ΙΔΙΕΥ ΛΙΤΚΙΝ

| #  | Article                                                                                                                                                                                                        | IF  | CITATIONS |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Bridging the macro to micro resolution gap with angiographic optical coherence tomography and dynamic contrast enhanced MRI. Scientific Reports, 2022, 12, 3159.                                               | 1.6 | 1         |
| 2  | Longitudinal in-vivo quantification of tumour microvascular heterogeneity by optical coherence angiography in pre-clinical radiation therapy. Scientific Reports, 2022, 12, 6140.                              | 1.6 | 7         |
| 3  | Volumetric tumor delineation and assessment of its early response to radiotherapy with optical coherence tomography. Biomedical Optics Express, 2021, 12, 2952.                                                | 1.5 | 12        |
| 4  | Toward a quantitative method for estimating tumour-stroma ratio in breast cancer using polarized light microscopy. Biomedical Optics Express, 2021, 12, 3241.                                                  | 1.5 | 13        |
| 5  | Low-coherence photonic method of electrochemical processes monitoring. Scientific Reports, 2021, 11, 12600.                                                                                                    | 1.6 | 3         |
| 6  | Diattenuation and retardance signature of plasmonic gold nanorods in turbid media revealed by<br>Mueller matrix polarimetry. Scientific Reports, 2021, 11, 20017.                                              | 1.6 | 3         |
| 7  | Discriminating turbid media by scatterer size and scattering coefficient using backscattered linearly and circularly polarized light. Biomedical Optics Express, 2021, 12, 6831.                               | 1.5 | 10        |
| 8  | Longitudinal in-vivo quantification of tumour microvasculature heterogeneity via optical coherence tomography (OCT) angiography in a pre-clinical model of radiation therapy. , 2021, , .                      |     | 0         |
| 9  | Quantification of radiation-induced microvasculature changes using optical coherence tomography and dynamic contrast enhanced MRI. , 2021, , .                                                                 |     | 0         |
| 10 | Periâ€ŧumoural stroma collagen organization of invasive ductal carcinoma assessed by polarized light<br>microscopy differs betweenOncotypeDXrisk group. Journal of Biophotonics, 2020, 13, e202000188.         | 1.1 | 6         |
| 11 | Dual-Agent Photodynamic Therapy with Optical Clearing Eradicates Pigmented Melanoma in Preclinical<br>Tumor Models. Cancers, 2020, 12, 1956.                                                                   | 1.7 | 21        |
| 12 | 85: The Role of Cytokine Signaling in the Reversal of Chronic Lymphedema. Radiotherapy and Oncology,<br>2020, 150, S38-S39.                                                                                    | 0.3 | 0         |
| 13 | Novel quantitative signature of tumor stromal architecture: polarized light imaging differentiates<br>between myxoid and sclerotic human breast cancer stroma. Biomedical Optics Express, 2020, 11, 3246.      | 1.5 | 13        |
| 14 | Multimodal OCT for Malignancy Imaging. , 2020, , 425-464.                                                                                                                                                      |     | 1         |
| 15 | Photon mayhem: new directions in diagnostic and therapeutic photomedicine. Biomedical Engineering<br>Letters, 2019, 9, 275-277.                                                                                | 2.1 | 3         |
| 16 | A multiscale Mueller polarimetry module for a stereo zoom microscope. Biomedical Engineering<br>Letters, 2019, 9, 339-349.                                                                                     | 2.1 | 8         |
| 17 | Novel methodology to image stromal tissue and assess its morphological features with polarized<br>light: towards a tumour microenvironment prognostic signature. Biomedical Optics Express, 2019, 10,<br>3963. | 1.5 | 14        |
| 18 | Analysis of low-scattering regions in optical coherence tomography: applications to neurography and<br>lymphangiography. Biomedical Optics Express, 2019, 10, 4207.                                            | 1.5 | 22        |

| #  | Article                                                                                                                                                                                                         | IF  | CITATIONS |
|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Optical coherence angiography monitoring of tumor early response to PDT in experimental and clinical studies. , 2019, , .                                                                                       |     | 1         |
| 20 | Assessment of optical coherence tomography speckle patterns in low-scatterer-concentration regions: simulations for lymphatic vessels mapping. , 2019, , .                                                      |     | 0         |
| 21 | Impact of velocity gradient in Poiseuille flow on the statistics of coherent radiation scattered by flowing Brownian particles in optical coherence tomography. Journal of Biomedical Optics, 2019, 24, 1.      | 1.4 | 1         |
| 22 | Preclinical longitudinal imaging of tumor microvascular radiobiological response with functional optical coherence tomography. Scientific Reports, 2018, 8, 38.                                                 | 1.6 | 28        |
| 23 | Kâ€distribution threeâ€dimensional mapping of biological tissues in optical coherence tomography.<br>Journal of Biophotonics, 2018, 11, e201700055.                                                             | 1.1 | 7         |
| 24 | Pixel classification method in optical coherence tomography for tumor segmentation and its complementary usage with OCT microangiography. Journal of Biophotonics, 2018, 11, e201700072.                        | 1.1 | 29        |
| 25 | Monte Carlo simulation of polarizationâ€sensitive secondâ€harmonic generation and propagation in biological tissue. Journal of Biophotonics, 2018, 11, e201800036.                                              | 1.1 | 5         |
| 26 | Cross-Polarization Optical Coherence Tomography with Active Maintenance of the Circular<br>Polarization of a Sounding Wave in a Common Path System. Radiophysics and Quantum Electronics,<br>2018, 60, 897-911. | 0.1 | 37        |
| 27 | Optical coherence tomographyâ€based angiography device with realâ€time angiography Bâ€scans<br>visualization and handâ€held probe for everyday clinical use. Journal of Biophotonics, 2018, 11,<br>e201700292.  | 1.1 | 47        |
| 28 | Preclinical quantitative in-vivo assessment of skin tissue vascularity in radiation-induced fibrosis with optical coherence tomography. Journal of Biomedical Optics, 2018, 23, 1.                              | 1.4 | 9         |
| 29 | Multiphoton tomography and multimodal OCT for in vivo visualization of oral malignancy in the hamster cheek pouch. , 2018, , .                                                                                  |     | 1         |
| 30 | Non-invasive voiding assessment in conscious mice. Bladder, 2018, 5, 33.                                                                                                                                        | 0.6 | 5         |
| 31 | Optical coherence elastography assesses tissue modifications in laser reshaping of cornea and cartilages. , 2018, , .                                                                                           |     | Ο         |
| 32 | Alternative Contrast Mechanism in Optical Coherence Tomography: Temporal Speckle Synchronization<br>Effects. Sovremennye Tehnologii V Medicine, 2018, 10, 39.                                                   | 0.4 | 0         |
| 33 | Quantitative compressional OCE: obviating pitfalls in using pre-calibrated compliant layers and some other practical obstacles. , 2018, , .                                                                     |     | Ο         |
| 34 | Two-dimensional OCT-relaxography of collagenous tissues. , 2018, , .                                                                                                                                            |     | 0         |
| 35 | Photodynamic therapy monitoring with optical coherence angiography. Scientific Reports, 2017, 7, 41506.                                                                                                         | 1.6 | 44        |
| 36 | Optical coherence elastography for strain dynamics measurements in laser correction of cornea shape. Journal of Biophotonics, 2017, 10, 1450-1463.                                                              | 1.1 | 57        |

| #  | Article                                                                                                                                                                                                                      | IF  | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 37 | Multimodal OCT for assessment of vasculature-targeted PDT success. , 2017, , .                                                                                                                                               |     | 0         |
| 38 | Multiparameter thermo-mechanical OCT-based characterization of laser-induced cornea reshaping.<br>Proceedings of SPIE, 2017, , .                                                                                             | 0.8 | 1         |
| 39 | Flexible polarimetric probe for 3 × 3 Mueller matrix measurements of biological tissue. Scientific<br>Reports, 2017, 7, 11958.                                                                                               | 1.6 | 29        |
| 40 | Optimized Mass Spectrometry Analysis Workflow with Polarimetric Guidance for ex vivo and in situ<br>Sampling of Biological Tissues. Scientific Reports, 2017, 7, 468.                                                        | 1.6 | 38        |
| 41 | Manifestations of nonlinear elasticity of biological tissues in compressional optical coherence elastography. Proceedings of SPIE, 2017, , .                                                                                 | 0.8 | 1         |
| 42 | Multimodal OCT for complex assessment of tumors response to therapy. , 2017, , .                                                                                                                                             |     | 1         |
| 43 | Quasistatic in-depth local strain relaxation/creep rate mapping using phase-sensitive optical coherence tomography. , 2017, , .                                                                                              |     | 0         |
| 44 | In-vivo longitudinal imaging of microvascular changes in irradiated oral mucosa of radiotherapy cancer patients using optical coherence tomography. Scientific Reports, 2017, 7, 16505.                                      | 1.6 | 40        |
| 45 | Practical obstacles and their mitigation strategies in compressional optical coherence elastography of biological tissues. Journal of Innovative Optical Health Sciences, 2017, 10, 1742006.                                 | 0.5 | 60        |
| 46 | Statistical properties of dynamic speckles from flowing Brownian scatterers in the vicinity of the image plane in optical coherence tomography. Biomedical Optics Express, 2017, 8, 2004.                                    | 1.5 | 8         |
| 47 | Accurate viscosity measurements of flowing aqueous glucose solutions with suspended scatterers<br>using a dynamic light scattering approach with optical coherence tomography. Journal of Biomedical<br>Optics, 2017, 22, 1. | 1.4 | 8         |
| 48 | Polarization image segmentation of radiofrequency ablated porcine myocardial tissue. PLoS ONE, 2017, 12, e0175173.                                                                                                           | 1.1 | 23        |
| 49 | Analysis of the optical delay generator for rapid depth scanning in optical coherence tomography. ,<br>2017, , .                                                                                                             |     | ο         |
| 50 | Analysis of scattering statistics and governing distribution functions in optical coherence tomography. Biomedical Optics Express, 2016, 7, 2551.                                                                            | 1.5 | 11        |
| 51 | Multi-modal optical imaging characterization of atherosclerotic plaques. Journal of Biophotonics, 2016, 9, 1009-1020.                                                                                                        | 1.1 | 17        |
| 52 | Robust strain mapping in optical coherence elastography by combining local phase-resolved measurements and cumulative displacement tracking. , 2016, , .                                                                     |     | 0         |
| 53 | OCT-based approach to local relaxations discrimination from translational relaxation motions.<br>Proceedings of SPIE, 2016, , .                                                                                              | 0.8 | 0         |
| 54 | Optimization of phase-variation measurements in low-coherence methods: implications for OCE. , 2016, , .                                                                                                                     |     | 2         |

| #  | Article                                                                                                                                                                                                       | IF  | CITATIONS |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 55 | Vessel-contrast enhancement in label-free optical coherence angiography based on phase and amplitude speckle variability. , 2016, , .                                                                         |     | 2         |
| 56 | Microvascular contrast enhancement in optical coherence tomography using microbubbles. Journal of Biomedical Optics, 2016, 21, 076014.                                                                        | 1.4 | 14        |
| 57 | Hybrid method of strain estimation in optical coherence elastography using combined subâ€wavelength<br>phase measurements and supraâ€pixel displacement tracking. Journal of Biophotonics, 2016, 9, 499-509.  | 1.1 | 48        |
