

# Yannick Tillier

## List of Publications by Year in Descending Order

**Source:** <https://exaly.com/author-pdf/2395818/yannick-tillier-publications-by-year.pdf>

**Version:** 2024-04-24

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

20  
papers

172  
citations

#	Paper	IF	Citations
20	Diagnosis and management of bruxism: Evaluation of clinical practices in France. <i>Cranio - Journal of Craniomandibular Practice</i> , <b>2021</b> , 39, 412-423	1.2	4
19	Modjaw <sup>®</sup> device: Analysis of mandibular kinematics recorded for a group of asymptomatic subjects. <i>Cranio - Journal of Craniomandibular Practice</i> , <b>2021</b> , 1-7	1.2	2
18	Experimental Bi-axial tensile tests of spinal meningeal tissues and constitutive models comparison. <i>Acta Biomaterialia</i> , <b>2021</b> , 140, 446-446	10.8	
17	Biomechanical assessment of different fixation methods in mandibular high sagittal oblique osteotomy using a three-dimensional finite element analysis model. <i>Scientific Reports</i> , <b>2021</b> , 11, 8755	4.9	2
16	A numerical, theoretical and experimental study of the effect of thermocycling on the matrix-filler interface of dental restorative materials. <i>Dental Materials</i> , <b>2021</b> , 37, 772-782	5.7	3
15	Theoretical prediction of dental composites yield stress and flexural modulus based on filler volume ratio. <i>Dental Materials</i> , <b>2020</b> , 36, 97-107	5.7	6
14	Mechanical characterization and identification of material parameters of porcine aortic valve leaflets. <i>Journal of the Mechanical Behavior of Biomedical Materials</i> , <b>2020</b> , 112, 104036	4.1	3
13	Numerical and experimental study of the electrofusion welding process of polyethylene pipes. <i>Polymer Engineering and Science</i> , <b>2015</b> , 55, 123-131	2.3	18
12	Electrofusion Welding Process Optimization Using a Coupled Numerical and Experimental Approach. <i>International Polymer Processing</i> , <b>2015</b> , 30, 566-573	1	1
11	Material properties of the placenta under dynamic loading conditions. <i>Computer Methods in Biomechanics and Biomedical Engineering</i> , <b>2014</b> , 17, 958-64	2.1	7
10	Comparison of stress distribution in the temporomandibular joint during jaw closing before and after symphyseal distraction: a finite element study. <i>International Journal of Oral and Maxillofacial Surgery</i> , <b>2012</b> , 41, 1474-82	2.9	9
9	Stress distribution in the temporo-mandibular joint discs during jaw closing: a high-resolution three-dimensional finite-element model analysis. <i>Surgical and Radiologic Anatomy</i> , <b>2012</b> , 34, 405-13	1.4	27
8	Determination of Young's modulus of mandibular bone using inverse analysis. <i>Medical Engineering and Physics</i> , <b>2010</b> , 32, 630-7	2.4	44
7	Numerical studies of wrinkling phenomenon in inflatable hyperelastic membranes undergoing multiaxial loadings. <i>International Journal of Material Forming</i> , <b>2009</b> , 2, 593-596	2	2
6	Finite element modeling for soft tissue surgery based on linear and nonlinear elasticity behavior. <i>Computer Aided Surgery</i> , <b>2006</b> , 11, 63-68		1
5	3D finite element modelling of macular translocation. <i>International Congress Series</i> , <b>2005</b> , 1281, 467-472		1
4	Immediate post-operative procedure for identification of the rheological parameters of biological soft tissue. <i>International Congress Series</i> , <b>2004</b> , 1268, 407-412		5

3	Finite element modelling for soft tissues surgery based on nonlinear elasticity behaviour. <i>International Congress Series</i> , <b>2004</b> , 1268, 384-389	2
2	Three-dimensional finite element modelling for soft tissues surgery. <i>International Congress Series</i> , <b>2003</b> , 1256, 349-355	11
1	Identification of magnetic parameters by inverse analysis coupled with finite-element modeling. <i>IEEE Transactions on Magnetics</i> , <b>2002</b> , 38, 3607-3619	2 16
