2657  
citing authors

#	ARTICLE	IF	CITATIONS
1	Translation of Viral Proteins. , 2021, , 444-459.		0
2	Insights into Gastrointestinal Virome: Etiology and Public Exposure. Water (Switzerland), 2021, 13, 2794.	2.7	5
3	Using the 2A Protein Coexpression System: Multicistronic 2A Vectors Expressing Gene(s) of Interest and Reporter Proteins. Methods in Molecular Biology, 2018, 1755, 31-48.	0.9	11
4	Therapeutic applications of the NPGP™ family of viral 2As. Reviews in Medical Virology, 2018, 28, e2001.	8.3	13
5	The Potential Consequences for Cell Signaling by a Class of NOD-Like Receptor Proteins (NLRs) Bearing an N-terminal Signal Sequence. Journal of Cell Signaling, 2017, 02, .	0.3	1
6	2A-Like™ Signal Sequences Mediating Translational Recoding: A Novel Form of Dual Protein Targeting. Traffic, 2016, 17, 923-939.	2.7	16
7	The Aphtho- and Cardiovirus Primary 2A/2B Polyprotein Cleavage, , 2014, , 213-223.		6
8	Inhibition of the foot-and-mouth disease virus subgenomic replicon by RNA aptamers. Journal of General Virology, 2014, 95, 2649-2657.	2.9	16
9	The protein coexpression problem in biotechnology and biomedicine: virus 2A and 2A-like sequences provide a solution. Future Virology, 2013, 8, 983-996.	1.8	13
10	2A peptides provide distinct solutions to driving stop-carry on translational recoding. Nucleic Acids Research, 2012, 40, 3143-3151.	14.5	118
11	Ribosome Skipping, Stop-Carry On or StopGo Translation. Nucleic Acids and Molecular Biology, 2010, , 101-121.	0.2	25
12	Site-Specific Release of Nascent Chains from Ribosomes at a Sense Codon. Molecular and Cellular Biology, 2008, 28, 4227-4239.	2.3	143
13	Occurrence, function and evolutionary origins of 2A-like™ sequences in virus genomes. Journal of General Virology, 2008, 89, 1036-1042.	2.9	118
14	Dissection of a co-translational nascent chain separation event. Biochemical Society Transactions, 2008, 36, 712-716.	3.4	36
15	E unum pluribus: multiple proteins from a self-processing polyprotein. Trends in Biotechnology, 2006, 24, 68-75.	9.3	332
16	Foot-and-mouth disease virus replication sites form next to the nucleus and close to the Golgi apparatus, but exclude marker proteins associated with host membrane compartments. Journal of General Virology, 2005, 86, 687-696.	2.9	50
17	Targeting of Proteins Derived from Self-Processing Polyproteins Containing Multiple Signal Sequences. Traffic, 2004, 5, 616-626.	2.7	87
18	The cleavage™ activities of foot-and-mouth disease virus 2A site-directed mutants and naturally occurring 2A-like™ sequences. Journal of General Virology, 2001, 82, 1027-1041.	2.9	467

#	ARTICLE	IF	CITATIONS
19	Analysis of the aphthovirus 2A/2B polyprotein "cleavage"™ mechanism indicates not a proteolytic reaction, but a novel translational effect: a putative ribosomal "skip"™. Journal of General Virology, 2001, 82, 1013-1025.	2.9	662
20	A Model for Nonstoichiometric, Cotranslational Protein Scission in Eukaryotic Ribosomes. Bioorganic Chemistry, 1999, 27, 55-79.	4.1	62
