#	ARTICLE	IF	CITATIONS
1	Dietary Mediators of the Genetic Susceptibility to Obesity—Results from the Quebec Family Study. <i>Journal of Nutrition</i> , 2022, 152, 49-58.	1.3	8
2	Examining the validity and consistency of the Adult Eating Behaviour Questionnaire-Español (AEBQ-Esp) and its relationship to BMI in a Mexican population. <i>Eating and Weight Disorders</i> , 2022, 27, 651-663.	1.2	23
3	Validation of the Adult Eating Behaviour Questionnaire adapted for the French-speaking Canadian population. <i>Eating and Weight Disorders</i> , 2022, 27, 1163-1179.	1.2	11
4	Differences in sibling temperament are associated with differences in maternal use of food to soothe during infancy: A sibling analysis. <i>Pediatric Obesity</i> , 2022, 17, e12907.	1.4	3
5	Understanding Gene-Lifestyle Interaction in Obesity: The Role of Mediation versus Moderation. <i>Lifestyle Genomics</i> , 2022, 15, 67-76.	0.6	5
6	The prospective relation between eating behaviors and BMI from middle childhood to adolescence: A 5-wave community study. <i>Preventive Medicine Reports</i> , 2022, 27, 101795.	0.8	4
7	Strategies to reduce the energy content of foods pre-ordered for lunch in the workplace: a randomised controlled trial in an experimental online canteen. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2022, 19, 54.	2.0	1
8	Associations between the home environment and childhood weight change: a cross-lagged panel analysis. <i>International Journal of Obesity</i> , 2022, 46, 1678-1685.	1.6	1
9	Are there causal relationships between attention-deficit/hyperactivity disorder and body mass index? Evidence from multiple genetically informed designs. <i>International Journal of Epidemiology</i> , 2021, 50, 496-509.	0.9	16
10	The acceptability and feasibility of using a 3D body size scale to initiate conversations about weight in toddlerhood: a mixed-methods study. <i>Pediatric Obesity</i> , 2021, 16, e12715.	1.4	0
11	The retail food environment and its association with body mass index in Mexico. <i>International Journal of Obesity</i> , 2021, 45, 1215-1228.	1.6	18
12	The association between childhood adiposity and appetite assessed using the Child Eating Behavior Questionnaire and Baby Eating Behavior Questionnaire: A systematic review and meta-analysis. <i>Obesity Reviews</i> , 2021, 22, e13169.	3.1	78
13	Investigating partner involvement in pregnancy and identifying barriers and facilitators to participating as a couple in a digital healthy eating and physical activity intervention. <i>BMC Pregnancy and Childbirth</i> , 2021, 21, 450.	0.9	9
14	Shared genetic architecture underlying sleep and weight in children. <i>Sleep Medicine</i> , 2021, 83, 40-44.	0.8	1
15	Appetite disinhibition rather than hunger explains genetic effects on adult BMI trajectory. <i>International Journal of Obesity</i> , 2021, 45, 758-765.	1.6	8
16	Online community engagement in response to COVID-19 pandemic. <i>Health Expectations</i> , 2021, 24, 728-730.	1.1	10
17	The Home Environment Interview and associations with energy balance behaviours and body weight in school-aged children—a feasibility, reliability, and validity study. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2021, 18, 167.	2.0	4
18	Socioeconomic status and changes in appetite from toddlerhood to early childhood. <i>Appetite</i> , 2020, 146, 104517.	1.8	33

#	ARTICLE	IF	CITATIONS
19	The Role of Eating Behaviours in Genetic Susceptibility to Obesity. <i>Current Obesity Reports</i> , 2020, 9, 512-521.	3.5	24
20	Experience of Using an Online Pre-Ordering System for A Workplace Canteen That Offers Lower-Energy Swaps: A Think-Aloud Study. <i>Nutrients</i> , 2020, 12, 3878.	1.7	5
21	The obesity epidemic "Nature via nurture: A narrative review of high-income countries. <i>SAGE Open Medicine</i> , 2020, 8, 205031212091826.	0.7	53
22	Common etiological architecture underlying reward responsiveness, externally driven eating behaviors, and BMI in childhood: findings from the Gemini twin cohort. <i>International Journal of Obesity</i> , 2020, 44, 2064-2074.	1.6	6
23	Genetic and environmental influences on human height from infancy through adulthood at different levels of parental education. <i>Scientific Reports</i> , 2020, 10, 7974.	1.6	17
24	Temperament as a predictor of eating behavior in middle childhood " A fixed effects approach. <i>Appetite</i> , 2020, 150, 104640.	1.8	18
25	Exclusively Digital Health Interventions Targeting Diet, Physical Activity, and Weight Gain in Pregnant Women: Systematic Review and Meta-Analysis. <i>JMIR MHealth and UHealth</i> , 2020, 8, e18255.	1.8	42
26	Emotional Overand Undereating in Children: A Longitudinal Analysis of Child and Contextual Predictors. <i>Child Development</i> , 2019, 90, e803-e818.	1.7	18
27	Confirmation of the Factor Structure and Reliability of the "Adult Eating Behavior Questionnaire"™ in an Adolescent Sample. <i>Frontiers in Psychology</i> , 2019, 10, 1991.	1.1	30
28	The association between emotional eating and depressive symptoms: a population-based twin study in Sri Lanka. <i>Global Health, Epidemiology and Genomics</i> , 2019, 4, e4.	0.2	8
29	Parental Education and Genetics of BMI from Infancy to Old Age: A Pooled Analysis of 29 Twin Cohorts. <i>Obesity</i> , 2019, 27, 855-865.	1.5	27
30	Weight change increases the odds of psychological distress in middle age: bidirectional analyses from the Whitehall II Study. <i>Psychological Medicine</i> , 2019, 49, 2505-2514.	2.7	4
31	Assessing potential shared genetic aetiology between body mass index and sleep duration in 142,209 individuals. <i>Genetic Epidemiology</i> , 2019, 43, 207-214.	0.6	7
32	Appetite and Weight. , 2019, , 265-273.		0
33	Birth size and gestational age in opposite-sex twins as compared to same-sex twins: An individual-based pooled analysis of 21 cohorts. <i>Scientific Reports</i> , 2018, 8, 6300.	1.6	21
34	Associations between birth size and later height from infancy through adulthood: An individual based pooled analysis of 28 twin cohorts participating in the CODATwins project. <i>Early Human Development</i> , 2018, 120, 53-60.	0.8	20
35	Emotional Feeding and Emotional Eating: Reciprocal Processes and the Influence of Negative Affectivity. <i>Child Development</i> , 2018, 89, 1234-1246.	1.7	53
36	The Home Environment Shapes Emotional Eating. <i>Child Development</i> , 2018, 89, 1423-1434.	1.7	31

#	ARTICLE	IF	CITATIONS
37	Genetic predisposition to obesity, restrained eating and changes in body weight: a population-based prospective study. <i>International Journal of Obesity</i> , 2018, 42, 858-865.	1.6	34
38	Evidence for gene-environment correlation in child feeding: Links between common genetic variation for BMI in children and parental feeding practices. <i>PLoS Genetics</i> , 2018, 14, e1007757.	1.5	67
39	Variation in the Heritability of Child Body Mass Index by Obesogenic Home Environment. <i>JAMA Pediatrics</i> , 2018, 172, 1153.	3.3	67
40	Genetic and environmental factors affecting birth size variation: a pooled individual-based analysis of secular trends and global geographical differences using 26 twin cohorts. <i>International Journal of Epidemiology</i> , 2018, 47, 1195-1206.	0.9	19
41	Feeding a Fussy Eater: Examining Longitudinal Bidirectional Relationships Between Child Fussy Eating and Maternal Feeding Practices. <i>Journal of Pediatric Psychology</i> , 2018, 43, 1138-1146.	1.1	40
42	Sources and pattern of protein intake and risk of overweight or obesity in young UK twins. <i>British Journal of Nutrition</i> , 2018, 120, 820-829.	1.2	19
43	Genetic susceptibility to the "obesogenic" environment: the role of eating behavior in obesity and an appetite for change. <i>American Journal of Clinical Nutrition</i> , 2018, 108, 429-430.	2.2	13
44	Investigating the Bidirectional Associations of Adiposity with Sleep Duration in Older Adults: The English Longitudinal Study of Ageing (ELSA). <i>Scientific Reports</i> , 2017, 7, 40250.	1.6	11
45	Association between birthweight and later body mass index: an individual-based pooled analysis of 27 twin cohorts participating in the CODATwins project. <i>International Journal of Epidemiology</i> , 2017, 46, 1488-1498.	0.9	22
46	Education in Twins and Their Parents Across Birth Cohorts Over 100 years: An Individual-Level Pooled Analysis of 42-Twin Cohorts. <i>Twin Research and Human Genetics</i> , 2017, 20, 395-405.	0.3	8
47	Genetic and Environmental Influences on Developmental Milestones and Movement: Results From the Gemini Cohort Study. <i>Research Quarterly for Exercise and Sport</i> , 2017, 88, 401-407.	0.8	10
48	Emotional over- and under-eating in early childhood are learned not inherited. <i>Scientific Reports</i> , 2017, 7, 9092.	1.6	50
49	Sugar intake from sweet food and beverages, common mental disorder and depression: prospective findings from the Whitehall II study. <i>Scientific Reports</i> , 2017, 7, 6287.	1.6	141
50	The individual environment, not the family is the most important influence on preferences for common non-alcoholic beverages in adolescence. <i>Scientific Reports</i> , 2017, 7, 16822.	1.6	4
51	Behavioural Susceptibility Theory: Professor Jane Wardle and the Role of Appetite in Genetic Risk of Obesity. <i>Current Obesity Reports</i> , 2017, 6, 38-45.	3.5	74
52	Screening for pickiness "a validation study. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2017, 14, 2.	2.0	28
53	Body composition impacts appetite regulation in middle childhood. A prospective study of Norwegian community children. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2017, 14, 70.	2.0	23
54	Food fussiness and food neophobia share a common etiology in early childhood. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2017, 58, 189-196.	3.1	79

#	ARTICLE	IF	CITATIONS
55	Child and parent predictors of picky eating from preschool to school age. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2017, 14, 87.	2.0	55
56	Appetitive traits associated with higher and lower body mass index: evaluating the validity of the adult eating behaviour questionnaire in an Australian sample. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2017, 14, 130.	2.0	50
57	Genetic and environmental influences on food preferences in adolescence. <i>American Journal of Clinical Nutrition</i> , 2016, 104, 446-453.	2.2	60
58	Appetitive traits and food intake patterns in early life. <i>American Journal of Clinical Nutrition</i> , 2016, 103, 231-235.	2.2	54
59	In memoriam. Jane Wardle. <i>Appetite</i> , 2016, 99, A1-A2.	1.8	0
60	Appetitive traits and relationships with BMI in adults: Development of the Adult Eating Behaviour Questionnaire. <i>Appetite</i> , 2016, 105, 356-363.	1.8	160
61	Energy and nutrient intakes of young children in the UK: findings from the Gemini twin cohort. <i>British Journal of Nutrition</i> , 2016, 115, 1843-1850.	1.2	19
62	Twin's Birth-Order Differences in Height and Body Mass Index From Birth to Old Age: A Pooled Study of 26 Twin Cohorts Participating in the CODATwins Project. <i>Twin Research and Human Genetics</i> , 2016, 19, 112-124.	0.3	21
63	The relationship between physical activity, sleep duration and depressive symptoms in older adults: The English Longitudinal Study of Ageing (ELSA). <i>Preventive Medicine Reports</i> , 2016, 4, 512-516.	0.8	43
64	Genetic and environmental effects on body mass index from infancy to the onset of adulthood: an individual-based pooled analysis of 45 twin cohorts participating in the COLlaborative project of Development of Anthropometrical measures in Twins (CODATwins) study. <i>American Journal of Clinical Nutrition</i> , 2016, 104, 371-379.	2.2	175
65	Maternal feeding practices and fussy eating in toddlerhood: a discordant twin analysis. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2016, 13, 81.	2.0	53
66	Genetic and environmental influences on height from infancy to early adulthood: An individual-based pooled analysis of 45 twin cohorts. <i>Scientific Reports</i> , 2016, 6, 28496.	1.6	133
67	Parental Reports of Infant and Child Eating Behaviors are not Affected by Their Beliefs About Their Twins's Zygosity. <i>Behavior Genetics</i> , 2016, 46, 763-771.	1.4	18
68	Meal size is a critical driver of weight gain in early childhood. <i>Scientific Reports</i> , 2016, 6, 28368.	1.6	37
69	Nature and Nurture in Early Feeding Behavior. <i>Nestle Nutrition Institute Workshop Series</i> , 2016, 85, 155-165.	1.5	4
70	Common genetic architecture underlying young children's food fussiness and liking for vegetables and fruit. <i>American Journal of Clinical Nutrition</i> , 2016, 103, 1099-1104.	2.2	53
71	Zygosity Differences in Height and Body Mass Index of Twins From Infancy to Old Age: A Study of the CODATwins Project. <i>Twin Research and Human Genetics</i> , 2015, 18, 557-570.	0.3	24
72	The CODATwins Project: The Cohort Description of Collaborative Project of Development of Anthropometrical Measures in Twins to Study Macro-Environmental Variation in Genetic and Environmental Effects on Anthropometric Traits. <i>Twin Research and Human Genetics</i> , 2015, 18, 348-360.	0.3	55

#	ARTICLE	IF	CITATIONS
73	Sleep and nighttime energy consumption in early childhood: a population-based cohort study. <i>Pediatric Obesity</i> , 2015, 10, 454-460.	1.4	32
74	Appetitive traits as behavioural pathways in genetic susceptibility to obesity: a population-based cross-sectional study. <i>Scientific Reports</i> , 2015, 5, 14726.	1.6	45
75	The relationship between appetite and food preferences in British and Australian children. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2015, 12, 116.	2.0	62
76	Self-reported sleep quality, weight status and depression in young adult twins and siblings. <i>BMC Obesity</i> , 2015, 2, 50.	3.1	5
77	The role of infant appetite in extended formula feeding. <i>Archives of Disease in Childhood</i> , 2015, 100, 758-762.	1.0	4
78	Behavioral susceptibility to obesity: Gene-environment interplay in the development of weight. <i>Physiology and Behavior</i> , 2015, 152, 494-501.	1.0	159
79	Parental control over feeding in infancy. Influence of infant weight, appetite and feeding method. <i>Appetite</i> , 2015, 91, 101-106.	1.8	50
80	Nighttime sleep duration and hedonic eating in childhood. <i>International Journal of Obesity</i> , 2015, 39, 1463-1466.	1.6	31
81	Associations between infant feeding and the size, tempo and velocity of infant weight gain: SITAR analysis of the Gemini twin birth cohort. <i>International Journal of Obesity</i> , 2014, 38, 980-987.	1.6	39
82	From modeling to measurement: Developmental trends in genetic influence on adiposity in childhood. <i>Obesity</i> , 2014, 22, 1756-1761.	1.5	32
83	Satiety Mechanisms in Genetic Risk of Obesity. <i>JAMA Pediatrics</i> , 2014, 168, 338.	3.3	149
84	Appetite and Growth. <i>JAMA Pediatrics</i> , 2014, 168, 345.	3.3	102
85	Sleep and energy intake in early childhood. <i>International Journal of Obesity</i> , 2014, 38, 926-929.	1.6	64
86	Nature and nurture in children's food preferences. <i>American Journal of Clinical Nutrition</i> , 2014, 99, 911-917.	2.2	80
87	Predictors of shorter sleep in early childhood. <i>Sleep Medicine</i> , 2014, 15, 536-540.	0.8	79
88	Dietary intake of young twins: nature or nurture?. <i>American Journal of Clinical Nutrition</i> , 2013, 98, 1326-1334.	2.2	20
89	Finding the missing heritability in pediatric obesity: the contribution of genome-wide complex trait analysis. <i>International Journal of Obesity</i> , 2013, 37, 1506-1509.	1.6	88
90	Inherited behavioral susceptibility to adiposity in infancy: a multivariate genetic analysis of appetite and weight in the Gemini birth cohort. <i>American Journal of Clinical Nutrition</i> , 2012, 95, 633-639.	2.2	71

#	ARTICLE	IF	CITATIONS
91	Genetic and Environmental Influences on Infant Sleep. <i>Pediatrics</i> , 2012, 129, 1091-1096.	1.0	51
92	Are my twins identical: parents may be misinformed by prenatal scan observations. <i>BJOG: an International Journal of Obstetrics and Gynaecology</i> , 2012, 119, 517-518.	1.1	18
93	Development and factor structure of the Baby Eating Behaviour Questionnaire in the Gemini birth cohort. <i>Appetite</i> , 2011, 57, 388-396.	1.8	200
94	Prospective associations between appetitive traits and weight gain in infancy. <i>American Journal of Clinical Nutrition</i> , 2011, 94, 1562-1567.	2.2	124
95	Genetic and Environmental Influences on Infant Growth: Prospective Analysis of the Gemini Twin Birth Cohort. <i>PLoS ONE</i> , 2011, 6, e19918.	1.1	80
96	Eating Behavior and Weight in Children. , 2011, , 455-482.		1
97	Nature and nurture in infant appetite: analysis of the Gemini twin birth cohort. <i>American Journal of Clinical Nutrition</i> , 2010, 91, 1172-1179.	2.2	155
98	Gemini: A UK Twin Birth Cohort With a Focus on Early Childhood Weight Trajectories, Appetite and the Family Environment. <i>Twin Research and Human Genetics</i> , 2010, 13, 72-78.	0.3	60
99	Environmental Influences on Children's Physical Activity: Quantitative Estimates Using a Twin Design. <i>PLoS ONE</i> , 2010, 5, e10110.	1.1	46
100	The FTO gene and measured food intake in children. <i>International Journal of Obesity</i> , 2009, 33, 42-45.	1.6	267
101	Adiposity and eating in the absence of hunger™ in children. <i>International Journal of Obesity</i> , 2008, 32, 1499-1505.	1.6	112
102	Eating rate is a heritable phenotype related to weight in children. <i>American Journal of Clinical Nutrition</i> , 2008, 88, 1560-1566.	2.2	181
