#	Article	IF	CITATIONS
1	Interoception and Mental Health: A Roadmap. Biological Psychiatry: Cognitive Neuroscience and Neuroimaging, 2018, 3, 501-513.	1.5	524
2	Putative Neuroprotective and Neurotoxic Kynurenine Pathway Metabolites Are Associated with Hippocampal and Amygdalar Volumes in Subjects with Major Depressive Disorder. Neuropsychopharmacology, 2015, 40, 463-471.	5.4	199
3	A Nonlinear Simulation Framework Supports Adjusting for Age When Analyzing BrainAGE. Frontiers in Aging Neuroscience, 2018, 10, 317.	3.4	183
4	Reduction of kynurenic acid to quinolinic acid ratio in both the depressed and remitted phases of major depressive disorder. Brain, Behavior, and Immunity, 2015, 46, 55-59.	4.1	162
5	Relationship between neurotoxic kynurenine metabolites and reductions in right medial prefrontal cortical thickness in major depressive disorder. Brain, Behavior, and Immunity, 2016, 53, 39-48.	4.1	136
6	Inflammation and neurological disease-related genes are differentially expressed in depressed patients with mood disorders and correlate with morphometric and functional imaging abnormalities. Brain, Behavior, and Immunity, 2013, 31, 161-171.	4.1	127
7	Neuroprotective kynurenine metabolite indices are abnormally reduced and positively associated with hippocampal and amygdalar volume in bipolar disorder. Psychoneuroendocrinology, 2015, 52, 200-211.	2.7	106
8	Resting-state functional network connectivity in prefrontal regions differs between unmedicated patients with bipolar and major depressive disorders. Journal of Affective Disorders, 2016, 190, 483-493.	4.1	102
9	Real-Time Functional Magnetic Resonance Imaging Amygdala Neurofeedback Changes Positive Information Processing in Major Depressive Disorder. Biological Psychiatry, 2017, 82, 578-586.	1.3	92
10	Tulsa 1000: a naturalistic study protocol for multilevel assessment and outcome prediction in a large psychiatric sample. BMJ Open, 2018, 8, e016620.	1.9	88
11	Activation of the kynurenine pathway is associated with striatal volume in major depressive disorder. Psychoneuroendocrinology, 2015, 62, 54-58.	2.7	80
12	Co-altered functional networks and brain structure in unmedicated patients with bipolar and major depressive disorders. Brain Structure and Function, 2017, 222, 4051-4064.	2.3	77
13	Changes in the neural correlates of implicit emotional face processing during antidepressant treatment in major depressive disorder. International Journal of Neuropsychopharmacology, 2013, 16, 2195-2208.	2.1	71
14	EEG Microstates Temporal Dynamics Differentiate Individuals with Mood and Anxiety Disorders From Healthy Subjects. Frontiers in Human Neuroscience, 2019, 13, 56.	2.0	54
15	Aberrant decision-making and drug addiction â€" how strong is the evidence?. Current Opinion in Behavioral Sciences, 2017, 13, 25-33.	3.9	34
16	Comparison of two different analysis approaches for DTI free-water corrected and uncorrected maps in the study of white matter microstructural integrity in individuals with depression. Human Brain Mapping, 2017, 38, 4690-4702.	3.6	30
17	Sex differences in neural responses to subliminal sad and happy faces in healthy individuals: Implications for depression. Journal of Neuroscience Research, 2017, 95, 703-710.	2.9	13
18	Machine Learning Analysis of the Relationships Between Gray Matter Volume and Childhood Trauma in a Transdiagnostic Community-Based Sample. Biological Psychiatry: Cognitive Neuroscience and Neuroimaging, 2019, 4, 734-742.	1.5	11

#	ARTICLE	IF	CITATION
19	The Effect of Mineralocorticoid and Glucocorticoid Receptor Antagonism on Autobiographical Memory Recall and Amygdala Response to Implicit Emotional Stimuli. International Journal of Neuropsychopharmacology, 2016, 19, pyw036.	2.1	9
20	Web-Based Graphic Representation of the Life Course of Mental Health: Cross-Sectional Study Across the Spectrum of Mood, Anxiety, Eating, and Substance Use Disorders. JMIR Mental Health, 2020, 7, e16919.	3.3	9
21	Polygenic risk for neuroticism moderates response to gains and losses in amygdala and caudate: Evidence from a clinical cohort. Journal of Affective Disorders, 2021, 293, 124-132.	4.1	5
22	Women with Major Depressive Disorder, Irrespective of Comorbid Anxiety Disorders, Show Blunted Bilateral Frontal Responses during Win and Loss Anticipation. Journal of Affective Disorders, 2020, 273, 157-166.	4.1	4
23	Evaluating the resource allocation index as a potential fMRI-based biomarker for substance use disorder. Drug and Alcohol Dependence, 2020, 216, 108211.	3.2	1
24	Functional magnetic resonance imaging data for the association between polygenic risk scores for neuroticism and reward-punishment processing. Data in Brief, 2022, 42, 108014.	1.0	0
