0.0	0
7	Increasing of energy efficiency of horizontal air cooling apparatus. AIP Conference Proceedings, 2021, , .	0.4	0
8	Analysis of the uncertainty factors influence on the mathematical modelling of ammonia compression in the wet vapor region. AIP Conference Proceedings, 2021, , .	0.4	0
9	Assessment of the prospects for the creation of low-flow compressor units of medium and high pressure on the basis of slow-speed long-stroke stages. AIP Conference Proceedings, 2021, , .	0.4	0
10	Analysis of the influence of the elastomeric valve element deformation on the integral characteristics of a slow-speed reciprocating compressor stage. AIP Conference Proceedings, 2021, , .	0.4	0
11	Experimental study of an air two-stage compressor based on low-speed long-stroke stages. AIP Conference Proceedings, 2021, , .	0.4	0
12	Thermodynamic analysis of expansion process of screw expander in wet steam area. Omsk Scientific Bulletin Series Aviation-Rocket and Power Engineering, 2021, 5, 39-47.	0.0	0
13	Comparative Evaluation of Methods for Calculating the Dynamics of Self-Acting Valves in Reciprocating Compressor Units. Chemical and Petroleum Engineering (English Translation of) Tj ETQq1 1 0.784314.rgBT /Overlock 1	0.4	0
14	Heat loss recovery system of the mobile compressor unit based on the absorption refrigerating machine. AIP Conference Proceedings, 2020, , .	0.4	1
15	Numerical analysis of the influence of the coolant pressure increase and the shell-and-tube heat exchanger outer surface isolation degree on the external heat losses value. AIP Conference Proceedings, 2020, , .	0.4	0
16	Results of CFD calculations verification of high pressure centrifugal compressor stage with inlet guide vanes. AIP Conference Proceedings, 2020, , .	0.4	0
17	Relevance of condensation temperature determination for marine vapour-compression refrigeration system with a composite cooling of condensation unit. AIP Conference Proceedings, 2020, , .	0.4	0
18	Experimental study of friction power in rotary vane machines. AIP Conference Proceedings, 2020, , .	0.4	0

#	ARTICLE	IF	CITATIONS
19	The method of numerical calculation of the design of the guides in the flowing part of the short diffuser of the air heat exchanger. AIP Conference Proceedings, 2020, , .	0.4	0
20	Self-acting shut-off valve effect of motion law schematization on calculation quality of low-speed long-stroke air piston compressor units working process. AIP Conference Proceedings, 2020, , .	0.4	0
21	The efficiency theoretical analysis of the ammonia refrigeration cycle based on the compression in the wet vapor region. AIP Conference Proceedings, 2020, , .	0.4	3
22	Analysis of the applicability of schematization based on the porous zone function for the numerical calculation of the flowing part of an air filter with a short diffuser. AIP Conference Proceedings, 2020, , .	0.4	1
23	Experimental research of horizontal air cooling apparatus. AIP Conference Proceedings, 2019, , .	0.4	1
24	Assessment of the relationship between the law of motion of the slow-speed long-stroke stage piston and the characteristics of the compressor unit drive. AIP Conference Proceedings, 2019, , .	0.4	4
25	Selection of the parameters of CFD calculation model of high-pressure centrifugal compressor stage with the inlet guide vanes. AIP Conference Proceedings, 2019, , .	0.4	2
26	Increasing the efficiency of the gas filter with a short diffuser by profiling its flow part. AIP Conference Proceedings, 2019, , .	0.4	0
27	Analysis of the thermal efficiency of solid and vacuum thermal insulation in an exchanger of the heat losses recovery system in mobile compressor units. AIP Conference Proceedings, 2019, , .	0.4	1
28	Research method of high-temperature low-flow turbine units self-lubricating bearing friction units temperature deformations. AIP Conference Proceedings, 2019, , .	0.4	1
29	Testing of temperature pile to obtain actual cooling performance. AIP Conference Proceedings, 2019, , .	0.4	0
30	Experimental research of the efficiency of gas filters with a short diffuser. AIP Conference Proceedings, 2019, , .	0.4	1
31	Thermodynamic analysis of the heat losses combined recovery ideal cycle of the compressor several process units. AIP Conference Proceedings, 2019, , .	0.4	0
32	Problems equilibration of aggregates on the basis of slow moving stages. Journal of Physics: Conference Series, 2019, 1260, 062026.	0.4	0
33	Numerical analysis of gas-dynamic efficiency of the flow part of compact air heat exchangers and filters for mobile compressor units. IOP Conference Series: Materials Science and Engineering, 2019, 604, 012038.	0.6	3
34	Developing teamwork skills for students trained in compressors and refrigeration programs. IOP Conference Series: Materials Science and Engineering, 2019, 604, 012040.	0.6	3
35	The application efficiency analysis of the main heat carrier as the mobile compressor unit recovery system elements «active» thermal insulation. AIP Conference Proceedings, 2018, , .	0.4	1
36	Experimental Evaluation of the Efficiency of Long-Stroke, Low-Speed Reciprocating Compressor Stages in Compression of Different Gases. Chemical and Petroleum Engineering (English Translation of) Tj ETQq0 0 0 rgBT (Overlock) 10 Tf 50 5		

#	ARTICLE	IF	CITATIONS
37	Analysis of the operating cycle efficiency of the long-stroke slow stage under the changing ratio of the piston forward and backward stroke time. AIP Conference Proceedings, 2018, , .	0.4	6
38	Mathematical modeling of working processes of variable frequency screw compressor with differentiated oil supply into the working chamber. IOP Conference Series: Materials Science and Engineering, 2018, 425, 012003.	0.6	0
39	Development of a numerical method for studying heat exchange and temperature fields in a self-lubricating turbocharger bearing under cooling. AIP Conference Proceedings, 2018, , .	0.4	3
40	The heat losses recovery system efficiency analysis of the mobile compressor unit with the additional cooling loop. AIP Conference Proceedings, 2018, , .	0.4	0
41	The efficiency comparative analysis of the mobile compressor unit heat losses recovery system flow part elements thermal insulation different types. AIP Conference Proceedings, 2018, , .	0.4	1
42	Experimental research of the operating processes of slow-speed long-stroke oil-free reciprocating compressor stages at discharge pressures up to 10 MPa. AIP Conference Proceedings, 2018, , .	0.4	9
43	Assessment of faulty sealing in automatic valves with elastomer structural elements and its impact on the operating process of slow-speed reciprocating compressor stages. AIP Conference Proceedings, 2018, , .	0.4	3
44	The analysis of the recuperative Rankine cycle boiling pressure impact on the efficiency of the mobile compressor unit with the heat losses recovery system. AIP Conference Proceedings, 2018, , .	0.4	1
45	Analysis of the efficiency of external cooling of slow-speed long-stroke oil-free reciprocating compressor stages with asymmetric design scheme. AIP Conference Proceedings, 2018, , .	0.4	2
46	The engineering technique for calculating the design parameters of the guides in the flowing part of gas filters short diffusers. AIP Conference Proceedings, 2018, , .	0.4	2
47	Increase in efficiency of gas filters with a short diffuser when operating in a swirling flow. AIP Conference Proceedings, 2018, , .	0.4	3
48	Influence of Oil Injection System on Efficiency of Speed-Controlled Screw Refrigeration Compressor. Chemical and Petroleum Engineering (English Translation of Khimicheskoe i Neftyanoe Mashinostroenie), 2017, 52, 620-626.	0.3	0
49	Analysis of Thermal State of Intensely Cooled Long-Stroke Low-Speed Piston Compressor Stage. Chemical and Petroleum Engineering (English Translation of Khimicheskoe i Neftyanoe Mashinostroenie), 2017, 52, 620-626.	0.3	0
50	Verification of a Numerical Technique for Investigating the Flow of a Cooling Medium in a Crescent-Shaped Gap of the Self-Lubricating Bearing of a Turbine Unit. Chemical and Petroleum Engineering (English Translation of Khimicheskoe i Neftyanoe Mashinostroenie), 2017, 52, 620-626.	0.3	0
51	The influence analysis of cooling medium and condensation node construction for refrigeration units specifications for the oil and gas offshore supply bases. AIP Conference Proceedings, 2017, , .	0.4	0
52	Calculating and parametric analysis of the work of the air single-stage medium pressure reciprocating compressor of on the basis of the oil-free long-stroke slow-speed stage. AIP Conference Proceedings, 2017, , .	0.4	6
53	Experimental study of the short diffuser design influence on the efficiency of air cooled condenser. AIP Conference Proceedings, 2017, , .	0.4	3
54	Increase in efficiency of the air heat exchanger with the short diffuser for compressed air cooling. AIP Conference Proceedings, 2017, , .	0.4	3

#	ARTICLE	IF	CITATIONS
55	Assessment of the Prospects of Development of Medium-Pressure Single-Stage Piston Compressor Units. Chemical and Petroleum Engineering (English Translation of Khimicheskoe I Neftyanoe) Tj ETQq1 1 0.78431 4 rgBT /Overlock 10 T	0.4	2
56	Influence of wall thickness and properties of structural materials on the discharge temperature and strength characteristics of slow-speed long-stroke stages. AIP Conference Proceedings, 2017, , .	0.4	2
57	Verification of the operating processes calculation technique for slow speed oil-free stages of reciprocating medium-pressure compressors. AIP Conference Proceedings, 2017, , .	0.4	7
58	The experimental research of the operating processes in slow speed stages of air reciprocating medium-pressure compressors. AIP Conference Proceedings, 2017, , .	0.4	18
59	The mobile compressor unit heat losses recovery system compactness improving possibility evaluation. AIP Conference Proceedings, 2017, , .	0.4	2
60	The study of the mobile compressor unit heat losses recovery system waste heat exchanger thermal insulation types influence on the operational efficiency. AIP Conference Proceedings, 2017, , .	0.4	5
61	Modeling of the processes of heating organic coolant in the system of heat losses recuperation of the mobile compressor unit on the basis of a low-speed single-stage. Journal of Physics: Conference Series, 2017, 858, 012008.	0.4	2
62	Theoretical Analysis of Changing Gas Dynamic Characteristics of the Dust Filter with a Short Diffuser While in Operation. Procedia Engineering, 2016, 152, 270-275.	1.2	4
63	The Efficiency Analysis for the Heat Losses Recuperation System of the Mobile Refrigeration Unit. Procedia Engineering, 2016, 152, 339-347.	1.2	2
64	The Experimental Research of the Thermal Conditions in Slow Speed Stage of Air Reciprocating Compressor. Procedia Engineering, 2016, 152, 297-302.	1.2	20
65	Constructional Design of Polymeric Cooled Bearings. Procedia Engineering, 2016, 152, 288-296.	1.2	0
66	Numerical Analysis of Gas Dynamic Efficiency of Short Diffusers with Internal Guiding Blades. Chemical and Petroleum Engineering (English Translation of Khimicheskoe I Neftyanoe) Tj ETQq0 0 0 rgBT /Overlock 10 Tf 50 1297 Td (M	1.2	2
67	Developing of Computational Investigation Methodology of Newtonian Fluid in the Crescent-shaped Gap of Turbogenerator Oil-free Bearing. Procedia Engineering, 2015, 113, 306-311.	1.2	2
68	The Estimation of Thermal Conditions of Highly-cooled Long-stroke Stages in Reciprocating Compressors. Procedia Engineering, 2015, 113, 264-269.	1.2	29
69	The Definition Limits Technique for the Efficient Regulation of the Â«Diesel Engine â€” Pressurized TurbocompressorÂ» System for Mobile Compressor Units. Procedia Engineering, 2015, 113, 152-157.	1.2	2
70	Development of Methods of Gas Flow Computation in Short Diffusers. Procedia Engineering, 2015, 113, 259-263.	1.2	6
71	Modeling the Work Processes of Slow-Speed, Long-Stroke Piston Compressors. Chemical and Petroleum Engineering (English Translation of Khimicheskoe I Neftyanoe Mashinostroenie), 2015, 51, 177-182.	0.3	13
72	Thermodynamic analysis of structural schemes of mobile compressor power plants with the system of heat losses recuperation. , 2014, , .		1

#	ARTICLE	IF	CITATIONS
73	Theoretical analysis of short diffusers implementation efficiency in compact heat exchangers. , 2014, , .		1
74	Contactless surface-temperature measurement for the rotating shaft of an unlubricated bearing. Russian Engineering Research, 2012, 32, 242-243.	0.6	1
75	Effect of microribbing on the instantaneous convective heat transfer coefficient in the working chamber of an unlubricated piston compressor. Chemical and Petroleum Engineering (English) Tj ETQq1 1 0.784314 rgBT /Overlock 10	0.784314	1
76	Reduction of weight-size parameters for heat-exchange equipment in mobile compressor plants. Chemical and Petroleum Engineering (English Translation of Khimicheskoe I Neftyanoe Mashinostroenie) Tj ETQq0 0 0 rgBT /Overlock 10 Tf 501617 Td (M	0.0	0
77	Influence exerted by efficiency of heat-exchange systems for gas-catalytic production on characteristics of compressor equipment. Chemical and Petroleum Engineering (English Translation) Tj ETQq1 1 0.784314 rgBT /Overlock 10	0.784314	1
78	Indexing a dual-rotor compressor with nonlinear rotor synchronization. Chemical and Petroleum Engineering (English Translation of Khimicheskoe I Neftyanoe Mashinostroenie), 1994, 30, 10-12.	0.3	0
