

Paulo Jc Favas

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/2362135/paulo-jc-favas-publications-by-year.pdf>

Version: 2024-04-20

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

42
papers

1,228
citations

#	Paper	IF	Citations
42	Geochemical anomalies from a survey of stream sediments in the Maquelab area (Oecusse, Timor-Leste) and their bearing on the identification of mafic-ultramafic chromite rich complex. <i>Applied Geochemistry</i> , 2021 , 126, 104868	3.5	2
41	Metal(loid) induced toxicity and defense mechanisms in <i>Spinacia oleracea</i> L.: Ecological hazard and Prospects for phytoremediation. <i>Ecotoxicology and Environmental Safety</i> , 2019 , 183, 109570	7	11
40	EDTA-Assisted Metal Uptake in <i>Raphanus sativus</i> L. and <i>Brassica oleracea</i> L.: Assessment of Toxicity and Food Safety. <i>Bulletin of Environmental Contamination and Toxicology</i> , 2019 , 103, 490-495	2.7	9
39	Remediation of Uranium-Contaminated Sites by Phytoremediation and Natural Attenuation 2019 , 277-300		10
38	Effect of <i>Glomus mossae</i> on accumulation efficiency, hazard index and antioxidant defense mechanisms in tomato under metal(loid) Stress. <i>International Journal of Phytoremediation</i> , 2018 , 20, 885-894	3.9	19
37	Metal(loid) accumulation in aquatic plants of a mining area: Potential for water quality biomonitoring and biogeochemical prospecting. <i>Chemosphere</i> , 2018 , 194, 158-170	8.4	28
36	Assessment of edibility and effect of arbuscular mycorrhizal fungi on <i>Solanum melongena</i> L. grown under heavy metal(loid) contaminated soil. <i>Ecotoxicology and Environmental Safety</i> , 2018 , 148, 318-326	7	32
35	Mycoremediation for Mine Site Rehabilitation 2018 , 233-260		4
34	Abandoned Mine Land Reclamation Challenges and Opportunities (Holistic Approach) 2018 , 3-31		9
33	Bioremoval of trace metals from rhizosediment by mangrove plants in Indian Sundarban Wetland. <i>Marine Pollution Bulletin</i> , 2017 , 124, 1078-1088	6.7	43
32	Identification of <i>Sesbania sesban</i> (L.) Merr. as an Efficient and Well Adapted Phytoremediation Tool for Cd Polluted Soils. <i>Bulletin of Environmental Contamination and Toxicology</i> , 2017 , 98, 867-873	2.7	13
31	Distribution of rare earth elements, thorium and uranium in streams and aquatic mosses of Central Portugal. <i>Environmental Earth Sciences</i> , 2017 , 76, 1	2.9	14
30	Accumulation efficiency, genotoxicity and antioxidant defense mechanisms in medicinal plant <i>Acalypha indica</i> L. under lead stress. <i>Chemosphere</i> , 2017 , 171, 544-553	8.4	63
29	Acid Mine Drainages From Abandoned Mines 2016 , 413-462		10
28	Biogeochemistry of uranium in the soil-plant and water-plant systems in an old uranium mine. <i>Science of the Total Environment</i> , 2016 , 568, 350-368	10.2	47
27	Lead heavy metal toxicity induced changes on growth and antioxidative enzymes level in water hyacinths [<i>Eichhornia crassipes</i> (Mart.)]. <i>Botanical Studies</i> , 2016 , 55, 54	2.3	178
26	Geomedicine and History of Science: A Contribution to Scientific Culture 2016 , 207-223		1

25	Uranium accumulation in aquatic macrophytes in an uraniferous region: Relevance to natural attenuation. <i>Chemosphere</i> , 2016 , 156, 76-87	8.4	21
24	Phytofiltration of Metal(loid)-Contaminated Water: The Potential of Native Aquatic Plants 2016 , 305-343		
23	Geochemical Fractionation of Trace Elements in Stream Sediments Contaminated by Mining Activity. <i>Clean - Soil, Air, Water</i> , 2015 , 43, 446-455	1.6	6
22	Mercury heavy-metal-induced physiochemical changes and genotoxic alterations in water hyacinths [<i>Eichhornia crassipes</i> (Mart.)]. <i>Environmental Science and Pollution Research</i> , 2015 , 22, 4597-608	5.1	51
21	Nickel accumulation by <i>Alyssum serpyllifolium</i> subsp. <i>lusitanicum</i> (Brassicaceae) from serpentine soils of Bragança and Morais (Portugal) ultramafic massifs: plant-soil relationships and prospects for phytomining. <i>Australian Journal of Botany</i> , 2015 , 63, 17	1.2	14
20	Accumulation of Trace Metals by Mangrove Plants in Indian Sundarban Wetland: Prospects for Phytoremediation. <i>International Journal of Phytoremediation</i> , 2015 , 17, 885-94	3.9	55
19	Assessment of mercury heavy metal toxicity-induced physiochemical and molecular changes in <i>Sesbania grandiflora</i> L.. <i>International Journal of Environmental Science and Technology</i> , 2015 , 12, 3273-3282	3.3	30
18	Potential of aquatic plants for phytofiltration of uranium-contaminated waters in laboratory conditions. <i>Ecological Engineering</i> , 2014 , 69, 170-176	3.9	47
17	Accumulation of uranium by aquatic plants in field conditions: prospects for phytoremediation. <i>Science of the Total Environment</i> , 2014 , 470-471, 993-1002	10.2	56
16	Effect of lead on phytotoxicity, growth, biochemical alterations and its role on genomic template stability in <i>Sesbania grandiflora</i> : a potential plant for phytoremediation. <i>Ecotoxicology and Environmental Safety</i> , 2014 , 108, 249-57	7	65
15	Uranium Bioavailability and Environmental Risk Assessment in Soils Contaminated by Mining. <i>IERI Procedia</i> , 2014 , 9, 43-46		4
14	Phytoremediation potential of native flora of arsenic-contaminated soils. <i>Arsenic in the Environment Proceedings</i> , 2014 , 298-299		
13	Temporal variation in the arsenic and metal accumulation in the maritime pine tree grown on contaminated soils. <i>International Journal of Environmental Science and Technology</i> , 2013 , 10, 809-826	3.3	12
12	Phytoremediation assessment of flora tolerant to heavy metals in the contaminated soils of an abandoned Pb mine in Central Portugal. <i>Chemosphere</i> , 2013 , 90, 2216-25	8.4	45
11	F [Goldschmidt Abstracts 2013. <i>Mineralogical Magazine</i> , 2013 , 77, 1058-1124	1.7	4
10	G [Goldschmidt Abstracts 2013. <i>Mineralogical Magazine</i> , 2013 , 77, 1125-1238	1.7	3
9	Heavy metals biogeochemistry in abandoned mining areas. <i>E3S Web of Conferences</i> , 2013 , 1, 19006	0.5	1
8	Uptake of uranium by native aquatic plants: potential for bioindication and phytoremediation. <i>E3S Web of Conferences</i> , 2013 , 1, 13007	0.5	11

7	Hydrochemistry of superficial waters in the Adoria mine area (Northern Portugal): environmental implications. <i>Environmental Earth Sciences</i> , 2012 , 65, 363-372	2.9	8
6	Accumulation of arsenic by aquatic plants in large-scale field conditions: opportunities for phytoremediation and bioindication. <i>Science of the Total Environment</i> , 2012 , 433, 390-7	10.2	101
5	Uranium accumulation by aquatic plants from uranium-contaminated water in Central Portugal. <i>International Journal of Phytoremediation</i> , 2012 , 14, 221-34	3.9	56
4	Adsorption of arsenic to different natural solids: Soils, stream sediments and peats 2012 , 168-169		1
3	Selective chemical extraction of heavy metals in tailings and soils contaminated by mining activity: Environmental implications. <i>Journal of Geochemical Exploration</i> , 2011 , 111, 160-171	3.8	102
2	Chemical speciation of heavy metals and arsenic in tailings and soils contaminated by mining activities (Northern Portugal). <i>Diqiu Huaxue</i> , 2006 , 25, 31-31		
1	Mineralogical controls on mine drainage of the abandoned Ervedosa tin mine in north-eastern Portugal. <i>Applied Geochemistry</i> , 2006 , 21, 1322-1334	3.5	35
