Vicente Andrs

List of Publications by Citations

Source: https://exaly.com/author-pdf/2454655/vicente-andres-publications-by-citations.pdf

Version: 2024-04-20

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

82 169 7,482 47 h-index g-index citations papers 182 8,792 7.1 5.95 L-index avg, IF ext. citations ext. papers

#	Paper	IF	Citations
169	Clonal hematopoiesis associated with TET2 deficiency accelerates atherosclerosis development in mice. <i>Science</i> , 2017 , 355, 842-847	33.3	602
168	Myogenin expression, cell cycle withdrawal, and phenotypic differentiation are temporally separable events that precede cell fusion upon myogenesis. <i>Journal of Cell Biology</i> , 1996 , 132, 657-66	7:3	494
167	MyoD-induced expression of p21 inhibits cyclin-dependent kinase activity upon myocyte terminal differentiation. <i>Molecular and Cellular Biology</i> , 1995 , 15, 3823-9	4.8	356
166	Splicing-directed therapy in a new mouse model of human accelerated aging. <i>Science Translational Medicine</i> , 2011 , 3, 106ra107	17.5	240
165	Role of A-type lamins in signaling, transcription, and chromatin organization. <i>Journal of Cell Biology</i> , 2009 , 187, 945-57	7-3	217
164	hMEF2C gene encodes skeletal muscle- and brain-specific transcription factors. <i>Molecular and Cellular Biology</i> , 1993 , 13, 2564-77	4.8	212
163	Histopathology of in-stent restenosis in patients with peripheral artery disease. <i>Circulation</i> , 1997 , 95, 1998-2002	16.7	196
162	Telomere biology and cardiovascular disease. <i>Circulation Research</i> , 2006 , 99, 1167-80	15.7	191
161	Telomeres and cardiovascular disease: does size matter?. Circulation Research, 2004, 94, 575-84	15.7	165
160	A mechanism of AP-1 suppression through interaction of c-Fos with lamin A/C. <i>Genes and Development</i> , 2006 , 20, 307-20	12.6	163
159	Downregulation of cyclin-dependent kinase 2 activity and cyclin A promoter activity in vascular smooth muscle cells by p27(KIP1), an inhibitor of neointima formation in the rat carotid artery. Journal of Clinical Investigation, 1997 , 99, 2334-41	15.9	153
158	Defective extracellular pyrophosphate metabolism promotes vascular calcification in a mouse model of Hutchinson-Gilford progeria syndrome that is ameliorated on pyrophosphate treatment. <i>Circulation</i> , 2013 , 127, 2442-51	16.7	149
157	Fast regulation of AP-1 activity through interaction of lamin A/C, ERK1/2, and c-Fos at the nuclear envelope. <i>Journal of Cell Biology</i> , 2008 , 183, 653-66	7.3	136
156	Remodeling of Bone Marrow Hematopoietic Stem Cell Niches Promotes Myeloid Cell Expansion during Premature or Physiological Aging. <i>Cell Stem Cell</i> , 2019 , 25, 407-418.e6	18	114
155	Classic and novel roles of p53: prospects for anticancer therapy. <i>Trends in Molecular Medicine</i> , 2007 , 13, 192-9	11.5	106
154	Temporally and Spatially Coordinated Expression of Cell Cycle Regulatory Factors After Angioplasty. <i>Circulation Research</i> , 1997 , 80, 418-426	15.7	94
153	A new bipartite DNA-binding domain: cooperative interaction between the cut repeat and homeo domain of the cut homeo proteins. <i>Genes and Development</i> , 1994 , 8, 245-57	12.6	89

(2014-1995)

152	Determination of the consensus binding site for MEF2 expressed in muscle and brain reveals tissue-specific sequence constraints. <i>Journal of Biological Chemistry</i> , 1995 , 270, 23246-9	5.4	88
151	Biological Versus Chronological Aging: JACC Focus Seminar. <i>Journal of the American College of Cardiology</i> , 2020 , 75, 919-930	15.1	87
150	Antibody blockade of thrombospondin accelerates reendothelialization and reduces neointima formation in balloon-injured rat carotid artery. <i>Circulation</i> , 1999 , 100, 849-54	16.7	86
149	Rapamycin attenuates atherosclerosis induced by dietary cholesterol in apolipoprotein-deficient mice through a p27 Kip1 -independent pathway. <i>Atherosclerosis</i> , 2004 , 172, 31-8	3.1	82
148	Overexpression of p27(Kip1) by doxycycline-regulated adenoviral vectors inhibits endothelial cell proliferation and migration and impairs angiogenesis. <i>FASEB Journal</i> , 2001 , 15, 1877-85	0.9	81
147	Identification of mitochondrial dysfunction in Hutchinson-Gilford progeria syndrome through use of stable isotope labeling with amino acids in cell culture. <i>Journal of Proteomics</i> , 2013 , 91, 466-77	3.9	79
146	Control of cell proliferation in atherosclerosis: insights from animal models and human studies. <i>Cardiovascular Research</i> , 2010 , 86, 254-64	9.9	78
145	Nitric oxide-induced downregulation of Cdk2 activity and cyclin A gene transcription in vascular smooth muscle cells. <i>Circulation</i> , 1998 , 97, 2066-72	16.7	78
144	Role of platelets as mediators that link inflammation and thrombosis in atherosclerosis. <i>Platelets</i> , 2013 , 24, 255-62	3.6	75
143	Aging, telomeres, and atherosclerosis. <i>Cardiovascular Research</i> , 2005 , 66, 213-21	9.9	75
142	The growth suppressor p27(Kip1) protects against diet-induced atherosclerosis. <i>FASEB Journal</i> , 2001 , 15, 1989-95	0.9	74
141	p19(ARF) deficiency reduces macrophage and vascular smooth muscle cell apoptosis and aggravates atherosclerosis. <i>Journal of the American College of Cardiology</i> , 2010 , 55, 2258-68	15.1	73
140	Differential regulation of the retinoblastoma family of proteins during cell proliferation and differentiation. <i>Biochemical Journal</i> , 1998 , 333 (Pt 3), 645-54	3.8	71
139	Control of vascular cell proliferation and migration by cyclin-dependent kinase signalling: new perspectives and therapeutic potential. <i>Cardiovascular Research</i> , 2004 , 63, 11-21	9.9	69
138	Short telomeres protect from diet-induced atherosclerosis in apolipoprotein E-null mice. <i>FASEB Journal</i> , 2004 , 18, 418-20	0.9	63
137	ERK1/2 MAP kinases promote cell cycle entry by rapid, kinase-independent disruption of retinoblastoma-lamin A complexes. <i>Journal of Cell Biology</i> , 2010 , 191, 967-79	7.3	62
136	Vascular Smooth Muscle-Specific Progerin Expression Accelerates Atherosclerosis and Death in a Mouse Model of Hutchinson-Gilford Progeria Syndrome. <i>Circulation</i> , 2018 , 138, 266-282	16.7	61
135	High-resolution imaging of intravascular atherogenic inflammation in live mice. <i>Circulation Research</i> , 2014 , 114, 770-9	15.7	59

134	A glimpse on the phenomenon of macrophage polarization during atherosclerosis. <i>Immunobiology</i> , 2011 , 216, 1172-6	3.4	59
133	Role of c-fos and E2F in the induction of cyclin A transcription and vascular smooth muscle cell proliferation. <i>Journal of Clinical Investigation</i> , 1998 , 101, 940-8	15.9	58
132	Macrophage proliferation and apoptosis in atherosclerosis. Current Opinion in Lipidology, 2012 , 23, 429-	-3 . β.4	56
131	Oil Red O and Hematoxylin and Eosin Staining for Quantification of Atherosclerosis Burden in Mouse Aorta and Aortic Root. <i>Methods in Molecular Biology</i> , 2015 , 1339, 85-99	1.4	55
130	Telomere Length as Cardiovascular Aging Biomarker: JACC Review Topic of the Week. <i>Journal of the American College of Cardiology</i> , 2018 , 72, 805-813	15.1	53
129	Nuclear envelope lamin-A couples actin dynamics with immunological synapse architecture and T cell activation. <i>Science Signaling</i> , 2014 , 7, ra37	8.8	52
128	Coordinate control of proliferation and migration by the p27Kip1/cyclin-dependent kinase/retinoblastoma pathway in vascular smooth muscle cells and fibroblasts. <i>Circulation Research</i> , 2003 , 92, 402-10	15.7	52
127	Selective inactivation of p27(Kip1) in hematopoietic progenitor cells increases neointimal macrophage proliferation and accelerates atherosclerosis. <i>Blood</i> , 2004 , 103, 158-61	2.2	50
126	A Novel Systems-Biology Algorithm for the Analysis of Coordinated Protein Responses Using Quantitative Proteomics. <i>Molecular and Cellular Proteomics</i> , 2016 , 15, 1740-60	7.6	48
125	Progerin accelerates atherosclerosis by inducing endoplasmic reticulum stress in vascular smooth muscle cells. <i>EMBO Molecular Medicine</i> , 2019 , 11,	12	47

(2003-2000)

Age-dependent increase in c-ros activity and cyclin A expression in vascular smooth muscle cells. A potential link between aging, smooth muscle cell proliferation and atherosclerosis. <i>Cardiovascular Research</i> , 2000 , 45, 1026-34	9.9	38	
Endothelial Jag1-RBPJ signalling promotes inflammatory leucocyte recruitment and atherosclerosis. <i>Cardiovascular Research</i> , 2016 , 112, 568-580	9.9	38	
ApoA-I/HDL-C levels are inversely associated with abdominal aortic aneurysm progression. <i>Thrombosis and Haemostasis</i> , 2015 , 113, 1335-46	7	35	
Increased p53 gene dosage reduces neointimal thickening induced by mechanical injury but has no effect on native atherosclerosis. <i>Cardiovascular Research</i> , 2007 , 75, 803-12	9.9	35	
Cardiac electrical defects in progeroid mice and Hutchinson-Gilford progeria syndrome patients with nuclear lamina alterations. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2016 , 113, E7250-E7259	11.5	34	
Animal models of atherosclerosis. <i>Progress in Molecular Biology and Translational Science</i> , 2012 , 105, 1-23	4	34	
Regulation of Gax homeobox gene transcription by a combination of positive factors including myocyte-specific enhancer factor 2. <i>Molecular and Cellular Biology</i> , 1995 , 15, 4272-81	4.8	34	
Proteomics Research in Cardiovascular Medicine and Biomarker Discovery. <i>Journal of the American College of Cardiology</i> , 2016 , 68, 2819-2830	15.1	34	
Control of vascular smooth muscle cell growth and its implication in atherosclerosis and restenosis (review). <i>International Journal of Molecular Medicine</i> , 1998 , 2, 81-9	4.4	31	
A-type lamins and cardiovascular disease in premature aging syndromes. <i>Current Opinion in Cell Biology</i> , 2017 , 46, 17-25	9	30	
A major role for RCAN1 in atherosclerosis progression. <i>EMBO Molecular Medicine</i> , 2013 , 5, 1901-17	12	30	
A-type lamins and Hutchinson-Gilford progeria syndrome: pathogenesis and therapy. <i>Frontiers in Bioscience - Scholar</i> , 2011 , 3, 1133-46	2.4	30	
Aryl hydrocarbon receptor contributes to the MEK/ERK-dependent maintenance of the immature state of human dendritic cells. <i>Blood</i> , 2013 , 121, e108-17	2.2	29	
Regulation of muscle phosphofructokinase by physiological concentrations of bisphosphorylated hexoses: effect of alkalinization. <i>Biochemical and Biophysical Research Communications</i> , 1990 , 172, 328-	-3 4 ·4	28	
Embryonic expression of the Gax homeodomain protein in cardiac, smooth, and skeletal muscle. <i>Circulation Research</i> , 1997 , 80, 452-62	15.7	28	
Generation and characterization of a novel knockin minipig model of Hutchinson-Gilford progeria syndrome. <i>Cell Discovery</i> , 2019 , 5, 16	22.3	27	
Tumor suppressor p27(Kip1) undergoes endolysosomal degradation through its interaction with sorting nexin 6. <i>FASEB Journal</i> , 2010 , 24, 2998-3009	0.9	27	
Antiproliferative strategies for the treatment of vascular proliferative disease. <i>Current Vascular Pharmacology</i> , 2003 , 1, 85-98	3.3	27	
	potential link between aging, smooth muscle cell proliferation and atherosclerosis. <i>Cardiovascular Research</i> , 2000, 45, 1026-34 ApoA-I/HDL-C levels are inversely associated with abdominal aortic aneurysm progression. <i>Thrombosis and Haemostasis</i> , 2015, 113, 1335-46 Increased p53 gene dosage reduces neointimal thickening induced by mechanical injury but has no effect on native atherosclerosis. <i>Cardiovascular Research</i> , 2007, 75, 803-12 Cardiac electrical defects in progeroid mice and Hutchinson-Gilford progeria syndrome patients with nuclear lamina alterations. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2016, 113, E7250-E7259 Animal models of atherosclerosis. <i>Pragress in Molecular Biology and Translational Science</i> , 2012, 105, 1-23 Regulation of Gax homeobox gene transcription by a combination of positive factors including myocyte-specific enhancer factor 2. <i>Molecular and Cellular Biology</i> , 1995, 15, 4272-81 Proteomics Research in Cardiovascular Medicine and Biomarker Discovery. <i>Journal of the American College of Cardiology</i> , 2016, 68, 2819-2830 Control of vascular smooth muscle cell growth and its implication in atherosclerosis and restenosis (review). <i>International Journal of Molecular Medicine</i> , 1998, 2, 81-9 A-type lamins and cardiovascular disease in premature aging syndromes. <i>Current Opinion in Cell Biology</i> , 2017, 46, 17-25 A major role for RCAN1 in atherosclerosis progression. <i>EMBO Molecular Medicine</i> , 2013, 5, 1901-17 A-type lamins and Hutchinson-Gilford progeria syndrome: pathogenesis and therapy. <i>Frontiers in Bioscience - Scholar</i> , 2011, 3, 1133-46 Aryl hydrocarbon receptor contributes to the MEK/ERK-dependent maintenance of the immature state of human dendritic cells. <i>Blood</i> , 2013, 121, e108-17 Regulation of muscle phosphofructokinase by physiological concentrations of bisphosphorylated hexoses: effect of alkalinization. <i>Biochemical and Biophysical Research</i> Communications, 1990, 172, 328 Embryonic expression of the Gax homeodomain prote	potential link between aging, smooth muscle cell proliferation and atherosclerosis. Cardiovascular Research, 2000, 45, 1026-34 Endothelial Jag1-RBP J signalling promotes inflammatory leucocyte recruitment and atherosclerosis. Cardiovascular Research, 2016, 112, 568-580 ApoA-I/HDL-C levels are inversely associated with abdominal aortic aneurysm progression. Thrombosis and Haemostasis, 2015, 113, 1335-46 ApoA-I/HDL-C levels are inversely associated with abdominal aortic aneurysm progression. Thrombosis and Haemostasis, 2015, 113, 1335-46 ApoA-I/HDL-C levels are inversely associated with abdominal aortic aneurysm progression. Thrombosis and Haemostasis, 2015, 113, 1335-46 ApoA-I/HDL-C levels are inversely associated with abdominal aortic aneurysm progression. Thrombosis and Haemostasis, 2015, 113, 1335-46 Aritic and the search of the Interest and Endough and Translational Science, 2012, 105, 1-23 Animal models of atherosclerosis. Progress in Molecular Biology and Translational Science, 2012, 105, 1-23 Regulation of Gax homeobox gene transcription by a combination of positive factors including myocyte-specific enhancer factor 2. Molecular and Cellular Biology, 1995, 15, 4272-81 Proteomics Research in Cardiovascular Medicine and Biomarker Discovery. Journal of the American College of Cardiology, 2016, 68, 2819-2830 Control of vascular smooth muscle cell growth and its implication in atherosclerosis and restenosis (review). International Journal of Molecular Medicine, 1998, 2, 81-9 A-type lamins and cardiovascular disease in premature aging syndromes. Current Opinion in Cell Biology, 2017, 46, 17-25 A major role for RCAN1 in atherosclerosis progression. EMBO Molecular Medicine, 2013, 5, 1901-17 A-type lamins and Hutchinson-Gilford progeria syndrome: pathogenesis and therapy. Frontiers in Bioscience - Scholar, 2011, 3, 1133-46 Aryl hydrocarbon receptor contributes to the MEK/ERK-dependent maintenance of the immature state of human dendritic cells.
