#	ARTICLE	IF	CITATIONS
1	Selective outcome reporting in paediatric dentistry restorative treatment randomised clinical trials – A meta-research. <i>International Journal of Paediatric Dentistry</i> , 2023, 33, 89-98.	1.8	3
2	Nonrestorative treatment of initial caries lesion in primary teeth: a systematic review and network meta-analysis. <i>Acta Odontologica Scandinavica</i> , 2022, 80, 1-8.	1.6	5
3	Stainless steel crown vs bulk fill composites for the restoration of primary molars post-pulpotomy: 1-year survival and acceptance results of a randomized clinical trial. <i>International Journal of Paediatric Dentistry</i> , 2022, 32, 11-21.	1.8	10
4	Giomer composite compared to glass ionomer in occlusoproximal ART restorations of primary molars: 24-month RCT. <i>Australian Dental Journal</i> , 2022, 67, 148-158.	1.5	2
5	Using information and communication technologies (ICTs) to solve the repressed demand for primary dental care in the Brazilian Unified Health System due to the COVID-19 pandemic: a randomized controlled study protocol nested with a before-and-after study including economic analysis. <i>BMC Oral Health</i> , 2022, 22, 112.	2.3	1
6	aPDT for oral decontamination of hospitalized patients with COVID 19. <i>Photodiagnosis and Photodynamic Therapy</i> , 2022, 38, 102762.	2.6	7
7	Clinical Accuracy of Two Different Criteria for the Detection of Caries Lesions around Restorations in Primary Teeth. <i>Caries Research</i> , 2022, 56, 98-108.	2.0	3
8	Is prior conditioning of dentin necessary in restoration with glass-ionomer cement? A systematic review and network meta-analysis. <i>International Journal of Adhesion and Adhesives</i> , 2021, 104, 102748.	2.9	0
9	Atraumatic Restorative Treatment-Sealed versus Nonsealed First Permanent Molars: A 3-Year Split-Mouth Clinical Trial. <i>Caries Research</i> , 2021, 55, 12-20.	2.0	7
10	Freio labial superior: Quando e como intervir?. <i>Research, Society and Development</i> , 2021, 10, e31410212608.	0.1	2
11	Negligible therapeutic impact, false-positives, overdiagnosis and lead-time are the reasons why radiographs bring more harm than benefits in the caries diagnosis of preschool children. <i>BMC Oral Health</i> , 2021, 21, 168.	2.3	6
12	Impact of non-restorative cavity control on proximal carious lesions of anterior primary teeth on the tooth survival and patient-centered outcomes (CEPECO 2): study protocol for a non-inferiority randomized clinical trial. <i>BMC Oral Health</i> , 2021, 21, 167.	2.3	1
13	Consensus on glass-ionomer cement thresholds for restorative indications. <i>Journal of Dentistry</i> , 2021, 107, 103609.	4.1	25
14	What is the most accurate method for detecting caries lesions? A systematic review. <i>Community Dentistry and Oral Epidemiology</i> , 2021, 49, 216-224.	1.9	15
15	Sedation versus protective stabilization for dental treatment of children with caries and challenging behavior at the dentist (CHOOSE): a study protocol for a non-randomized clinical trial. <i>BMC Oral Health</i> , 2021, 21, 256.	2.3	4
16	Survival rate of primary molar restorations is not influenced by hand mixed or encapsulated GIC: 24-months RCT. <i>BMC Oral Health</i> , 2021, 21, 371.	2.3	2
17	Reporting standards for research in Pediatric Dentistry (RAPID): an expert consensus-based statement. <i>BMC Oral Health</i> , 2021, 21, 369.	2.3	5
18	Atraumatic restorative treatment restorations performed in different settings: systematic review and meta-analysis. <i>Australian Dental Journal</i> , 2021, 66, 430-443.	1.5	4

#	ARTICLE	IF	CITATIONS
19	Risk Factors Associated with Cusp Fractures in Posterior Permanent Teeth – A Cross-Sectional Study. Applied Sciences (Switzerland), 2021, 11, 9299.	2.5	6
20	The economic impact of two diagnostic strategies in the management of restorations in primary teeth: a health economic analysis plan for a trial-based economic evaluation. Trials, 2021, 22, 794.	1.6	1
21	Periodontal Changes After Caries Management in Preschool and School-Age Children. Journal of Dentistry for Children, 2021, 88, 52-57.	0.2	0
22	Children's self-reported discomfort of restorative treatments for deep caries lesions in primary teeth: Results from a randomized clinical trial. Research, Society and Development, 2021, 10, e519101623837.	0.1	0
23	Randomized clinical trial to evaluate two methods of caries risk assessment in schoolchildren: the CARDEC-PEL 04 study protocol. BMC Oral Health, 2021, 21, 654.	2.3	0
24	Reporting standards for research in Pediatric Dentistry (RAPID): A development protocol. International Journal of Paediatric Dentistry, 2020, 30, 96-103.	1.8	3
25	Welcome on board!. International Journal of Paediatric Dentistry, 2020, 30, 2-2.	1.8	1
26	Editorial. International Journal of Paediatric Dentistry, 2020, 30, 664-664.	1.8	0
27	Atraumatic restorative treatment compared to the Hall Technique for occluso-proximal carious lesions in primary molars; 36-month follow-up of a randomised control trial in a school setting. BMC Oral Health, 2020, 20, 318.	2.3	22
28	Study Protocol for an Online Questionnaire Survey on Symptoms/Signs, Protective Measures, Level of Awareness and Perception Regarding COVID-19 Outbreak among Dentists. A Global Survey. International Journal of Environmental Research and Public Health, 2020, 17, 5598.	2.6	48
29	Could COVID-19 change the way we manage caries in primary teeth? Current implications on Paediatric Dentistry. International Journal of Paediatric Dentistry, 2020, 30, 523-525.	1.8	22
30	Is it worth using low-cost glass ionomer cements for occlusal ART restorations in primary molars? 2-year survival and cost analysis of a Randomized clinical trial. Journal of Dentistry, 2020, 101, 103446.	4.1	9
31	Reference is not evidence. International Journal of Paediatric Dentistry, 2020, 30, 661-663.	1.8	2
32	The Editor recommends this issue's article to the reader. International Journal of Paediatric Dentistry, 2020, 30, 665-665.	1.8	0
33	The Editor recommends this issue's article to the reader. International Journal of Paediatric Dentistry, 2020, 30, 526-526.	1.8	0
34	Transparency in clinical trials: Adding value to paediatric dental research. International Journal of Paediatric Dentistry, 2020, 31, 4-13.	1.8	12
35	How researchers should select the best outcomes for randomised clinical trials in paediatric dentistry?. International Journal of Paediatric Dentistry, 2020, 31, 23-30.	1.8	7
36	Caries removal strategies for deep carious lesions in primary teeth: Systematic review. International Journal of Paediatric Dentistry, 2020, 30, 391-391.	1.8	0

#	ARTICLE	IF	CITATIONS
37	Recommended procedures for the management of early childhood caries lesions – a scoping review by the Children Experiencing Dental Anxiety: Collaboration on Research and Education (CEDACORE). BMC Oral Health, 2020, 20, 75.	2.3	20
38	Current evidence of tissue engineering for dentine regeneration in animal models: a systematic review. Regenerative Medicine, 2020, 15, 1345-1360.	1.7	14
39	Influence of different clinical criteria on the decision to replace restorations in primary teeth. Journal of Dentistry, 2020, 101, 103421.	4.1	9
40	The Hall Technique and exfoliation of primary teeth: a retrospective cohort study. British Dental Journal, 2020, 228, 213-217.	0.6	2
41	Influence of school environment on occurrence of traumatic dental injuries in 12 years old children. Dental Traumatology, 2020, 36, 510-517.	2.0	7
42	Coronavirus disease (COVID-19): Characteristics in children and considerations for dentists providing their care. International Journal of Paediatric Dentistry, 2020, 30, 245-250.	1.8	118
43	The effect of two clinical criteria in the assessment of caries lesions around restorations in children (CARDEC-03): study protocol for a diagnostic randomized clinical trial. F1000Research, 2020, 9, 650.	1.6	2
44	Management of deep caries lesions with or without pulp involvement in primary teeth: a systematic review and network meta-analysis. Brazilian Oral Research, 2020, 35, e004.	1.4	5
45	Impact of visual inspection and radiographs for caries detection in children through a 2-year randomized clinical trial. Journal of the American Dental Association, 2020, 151, 407-415.e1.	1.5	16
46	Shortening of etching time of the dentin in primary teeth restorations: a randomized clinical trial. Brazilian Oral Research, 2020, 34, e081.	1.4	10
47	How can we associate an economic evaluation with a clinical trial?. Brazilian Oral Research, 2020, 34, e076.	1.4	4
48	The effect of two clinical criteria in the assessment of caries lesions around restorations in children (CARDEC-03): study protocol for a diagnostic randomized clinical trial. F1000Research, 2020, 9, 650.	1.6	1
49	Currículo de Odontopediatria nos cursos brasileiros de graduação em Odontologia. Revista Da ABENO, 2020, 20, 93-101.	0.1	2
50	Oral health of 12-year-old children in Quito, Ecuador: a population-based epidemiological survey. BMC Oral Health, 2019, 19, 184.	2.3	19
51	Seeking quality on research. International Journal of Paediatric Dentistry, 2019, 29, 1-1.	1.8	0
52	Impact of the radiographic method on treatment decisions related to dental caries in primary molars: a before-after study. Clinical Oral Investigations, 2019, 23, 4075-4081.	3.0	10
53	Class carbomer and compomer for ART restorations: 3-year results of a randomized clinical trial. Clinical Oral Investigations, 2019, 23, 1761-1770.	3.0	13
54	The Atraumatic Restorative Treatment. , 2019, , 169-177.		1

#	ARTICLE	IF	CITATIONS
55	Impact of different restorative treatments for deep caries lesion in primary teeth (CEPECO 1) â€“ study protocol for a noninferiority randomized clinical trial. <i>BMC Oral Health</i> , 2019, 19, 6.	2.3	2
56	Editorial: We have to learn how to listen. <i>International Journal of Paediatric Dentistry</i> , 2018, 28, 121-121.	1.8	0
57	Editorial: The importance of reviewers. <i>International Journal of Paediatric Dentistry</i> , 2018, 28, 277-277.	1.8	0
58	The Influence of Cognitive Bias on Caries Lesion Detection in Preschool Children. <i>Caries Research</i> , 2018, 52, 420-428.	2.0	5
59	Management of dental caries among children: a look at the cost-effectiveness. <i>Expert Review of Pharmacoeconomics and Outcomes Research</i> , 2018, 18, 127-134.	1.4	18
60	Scientific evidence for the management of dentin caries lesions in pediatric dentistry: A systematic review and network meta-analysis. <i>PLoS ONE</i> , 2018, 13, e0206296.	2.5	31
61	Patient-reported outcomes associated with different restorative techniques in pediatric dentistry: A systematic review and MTC meta-analysis. <i>PLoS ONE</i> , 2018, 13, e0208437.	2.5	18
62	Survival percentages of atraumatic restorative treatment (ART) restorations and sealants in posterior teeth: an updated systematic review and meta-analysis. <i>Clinical Oral Investigations</i> , 2018, 22, 2703-2725.	3.0	70
63	Clinical wear of approximal glass ionomer restorations protected with a nanofilled self-adhesive light-cured protective coating. <i>Journal of Applied Oral Science</i> , 2018, 26, e20180094.	1.8	5
64	Editorial: Caries: do we still have to worry?. <i>International Journal of Paediatric Dentistry</i> , 2018, 28, 345-345.	1.8	0
65	Editorial IJPD January 2018. <i>International Journal of Paediatric Dentistry</i> , 2018, 28, 1-1.	1.8	1
66	Atraumatic Restorative Treatment: Restorative Component. <i>Monographs in Oral Science</i> , 2018, 27, 92-102.	1.8	11
67	Bonding behavior of restorative materials in primary teeth submitted to erosive challenge â€” Evidence from an in vitro study. <i>International Journal of Adhesion and Adhesives</i> , 2018, 85, 130-137.	2.9	2
68	Does Acid Challenge Affect the Properties and Bond Stability of Restorative Materials on Primary Teeth?. <i>Journal of Adhesive Dentistry</i> , 2018, 20, 223-231.	0.5	4
69	The Hall Technique 10 years on: Questions and answers. <i>British Dental Journal</i> , 2017, 222, 478-483.	0.6	64
70	Low-cost GICs reduce survival rate in occlusal ART restorations in primary molars after one year: A RCT. <i>Journal of Dentistry</i> , 2017, 57, 45-50.	4.1	15
71	Partial caries removal increases the survival of permanent tooth: a 14-year case report. <i>European Archives of Paediatric Dentistry: Official Journal of the European Academy of Paediatric Dentistry</i> , 2017, 18, 423-426.	1.9	4
72	Efficacy of conventional treatment with composite resin and atraumatic restorative treatment in posterior primary teeth: study protocol for a randomised controlled trial. <i>BMJ Open</i> , 2017, 7, e015542.	1.9	7

#	ARTICLE	IF	CITATIONS
73	Influence of acceleration setting reaction by halogen light curing on GIC dentin interface: Qualitative analysis by SEM. <i>Microscopy Research and Technique</i> , 2017, 80, 374-377.	2.2	0
74	Oral health status of children and young adults with autism spectrum disorders: systematic review and meta-analysis. <i>International Journal of Paediatric Dentistry</i> , 2017, 27, 388-398.	1.8	96
75	<scp>ART</scp> is an alternative for restoring occlusoproximal cavities in primary teeth – evidence from an updated systematic review and meta-analysis. <i>International Journal of Paediatric Dentistry</i> , 2017, 27, 201-209.	1.8	56
76	Effectiveness of conventional treatment using bulk-fill composite resin versus Atraumatic Restorative Treatments in primary and permanent dentition: a pragmatic randomized clinical trial. <i>BMC Oral Health</i> , 2017, 17, 34.	2.3	24
77	Responsiveness of the Early Childhood Oral Health Impact Scale (ECOHIS) is related to dental treatment complexity. <i>Health and Quality of Life Outcomes</i> , 2017, 15, 182.	2.4	17
78	Impact of a Tutored Theoretical-Practical Training to Develop Undergraduate Students' Skills for the Detection of Caries Lesions: Study Protocol for a Multicenter Controlled Randomized Study. <i>JMIR Research Protocols</i> , 2017, 6, e155.	1.0	5
79	Influence of preoperative pain in the success rate of indirect pulp capping: a retrospective study. <i>Minerva Dental and Oral Science</i> , 2017, 66, 64-68.	1.0	0
80	Performance of Universal Adhesive in Primary Molars After Selective Removal of Carious Tissue: An 18-Month Randomized Clinical Trial. <i>Pediatric Dentistry (discontinued)</i> , 2017, 39, 371-376.	0.4	5
81	Evaluation of the relationship between the cost and properties of glass ionomer cements indicated for atraumatic restorative treatment. <i>Brazilian Oral Research</i> , 2016, 30, .	1.4	18
82	Adhesive systems for restoring primary teeth: a systematic review and meta-analysis of <i>in vitro</i> studies. <i>International Journal of Paediatric Dentistry</i> , 2016, 26, 364-375.	1.8	32
83	Bilayer technique and nano-filled coating increase success of approximal <scp>ART</scp> restorations: a randomized clinical trial. <i>International Journal of Paediatric Dentistry</i> , 2016, 26, 231-239.	1.8	11
84	Caries lesion prevention and arrestment in approximal surfaces in contact with glass ionomer cement restorations – A systematic review and meta-analysis. <i>International Journal of Paediatric Dentistry</i> , 2016, 26, 161-172.	1.8	14
85	Atraumatic Restorative Treatment compared to the Hall Technique for occluso-proximal cavities in primary molars: study protocol for a randomized controlled trial. <i>Trials</i> , 2016, 17, 169.	1.6	28
86	Impact of the radiographic examination on diagnosis and treatment decision of caries lesions in primary teeth – the Caries Detection in Children (CARDEC-01) trial: study protocol for a randomized controlled trial. <i>Trials</i> , 2016, 17, 69.	1.6	16
87	<i>In vitro</i> performance of <scp>QLF</scp> system and conventional methods for detection of occlusal caries around tooth-colored restorations in primary molars. <i>International Journal of Paediatric Dentistry</i> , 2016, 26, 26-34.	1.8	11
88	Do glass ionomer cements prevent caries lesions in margins of restorations in primary teeth?. <i>Journal of the American Dental Association</i> , 2016, 147, 177-185.	1.5	38
89	Effect of erosive challenge and Nd:YAG laser irradiation on bond strength of adhesive systems to dentin. <i>International Journal of Adhesion and Adhesives</i> , 2016, 64, 60-64.	2.9	3
90	Dry-bonding Etch-and-Rinse Strategy Improves Bond Longevity of a Universal Adhesive to Sound and Artificially-induced Caries-affected Primary Dentin. <i>Journal of Adhesive Dentistry</i> , 2016, 18, 475-482.	0.5	13

#	ARTICLE	IF	CITATIONS
91	Answer to the letter "Complete clinical retention of sealant materials should not be contemplated as cut-off for clinical success". Braz Oral Res. 2016;30:e32. doi: 10.1590/1807-3107BOR-2016.vol30.0032. Brazilian Oral Research, 2016, 30, .	1.4	0
92	Assessment of Glass Ionomer Cements (GIC) Restorations after Acidic Erosive Challenges: An invitro Study. Pesquisa Brasileira Em Odontopediatria E Clinica Integrada, 2016, 16, 323-330.	0.9	1
93	Survival Rate of Atraumatic Restorative Treatment (ART) Restorations Using a Glass Ionomer Bilayer Technique with a Nanofilled Coating: A Bi-center Randomized Clinical Trial. Pediatric Dentistry (discontinued), 2016, 38, 18-24.	0.4	6
94	Bond Strength of High-Viscosity Glass Ionomer Cements is Affected by Tubular Density and Location in Dentin?. Microscopy and Microanalysis, 2015, 21, 849-854.	0.4	5
95	Low-cost glass ionomer cement as ART sealant in permanent molars: a randomized clinical trial. Brazilian Oral Research, 2015, 29, 1-9.	1.4	11
96	Epidemiological study of traumatic dental injuries in 5- to 6-year-old Brazilian children. Brazilian Oral Research, 2015, 29, 1-6.	1.4	12
97	Bonding stability of adhesive systems to eroded dentin. Brazilian Oral Research, 2015, 29, 1-6.	1.4	21
98	Contact with Fluoride-Releasing Restorative Materials Can Arrest Simulated Approximal Caries Lesion. Journal of Nanomaterials, 2015, 2015, 1-7.	2.7	3
99	Mechanical Properties of High-Viscosity Glass Ionomer Cement and Nanoparticle Glass Carbomer. Journal of Nanomaterials, 2015, 2015, 1-4.	2.7	10
100	Visual Inspection for Caries Detection. Journal of Dental Research, 2015, 94, 895-904.	5.2	149
101	Clinical Relevance of Studies on the Accuracy of Visual Inspection for Detecting Caries Lesions: A Systematic Review. Caries Research, 2015, 49, 91-98.	2.0	26
102	Effect of method of caries induction on aged resin-dentin bond of primary teeth. BMC Oral Health, 2015, 15, 79.	2.3	13
103	Bonding Performance of a Multimode Adhesive to Artificially-induced Caries-affected Primary Dentin. Journal of Adhesive Dentistry, 2015, 17, 125-31.	0.5	25
104	Conservative Treatment of Deep Dentin Lesions in Primary Molars: Case-Series. Pesquisa Brasileira Em Odontopediatria E Clinica Integrada, 2015, 15, 337-344.	0.9	1
105	Prevalence of Dental Caries in Preschool Children by ICDAS Diagnostic Methodology. Pesquisa Brasileira Em Odontopediatria E Clinica Integrada, 2015, 15, 291-300.	0.9	2
106	New proposal of silver diamine fluoride use in arresting approximal caries: study protocol for a randomized controlled trial. Trials, 2014, 15, 448.	1.6	14
107	Associated factors to erosive tooth wear and its impact on quality of life in children with cerebral palsy. Special Care in Dentistry, 2014, 34, 278-285.	0.8	13
108	Bonding longevity of flowable GIC layer in artificially carious dentin. International Journal of Adhesion and Adhesives, 2014, 51, 62-66.	2.9	4
