ΜΙ-ΗΥΠΝ ΟΗΟΙ

#	Article	IF	CITATIONS
1	Changes in cognitive characteristics according to 3 intensity changes by 8 vibration frequencies (STROBE). Medicine (United States), 2021, 100, e24770.	1.0	2
2	Effect of Childbirth Experience on Cognitive Performance and Event-Related Potential Patterns. Applied Sciences (Switzerland), 2021, 11, 3233.	2.5	0
3	Effective Connectivity Analysis of Brain Activated Regions during Distracted Driving. Brain Sciences, 2021, 11, 690.	2.3	1
4	Development of a Tactile Actuator with Non-Contact and Trans-Object Characteristics Using a Time-Varying Magnetic Field. Actuators, 2021, 10, 106.	2.3	1
5	Mid-Air Tactile Sensations Evoked by Laser-Induced Plasma: A Neurophysiological Study. Frontiers in Neuroscience, 2021, 15, 733423.	2.8	0
6	Evaluation of Effective Connectivity Between Brain Areas Activated During Simulated Driving Using Dynamic Causal Modeling. Frontiers in Behavioral Neuroscience, 2020, 14, 158.	2.0	3
7	A STUDY ON SOMATOSENSORY EVOKED POTENTIAL PATTERNS ACCORDING TO VARIOUS VIBROTACTILE STIMULATION: FREQUENCIES AND INTENSITIES. Journal of Mechanics in Medicine and Biology, 2020, 20, 2040015.	0.7	1
8	A study on age- and gender-dependent differences in distance and angle between the internal carotid artery and basilar artery. Technology and Health Care, 2020, 28, 321-326.	1.2	0
9	Development of an fMRI-compatible driving simulator with simultaneous measurement of physiological and kinematic signals: The multi-biosignal measurement system for driving (MMSD). Technology and Health Care, 2020, 28, 335-345.	1.2	7
10	A study on cognitive experience in response to vibrational stimuli of various frequencies at different intensities. Neuroscience Letters, 2019, 713, 134519.	2.1	4
11	BOLD Signal Change during Driving with Addition Task using fMRI. , 2019, , .		1
12	Development of a puff- and suction-type pressure stimulator for human tactile studies. Behavior Research Methods, 2018, 50, 703-710.	4.0	2
13	Increase in brain activation due to sub-tasks during driving: fMRI study using new MR-compatible driving simulator. Journal of Physiological Anthropology, 2017, 36, 11.	2.6	22
14	Determination of Trace Metal Levels in the General Population of Korea. International Journal of Environmental Research and Public Health, 2017, 14, 702.	2.6	41
15	Primary and secondary gait deviations of stroke survivors and their association with gait performance. Journal of Physical Therapy Science, 2016, 28, 2634-2640.	0.6	12
16	Differences in and correlations between cognitive abilities and brain volumes in healthy control, mild cognitive impairment, and Alzheimer disease groups. Clinical Anatomy, 2016, 29, 473-480.	2.7	3
17	Differences in cognitive ability and hippocampal volume between Alzheimer's disease, amnestic mild cognitive impairment, and healthy control groups, and their correlation. Neuroscience Letters, 2016, 620, 115-120.	2.1	15
18	Somatotopic Map and Inter- and Intra-Digit Distance in Brodmann Area 2 by Pressure Stimulation. Scientific Reports, 2016, 6, 30243.	3.3	0

Мі-Нуим Сної

#	Article	IF	CITATIONS
19	Inter- and Intradigit Somatotopic Map of High-Frequency Vibration Stimulations in Human Primary Somatosensory Cortex. Medicine (United States), 2016, 95, e3714.	1.0	4
20	Extraction and Analysis of Risk Elements for Korean Homecare Patients with Senile Dementia. Journal of Behavioral Health Services and Research, 2016, 43, 116-126.	1.4	6
21	Differences in Activation Area Within Brodmann Area 2 Caused by Pressure Stimuli on Fingers and Joints. Medicine (United States), 2015, 94, e1657.	1.0	5
22	Change of neuronal activations induced by the passive perception of driving speed difference. Bio-Medical Materials and Engineering, 2015, 26, S833-S840.	0.6	1
23	Evaluation of the possibility and response characteristics of laser-induced tactile sensation. Neuroscience Letters, 2015, 602, 68-72.	2.1	16
24	Differing ERP patterns caused by suction and puff stimuli. Neuroscience Letters, 2015, 594, 70-75.	2.1	0
25	2C1-3 Real-life accident factors for elderly patients with dementia. Ningen Kogaku = the Japanese Journal of Ergonomics, 2015, 51, S462-S464.	0.1	0
26	Development of a simultaneous vibration and pressure stimulation system for cognitive studies. Bio-Medical Materials and Engineering, 2014, 24, 3619-3627.	0.6	3
27	Effects of distraction task on driving: A functional magnetic resonance imaging study. Bio-Medical Materials and Engineering, 2014, 24, 2971-2977.	0.6	8
28	Correlation between cognitive ability measured by response time of 1â€back task and changes of SpO ₂ by supplying three different levels of oxygen in the elderly. Geriatrics and Gerontology International, 2013, 13, 384-387.	1.5	10
29	Effects of three levels of arousal on 3-back working memory task performance. Cognitive Neuroscience, 2013, 4, 1-6.	1.4	18
30	1G-35 Changes of driving performance and skin conductance level of experienced taxi drivers due to distraction tasks. Ningen Kogaku = the Japanese Journal of Ergonomics, 2013, 49, S556-S558.	0.1	1
31	Effects of oxygen concentration and flow rate on cognitive ability and physiological responses in the elderly. Neural Regeneration Research, 2013, 8, 264-9.	3.0	2
32	Effects of gender and age on anterior commissure volume. Neuroscience Letters, 2011, 500, 92-94.	2.1	54
33	An analysis of the correlation between young males' personal aggression and their skin conductance levels during exposure to aggression images. Psychiatry Research, 2011, 186, 441-442.	3.3	8
34	Activation of the limbic system under 30% oxygen during a visuospatial task: An fMRI study. Neuroscience Letters, 2010, 471, 70-73.	2.1	13
35	Difference between smokers and non-smokers in the corpus callosum volume. Neuroscience Letters, 2010, 485, 71-73.	2.1	7
36	Long-term study of simulator sickness: Differences in psychophysiological responses due to individual sensitivity. , 2009, , .		8
