#	ARTICLE	IF	CITATIONS
1	Prioritized customer order scheduling to maximize throughput. European Journal of Operational Research, 2016, 255, 345-356.	3.5	10
2	Stochastic customer order scheduling with setup times to minimize expected cycle time. International Journal of Production Research, 2018, 56, 2684-2706.	4.9	10
3	Throughputs Maximization of Stochastic Customer Orders Under Two Production Schemes. IEEE Transactions on Automation Science and Engineering, 2017, 14, 745-757.	3.4	6
4	Minimizing Expected Cycle Time of Stochastic Customer Orders Through Bounded Multi-Fidelity Simulations. IEEE Transactions on Automation Science and Engineering, 2018, 15, 1797-1809.	3.4	6
5	Efficient Learning for Selecting Important Nodes in Random Network. IEEE Transactions on Automatic Control, 2021, 66, 1321-1328.	3.6	6
6	Inventory-Constrained Throughput Optimization for Stochastic Customer Orders. IEEE Transactions on Automation Science and Engineering, 2019, 16, 1218-1231.	3.4	5
7	Stochastic customer order scheduling to maximize throughput. , 2015, , .		4
8	Sequential Sampling for a Ranking and Selection Problem with Exponential Sampling Distributions. , 2020, , .		4
9	Scheduling customer orders on unrelated parallel machines to minimise total weighted completion time. Journal of the Operational Research Society, 2021, 72, 1726-1736.	2.1	3
10	Efficient Simulation Budget Allocation With Bound Information. IEEE Transactions on Automatic Control, 2020, 65, 207-222.	3.6	2
11	Minimax efficient finite-difference stochastic gradient estimators using black-box function evaluations. Operations Research Letters, 2021, 49, 40-47.	0.5	2
12	Effective throughput maximization of stochastic customer orders with inventory constraints. , 2016, , .		1
13	Efficient Sampling Procedure for Selecting the Largest Stationary Probability of a Markov Chain. , 2018, , .		1
14	Efficient Lateral Transshipment Policy for Multi-Retailer System. , 2019, , .		1
15	Dynamic Sampling Procedure for Decomposable Random Networks. , 2019, , .		0
16	Efficient learning for decomposing and optimizing random networks. Fundamental Research, 2022, , .	1.6	0
