#	ARTICLE	IF	CITATIONS
1	Low back pain and telecommuting in Japan: Influence of work environment quality. <i>Journal of Occupational Health</i> , 2022, 64, e12329.	2.1	6
2	Telecommuting Frequency and Preference among Japanese Workers According to Regional Cumulative COVID-19 Incidence: A Cross-Sectional Study. <i>SAGE Open</i> , 2022, 12, 2158244022110821.	1.7	2
3	Job stress among workers who telecommute during the coronavirus disease (COVID-19) pandemic in Japan: a cross-sectional study. <i>International Journal of Occupational Medicine and Environmental Health</i> , 2022, , .	1.3	5
4	Measurement of the Workplace Protection Factor of Replaceable Particulate and Powered Air-purifying Respirators in Japanese Dust-generating Occupations. <i>Journal of UOEH</i> , 2022, 44, 15-24.	0.6	3
5	Application of tight-fitting half-facepiece breath-response powered air-purifying respirator for internal body cooling in occupational environment. <i>PLoS ONE</i> , 2022, 17, e0266534.	2.5	1
6	Effect of Working from Home on the Association between Job Demands and Psychological Distress. <i>International Journal of Environmental Research and Public Health</i> , 2022, 19, 6287.	2.6	2
7	Sociodemographic factors and self-restraint from social behaviors during the COVID-19 pandemic in Japan: A cross-sectional study. <i>Preventive Medicine Reports</i> , 2022, 28, 101834.	1.8	1
8	A cross-sectional study of the association between frequency of telecommuting and unhealthy dietary habits among Japanese workers during the COVID-19 pandemic. <i>Journal of Occupational Health</i> , 2021, 63, e12281.	2.1	15
9	Intensity of Home-Based Telework and Work Engagement During the COVID-19 Pandemic. <i>Journal of Occupational and Environmental Medicine</i> , 2021, 63, 907-912.	1.7	21
10	Workplace measures against COVID-19 during the winter third wave in Japan: Company size-based differences. <i>Journal of Occupational Health</i> , 2021, 63, e12224.	2.1	33
11	Association Between Telecommuting Environment and Low Back Pain Among Japanese Telecommuting Workers. <i>Journal of Occupational and Environmental Medicine</i> , 2021, 63, e944-e948.	1.7	11
12	Combining Indoor Positioning Using Wi-Fi Round Trip Time with Dust Measurement in the Field of Occupational Health. <i>Sensors</i> , 2021, 21, 7261.	3.8	2
13	A cross-sectional study on perceived workplace health support and health-related quality of life. <i>Journal of Occupational Health</i> , 2021, 63, e12302.	2.1	7
14	Association Between Time Spent With Family and Loneliness Among Japanese Workers During the COVID-19 Pandemic: A Cross-Sectional Study. <i>Frontiers in Psychiatry</i> , 2021, 12, 786400.	2.6	11
15	Effects of toner-handling work on respiratory function, chest X-ray findings, and biomarkers of inflammation, allergy, and oxidative stress: a 10-year prospective Japanese cohort study. <i>BMC Pulmonary Medicine</i> , 2020, 20, 280.	2.0	1
16	The Relationship Between Fear-avoidance Beliefs in Employees with Chronic Musculoskeletal Pain and Work Productivity: A Longitudinal Study. <i>Journal of UOEH</i> , 2020, 42, 13-26.	0.6	4
17	Evaluation of the performance of replaceable particulate and powered air-purifying respirators considering non-recommended wearing methods. <i>Industrial Health</i> , 2020, 58, 573-580.	1.0	7
18	A Cohort Study on Respiratory Symptoms and Diseases Caused by Toner-Handling Work: Longitudinal Analyses from 2003 to 2013. <i>Atmosphere</i> , 2019, 10, 647.	2.3	4

#	ARTICLE	IF	CITATIONS
19	Musculoskeletal pain in Japanese workers and the relationship between labor productivity by presenteeism and chronic musculoskeletal pain: a cross-sectional study. <i>Environmental and Occupational Health Practice</i> , 2019, 1, 21-30.	0.5	3
20	A survey on methods of wearing respiratory protective equipment and awareness of respiratory protection among workers engaged in dust-generating work. <i>Environmental and Occupational Health Practice</i> , 2019, 1, 39-45.	0.5	5
21	A cohort study of the acute and chronic respiratory effects of toner exposure among handlers: a longitudinal analyses from 2004 to 2013. <i>Industrial Health</i> , 2016, 54, 448-459.	1.0	6
