

Danielle R Miller

List of Publications by Citations

Source: <https://exaly.com/author-pdf/2462252/danielle-r-miller-publications-by-citations.pdf>

Version: 2024-04-26

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
21	The nature of white matter abnormalities in blast-related mild traumatic brain injury. <i>NeuroImage: Clinical</i> , 2015 , 8, 148-56	5.3	58
20	White matter abnormalities are associated with chronic postconcussion symptoms in blast-related mild traumatic brain injury. <i>Human Brain Mapping</i> , 2016 , 37, 220-9	5.9	50
19	Default Mode Network Subsystems are Differentially Disrupted in Posttraumatic Stress Disorder. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2017 , 2, 363-371	3.4	47
18	Automated measurement of hippocampal subfields in PTSD: Evidence for smaller dentate gyrus volume. <i>Journal of Psychiatric Research</i> , 2017 , 95, 247-252	5.2	36
17	Altered white matter microstructural organization in posttraumatic stress disorder across 3047 adults: results from the PGC-ENIGMA PTSD consortium. <i>Molecular Psychiatry</i> , 2021 , 26, 4315-4330	15.1	33
16	Neuroimaging of deployment-associated traumatic brain injury (TBI) with a focus on mild TBI (mTBI) since 2009. <i>Brain Injury</i> , 2017 , 31, 1204-1219	2.1	27
15	The goddess who spins the thread of life: Klotho, psychiatric stress, and accelerated aging. <i>Brain, Behavior, and Immunity</i> , 2019 , 80, 193-203	16.6	21
14	Contributions of polygenic risk for obesity to PTSD-related metabolic syndrome and cortical thickness. <i>Brain, Behavior, and Immunity</i> , 2017 , 65, 328-336	16.6	20
13	White matter abnormalities are associated with overall cognitive status in blast-related mTBI. <i>Brain Imaging and Behavior</i> , 2017 , 11, 1129-1138	4.1	18
12	Posttraumatic stress disorder symptom severity is associated with reduced default mode network connectivity in individuals with elevated genetic risk for psychopathology. <i>Depression and Anxiety</i> , 2017 , 34, 632-640	8.4	16
11	Behavioral and neural correlates of memory suppression in PTSD. <i>Journal of Psychiatric Research</i> , 2019 , 112, 30-37	5.2	16
10	Functional Brain Alterations Associated With Cognitive Control in Blast-Related Mild Traumatic Brain Injury. <i>Journal of the International Neuropsychological Society</i> , 2018 , 24, 662-672	3.1	16
9	A Cerebrovascular Hypothesis of Neurodegeneration in mTBI. <i>Journal of Head Trauma Rehabilitation</i> , 2019 , 34, E18-E27	3	14
8	Close-Range Blast Exposure Is Associated with Altered White Matter Integrity in Apolipoprotein e4 Carriers. <i>Journal of Neurotrauma</i> , 2019 , 36, 3264-3273	5.4	10
7	Coordinating Global Multi-Site Studies of Military-Relevant Traumatic Brain Injury: Opportunities, Challenges, and Harmonization Guidelines. <i>Brain Imaging and Behavior</i> , 2021 , 15, 585-613	4.1	4
6	The PPM1F gene moderates the association between PTSD and cortical thickness. <i>Journal of Affective Disorders</i> , 2019 , 259, 201-209	6.6	3
5	Cerebral perfusion is associated with blast exposure in military personnel without moderate or severe TBI. <i>Journal of Cerebral Blood Flow and Metabolism</i> , 2021 , 41, 886-900	7.3	3

4	Trauma and posttraumatic stress disorder modulate polygenic predictors of hippocampal and amygdala volume.. <i>Translational Psychiatry</i> , 2021 , 11, 637	8.6	1
3	Apolipoprotein E (APOE) ϵ moderates the relationship between c-reactive protein, cognitive functioning, and white matter integrity. <i>Brain, Behavior, and Immunity</i> , 2021 , 95, 84-95	16.6	1
2	Apolipoprotein E (ϵ) Status Moderates the Relationship Between Close-Range Blast Exposure and Cognitive Functioning. <i>Journal of the International Neuropsychological Society</i> , 2021 , 27, 315-328	3.1	1
1	Interpersonal early life trauma is associated with increased cerebral perfusion and poorer memory performance in post-9/11 veterans. <i>NeuroImage: Clinical</i> , 2020 , 28, 102365	5.3
