|---|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1 | Construction of magnetically separable NiAl LDH/Fe <sub>3</sub> O <sub>4</sub> @RGO nanocomposites with enhanced photocatalytic performance under visible light. Physical Chemistry Chemical Physics, 2018, 20, 414-421.                                                          | 2.8 | 94        |
| 2 | One-step hydrothermal synthesis of peony-like Ag/Bi <sub>2</sub> WO <sub>6</sub> as efficient visible light-driven photocatalyst toward organic pollutants degradation. Journal of Materials Science, 2018, 53, 4848-4860.                                                        | 3.7 | 36        |
| 3 | Fabrication of ZnAl mixed metal-oxides/RGO nanohybrid composites with enhanced photocatalytic activity under visible light. Applied Surface Science, 2018, 441, 599-606.                                                                                                          | 6.1 | 29        |
| 4 | Construction of 3D marigold-like Bi <sub>2</sub> WO <sub>6</sub> /Ag <sub>2</sub> O/CQDs heterostructure with superior visible-light active photocatalytic activity toward tetracycline degradation and selective oxidation. Journal of Materials Science, 2018, 53, 12040-12055. | 3.7 | 12        |
