#	ARTICLE	IF	CITATIONS
1	Nickel penetration into stratum corneum in <i>FLG</i> null carriers – A human experimental study. <i>Contact Dermatitis</i> , 2022, 87, 154-161.	1.4	6
2	Preservatives in non-cosmetic products: Increasing human exposure requires action for protection of health. <i>Contact Dermatitis</i> , 2022, 87, 389-405.	1.4	7
3	Suitable test concentration of cobalt and concomitant reactivity to nickel and chromium: A multicentre study from the Swedish Contact Dermatitis Research Group. <i>Contact Dermatitis</i> , 2021, 84, 153-158.	1.4	3
4	Impact of mono-culture vs. Co-culture of keratinocytes and monocytes on cytokine responses induced by important skin sensitizers. <i>Journal of Immunotoxicology</i> , 2021, 18, 74-84.	1.7	5
5	Comment on <i>MDBGN</i> / <i>DBDCB</i> , the European baseline series, and <i>EU</i> legislation. <i>Contact Dermatitis</i> , 2021, 85, 607-610.	1.4	6
6	Reply to further response: Comment on <i>MDBGN</i> / <i>DBDCB</i> , the European baseline series, and <i>EU</i> legislation – Again. <i>Contact Dermatitis</i> , 2021, 85, 614-614.	1.4	1
7	Filaggrin Polymorphisms and the Uptake of Chemicals through the Skin – A Human Experimental Study. <i>Environmental Health Perspectives</i> , 2021, 129, 17002.	6.0	12
8	Chemical Methods for Detection of Allergens and Skin Exposure. , 2021, , 631-652.		0
9	Contact Allergy to Metals. , 2021, , 757-802.		5
10	European Legislation on Contact Allergens in Product for Consumer and Occupational Use. , 2021, , 1199-1207.		1
11	Contact Allergy to Hair Dyes. , 2021, , 877-889.		0
12	Filaggrin gene mutations in relation to contact allergy and hand eczema in adolescence. <i>Contact Dermatitis</i> , 2020, 82, 147-152.	1.4	13
13	Contact Allergy to Metals. , 2020, , 1-46.		1
14	Some Other Metals. , 2020, , 687-697.		1
15	Photographers and Other Photo-Lab Workers. , 2020, , 2221-2227.		0
16	Chemical Methods for Detection of Allergens and Skin Exposure. , 2020, , 1-23.		0
17	European Legislation on Contact Allergens in Product for Consumer and Occupational Use. , 2020, , 1-9.		0
18	Contact Allergy to Hair Dyes. , 2020, , 1-13.		0

#	ARTICLE	IF	CITATIONS
19	Filaggrin variations are associated with PAH metabolites in urine and DNA alterations in blood. Environmental Research, 2019, 177, 108600.	7.5	13
20	Genetic variants of filaggrin are associated with occupational dermal exposure and blood DNA alterations in hairdressers. Science of the Total Environment, 2019, 653, 45-54.	8.0	13
21	Nickel deposition and penetration into the stratum corneum after short metallic nickel contact: An experimental study. Contact Dermatitis, 2019, 80, 86-93.	1.4	26
22	Atopic dermatitis at preschool age and contact allergy in adolescence: a population-based cohort study. British Journal of Dermatology, 2019, 180, 782-789.	1.5	7
23	Short contact with nickel is not harmless. Contact Dermatitis, 2019, 80, 259-260.	1.4	5
24	Chemical Methods for Detection of Allergens and Skin Exposure. , 2019, , 1-23.		0
25	Hair Dyes. , 2019, , 1-13.		0
26	Metal Allergy: Nickel. , 2018, , 423-434.		7
27	Isothiazolinones are still widely used in paints purchased in five European countries: a follow-up study. Contact Dermatitis, 2018, 78, 246-253.	1.4	35
28	Chromium(III) release from chromium-tanned leather elicits allergic contact dermatitis: a use test study. Contact Dermatitis, 2018, 78, 307-314.	1.4	48
29	Self-testing for contact allergy to hair dyes: A 5-year follow-up multicentre study. Contact Dermatitis, 2018, 78, 131-138.	1.4	12
30	Neglected exposure route: cobalt on skin and its associations with urinary cobalt levels. Occupational and Environmental Medicine, 2018, 75, 837-842.	2.8	20
31	Extended documentation for hand dermatitis patients: Pilot study on irritant exposures. Contact Dermatitis, 2018, 79, 168-174.	1.4	15
32	Short contact with nickel causes allergic contact dermatitis: an experimental study. British Journal of Dermatology, 2018, 179, 1127-1134.	1.5	31
33	Non-oxidative hair dye products on the European market: What do they contain?. Contact Dermatitis, 2018, 79, 281-287.	1.4	10
34	Contamination of skin and surfaces by cobalt in the hard metal industry. Contact Dermatitis, 2018, 79, 226-231.	1.4	16
35	Some Other Metals. , 2018, , 1-14.		0
36	Criteria for the evidence-based categorisation of skin sensitisers. Food and Chemical Toxicology, 2017, 105, 14-21.	3.6	6

#	ARTICLE	IF	CITATIONS
37	Development, validation and testing of a skin sampling method for assessment of metal exposure. Contact Dermatitis, 2017, 77, 17-24.	1.4	16
38	A population-based study of self-reported skin exposures and symptoms in relation to contact allergy in adolescents. Contact Dermatitis, 2017, 77, 242-249.	1.4	19
39	Hairdressers' skin exposure to hair dyes during different hair dyeing tasks. Contact Dermatitis, 2017, 77, 303-310.	1.4	23
40	Water Exposure on the Hands in Adolescents: A Report from the BAMSE Cohort. Acta Dermato-Venereologica, 2017, 97, 188-192.	1.3	8
41	Chromium Dermatitis in a Metal Worker Due to Leather Gloves and Alkaline Coolant. Acta Dermato-Venereologica, 2016, 96, 104-105.	1.3	10
42	Alterations of telomere length and DNA methylation in hairdressers: A cross-sectional study. Environmental and Molecular Mutagenesis, 2016, 57, 159-167.	2.2	15
43	Cobalt allergy: suitable test concentration, and concomitant reactivity to nickel and chromium. Contact Dermatitis, 2016, 74, 360-367.	1.4	42
44	Elicitation threshold of cobalt chloride: analysis of patch test dose-response studies. Contact Dermatitis, 2016, 74, 105-109.	1.4	21
45	Chromium(III) and chromium(VI) release from leather during 8 months of simulated use. Contact Dermatitis, 2016, 75, 82-88.	1.4	26
46	High prevalence of contact allergy in adolescence: results from the population-based BAMSE birth cohort. Contact Dermatitis, 2016, 74, 44-51.	1.4	63
47	Comparative sensitizing potencies of fragrances, preservatives, and hair dyes. Contact Dermatitis, 2016, 75, 265-275.	1.4	29
48	Testing in artificial sweat - Is less more? Comparison of metal release in two different artificial sweat solutions. Regulatory Toxicology and Pharmacology, 2016, 81, 381-386.	2.7	36
49	Snapshot of cobalt, chromium and nickel exposure in dental technicians. Contact Dermatitis, 2016, 75, 370-376.	1.4	23
50	Nickel on the market: a baseline survey of articles in "prolonged contact"™ with skin. Contact Dermatitis, 2016, 75, 77-81.	1.4	30
51	Patch testing with hair cosmetic series in Europe: a critical review and recommendation. Contact Dermatitis, 2015, 73, 69-81.	1.4	42
52	European Society of Contact Dermatitis guideline for diagnostic patch testing - recommendations on best practice. Contact Dermatitis, 2015, 73, 195-221.	1.4	1,012
53	Short and frequent skin contact with nickel. Contact Dermatitis, 2015, 73, 222-230.	1.4	45
54	Jewellery: alloy composition and release of nickel, cobalt and lead assessed with the EU synthetic sweat method. Contact Dermatitis, 2015, 73, 231-238.	1.4	34

#	ARTICLE	IF	CITATIONS
55	Hand eczema and atopic dermatitis in adolescents: a prospective cohort study from the BAMSE project. <i>British Journal of Dermatology</i> , 2015, 173, 1175-1182.	1.5	40
56	Methylisothiazolinone and benzisothiazolinone are widely used in paint: a multicentre study of paints from five European countries. <i>Contact Dermatitis</i> , 2015, 72, 127-138.	1.4	85
57	Methylisothiazolinone in rinse-off products causes allergic contact dermatitis: a repeated open-application study. <i>British Journal of Dermatology</i> , 2015, 173, 115-122.	1.5	39
58	Contact allergy trends in Sweden – a retrospective comparison of patch test data from 1992, 2000, and 2009. <i>Contact Dermatitis</i> , 2015, 72, 297-304.	1.4	46
59	Nickel Exposure When Working Out in the Gym. <i>Acta Dermato-Venereologica</i> , 2015, 95, 247-249.	1.3	17
60	Chromium released from leather – I: exposure conditions that govern the release of chromium(III) and chromium(VI). <i>Contact Dermatitis</i> , 2015, 72, 206-215.	1.4	57
61	Chromium released from leather – II: the importance of environmental parameters. <i>Contact Dermatitis</i> , 2015, 72, 275-285.	1.4	34
62	Exposure of hairdressers to ortho- and meta-toluidine in hair dyes. <i>Occupational and Environmental Medicine</i> , 2015, 72, 57-63.	2.8	19
63	The influence of hydrogen peroxide on the permeability of protective gloves to resorcinol in hairdressing. <i>Contact Dermatitis</i> , 2015, 72, 33-39.	1.4	18
64	Failure of total hip implants: metals and metal release in 52 cases. <i>Contact Dermatitis</i> , 2014, 71, 319-325.	1.4	29
65	Severe occupational chromium allergy despite cement legislation. <i>Contact Dermatitis</i> , 2014, 70, 321-323.	1.4	22
66	Multicentre patch testing with fragrance mix II and hydroxyisohexyl 3-cyclohexene carboxaldehyde by the Swedish Contact Dermatitis Research Group. <i>Contact Dermatitis</i> , 2014, 70, 187-189.	1.4	14
67	Cobalt skin dose resulting from short and repetitive contact with hard metals. <i>Contact Dermatitis</i> , 2014, 70, 361-368.	1.4	24
68	Coupled exposure to ingredients of cosmetic products: III. Ultraviolet filters. <i>Contact Dermatitis</i> , 2014, 71, 162-169.	1.4	40
69	Do insulation products of man-made vitreous fibres still cause skin discomfort?. <i>Contact Dermatitis</i> , 2014, 70, 351-360.	1.4	9
70	Nickel release from white gold. <i>Contact Dermatitis</i> , 2014, 71, 109-111.	1.4	13
71	Correlation between bulk- and surface chemistry of Cr-tanned leather and the release of Cr(III) and Cr(VI). <i>Journal of Hazardous Materials</i> , 2014, 280, 654-661.	12.4	56
72	Prevalence and incidence of hand eczema in adolescence: report from the BAMSE – a population-based birth cohort. <i>British Journal of Dermatology</i> , 2014, 171, 609-614.	1.5	28

#	ARTICLE	IF	CITATIONS
73	Cobalt, nickel and chromium release from dental tools and alloys. Contact Dermatitis, 2014, 70, 3-10.	1.4	64
74	Readability of product ingredient labels can be improved by simple means: an experimental study. Contact Dermatitis, 2014, 71, 233-241.	1.4	10
75	Phenylenediamine and other allergens in hair dye products in the United States: a consumer exposure study. Contact Dermatitis, 2014, 70, 213-218.	1.4	59
76	Coupled exposure to ingredients of cosmetic products: Preservatives. Contact Dermatitis, 2014, 70, 219-226.	1.4	40
77	Formal recycling of e-waste leads to increased exposure to toxic metals: An occupational exposure study from Sweden. Environment International, 2014, 73, 243-251.	10.0	172
78	Coin exposure may cause allergic nickel dermatitis: a review. Contact Dermatitis, 2013, 68, 3-14.	1.4	60
79	Nickel allergy following EU regulation - more action is needed. British Journal of Dermatology, 2013, 169, 733-733.	1.5	2
80	Coupled exposure to ingredients of cosmetic products: Fragrances. Contact Dermatitis, 2013, 69, 335-341.	1.4	67
81	The cost of nickel allergy: a global investigation of coin composition and nickel and cobalt release. Contact Dermatitis, 2013, 68, 15-22.	1.4	30
82	Is there a flipside to nickel use in coins?. Contact Dermatitis, 2013, 68, 1-2.	1.4	2
83	The hair dye allergy self-test: considerations for treating physicians. British Journal of Dermatology, 2013, 168, 448-448.	1.5	1
84	Categorization of fragrance contact allergens for prioritization of preventive measures: clinical and experimental data and consideration of structure-activity relationships. Contact Dermatitis, 2013, 69, 196-230.	1.4	73
85	New UK nickel-plated steel coins constitute an increased allergy and eczema risk. Contact Dermatitis, 2013, 68, 323-330.	1.4	41
86	The cobalt spot test - further insights into its performance and use. Contact Dermatitis, 2013, 69, 280-287.	1.4	32
87	Activation of non-sensitizing or low-sensitizing fragrance substances into potent sensitizers - prehapten and prohaptens. Contact Dermatitis, 2013, 69, 323-334.	1.4	85
88	Nickel may be released from laptop computers. Contact Dermatitis, 2012, 67, 384-385.	1.4	24
89	Hypersensitivity reactions to metallic implants - diagnostic algorithm and suggested patch test series for clinical use. Contact Dermatitis, 2012, 66, 4-19.	1.4	179
90	Phenylenediamine and other hair dye sensitizers in Spain. Contact Dermatitis, 2012, 66, 27-32.	1.4	59

#	ARTICLE	IF	CITATIONS
91	Cobalt release from implants and consumer items and characteristics of cobalt sensitized patients with dermatitis. Contact Dermatitis, 2012, 66, 113-122.	1.4	36
92	Epoxy pipe relining – an emerging contact allergy risk for workers. Contact Dermatitis, 2012, 67, 59-65.	1.4	32
93	Primary prevention of latex allergy in healthcare – spectrum of strategies including the European glove standardization. Contact Dermatitis, 2012, 66, 165-171.	1.4	20
94	Skin exposure to epoxy in the pipe relining trade – an observational study. Contact Dermatitis, 2012, 67, 66-72.	1.4	26
95	Self-testing for contact sensitization to hair dyes – scientific considerations and clinical concerns of an industry-led screening programme. Contact Dermatitis, 2012, 66, 300-311.	1.4	25
96	Photographers and Other Photo-Lab Workers. , 2012, , 1635-1640.		0
97	Some Other Metals. , 2012, , 521-527.		0
98	Excessive nickel release from earrings purchased from independent shops and street markets – a field study from Warsaw and London. Journal of the European Academy of Dermatology and Venereology, 2011, 25, 1021-1026.	2.4	30
99	Occupational hand eczema caused by nickel and evaluated by quantitative exposure assessment. Contact Dermatitis, 2011, 64, 32-36.	1.4	57
100	Preservatives and fragrances in selected consumer-available cosmetics and detergents. Contact Dermatitis, 2011, 64, 265-272.	1.4	153
101	The EU Nickel Directive revisited-future steps towards better protection against nickel allergy. Contact Dermatitis, 2011, 64, 121-125.	1.4	88
102	Nickel deposited on the skin-visualization by DMG test. Contact Dermatitis, 2011, 64, 151-157.	1.4	40
103	Clinical work-up of a highly reactive nickel-allergic patient. Contact Dermatitis, 2011, 65, 51-53.	1.4	3
104	Nickel on the Dutch market: 10 years after entry into force of the EU Nickel Directive. Contact Dermatitis, 2011, 65, 115-117.	1.4	15
105	Multicentre patch testing with a resol resin based on phenol and formaldehyde. Contact Dermatitis, 2011, 65, 34-37.	1.4	13
106	Nomenclature of metal allergens in contact dermatitis. Contact Dermatitis, 2011, 65, 1-2.	1.4	6
107	Revision of the European standard for control of the EU nickel restriction - a probable improvement for European citizens. Contact Dermatitis, 2011, 65, 60-61.	1.4	7
108	Assessment of nickel and cobalt release from 200 unused hand-held work tools for sale in Denmark – Sources of occupational metal contact dermatitis?. Science of the Total Environment, 2011, 409, 4663-4666.	8.0	34

#	ARTICLE	IF	CITATIONS
109	Multicentre Patch Testing with Compositae Mix by the Swedish Contact Dermatitis Research Group. Acta Dermato-Venereologica, 2011, 91, 295-298.	1.3	15
110	Allergens Exposure Assessment. , 2011, , 493-510.		10
111	Sensitivity and specificity of the nickel spot (dimethylglyoxime) test. Contact Dermatitis, 2010, 62, 279-288.	1.4	124
112	A spot test for detection of cobalt release " early experience and findings. Contact Dermatitis, 2010, 63, 63-69.	1.4	99
113	Cobalt release from inexpensive jewellery: has the use of cobalt replaced nickel following regulatory intervention?. Contact Dermatitis, 2010, 63, 70-76.	1.4	54
114	Nickel on the Swedish market: follow-up 10 years after entry into force of the EU Nickel Directive. Contact Dermatitis, 2010, 63, 333-339.	1.4	48
115	Hypersensitivity reactions from metallic implants: a future challenge that needs to be addressed. British Journal of Dermatology, 2010, 162, 235-236.	1.5	24
116	Skin Deposition of Nickel, Cobalt, and Chromium in Production of Gas Turbines and Space Propulsion Components. Annals of Occupational Hygiene, 2010, 54, 340-50.	1.9	63
117	Occupational skin exposure to water: a population-based study. British Journal of Dermatology, 2009, 160, 616-621.	1.5	32
118	Cobalt-containing alloys and their ability to release cobalt and cause dermatitis. Contact Dermatitis, 2009, 60, 165-170.	1.4	72
119	Potent skin sensitizers in oxidative hair dye products on the Swedish market. Contact Dermatitis, 2009, 61, 269-275.	1.4	72
120	Deposition of nickel, chromium, and cobalt on the skin in some occupations " assessment by acid wipe sampling. Contact Dermatitis, 2008, 58, 347-354.	1.4	110
121	Release of nickel from coins and deposition onto skin from coin handling " comparing euro coins and SEK. Contact Dermatitis, 2008, 59, 31-37.	1.4	68
122	Gender differences in the disposition and toxicity of metals. Environmental Research, 2007, 104, 85-95.	7.5	571
123	Assessment of skin exposure to nickel, chromium and cobalt by acid wipe sampling and ICP-MS. Contact Dermatitis, 2006, 54, 233-238.	1.4	81
124	Self-reported skin exposure " validation of questions by observation. Contact Dermatitis, 2006, 55, 186-191.	1.4	42
125	Large Organic Aerosols in a Dynamic and Continuous Whole-Body Exposure Chamber Tested on Humans and on a Heated Mannequin. Annals of Occupational Hygiene, 2006, 50, 705-15.	1.9	8
126	Allergens Exposure Assessment. , 2006, , 413-427.		7
