#	ARTICLE	IF	CITATIONS
1	Autophagy and its role in gastric cancer. <i>Clinica Chimica Acta</i> , 2019, 489, 10-20.	1.1	119
2	Inhibition of the JAK2/STAT3 Pathway Reduces Gastric Cancer Growth In Vitro and In Vivo. <i>PLoS ONE</i> , 2014, 9, e95993.	2.5	77
3	Signalling mechanism(s) of epithelialâ€‘mesenchymal transition and cancer stem cells in tumour therapeutic resistance. <i>Clinica Chimica Acta</i> , 2018, 483, 156-163.	1.1	63
4	Diallyl disulfide suppresses epithelial-mesenchymal transition, invasion and proliferation by downregulation of LIMK1 in gastric cancer. <i>Oncotarget</i> , 2016, 7, 10498-10512.	1.8	51
5	Diallyl disulfide-induced G2/M arrest of human gastric cancer MGC803 cells involves activation of p38 MAP kinase pathways. <i>World Journal of Gastroenterology</i> , 2004, 10, 2731.	3.3	49
6	Trefoil factors: Gastrointestinal-specific proteins associated with gastric cancer. <i>Clinica Chimica Acta</i> , 2015, 450, 127-134.	1.1	39
7	Erk is involved in the differentiation induced by diallyl disulfide in the human gastric cancer cell line MGC803. <i>Cellular and Molecular Biology Letters</i> , 2006, 11, 408-23.	7.0	32
8	Inhibition of ERK and activation of p38 are involved in diallyl disulfide induced apoptosis of leukemia HL-60 cells. <i>Archives of Pharmacal Research</i> , 2008, 31, 786-793.	6.3	28
9	The DNA replication regulator MCM6: An emerging cancer biomarker and target. <i>Clinica Chimica Acta</i> , 2021, 517, 92-98.	1.1	24
10	Function and mechanisms of microRNAâ€‘20a in colorectal cancer (Review). <i>Experimental and Therapeutic Medicine</i> , 2020, 19, 1605-1616.	1.8	20
11	Chk1, but not Chk2, is responsible for G2/M phase arrest induced by diallyl disulfide in human gastric cancer BGC823 cells. <i>Food and Chemical Toxicology</i> , 2014, 68, 61-70.	3.6	19
12	Identification of potential targets for diallyl disulfide in human gastric cancer MGC-803 cells using proteomics approaches. <i>Oncology Reports</i> , 2015, 33, 2484-2494.	2.6	19
13	Identification of potential targets for differentiation in human leukemia cells induced by diallyl disulfide. <i>International Journal of Oncology</i> , 2017, 50, 697-707.	3.3	16
14	Diallyl disulfide selectively causes checkpoint kinase-1 mediated G2/M arrest in human MGC803 gastric cancer cell line. <i>Oncology Reports</i> , 2014, 32, 2274-2282.	2.6	15
15	Knockdown of RhoGDI2 represses human gastric cancer cell proliferation, invasion and drug resistance via the Rac1/Pak1/LIMK1 pathway. <i>Cancer Letters</i> , 2020, 492, 136-146.	7.2	15
16	Diallyl disulfide inhibits TGFâ€‘Î²1â€‘induced upregulation of Rac1 and Î²-catenin in epithelialâ€‘mesenchymal transition and tumor growth of gastric cancer. <i>Oncology Reports</i> , 2018, 39, 2797-2806.	2.6	11
17	RORÎ± Suppresses Epithelial-to-Mesenchymal Transition and Invasion in Human Gastric Cancer Cells via the Wnt/Î²-Catenin Pathway. <i>Frontiers in Oncology</i> , 2019, 9, 1344.	2.8	11
18	Diallyl disulfide induces downregulation and inactivation of cofilin; Î²1 differentiation via the Rac1/ROCK1/LIMK1 pathway in leukemia cells. <i>International Journal of Oncology</i> , 2020, 56, 772-782.	3.3	9

#	ARTICLE	IF	CITATIONS
19	BCL10 in cell survival after DNA damage. Clinica Chimica Acta, 2019, 495, 301-308.	1.1	7
20	The Role of miR-129-5p in Cancer: A Novel Therapeutic Target. Current Molecular Pharmacology, 2022, 15, 647-657.	1.5	5
21	Gastrokine 2 Regulates the Antitumor Effect of JAK2/STAT3 Pathway in Gastric Cancer. Evidence-based Complementary and Alternative Medicine, 2021, 2021, 1-9.	1.2	2
22	lncRNAs as Hallmarks for Individualized Treatment of Gastric Cancer. Anti-Cancer Agents in Medicinal Chemistry, 2021, 21, .	1.7	1
23	Interference of Chkl/2 by RNA Regulates G2/M Arrest and Expressions of Cell Cycle Related Proteins Induced by Diallyl Disulfide*. Progress in Biochemistry and Biophysics, 2010, 37, 184-189.	0.3	1
