List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/2374769/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Selenium fertigation with nanobubbles influences soil selenium residual and plant performance by modulation of bacterial community. Journal of Hazardous Materials, 2022, 423, 127114.	12.4	9
2	Response of soil chemical properties, enzyme activities and microbial communities to biochar application and climate change in a Mediterranean agroecosystem. Geoderma, 2022, 407, 115536.	5.1	17
3	Functional soil mycobiome across ecosystems. Journal of Proteomics, 2022, 252, 104428.	2.4	15
4	Microbial traits determine soil C emission in response to fresh carbon inputs in forests across biomes. Global Change Biology, 2022, 28, 1516-1528.	9.5	37
5	Impacts and mechanisms of nanobubbles level in drip irrigation system on soil fertility, water use efficiency and crop production: The perspective of soil microbial community. Journal of Cleaner Production, 2022, 333, 130050.	9.3	16
6	Priming effects in soils across Europe. Global Change Biology, 2022, 28, 2146-2157.	9.5	22
7	The global biogeography of soil priming effect intensity. Global Ecology and Biogeography, 2022, 31, 1679-1687.	5.8	15
8	Combined ozonation and solarization for the removal of pesticides from soil: Effects on soil microbial communities. Science of the Total Environment, 2021, 758, 143950.	8.0	18
9	Soil microbial diversity–biomass relationships are driven by soil carbon content across global biomes. ISME Journal, 2021, 15, 2081-2091.	9.8	186
10	Interactions between soil microbial communities and agronomic behavior in a mandarin crop subjected to water deficit and irrigated with reclaimed water. Agricultural Water Management, 2021, 247, 106749.	5.6	7
11	The structure and function of soil archaea across biomes. Journal of Proteomics, 2021, 237, 104147.	2.4	10
12	Use of Slaughterhouse Sludge in the Bioremediation of an Oxyfluorfen-Polluted Soil. International Journal of Environmental Research, 2021, 15, 723-731.	2.3	7
13	Global homogenization of the structure and function in the soil microbiome of urban greenspaces. Science Advances, 2021, 7, .	10.3	83
14	Plant and soil microbial community responses to different water management strategies in an almond crop. Science of the Total Environment, 2021, 778, 146148.	8.0	13
15	Role of organic amendment application on soil quality, functionality and greenhouse emission in a limestone quarry from semiarid ecosystems. Applied Soil Ecology, 2021, 164, 103925.	4.3	18
16	Largeâ€scale drivers of relationships between soil microbial properties and organic carbon across Europe. Global Ecology and Biogeography, 2021, 30, 2070-2083.	5.8	32
17	In vitro elucidation of suppression effects of composts to soil-borne pathogen Phytophthora nicotianae on pepper plants using 16S amplicon sequencing and metaproteomics. Renewable Agriculture and Food Systems, 2020, 35, 206-214.	1.8	9
18	Climatic vulnerabilities and ecological preferences of soil invertebrates across biomes. Molecular Ecology, 2020, 29, 752-761.	3.9	29

#	Article	IF	CITATIONS
19	Soil fertility and crop production are fostered by micro-nano bubble irrigation with associated changes in soil bacterial community. Soil Biology and Biochemistry, 2020, 141, 107663.	8.8	64
20	Organic amendments exacerbate the effects of silver nanoparticles on microbial biomass and community composition of a semiarid soil. Science of the Total Environment, 2020, 744, 140919.	8.0	12
21	Soil Metaproteomics for the Study of the Relationships Between Microorganisms and Plants: A Review of Extraction Protocols and Ecological Insights. International Journal of Molecular Sciences, 2020, 21, 8455.	4.1	23
22	The influence of soil age on ecosystem structure and function across biomes. Nature Communications, 2020, 11, 4721.	12.8	47
23	Microhabitat heterogeneity associated with Vanilla spp. and its influences on the microbial community of leaf litter and soil. Soil Ecology Letters, 2020, 2, 195-208.	4.5	2
24	Environmentally relevant concentrations of silver nanoparticles diminish soil microbial biomass but do not alter enzyme activities or microbial diversity. Journal of Hazardous Materials, 2020, 391, 122224.	12.4	33
25	Multiple elements of soil biodiversity drive ecosystem functions across biomes. Nature Ecology and Evolution, 2020, 4, 210-220.	7.8	543
26	Land use shapes the resistance of the soil microbial community and the C cycling response to drought in a semi-arid area. Science of the Total Environment, 2019, 648, 1018-1030.	8.0	20
27	Global ecological predictors of the soil priming effect. Nature Communications, 2019, 10, 3481.	12.8	148
28	Solarization-based pesticide degradation results in decreased activity and biomass of the soil microbial community. Geoderma, 2019, 354, 113893.	5.1	12
29	When drought meets forest management: Effects on the soil microbial community of a Holm oak forest ecosystem. Science of the Total Environment, 2019, 662, 276-286.	8.0	45
30	Boron in soil: The impacts on the biomass, composition and activity of the soil microbial community. Science of the Total Environment, 2019, 685, 564-573.	8.0	47
31	Altered leaf litter quality exacerbates the negative impact of climate change on decomposition. Journal of Ecology, 2019, 107, 2364-2382.	4.0	53
32	Using proteins to study how microbes contribute to soil ecosystem services: The current state and future perspectives of soil metaproteomics. Journal of Proteomics, 2019, 198, 50-58.	2.4	52
33	The effects of struvite and sewage sludge on plant yield and the microbial community of a semiarid Mediterranean soil. Geoderma, 2019, 337, 1051-1057.	5.1	46
34	The extracellular metaproteome of soils under semiarid climate: A methodological comparison of extraction buffers. Science of the Total Environment, 2018, 619-620, 707-711.	8.0	18
35	Comparing the impacts of drip irrigation by freshwater and reclaimed wastewater on the soil microbial community of two citrus species. Agricultural Water Management, 2018, 203, 53-62.	5.6	27
36	Climate shapes the protein abundance of dominant soil bacteria. Science of the Total Environment, 2018, 640-641, 18-21.	8.0	12

#	Article	IF	CITATIONS
37	Soil Erosion and C Losses: Strategies for Building Soil Carbon. , 2018, , 215-238.		8
38	Native soil organic matter conditions the response of microbial communities to organic inputs with different stability. Geoderma, 2017, 295, 1-9.	5.1	45
39	Differential sensitivity of total and active soil microbial communities to drought and forest management. Global Change Biology, 2017, 23, 4185-4203.	9.5	150
40	The impacts of organic amendments: Do they confer stability against drought on the soil microbial community?. Soil Biology and Biochemistry, 2017, 113, 173-183.	8.8	62
41	Agro-forestry management of Paulownia plantations and their impact on soil biological quality: The effects of fertilization and irrigation treatments. Applied Soil Ecology, 2017, 117-118, 46-56.	4.3	19
42	Ecological and functional adaptations to water management in a semiarid agroecosystem: a soil metaproteomics approach. Scientific Reports, 2017, 7, 10221.	3.3	34
43	Combined effects of reduced irrigation and water quality on the soil microbial community of a citrus orchard under semi-arid conditions. Soil Biology and Biochemistry, 2017, 104, 226-237.	8.8	94
44	Plant-plant competition outcomes are modulated by plant effects on the soil bacterial community. Scientific Reports, 2017, 7, 17756.	3.3	66
45	Compost, leonardite, and zeolite impacts on soil microbial community under barley crops. Journal of Soil Science and Plant Nutrition, 2017, , 0-0.	3.4	9
46	The combination of quarry restoration strategies in semiarid climate induces different responses in biochemical and microbiological soil properties. Applied Soil Ecology, 2016, 107, 33-47.	4.3	51
47	The active microbial diversity drives ecosystem multifunctionality and is physiologically related to carbon availability in Mediterranean semiâ€arid soils. Molecular Ecology, 2016, 25, 4660-4673.	3.9	151
48	The enzymatic and physiological response of the microbial community in semiarid soil to carbon compounds from plants. European Journal of Soil Science, 2016, 67, 456-469.	3.9	14
49	It's all about functionality: How can metaproteomics help us to discuss the attributes of ecological relevance in soil?. Journal of Proteomics, 2016, 144, 159-161.	2.4	42
50	Bacteria dominate the short-term assimilation of plant-derived N in soil. Soil Biology and Biochemistry, 2016, 96, 30-38.	8.8	59
51	The ecological and physiological responses of the microbial community from a semiarid soil to hydrocarbon contamination and its bioremediation using compost amendment. Journal of Proteomics, 2016, 135, 162-169.	2.4	136
52	Soil restoration with organic amendments: linking cellular functionality and ecosystem processes. Scientific Reports, 2015, 5, 15550.	3.3	104
53	Benefactor and allelopathic shrub species have different effects on the soil microbial community along an environmental severity gradient. Soil Biology and Biochemistry, 2015, 88, 48-57.	8.8	44
54	The effects of fresh and stabilized pruning wastes on the biomass, structure and activity of the soil microbial community in a semiarid climate. Applied Soil Ecology, 2015, 89, 1-9.	4.3	32

#	Article	IF	CITATIONS
55	Deforestation fosters bacterial diversity and the cyanobacterial community responsible for carbon fixation processes under semiarid climate: a metaproteomics study. Applied Soil Ecology, 2015, 93, 65-67.	4.3	27
56	Identification of sensitive indicators to assess the interrelationship between soil quality, management practices and human health. Soil, 2015, 1, 173-185.	4.9	209
57	Enzyme activity, microbial biomass and community structure in a long-term restored soil under semi-arid conditions. Soil Research, 2015, 53, 553.	1.1	9
58	Field trial on removal of petroleumâ€hydrocarbon pollutants using a microbial consortium for bioremediation and rhizoremediation. Environmental Microbiology Reports, 2015, 7, 85-94.	2.4	32
59	Metaproteomics of soils from semiarid environment: Functional and phylogenetic information obtained with different protein extraction methods. Journal of Proteomics, 2014, 101, 31-42.	2.4	82
60	Microbiological and biochemical properties of artificial substrates: A preliminary study of its application as Technosols or as a basis in Green Roof Systems. Ecological Engineering, 2014, 70, 189-199.	3.6	44
61	The role of lignin and cellulose in the carbon-cycling of degraded soils under semiarid climate and their relation to microbial biomass. Soil Biology and Biochemistry, 2014, 75, 152-160.	8.8	57
62	Characterization of the microbial community in biological soil crusts dominated by Fulgensia desertorum (Tomin) Poelt and Squamarina cartilaginea (With.) P. James and in the underlying soil. Soil Biology and Biochemistry, 2014, 76, 70-79.	8.8	30
63	Response of Soil Microbial Community to a High Dose of Fresh Olive Mill Wastewater. Pedosphere, 2013, 23, 281-289.	4.0	9
64	Can the labile carbon contribute to carbon immobilization in semiarid soils? Priming effects and microbial community dynamics. Soil Biology and Biochemistry, 2013, 57, 892-902.	8.8	74
65	Analysis of structure, function, and activity of a benzene-degrading microbial community. FEMS Microbiology Ecology, 2013, 85, 14-26.	2.7	48
66	The nitrogen cycle in anaerobic methanotrophic mats of the Black Sea is linked to sulfate reduction and biomass decomposition. FEMS Microbiology Ecology, 2013, 86, 231-245.	2.7	13
67	Insights from quantitative metaproteomics and protein-stable isotope probing into microbial ecology. ISME Journal, 2013, 7, 1877-1885.	9.8	107
68	Phylogenetic and functional changes in the microbial community of long-term restored soils under semiarid climate. Soil Biology and Biochemistry, 2013, 65, 12-21.	8.8	98
69	Soil microbial community under a nurse-plant species changes in composition, biomass and activity as the nurse grows. Soil Biology and Biochemistry, 2013, 64, 139-146.	8.8	102
70	Altitudeâ€related factors but not <i>Pinus</i> community exert a dominant role over chemical and microbiological properties of a Mediterranean humid soil. European Journal of Soil Science, 2012, 63, 541-549.	3.9	35
71	Effects of organic amendments on soil carbon fractions, enzyme activity and humus–enzyme complexes under semi-arid conditions. European Journal of Soil Biology, 2012, 53, 94-102.	3.2	52
72	Soil microbial community structure and activity in monospecific and mixed forest stands, under Mediterranean humid conditions. Plant and Soil, 2012, 354, 359-370.	3.7	77

#	Article	IF	CITATIONS
73	Microbial interactions during residual oil and <i>n</i> â€fatty acid metabolism by a methanogenic consortium. Environmental Microbiology Reports, 2012, 4, 297-306.	2.4	33
74	Biochar influences the microbial community structure during manure composting with agricultural wastes. Science of the Total Environment, 2012, 416, 476-481.	8.0	185
75	Feasibility of a cell separation-proteomic based method for soils with different edaphic properties and microbial biomass. Soil Biology and Biochemistry, 2012, 45, 136-138.	8.8	21
76	Assimilation of benzene carbon through multiple trophic levels traced by different stable isotope probing methodologies. FEMS Microbiology Ecology, 2011, 77, 357-369.	2.7	20
77	The effects of human trampling on the microbiological properties of soil and vegetation in mediterranean mountain areas. Land Degradation and Development, 2011, 22, 383-394.	3.9	44
78	Elucidating MTBE degradation in a mixed consortium using a multidisciplinary approach. FEMS Microbiology Ecology, 2010, 73, no-no.	2.7	47
79	Protein-based stable isotope probing. Nature Protocols, 2010, 5, 1957-1966.	12.0	97
80	Influence of forest cover and herbaceous vegetation on the microbiological and biochemical properties of soil under Mediterranean humid climate. European Journal of Soil Biology, 2010, 46, 273-279.	3.2	23
81	Tracing Changes in the Microbial Community of a Hydrocarbon-Polluted Soil by Culture-Dependent Proteomics. Pedosphere, 2010, 20, 479-485.	4.0	27
82	Soil Degradation and Rehabilitation: Microorganisms and Functionality. , 2010, , 253-270.		8
83	Soil metaproteomics: a review of an emerging environmental science. Significance, methodology and perspectives. European Journal of Soil Science, 2009, 60, 845-859.	3.9	103
84	Soil organic carbon buffers heavy metal contamination on semiarid soils: Effects of different metal threshold levels on soil microbial activity. European Journal of Soil Biology, 2009, 45, 220-228.	3.2	58
85	Role of amendments on N cycling in Mediterranean abandoned semiarid soils. Applied Soil Ecology, 2009, 41, 195-205.	4.3	37
86	Long-term Effect of Municipal Solid Waste Amendment on Microbial Abundance and Humus-associated Enzyme Activities Under Semiarid Conditions. Microbial Ecology, 2008, 55, 651-661.	2.8	96
87	Relationship between the Agricultural Management of a Semiâ€∎rid Soil and Microbiological Quality. Communications in Soil Science and Plant Analysis, 2008, 39, 421-439.	1.4	6
88	Influence of orientation, vegetation and season on soil microbial and biochemical characteristics under semiarid conditions. Applied Soil Ecology, 2008, 38, 62-70.	4.3	54
89	Application of fresh and composted organic wastes modifies structure, size and activity of soil microbial community under semiarid climate. Applied Soil Ecology, 2008, 40, 318-329.	4.3	279
90	Past, present and future of soil quality indices: A biological perspective. Geoderma, 2008, 147, 159-171.	5.1	516

#	Article	IF	CITATIONS
91	The long-term effects of the management of a forest soil on its carbon content, microbial biomass and activity under a semi-arid climate. Applied Soil Ecology, 2007, 37, 53-62.	4.3	86
92	Quantity and spectroscopic properties of soil dissolved organic matter (DOM) as a function of soil sample treatments: Air-drying and pre-incubation. Chemosphere, 2007, 69, 1040-1046.	8.2	41
93	Addition of Urban Waste to Semiarid Degraded Soil: Long-term Effect. Pedosphere, 2007, 17, 557-567.	4.0	46
94	Microbial activity in non-agricultural degraded soils exposed to semiarid climate. Science of the Total Environment, 2007, 378, 183-186.	8.0	13
95	Microbiological activity in a soil 15 years after its devegetation. Soil Biology and Biochemistry, 2006, 38, 2503-2507.	8.8	85
96	Microbiological degradation index of soils in a semiarid climate. Soil Biology and Biochemistry, 2006, 38, 3463-3473.	8.8	308
